Objective and strategy

The fund seeks investment results that correspond generally to the performance, before fees and expenses, of the Nifty 500 Index (the "Underlying Index"). Nifty 500 Index measures the equity performance of the top 500 companies traded on the National Stock Exchange of India (the "NSE") based on full market capitalization that meet certain eligibility requirements. It includes representation from the large, mid and small-cap segments of the Indian equity markets. The Nifty 500 Index was created and is maintained by NSE Indices Limited ("NSEI" or the "Index Provider"). The MSCI Emerging Markets Index tracks the performance of stocks in select developing markets.

Performance quoted represents past performance and does not guarantee future results. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Shares are bought and sold at market price (closing price) not net asset value (NAV) and are not individually redeemed from the Fund. Market price returns are based on the midpoint of the bid/ask spread at 4:00 pm Eastern Time (when NAV is normally determined) and do not represent the return you would receive if you traded at other times. To obtain the most recent month-end performance data visit www.Xtrackers.com or call 1-844-851-4255.

Indexes are unmanaged; you cannot invest in an index. Index performance is gross of fees and assumes dividend reinvestment. Inclusion of fees would have reduced returns.

Risk: Investing involves risk, including the possible loss of principal. Stocks may decline in value. Funds investing in a single country generally are more volatile than more diversified funds. India is an emerging market country and exhibits significantly greater market volatility from time to time in comparison to more developed markets. Special risks associated with investing in Indian companies include less developed securities markets (which can lead to uncertainty and higher transaction costs), exposure to currency fluctuations, political and legal uncertainty, greater government control over the economy and the threat of conflict from persistent religious and border disputes. An investment in the fund should be considered only as a supplement to a complete investment program for those investors willing to accept the risks associated with the fund. Please read the prospectus for more information. This is not an offer to sell to residents or nationals of India.
