The "S&P 500 Equal Weight Scored & Screened Index" is a product of S&P Dow Jones Indices LLC or its affiliates ("**SPDJI**"), and has been licensed for use by Xtrackers S&P 500 Equal Weight Scored & Screened UCITS ETF. Standard & Poor's® and S&P® are registered trademarks of Standard & Poor's Financial Services LLC ("**S&P**"); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC ("**Dow Jones**") and these trademarks have been licensed for use by SPDJI and sublicensed for certain purposes by Xtrackers S&P 500 Equal Weight Scored & Screened UCITS ETF. It is not possible to invest directly in an index. Xtrackers S&P 500 Equal Weight Scored & Screened UCITS ETF is not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P, any of their respective affiliates (collectively, "**S&P Dow Jones Indices**"). S&P Dow Jones Indices do not make any representation or warranty, express or implied, to the owners of Xtrackers S&P 500 Equal Weight Scored & Screened UCITS ETF or any member of the public regarding the advisability of investing in securities generally or in Xtrackers S&P 500 Equal Weight Scored & Screened UCITS ETF particularly or the ability of the S&P 500 Equal Weight Scored & Screened Index to track general market performance. Past performance of an index is not an indication or guarantee of future results. S&P Dow Jones Indices' only relationship to Xtrackers S&P 500 Equal Weight Scored & Screened UCITS ETF with respect to the S&P 500 Equal Weight Scored & Screened Index is the licensing of the index and certain trademarks, service marks and/or trade names of S&P Dow Jones Indices and/or its licensors. The S&P 500 Equal Weight Scored & Screened Index is determined, composed and calculated by S&P Dow Jones Indices without regard to Xtrackers S&P 500 Equal Weight Scored & Screened UCITS ETF. S&P Dow Jones Indices have no obligation to take the needs of Xtrackers S&P 500 Equal Weight Scored & Screened UCITS ETF or the owners of Xtrackers S&P 500 Equal Weight Scored & Screened UCITS ETF into consideration in determining, composing or calculating the S&P 500 Equal Weight Scored & Screened Index. S&P Dow Jones Indices are not responsible for and have not participated in the determination of the prices, the value of Xtrackers S&P 500 Equal Weight Scored & Screened UCITS ETF or the timing of the issuance or sale of Xtrackers S&P 500 Equal Weight Scored & Screened UCITS ETF or in the determination or calculation of the equation by which Xtrackers S&P 500 Equal Weight Scored & Screened UCITS ETF is to be converted into cash, surrendered or redeemed, as the case may be. S&P Dow Jones Indices have no obligation or liability in connection with the administration, marketing or trading of Xtrackers S&P 500 Equal Weight Scored & Screened UCITS ETF. There is no assurance that investment products based on the S&P 500 Equal Weight Scored & Screened Index will accurately track index performance or provide positive investment returns. S&P Dow Jones Indices LLC is not an investment or tax advisor. A tax advisor should be consulted to evaluate the impact of any tax-exempt securities on portfolios and the tax consequences of making any particular investment decision. Inclusion of a security within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, nor is it considered to be investment advice.

S&P DOW JONES INDICES DOES NOT GUARANTEE THE ADEQUACY, ACCURACY, TIMELINESS AND/OR THE COMPLETENESS OF THE S&P 500 EQUAL WEIGHT SCORED & SCREENED INDEX OR ANY DATA RELATED THERETO OR ANY COMMUNICATION, INCLUDING BUT NOT LIMITED TO, ORAL OR WRITTEN COMMUNICATION (INCLUDING ELECTRONIC COMMUNICATIONS) WITH RESPECT THERETO. S&P DOW JONES INDICES SHALL NOT BE SUBJECT TO ANY DAMAGES OR LIABILITY FOR ANY ERRORS, OMISSIONS, OR DELAYS THEREIN. S&P DOW JONES INDICES MAKES NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIMS ALL WARRANTIES, OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE OR AS TO RESULTS TO BE OBTAINED BY XTRACKERS S&P 500 EQUAL WEIGHT SCORED & SCREENED UCITS ETF, OWNERS OF XTRACKERS S&P 500 EQUAL WEIGHT SCORED & SCREENED UCITS ETF, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF S&P 500 EQUAL WEIGHT SCORED & SCREENED INDEX OR WITH RESPECT TO ANY DATA RELATED THERETO. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT WHATSOEVER SHALL S&P DOW JONES INDICES BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES INCLUDING BUT NOT LIMITED TO, LOSS OF PROFITS, TRADING LOSSES, LOST TIME OR GOODWILL, EVEN IF THEY HAVE BEEN ADVISED OF THE POSSIBLITY OF SUCH DAMAGES, WHETHER IN CONTRACT, TORT, STRICT LIABILITY, OR OTHERWISE. THERE ARE NO THIRD-PARTY

