

Xtrackers Low Beta High Yield Bond ETF

Q4 | 12.31.25

Ticker: HYDW

Xtrackers
by // DWS

Objective and strategy

Xtrackers Low Beta High Yield Bond ETF seeks investment results that correspond generally to the performance, before fees and expenses, of the Solactive USD High Yield Corporates Total Market Low Beta Index - a rules-based, market value weighted index engineered to mirror the performance of the lower yielding segment of the High Yield rated corporate bond market issued in U.S. This index targets the higher quality issuers within the high-yield universe with lower beta relative to the market. The Bloomberg U.S. Universal Index measures the performance of USD taxable bonds which are rated investment grade or high-yield.

ETF performance (12/31/25)

	3-months	1-year	3-year	5-year	10-year	Since ETF Inception
ETF (at NAV)	1.83%	8.39%	7.98%	3.57%	—	4.16%
Market price returns	1.64%	8.39%	7.88%	3.51%	—	4.15%
Solactive USD High Yield Corporates Total Market Low Beta Index	1.85%	8.57%	8.17%	3.68%	—	4.22%
Solactive USD High Yield Corporates Total Market Index	1.54%	8.62%	9.85%	4.24%	—	4.73%
Bloomberg U.S. Universal Bond Index	1.20%	7.58%	5.24%	0.06%	—	2.12%

Performance quoted represents past performance and does not guarantee future results. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Shares are bought and sold at market price (closing price) not net asset value (NAV) and are not individually redeemed from the Fund. Market price returns are based on the midpoint of the bid/ask spread at 4:00 pm Eastern Time (when NAV is normally determined) and do not represent the return you would receive if you traded at other times. To obtain the most recent month-end performance data visit www.Xtrackers.com or call 1-844-851-4255.

Indexes are unmanaged; you cannot invest in an index. Index performance is gross of fees and assumes dividend reinvestment. Inclusion of fees would have reduced returns.

ETF details (12/31/25)

NYSE ticker	HYDW
NAV ticker	HYDW.NV
Intraday ticker	HYDW.IV
Inception date	01/10/2018
Number of holdings	603

Holdings-based data is subject to change.

Credit quality⁵ (12/31/25)

¹ The unsubsidized yield reflects what the yield would have been had a fee and/or expense waiver not been in place during the period shown. Yields fluctuate and are not guaranteed. For current yield information, visit our website at www.dws.com or call (844) 851-4255. The SEC 30-day yield is the net investment income per share earned over the month ended (as of 12/31/25) shown as an annualized percentage of net asset value on that date. For current yield information, call 1-844-851-4255.

² Beta is a historical measurement of a fund's sensitivity to the movements of the fund's benchmark index. A fund with a beta greater than one is more volatile than the benchmark. A fund with a beta less than one is less volatile. Beta is based on a one-year period relative to the index.

³ Modified Duration to Worst is the measure of sensitivity of the price of a bond to a change in interest rates, assuming worst case scenario. Modified duration is the approximate percentage change in a bond's price for a 100 basis points change in yield, assuming that the bond's expected cash flow does not change when the yield changes.

⁴ Average coupon is the interest rate, expressed as an annual percentage of face value, which a bond issuer promises to pay until maturity.

⁵ Credit quality represents the highest rating of either Moody's Investors Service, Fitch Ratings or Standard & Poor's and is their opinion as to the quality of the securities they rate. Credit quality is measured on a scale that ranges from AAA (highest) to D (lowest). Credit quality does not remove market risk and is subject to change. Investments in lower-quality ("junk bonds") and non-rated securities present greater risk of loss than investments in higher-quality securities.

The brand Xtrackers represents all systematic investment solutions. Xtrackers ETFs ("ETFs") are managed by DBX Advisors LLC (the "Adviser"), and distributed by ALPS Distributors, Inc. ("ALPS"). The Adviser is a subsidiary of DWS Group GmbH & Co. KGaA, and is not affiliated with ALPS. Shares are not individually redeemable, and owners of Shares may acquire those Shares from the Fund, or tender such Shares for redemption to the Fund, in Creation Units only. The brand DWS represents DWS Group GmbH & Co. KGaA and any of its subsidiaries such as DWS Distributors, Inc., which offers investment products, or DWS Investment Management Americas, Inc. and RREEF America L.L.C., which offer advisory services.

Carefully consider the fund's investment objectives, risk factors, and charges and expenses before investing. This and other information can be found in the fund's prospectus, which may be obtained by calling 1-844-851-4255, or by viewing or downloading a prospectus from www.Xtrackers.com. Read the prospectus carefully before investing.

War, terrorism, sanctions, economic uncertainty, trade disputes, public health crises and related geopolitical events have led and, in the future, may lead to significant disruptions in U.S. and world economies and markets, which may lead to increased market volatility and may have significant adverse effects on the fund and its investments.

Risk: Bond investments are subject to interest rate, credit, liquidity and market risks to varying degrees. When interest rates rise, bond prices generally fall. Credit risk refers to the ability of an issuer to make timely payments of principal and interest. Investing involves risk, including the possible loss of principal. Investments in lower-quality ("junk bonds") and non-rated securities present greater risk of loss than investments in higher-quality securities. Foreign investing involves greater and different risks than investing in U.S. companies, including currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards. Funds investing in a single industry (or group of industries), country or in a limited geographic region generally are more volatile than more diversified funds. Performance of the fund may diverge from that of the underlying index due to operating expenses, transaction costs, cash flows, use of sampling strategies or operational inefficiencies. An investment in this fund should be considered only as a supplement to a complete investment program for those investors willing to accept the risks associated with that fund. See the prospectus for details.
