Performance quoted represents past performance and does not guarantee future results. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Shares are bought and sold at market price (closing price) not net asset value (NAV) and are not individually redeemed from the Fund. Market price returns are based on the midpoint of the bid/ask spread at 4:00 pm Eastern Time (when NAV is normally determined) and do not represent the return you would receive if you traded at other times. To obtain the most recent month-end performance data visit www.Xtrackers.com or call 1-844-851-4255.

Indexes are unmanaged; you cannot invest in an index. Index performance is gross of fees and assumes dividend reinvestment. Inclusion of fees would have reduced returns.

Objective and strategy

Prior to 12/19/25, this fund was known as the Xtrackers S&P 500 Value Scored & Screened ETF. The fund's investment objective also changed at that time. The fund's ticker symbol changed from SNPV to XOEX. See the prospectus for details. The fund seeks investment results that correspond generally to the performance, before fees and expenses, of the S&P 100 Ex-Top 20 Select Index. The Xtrackers S&P 100 Ex Top 20 ETF (XOEX), using a "passive" or indexing investment approach, seeks investment results that correspond generally to the performance, before fees and expenses, of the S&P 100 Ex-Top 20 Select Index, that measures the performance of companies in the S&P 100, excluding the largest 20 companies, as ranked by free float market capitalization. The S&P 500 Index tracks the performance of 500 leading U.S. stocks and is widely considered representative of the U.S. equity market.

¹ Beta is a historical measurement of a fund's sensitivity to the movements of the fund's benchmark index. A fund with a beta greater than one is more volatile than the benchmark. A fund with a beta less than one is less volatile. Beta is based on a one-year period relative to the index.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The Morningstar Rating™ for funds, or 'star rating', is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed end funds and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10 year (if applicable) Morningstar Rating metrics. The weights are 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Carefully consider the fund's investment objectives, risk factors, and charges and expenses before investing. This and other information can be found in the fund's prospectus, which may be obtained by calling 1-844-851-4255, or by viewing or downloading a prospectus from www.Xtrackers.com. Read the prospectus carefully before investing.

War, terrorism, sanctions, economic uncertainty, trade disputes, public health crises and related geopolitical events have led and, in the future, may lead to significant disruptions in U.S. and world economies and markets, which may lead to increased market volatility and may have significant adverse effects on the fund and its investments.

Risk: Investing involves risk, including possible loss of principal. Stocks may decline in value. Bond investments are subject to interest-rate, credit, liquidity and market risks to varying degrees. When interest rates rise, bond prices generally fall. Foreign investing involves greater and different risks than investing in U.S. companies, including currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards. Emerging markets tend to be more volatile and less liquid than the markets of more mature economies, and generally have less diverse and less mature economic structures and less stable political systems than those of developed countries. Funds investing in a single industry, country or in a limited geographic region generally are more volatile than more diversified funds. Performance of a fund may diverge from that of an underlying index due to operating expenses, transaction costs, cash flows, use of sampling strategies or operational inefficiencies. There are additional risks associated with investing in high-yield bonds, aggressive growth stocks, non-diversified/concentrated funds and small-and mid-cap stocks which are more fully explained in the prospectuses, as applicable. An investment in any fund should be considered only as a supplement to a complete investment program for those investors willing to accept the risks associated with that fund. Please read the prospectus for more information.
