## How did the fund perform last year and what affected its performance?

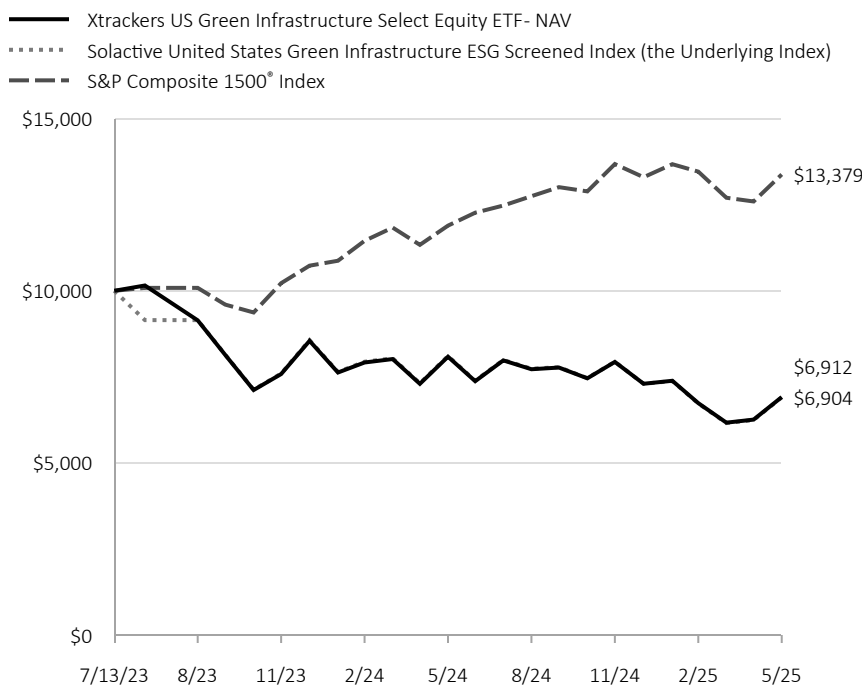

The Fund seeks investment results that correspond generally to the performance, before fees and expenses, of the Solactive United States Green Infrastructure ESG Screened Index (the Underlying Index). The Underlying Index is comprised of companies that have business exposure in the production, generation, or distribution of green energy or are engaged in the establishment of a sustainable infrastructure to enable the use of renewable energy and that fulfill certain sustainability criteria.

The Fund returned -14.51% for the period ended May 31, 2025. The Fund's underlying index returned -14.82% and the Fund's broad-based index the S&P Composite 1500<sup>®</sup> Index returned 12.49% during the same period.

Consumer Discretionary and Materials were the only sectors that contributed positively to performance. The Industrials, Utilities and Energy sectors detracted from the performance.

## Fund Performance

### Cumulative Growth of an Assumed \$10,000 Investment

Solactive United States Green Infrastructure ESG Screened Index is comprised of companies that have business exposure in the production, generation, or distribution of green energy or are engaged in the establishment of a sustainable infrastructure to enable the use of renewable energy and that fulfill certain sustainability criteria.

S&P Composite 1500<sup>®</sup> Index combines three leading indices, the S&P 500<sup>®</sup>, the S&P MidCap 400<sup>®</sup>, and the S&P SmallCap 600<sup>®</sup>, to cover approximately 90% of the U.S. market capitalization. It is designed for investors seeking to replicate the performance of the U.S. equity market or benchmark against a representative universe of tradeable stocks.

The S&P Composite 1500<sup>®</sup> Index is a required broad-based index that represents the Fund's overall equity market.

Index returns do not reflect any fees or expenses and it is not possible to invest directly into an index.

Performance shown is historical. The Fund's past performance is not a good predictor or guarantee of the Fund's future performance. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. The performance graph and returns table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the sale of Fund shares. Shares are bought and sold at market price (closing price) not net asset value (NAV) and are not individually redeemed from the Fund. The Fund will be sensitive to, and its performance will depend to a great extent on, the overall condition of green or low carbon infrastructure companies. These investments are considered to be speculative and are subject to greater risk of loss, greater sensitivity to interest rate and economic changes, valuation difficulties and potential illiquidity. The Fund will be sensitive to, and its performance will depend to a greater extent on, the overall condition of green or low carbon energy companies. Such companies face enhanced risks caused by factors including changes in government regulations, the impact of adverse weather conditions and on the demand for renewable energy production. Incorporation of ESG criteria in the Fund's investment strategy does not guarantee a return or protect against a loss, limits the types and number of investment opportunities available to the Fund and, as a result, the Fund may under perform other funds that do not have an ESG focus. Regulatory changes or interpretations regarding the definitions and/or use of ESG criteria could have a material adverse effect on the Fund's ability to invest in accordance with its investment policies and/or achieve its investment objective, as well as the ability of certain classes of investors to invest in funds following an ESG strategy such as the fund. Any fund that focuses in a particular segment of the market or region of the world will generally be more volatile than a fund that invests more broadly. This Fund is non-diversified and can take larger positions in fewer issues, increasing its potential risk. An investment in the Fund should be considered only as a supplement to a complete investment program for those investors willing to accept the risks associated with the Fund. Please read the prospectus for more information.
