Should the Board of Directors decide to provide for such possibility, the Luxembourg Prospectus will be updated prior to the entry into force of such decision in order for the Company to comply with the relevant disclosure requirements of the SFTR Regulation for the Sub-Fund. ○ The Sub-Fund may not hold every constituent or the exact weighting of a constituent in the Reference Index but instead may seek to gain exposure to the Reference Index by using optimisation techniques and/or by investing in securities that are not part of the Reference Index. ○ The Sub-Fund shall not engage in securities lending transactions except where such securities lending transaction is carried out solely for the purpose of efficient portfolio management and does not amount to more than 50% of the net asset value of the Sub-Fund. ○ As at the date of this PHS, the Sub-Fund is not expected to participate in any repurchase transactions. ○ Subject to the Regulations 2018 and the Notices and/or subject to the extent allowed by the Monetary Authority of Singapore, you should note that the Sub-Fund may invest, as a part of its investment policy and for the purposes of hedging, efficient portfolio management and/or optimising returns, in financial derivative instruments such as swap transaction(s). Liquidity Risks	
<ul style="list-style-type: none"> Most of the trading activity for shares of Class 1C in Singapore is expected to occur on the SGX-ST. The secondary market may be illiquid – The Sub-Fund shall ensure that at least one Designated Market Maker(s) is appointed at all times to provide for an adequately liquid market for the Singapore Shares on the SGX-ST. The obligations of the Designated Market Maker(s) include quoting, on a continuous basis or in such manner as SGX-ST prescribes, bid prices to potential sellers and offer prices to potential buyers for the Singapore Shares on the SGX-ST. Fluctuations in exchange rates may affect the value of the Shares. You should also note that currencies of some emerging markets are controlled and there may be risks of limited liquidity in these markets.