BENEFICIARIES OF ANY AGREEMENTS OR ARRANGEMENTS BETWEEN S&P DOW JONES INDICES AND XTRACKERS S&P 500 EQUAL WEIGHT SCORED & SCREENED UCITS ETF, OTHER THAN THE LICENSORS OF S&P DOW JONES INDICES.

SUPPLEMENT 60: Xtrackers MSCI Global SDG 9 Industry, Innovation & Infrastructure UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to the Xtrackers MSCI Global SDG 9 Industry, Innovation & Infrastructure UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus") and the first addendum to the Prospectus dated 1 December 2023 (the "Addendum")), and must be read in conjunction with, the Prospectus and the Addendum.

Xtrackers (IE) plc

Dated 3 March 2025

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 9 (build resilient infrastructure, promote inclusive and sustainable industrialisation and foster innovation) of the United Nations 2030 Agenda for Sustainable Development.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track, before fees and expenses, the performance of the MSCI ACWI IMI SDG 9 Industry, Innovation and Infrastructure Select Index (the "**Reference Index**"), by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*").

The Fund is managed according to a passive approach and is a Full Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus. Underlying Securities may include direct investment in China A Shares through Stock Connect. Further information about Stock Connect is available online at the website: https://www.hkex.com.hk/mutual-market/stock-connect?sc_lang=en

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the Prospectus.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities under the conditions and within the limits laid down by the Central Bank from time to time and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "**Use of Derivatives by Direct Investment Funds**" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Further, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund and provided that such borrowing is for temporary purposes only. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Emerging Markets

Investors in the Fund should be aware of the following risks associated with an investment in emerging markets:

(a) *Emerging Market Risk*: Investments in the market to which the Reference Index relates are currently exposed to risks pertaining to emerging markets generally. These include risks brought about by investment ceiling limits where foreign investors are subject to certain holding limits and constraints imposed on trading of listed securities where a registered foreign investor may only maintain a trading account with one licensed securities company in the relevant market. These may contribute to the illiquidity of the relevant securities market, as well as create inflexibility and uncertainty as to the trading environment.

(b) *Legal Risk*: The economies of most emerging markets are often less developed than those of other geographic regions such as the United States and Europe. The laws and regulations affecting these economies are also in a relatively early stage of development and are not as well established as the laws and regulations of developed countries. Such countries' securities laws and regulations may still be in their development stages and not drafted in a very concise manner which may be subject to interpretation. In the event of a securities related dispute involving a foreign party, the laws of these countries would typically apply (unless an applicable international treaty provides otherwise). The court systems of these nations may not be as transparent and effective as court systems in more developed countries or territories and there can be no

assurance of obtaining effective enforcement of rights through legal proceedings and generally the judgements of foreign courts are often not recognised.

(c) *Regulatory Risk:* Foreign investment in emerging economies' primary and secondary securities markets is often still relatively new and much of the relevant securities laws may be ambiguous and/or have been developed to regulate direct investment by foreigners rather than portfolio investment. Investors should note that because of a lack of precedent, securities market laws and the regulatory environment for primary and secondary market investments by foreign investors can be in the early stages of development, and may, in some jurisdictions, remain untested. The regulatory framework of the emerging economies' primary and secondary securities markets is often in the development stage compared to many of the world's leading stock markets, and accordingly there may be a lower level of regulatory monitoring of the activities of the emerging economies' primary and secondary securities markets.

