### Key Risks

The Fund invests in non-investment grade bonds which generally have a higher risk of default and are more susceptible to market fluctuations. This could adversely affect the value of your investment.

The Fund will use financial contracts (known as derivatives) to try to reduce the effect of currency fluctuations between the currency of its assets and the currency of the shares. This may not be effective and may prevent the Fund from benefitting from an increase in value of (or expose a Fund to the decrease in value of) a particular currency.

The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss. Bonds are exposed to credit risk and interest rate risk. There is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. If interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment.

The Fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks than well developed economies. Political unrest and economic downturn may be more likely and will affect the value of your investment.

The Fund follows a rules-based strategy which will deviate from the overall market or parent index. Your investment is likely to be less diversified and there is no guarantee that the index's 'rules-based' strategy will be achieved.

### Reference Index key features

The iBoxx MSCI ESG USD Emerging Markets Sovereigns Quality Weighted Index aims to reflect the performance of the following market:

- USD-denominated bonds issued by governments of Emerging countries
- Exposure across the whole yield curve (minimum time to maturity of 6 months)
- Minimum bond rating of B
- Minimum amount outstanding of USD 1 billion per bond

This index offers an alternative weighting approach, countries with favourable fundamental economic indicators and higher MSCI ESG Government Ratings will have higher representation in the index compared to countries with weaker economic fundamental indicators and lower MSCI ESG Government Ratings. Additional information on the Index and the general methodology behind the Markit iBoxx indices can be found on Markit iBoxx website ([www.markit.com](http://www.markit.com)).
