

Xtrackers FTSE 100 Equal Weight UCITS ETF 1D

a sub fund of Xtrackers (IE) Plc.

Xtrackers ETFs - Deutsche AM Exchange Traded Funds

Xtrackers is the brand name for the exchange-traded funds (ETF) managed by Deutsche Asset Management. ETFs are regulated, open-ended investment funds that trade on stock exchanges just like any other listed, tradable security. They combine in a single, easy to use product the key intraday trading and liquidity elements of stocks with the diversification offered by an index fund. Since launch in 2007, Xtrackers has grown rapidly. It now has around GBP 61.64 bn in assets under management (as of February, 2018) across more than 150 products, making Xtrackers one of the largest ETF provider in Europe and amongst the top providers globally.

Reporting Fund	Yes

* ETF invests in all or in a representative sample of securities of the underlying index.

¹ Please see page 2 in this document for more details of All-in fee.

Key Risks

- The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.
- The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events.
- The Fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets.
- The Fund follows a rules-based strategy which will deviate from the overall market or parent index. Your investment is likely to be less diversified and there is no guarantee that the index's 'rules-based' strategy will be achieved.

FTSE 100 Semi-Annual Equally Weighted Index

The FTSE 100 Semi Annual Equal Weighted Index (Index) reflects the performance of large UK listed companies that are constituents of the FTSE 100 Index with each company in the Index being allocated a fixed weight of 1% at times of rebalancing. The Index contains shares of large sized publicly held companies actively traded on the London Stock Exchange. The Index is calculated on a total return net basis which means that all dividends and distributions made by the companies comprised in the Index are reinvested in the shares after tax. The Index is reviewed and rebalanced semi-annually, to coincide with the June and December adjustments of the FTSE 100 Index. The constituents of the Index may differ from the constituents of the FTSE 100 Index as a consequence of differences in the rebalancing cycle.

Clarification of All-In Fee

Investors should be aware that in addition to the All-In Fee, other factors may negatively impact the performance of their investment relative to the underlying index. Examples include: Brokerage and other transaction costs, Financial Transaction Taxes or Stamp Duties as well as potential differences in taxation of either capital gains or dividends assumed in the relevant underlying index, and actual taxation of either capital gains or dividends in the fund. The precise impact of these costs cannot be estimated reliably in advance as it depends on a variety of non-static factors. Investors are encouraged to consult the audited annual- and un-audited semi-annual reports for details.

Key Risk Factors

An investment in an Xtrackers ETF may not be suitable for all investors. Past performance is not a reliable indicator of future results. Investments in funds involve numerous risks including, among others, general market risks, credit risks, foreign exchange risks, interest rate risks and liquidity risks. As such, the value of an investment in an Xtrackers ETF may go down as well as up and can result in losses, up and including a total loss of the amount initially invested.

Investors should be aware that Deutsche Asset Management (UK) Limited, any of its parents or any of its or its parents subsidiaries or affiliates (together referred to as Deutsche Asset Management) may from time to time own interests in the Fund which may represent a significant amount or proportion of the overall investor holdings in the Fund. Investors should consider what possible impact such holdings, or any disposal thereof, may have on them.
