Key Risks

The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss. Bonds are exposed to credit risk and interest rate risk. There is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. If interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment. The fund has a scheduled maturity date, there is no guarantee this will be met. There is no guarantee that any specific redemption amount will be returned to investors at maturity, the redemption amount may be below the initial purchase amount, and investors should be able to sustain losses up to the total investment amount.
