Xtrackers MSCI Global Social Fairness Contributors UCITS ETF

Share class: 1C, ISIN: IE000L2IS494, Security code: DBX0UT, Currency: USD

a sub-fund of Xtrackers (IE) plc. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. **INVESTMENT OBJECTIVE:** The aim is for your investment to track the performance before fees and expenses of the MSCI ACWI IMI SDG Social Fairness Select Index (index). **DESCRIPTION OF INDEX:** The index is based on the MSCI ACWI IMI Index (Parent Index) and is designed to reflect the performance of the shares of large, medium, and small-capitalisation companies globally that are associated with a positive contribution to United Nations Sustainable Development Goals which aim to ensure social fairness, including SDG: 1, 2, 4, 5, 8, and 10 (Social Fairness SDGs). In order to be eligible for inclusion, companies must be eligible for inclusion in the Parent Index and must pass the ESG screening criteria and either the SDG impact selection criteria or the SDG thematic selection criteria. **ESG CRITERIA:** The ESG screening criteria excludes companies from the Parent Index which breach certain ESG standards, as disclosed in the prospectus and/or supplement. The ESG Criteria comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 (PAB Exclusions). The SDG impact selection criteria identifies companies that contribute positively to the Social Fairness SDGs. Securities must meet a certain revenue threshold from associated business activities. The SDG thematic selection criteria identifies companies geared towards promoting growth, development, and safeguards of key stakeholders, relative to their sector peers. Securities are weighted by the product of their free float-adjusted market capitalisation and either their percentage revenue exposure from the Social Fairness SDGs aligned business activities or their

relevance score and are then scaled to 50% and 50% respectively. The index includes an issuer capping component, limiting the weight of each issuer to 4.5% at each quarterly rebalance. **INDEX REBALANCING, CALCULATION AND ADMINISTRATION:** The index is administered by MSCI Limited. The index is calculated on a total return net basis, which means that all dividends and distributions by the companies are reinvested in the shares after tax. The index is reviewed semi-annually and rebalanced at least quarterly. The index is calculated in USD on a daily basis. **INVESTMENT POLICY:** To achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying all or a substantial number of the securities in the index. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contracts (derivatives). **FURTHER INFORMATION:** Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 1 per cent. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 5 because its share price fluctuates comparatively strongly and the likelihood of both losses and gains is therefore relatively high. The following risks could be of particular significance for the fund: The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. **EXCEPTIONAL CIRCUMSTANCES RISK:** Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the fund's performance to be substantially different from the performance of the index. **CONFLICTS OF INTEREST RISK:** DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. **NO GUARANTEE RISK:** The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. **SHARES RISK:** The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector,

geographical region and political events. **EMERGING MARKETS RISK:** The fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks than well developed economies. **SECTOR CONCENTRATION RISK:** The fund has a focus on a single or narrow range of industry, sector or types of companies and performance may not reflect a rise in broader markets. **SUSTAINABILITY RISK:** The ESG screening and selection criteria are embedded within the index selection process, which seeks to exclude securities issued by companies involved in certain activities and identify companies which positively contribute to SDG 1, SDG 2, SDG 4, SDG 5, SDG 8, and SDG 10. The investment manager and sub-portfolio manager are not responsible for monitoring the screening or identification process or confirming that all securities which pass the screening or identification process are issued by companies with adequate ESG standards or SDG alignment. The company is relying on the activities conducted by and information provided by the administrator of the index and MSCI ESG Research LLC for the ESG screening and identification. ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the index administrator may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the index. **DERIVATIVES RISK:** The fund may use derivatives for investment purposes and to try to manage its investments more efficiently. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investments. A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
