Xtrackers USA Biodiversity Focus SRI UCITS ETF

Share class: 1C, ISIN: IE000LOS2D0, Security code: DBX0UN, Currency: USD

a sub-fund of Xtrackers (IE) plc. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. **INVESTMENT OBJECTIVE:** The aim is for your investment to track the performance of the ISS STOXX® US Biodiversity Focus SRI Index (index). **DESCRIPTION OF INDEX:** The index is based on the STOXX US Index (Parent Index) and is designed to reflect the performance of the shares of large and medium capitalisation companies across developed markets globally. **ESG CRITERIA:** Securities from the Parent Index which do not meet certain ESG or biodiversity related criteria using ESG data from Institutional Shareholder Services Inc. (ISS ESG) are excluded. Securities are excluded if they breach revenue thresholds in certain activities with potential negative contribution to biodiversity. Securities from the Parent Index are ranked by ISS ESG's Potentially Disappeared Fraction over enterprise value including cash and the worst 20% of companies within each sector are excluded from the index, as well as securities with missing data. ISS ESG calculates an aggregated UN Sustainable Development Goals (SDG) Impact Rating score based on certain biodiversity-related SDGs and the worst 20% of companies within each sector in the Parent Index are excluded from the index. If following the above criteria, the Greenhouse Gas (GHG) intensity of the index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity up to a relevant reduction threshold. In addition, securities must also meet certain liquidity criteria to be eligible for inclusion in the index. **INDEX REBALANCING, CALCULATION AND ADMINISTRATION:**

The remaining securities are weighted by their free-float adjusted market capitalisation and are capped up to 8%, with individual and industry weight deviation limits applied. The index is administered by STOXX Ltd. The index is calculated on a total return net basis, which means that all dividends and distributions by the companies are reinvested in the shares after tax. The index is reviewed and rebalanced at least quarterly. The index is calculated in USD on a daily basis. **INVESTMENT POLICY:** To achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying all or a substantial number of the securities in the index. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contracts (derivatives). **FURTHER INFORMATION:** Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 1 per cent. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. **EXCEPTIONAL CIRCUMSTANCES RISK:** Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the fund's performance to be substantially different from the performance of the index. **CONFLICTS OF INTEREST RISK:** DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. **NO GUARANTEE RISK:** The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. **SHARES RISK:** The value of an investment in shares will depend on a number of factors

including, but not limited to, market and economic conditions, sector, geographical region and political events. **REGION CONCENTRATION RISK:** The fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets. **SUSTAINABILITY RISK:** The ESG screening and weighting criteria are embedded within the index selection process, which seeks to exclude securities issued by companies involved in certain activities and overweight securities issued by companies meeting certain standards. The investment manager and sub-portfolio manager are not responsible for monitoring the screening and weighting process or confirming that all securities which pass the screening process are issued by companies with adequate ESG standards. The company is relying on the activities conducted by and information provided by the administrator of the index for the ESG screening and weighting. ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the index administrator may incorrectly assess a security or issuer, resulting in the incorrect inclusion, exclusion or weighting of a security in the index. **DERIVATIVES RISK:** The fund may use derivatives for investment purposes and to try to manage its investments more efficiently. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investments.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
