

**Key investor information**

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**Xtrackers USD Corporate Bond UCITS ETF**

**Share class: 2D - EUR Hedged, ISIN: IE00BZ036J45, Security code: A14XH4, Currency: EUR**

a sub-fund of Xtrackers (IE) plc. The management company is DWS Investment S.A., a member of the DWS Group.

**Objectives and investment policy**

The fund is passively managed. The aim is for your investment to reflect the performance of the Bloomberg Barclays USD Liquid Investment Grade Corporate Index (index), while seeking to minimise foreign currency fluctuations at share class level. The index is designed to reflect the performance of fixed-interest tradable debt (bonds) which are investments that pay out a fixed level of income or interest. The bonds are issued by financial, utility or industrial US and non-US companies that meet specific maturity, credit rating and liquidity requirements. Bonds are only eligible for inclusion in the index if they meet certain pre-determined standards. They must also be rated as "investment grade", meaning they have been judged by an independent agency as likely to meet their payment obligations. The index is calculated on a total return basis. This means that all interest payments received from bonds are reinvested in the index. The index is reviewed and rebalanced

monthly. To achieve the aim, the fund will i) attempt to replicate the index, before fees and expenses, by buying a portfolio of securities that may comprise the constituents of the index or other unrelated investments as determined by DWS entities and ii) enter into financial contracts (derivatives) which attempt to reduce the effect of exchange rate fluctuations between the currency of the index components and the currency of your shares. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of derivatives. The fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the fund. The currency of the fund is USD. The fund distributes up to four times per annum. You may request the redemption of shares generally on a daily basis.

**Risk and reward profile**

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 4 because its share price fluctuates and the likelihood of both losses and gains may therefore be relatively high. The following risks could be of particular significance for the fund: The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may

cause the fund's performance to be substantially different from the performance of the index. DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The fund may invest in bonds which are exposed to credit risk and interest rate risk. Credit risk means that there is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. Interest rate risk means that if interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment. The fund may use derivatives to i) try to manage its investments more efficiently; and ii) try to reduce movements in currency exchange rates between the currency of the fund's assets and the currency of the fund's shares. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investment.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

**Charges**

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
<b>Entry charge</b>	None
<b>Exit charge</b>	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
<b>Ongoing charges</b>	0.21 %
Charges taken from the fund under certain specific conditions	
<b>Performance fee</b>	None
<b>Securities lending fees</b>	0.00 %

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges figure is based on expenses for the fiscal year ending 31.12.2020. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

To the extent the fund undertakes securities lending to generate revenue, the fund will ultimately be allocated 70% of the associated revenue, the securities lending agent, which will be a DWS entity or other Deutsche Bank entity, will be allocated 15% and the remaining 15% will be allocated to the DWS entity which monitors such activities, as set out in the prospectus. As securities lending revenue sharing does not increase the costs of running the fund, this has been excluded from the ongoing charges.

## Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the 2D - EUR Hedged share class of Xtrackers USD Corporate Bond UCITS ETF were deducted during the calculation. The 2D - EUR Hedged share class of Xtrackers USD Corporate Bond UCITS ETF was launched in 2016.

— As of 17 May 2018 the share class changed its benchmark index to Bloomberg Barclays USD Liquid Investment Grade Corporate Index. The investment objectives of the share class are unchanged and it continues to hedge currency risk. Prior to that date the share class benchmark was the Bloomberg Barclays USD Liquid Investment Grade Corporate Index 100% Hedged to EUR Index. The index performance shown for 2018 is based solely on the performance of the Bloomberg Barclays USD Liquid Investment Grade Corporate Index.
