Xtrackers II ESG Global Aggregate Bond UCITS ETF

Share class: 1D, ISIN: LU0942970103, Security code: DBX0NV, Currency: USD

a sub-fund of Xtrackers II. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. **INVESTMENT OBJECTIVE:** The aim is for your investment to reflect the performance of the Bloomberg MSCI Global Aggregate Sustainable and SRI Currency Neutral Index (index). **DESCRIPTION OF INDEX:** The index reflects the performance of a broad-based measure of the global investment grade fixed-rate debt markets. The universe of eligible bonds which may be included in the index are all investible fixed rate, investment-grade debt securities which are rated investment grade (Baa3/BBB-/BBB- or higher) using the applicable rating of Moody's, Standard & Poor's and Fitch, after dropping the highest and lowest available ratings. The following criteria determine which bonds are included (i) amount outstanding/minimum issue size, (ii) quality, (iii) maturity, (iv) seniority/order of repayment of the debt, (v) taxability, (vi) coupon payments, (vii) eligible local currencies, (viii) market of issue, (ix) security type and (x) sector. **ESG CRITERIA:** Securities which fail to meet certain relevant environmental, social and governance (ESG) criteria, including: (i) issuers with an insufficient MSCI ESG Rating, (ii) companies that do not meet minimum requirements related to MSCI ESG Controversies, (iii) companies exceeding specific revenue thresholds from certain controversial activities, and (iv) companies with any involvement in controversial weapons, are excluded. The ESG Criteria comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818. **INDEX REBALANCING, CALCULATION AND ADMINISTRATION:** The index is administered by Bloomberg Index Services Limited. The

index is rebalanced on a monthly basis, at each month-end, with the selected bonds weighted according to their relative outstanding notional amount subject to certain adjustments to reflect certain segment weightings in the index in addition to the application of the ESG criteria. **INVESTMENT POLICY:** To achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying a portfolio of securities that may comprise the constituents of the index or other unrelated investments or other eligible assets (including to-be-announced (TBA) securities and mortgage-backed securities (MBS)) as determined by DWS entities. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of derivatives. The index is calculated on a total return basis which means that payments from coupons are reinvested in the index. **FURTHER INFORMATION:** Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 1 per cent. The currency of the fund is USD. The fund distributes up to four times per annum. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 4 because its share price fluctuates and the likelihood of both losses and gains may therefore be relatively high. The following risks could be of particular significance for the fund: The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. **EXCEPTIONAL CIRCUMSTANCES RISK:** Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the fund's performance to be substantially different from the performance of the index. **CONFLICTS OF INTEREST RISK:** DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. **NO GUARANTEE RISK:** The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. **CURRENCY RISK:** Fluctuations in interest rates of the currency of the shares, the index or other assets of the fund may affect the value of your investment. **BONDS RISK:** The index provides a notional exposure

to the value and/or return of certain bonds which may fall. Markets in these asset classes may at times become volatile or illiquid. This means that ordinary trading activity may occasionally be disrupted or impossible. The index may be affected. **SUSTAINABILITY RISK:** The environmental, social and governance screening criteria are embedded within the index selection process, which seeks to exclude bonds issued by issuers involved in certain activities. The investment manager and sub-portfolio managers are not responsible for monitoring the screening process or confirming that all bonds which pass the screening process are issued by issuers with adequate environmental, social and governance standards. The company is solely relying on the activities conducted by and information provided by the administrator of the index and MSCI ESG Research LLC for the ESG screening. ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the index administrator may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the index. **DERIVATIVES RISK:** The fund may use derivatives to try to manage its investments more efficiently. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investment. **CREDIT RISK & INTEREST RATE RISK:** The fund may invest in bonds which are exposed to credit risk and interest rate risk. Credit risk means that there is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. Interest rate risk means that if interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
