

Key investor information for investors in Switzerland

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Xtrackers Future Mobility UCITS ETF

Share class: 1C, ISIN: IE00BGV5VR99, Security code: A2N6LL, Currency: USD

a sub-fund of Xtrackers (IE) plc. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. The aim is for your investment to track the performance before fees and expenses of the Nasdaq Yewno Global Future Mobility Index (index). The index is designed to reflect the performance of the shares of companies from global developed and emerging markets that have material exposure to themes related to future mobility. Nasdaq, along with Yewno Inc, apply a screening and analysis process to identify index constituents. This process includes but is not limited to, analysing patent data, market size, trading volume, market listing and foreign ownership restrictions. Scores are allocated to potential constituents and up to 100 companies that meet the rules are selected for inclusion in the index. The index is calculated on a total return net basis. This means that all dividends and distributions by the companies are reinvested in the shares after tax. The index is

reviewed and rebalanced semi-annually and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions. The index is calculated in US Dollars on a daily basis. To achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying all or a substantial number of the securities in the index. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of derivatives. The fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the fund. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the fund's performance to be substantially different from the performance of the index. DWS entities and related companies may act in several roles in relation to the fund such as distributor

and management company which may involve conflicts of interest. The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events. The fund has a focus on a single or narrow range of industry, sector or types of companies and performance may not reflect a rise in broader markets. The fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks than well developed economies. Political unrest and economic downturn may be more likely and will affect the value of your investment. The fund follows a rules-based strategy which will deviate from how the overall market or parent index performs. Your investment is likely to be less diversified and there is no guarantee that the index's 'rules-based' strategy will be achieved. The fund may use derivatives to try to manage its investments more efficiently. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investment.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

| | |
|---|--------|
| One-off charges taken before or after you invest | |
| Entry charge | None |
| Exit charge | None |
| This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge). | |
| Charges taken from the fund over a year | |
| Ongoing charges | 0.35 % |
| Charges taken from the fund under certain specific conditions | |
| Performance fee | None |
| Securities lending fees | 0.00 % |

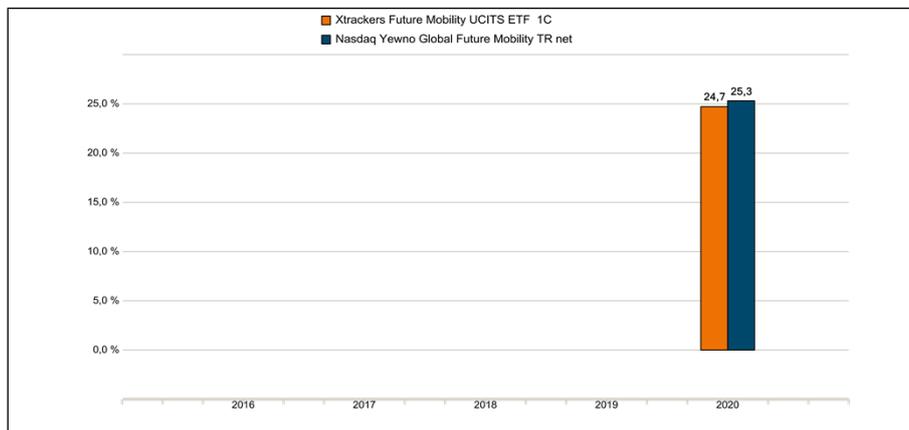

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges figure is based on expenses for the fiscal year ending 31.12.2020. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

To the extent the fund undertakes securities lending to generate revenue, the fund will ultimately be allocated 70% of the associated revenue, the securities lending agent, which will be a DWS entity or other Deutsche Bank entity, will be allocated 15% and the remaining 15% will be allocated to the DWS entity which monitors such activities, as set out in the prospectus. As securities lending revenue sharing does not increase the costs of running the fund, this has been excluded from the ongoing charges.

Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the 1C share class of Xtrackers Future Mobility UCITS ETF were deducted during the calculation. The 1C share class of Xtrackers Future Mobility UCITS ETF was launched in 2019.

Practical information

The depositary is State Street Custodial Services (Ireland) Limited, Ireland. Copies of the prospectus and the periodic reports are available free of charge in the language of this document.
