Key Risks

The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss. The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events.

The Fund has a focus on a single or narrow range of industry, sector or types of companies and performance may not reflect a rise in broader markets.

The Fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks than well developed economies. Political unrest and economic downturn may be more likely and will affect the value of your investment.

The Fund invests in small and mid-capitalisation companies, which potentially involves greater risks compared to investing in large capitalisation companies. The shares may have less liquidity and could experience more price swings (or volatility) which could adversely affect the value of your investment.

The Fund is exposed to the currency markets which may be highly volatile. Large price swings can occur in such markets within very short periods and may result in your investment suffering a loss.

The following is applicable if you subscribe for or settle shares in a different currency than the fund or share-class currency: Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies.
