Objective and strategy

Xtrackers MSCI USA Climate Action Equity ETF (the "fund"), seeks investment results that correspond generally to the performance, before fees and expenses, of the MSCI USA Climate Action Index (the "Underlying Index"). The MSCI USA Climate Action Index is comprised of large and mid-capitalization companies in the United States that the Underlying Index's methodology assesses as leading their sector peers in taking action relating to a climate transition. The Underlying Index targets a coverage of 50% of the companies from each Global Industry Classification Standard ("GICS") sector in the MSCI USA Index (the "Parent Index"). The Underlying Index uses MSCI Impact Solutions, MSCI ESG Ratings, MSCI ESG Controversies, MSCI Business Involvement Screening Research and MSCI Climate Change Metrics (collectively, "MSCI ESG Research") to determine index components for the Underlying Index. The MSCI USA Index measures the performance of the large- and mid-cap segments of the U.S. equity market.

ETF performance (12/31/25)

	3-months	1-year	3-year	5-year	10-year	Since ETF Inception
ETF (at NAV)	1.89%	14.32%	—	—	—	22.21%
Market price returns	1.89%	14.23%	—	—	—	22.21%
MSCI USA Climate Action Index	1.89%	14.40%	—	—	—	22.28%
MSCI USA Index	2.42%	17.75%	—	—	—	22.13%

Performance quoted represents past performance and does not guarantee future results. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Shares are bought and sold at market price (closing price) not net asset value (NAV) and are not individually redeemed from the Fund. Market price returns are based on the midpoint of the bid/ask spread at 4:00 pm Eastern Time (when NAV is normally determined) and do not represent the return you would receive if you traded at other times. To obtain the most recent month-end performance data visit www.Xtrackers.com or call 1-844-851-4255.

Indexes are unmanaged; you cannot invest in an index. Index performance is gross of fees and assumes dividend reinvestment. Inclusion of fees would have reduced returns.

Read the prospectus carefully before investing.

ESG investment strategy risk:

The Underlying Indices' ESG methodology, and thus the Funds' investment strategy, limits the types and number of investment opportunities available to the Funds and, as a result, the Fund may underperform other funds that do not have an ESG focus. The Underlying Index's ESG methodology may result in the Fund investing in securities or industry sectors that underperform the market as a whole or underperform other funds screened for ESG standards. In addition, the index provider may be unsuccessful in creating an index composed of companies that exhibit positive ESG characteristics.

War, terrorism, sanctions, economic uncertainty, trade disputes, public health crises and related geopolitical events have led and, in the future, may lead to significant disruptions in U.S. and world economies and markets, which may lead to increased market volatility and may have significant adverse effects on the fund and its investments.

Risk: Investing involves risk, including the possible loss of principal. Stocks may decline in value. Incorporation of ESG criteria in the fund's investment strategy does not guarantee a return or protect against a loss, limits the types and number of investment opportunities available to the fund and, as a result, the fund may underperform other funds that do not have an ESG focus. The Underlying Index's methodology for identifying companies attempting to reduce their carbon footprint limits the types and number of investment opportunities available to the fund and, as a result, the fund may underperform other funds that do not follow a carbon reduction strategy. In certain situations, it may be difficult or impossible to sell an investment at an acceptable price. Any fund that focuses in a particular segment of the market or region of the world will generally be more volatile than a fund that invests more broadly. Performance of the fund may diverge from that of the Underlying Index due to operating expenses, transaction costs, cash flows, use of sampling strategies or operational inefficiencies. An investment in this fund should be considered only as a supplement to a complete investment program for those investors willing to accept the risks associated with the fund. Please read the prospectus for more information.
