Key Risks

Bonds are exposed to credit risk and interest rate risk. There is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. If interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment.

The Fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks than well developed economies. Political unrest and economic downturn may be more likely and will affect the value of your investment.

The following is applicable if you subscribe for or settle shares in a different currency than the fund or share-class currency: Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies.

The Fund is exposed to the currency markets which may be highly volatile. Large price swings can occur in such markets within very short periods and may result in your investment suffering a loss.

The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss.
