Objectives and investment policy

The fund is passively managed. **INVESTMENT OBJECTIVE:** The aim is for your investment to reflect the performance of the MSCI Europe Communication Services 20-35 Capped Index (index). **DESCRIPTION OF INDEX:** The index is based on the MSCI Europe Communication Services Index (Parent Index), which is designed to reflect the performance of shares in large and medium capitalisation companies across certain developed markets in Europe which are classified in the communication services sector as per the Global Industry Classification Standard®. The weight of the largest group entity in the index is capped at 31.5% and the weights of all other entities are capped at 18% at each quarterly index rebalancing. Where the largest group entity has exceeded 35% or any other entity has exceeded 20% in the lead up to each month-end, such entities will be rebalanced to 31.5% and 18% respectively. **INDEX REBALANCING, CALCULATION AND ADMINISTRATION:** The index is calculated on a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax. The index is reviewed and rebalanced on at least a quarterly basis. The index is calculated in Euros on a daily basis. **INVESTMENT POLICY:** To

achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying all or a substantial number of the securities in the index. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of derivatives. The fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the fund. **FURTHER INFORMATION:** Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 1 per cent. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 5 because its share price fluctuates comparatively strongly and the likelihood of both losses and gains is therefore relatively high. The following risks could be of particular significance for the fund: The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. **EXCEPTIONAL CIRCUMSTANCES RISK:** Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the fund's performance to be substantially different from the performance of the index.

CONFLICTS OF INTEREST RISK: DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. **NO GUARANTEE RISK:** The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. **SHARES RISK:** The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events. **RULES BASED INDEX RISK:** The index is rules-based and is not capable of being adjusted to take into account changing market circumstances. As a result you may be negatively affected by, or may not benefit from, the lack of such adjustments in changing market circumstances. The fund has a focus on a single or narrow range of industry, sector or types of companies and performance may not reflect a rise in broader markets. **DERIVATIVES RISK:** The fund may use derivatives for investment purposes and to try to manage its investments more efficiently. They may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investments. A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