(d) *Foreign Exchange Risk*: Some currencies of emerging markets are controlled. Investors should note the risks of limited liquidity in certain foreign exchange markets.

(e) *Trading Volumes and Volatility*: Often emerging market stock exchanges are smaller and have lower trading volumes and shorter trading hours than most OECD exchanges and the market capitalisations of listed companies are small compared to those on more developed exchanges in developed markets. The listed equity securities of many companies on such exchanges are accordingly materially less liquid, subject to greater dealer spreads and experience materially greater volatility than those of OECD countries. Many such exchanges have, in the past, experienced substantial price volatility and no assurance can be given that such volatility will not occur in the future. The above factors could negatively affect the Net Asset Value of the Fund.

(f) *Taxation risk*: The Fund may invest in jurisdictions where the tax regime is not fully developed or is not sufficiently certain, and as such changes to the tax policies may be implemented without any prior notice and may also apply retrospectively. Any changes in tax policies may reduce the after-taxation returns of the underlying assets to which the performance of the Fund is linked to.

(g) *Restricted markets risk*: The Fund may invest in markets in respect of which the local government imposes limitations or restrictions on foreign ownership or holdings. In order to access such markets, the Fund may use instruments such as American depositary receipts (**ADRs**), global depositary receipts (**GDRs**), non-voting depositary receipts (**NVDRs**) or P-Notes in order to gain exposure to equity securities instead of using physical securities where, due to such local restrictions or quota limitations, it is not possible to hold these directly. Such legal and regulatory restrictions or limitations may have adverse effects on the liquidity and performance of the Fund holdings as compared to the performance of the Reference Index. This may increase the risk of tracking error and, at worst, the Fund may not be able to achieve its investment objective and/or the Fund may have to be closed to further subscriptions.

(h) *Liquidity Risk:* Primary market-investors should be aware that it may take up to nine Business Days following the Transaction Day to receive the proceeds of redemptions requests.

Concentration of the Reference Index

The market which the Reference Index seeks to represent has a high concentration to one or more sectors. Therefore, investors should be aware that changes in the conditions affecting the concentrated sector or sectors may have an adverse impact on the performance of the Reference Index and the portfolio of transferable securities and eligible assets held by the Fund.

Environmental, Social and Governance Standards

The Reference Index's environmental, social and governance standards limit the number of securities eligible for inclusion in the Reference Index. As a result, the Reference Index, and as such the Fund, may be more heavily weighted in securities, industry sectors or countries that underperform the market as a whole or underperform other funds screened for environmental, social and governance ("**ESG**") standards, or which do not screen for such standards.

Investors should note that the determination that the Fund is subject to the disclosure requirements of a financial product under Article 8(1) SFDR is made solely on the basis that the Reference Index promotes environmental and social characteristics. The Company is relying on the activities conducted by and information provided by the Index Administrator or other data providers (as further described under the heading "General Description of the

Underlying Asset", where applicable) to make this determination. Neither the Company, nor any of its service providers, makes any representation or otherwise as to the suitability of the Reference Index and the Fund in meeting an investor's criteria on minimum ESG standards or otherwise. Investors are advised to carry out their own review as to whether the Reference Index and the Fund accords with their own ESG criteria. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Underlying Asset".

Investors should note that whilst the Fund and the Reference Index seek to ensure compliance with the criteria outlined under "General Description of the Underlying Asset" at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the Fund until it is possible and practicable to divest such positions.

Sustainability Data Risks

Investors should note that the Reference Index solely relies on analysis from the Index Administrator or other data providers (as applicable) in relation to sustainability considerations. Neither the Company, nor any of its service providers, makes any representation with respect to the accuracy, reliability, correctness of the sustainability related data or the way that these are implemented.

It should also be noted that analysis of companies' ESG performance may be based on models, estimates and assumptions. This analysis should not be taken as an indication or guarantee of current or future performance.

ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Index Administrator or other data providers (as applicable) may incorrectly assess a security or

issuer, resulting in the incorrect inclusion or exclusion of a security in the Reference Index and therefore the portfolio of the Fund.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

The Fund does not intend to make dividend payments.

General Information Relating to the Fund

Base Currency	USD
Cut-off Time	Means 4:30 p.m. Dublin time on the Business Day before the relevant Transaction Day
Fund Classification (InvStG)	Equity Fund, target minimum percentage of 80%.
Minimum Fund Size	USD 50,000,000

Settlement Date Means up to nine Business Days following the Transaction Day[79]

Securities Lending No

Transparency under SFDR The Fund promotes, among other characteristics, environmental and social characteristics and is subject to the disclosure requirements of a financial product under Article 8(1) SFDR. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Reference Index". Please also refer to "Environmental, Social and Governance Standards" under "Specific Risk Warning" above, to the section entitled "Sustainability-related disclosures under SFDR and EU Taxonomy Regulation" set out in the Prospectus and the annex to this Supplement.

Significant Market Means a Direct Replication Significant Market.

Description of the Shares

Class	**"1C"**
ISIN Code	IE0005E47AH7
German Security Identification Number (WKN)	DBX0S9
Currency	USD
Launch Date	13 December 2022
Minimum Initial Investment Amount	USD 50,000
Minimum Additional Investment Amount	USD 50,000
Minimum Redemption Amount	USD 50,000
Currency hedged Share class	No

Fees and Expenses

---

79 In the case that a Significant Market is closed for trading or settlement on any Business Day during the period between the relevant Transaction Day and the expected settlement date (inclusive), and/or settlement in the base currency of the Fund is not available on the expected settlement date, there may be corresponding delays to the settlement times indicated in this Supplement subject to the regulatory limit on settlement periods of 10 Business Days from the Cut-off Time. Earlier or later times may be determined by the Management Company at its discretion, whereby notice will be given on www.Xtrackers.com

Class	**“1C”**
Management Company Fee	Up to 0.20% per annum
Platform Fee	Up to 0.15% per annum
All-in Fee	Up to 0.35% per annum
Primary Market Transaction Costs	Applicable
Transaction Costs	Applicable
Anticipated Tracking Error	Up to 1.00% per annum

This section headed "Fees and Expenses" should be read in conjunction with the section headed "Fees and Expenses" in the Prospectus.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is based on the MSCI ACWI IMI Index (the "**Parent Index**"), which is administered by MSCI Limited (the "**Index Administrator**"). The Parent Index includes large, medium, and small-capitalisation companies across developed and emerging markets globally. Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 9 (build resilient infrastructure, promote inclusive and sustainable industrialisation and foster innovation) ("**SDG 9**") of the United Nations 2030 Agenda for Sustainable Development ("**UN 2030 Agenda**"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("**SDGs**") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

- Are unrated by MSCI ESG Research;
- Are assigned an MSCI ESG Rating of 'B' and below;
- Have any tie to controversial weapons;
- Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
- Fail to comply with the United Nations Global Compact principles;
- Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
- Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("**BISR"**) aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 9. Companies that meet a certain revenue threshold from business activities associated with SDG 9 are selected ("**SDG 9 Aligned Business Activities**"). Such SDG 9 Aligned Business Activities may include, but are not limited to:

- Alternative energy;
- Pollution prevention;
- Clean transport infrastructure;

- Industrial automation;
- Demand-side management;
- SME finance; and
- Connectivity.

SDG Thematic Selection

Constituents from the Parent Index which (i) *pass* the ESG exclusions criteria outlined above, but (ii) *do not pass* the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI Robotics Index (the "**Thematic Parent Index**"*)*. Constituents' exposure to the theme of robots and automation (the "**Theme**"), which includes (but is not limited to) the development of new products and services focused on robots, artificial intelligence, industrial robots, automation, non-industrial robots, and autonomous robots, is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:

- Business segment information from company annual reports and third-party data sources; and
- Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (**SIC**) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Constituents that do not have any revenue that contributes to SDG 9 are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:

- Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 9 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%; and
- Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their relevance score and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

The Reference Index includes (i) an issuer capping component, limiting the weight of each issuer to 4.5% at each quarterly index rebalance, and (ii) a minimum weight filter, that excludes securities which would otherwise have comprised a very small percentage of the Reference Index in order to aid replication of the Reference Index.

The Reference Index is reviewed on a semi-annual basis and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of applicable withholding tax.

The Reference Index is calculated in US Dollars on a daily basis.

Further Information

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

SUPPLEMENT 61: Xtrackers MSCI Global SDG 11 Sustainable Cities UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to the Xtrackers MSCI Global SDG 11 Sustainable Cities UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus") and the first addendum to the Prospectus dated 1 December 2023 (the "Addendum")), and must be read in conjunction with, the Prospectus and the Addendum.

Xtrackers (IE) plc

Dated 3 March 2025

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 11 (make cities and human settlements inclusive, safe, resilient and sustainable) of the United Nations 2030 Agenda for Sustainable Development.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track, before fees and expenses, the performance of the MSCI ACWI IMI SDG 11 Sustainable Cities and Communities Select Index (the "**Reference Index**"), by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*").

The Fund is managed according to a passive approach and is a Full Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus. Underlying Securities may include direct investment in China A Shares through Stock Connect. Further information about Stock Connect is available online at the website: https://www.hkex.com.hk/mutual-market/stock-connect?sc_lang=en

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the Prospectus.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities under the conditions and within the limits laid down by the Central Bank from time to time and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "**Use of Derivatives by Direct Investment Funds**" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Further, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund and provided that such borrowing is for temporary purposes only. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Emerging Markets

Investors in the Fund should be aware of the following risks associated with an investment in emerging markets:

(i) *Emerging Market Risk*: Investments in the market to which the Reference Index relates are currently exposed to risks pertaining to emerging markets generally. These include risks brought about by investment ceiling limits where foreign investors are subject to certain holding limits and constraints imposed on trading of listed securities where a registered foreign investor may only maintain a trading account with one licensed securities company in the relevant market. These may contribute to the illiquidity of the relevant securities market, as well as create inflexibility and uncertainty as to the trading environment.

(j) *Legal Risk*: The economies of most emerging markets are often less developed than those of other geographic regions such as the United States and Europe. The laws and regulations affecting these economies are also in a relatively early stage of development and are not as well established as the laws and

regulations of developed countries. Such countries' securities laws and regulations may still be in their development stages and not drafted in a very concise manner which may be subject to interpretation. In the event of a securities related dispute involving a foreign party, the laws of these countries would typically apply (unless an applicable international treaty provides otherwise). The court systems of these nations may not be as transparent and effective as court systems in more developed countries or territories and there can be no assurance of obtaining effective enforcement of rights through legal proceedings and generally the judgements of foreign courts are often not recognised.

(k) *Regulatory Risk:* Foreign investment in emerging economies' primary and secondary securities markets is often still relatively new and much of the relevant securities laws may be ambiguous and/or have been developed to regulate direct investment by foreigners rather than portfolio investment. Investors should note that because of a lack of precedent, securities market laws and the regulatory environment for primary and secondary market investments by foreign investors can be in the early stages of development, and may, in some jurisdictions, remain untested. The regulatory framework of the emerging economies' primary and secondary securities markets is often in the development stage compared to many of the world's leading stock markets, and accordingly there may be a lower level of regulatory monitoring of the activities of the emerging economies' primary and secondary securities markets.

(l) *Foreign Exchange Risk*: Some currencies of emerging markets are controlled. Investors should note the risks of limited liquidity in certain foreign exchange markets.

(m) *Trading Volumes and Volatility*: Often emerging market stock exchanges are smaller and have lower trading volumes and shorter trading hours than most OECD exchanges and the market capitalisations of listed companies are small compared to those on more developed exchanges in developed markets. The listed equity securities of many companies on such exchanges are accordingly materially less liquid, subject to greater dealer spreads and experience materially greater volatility than those of OECD countries. Many such exchanges have, in the past, experienced substantial price volatility and no assurance can be given that such volatility will not occur in the future. The above factors could negatively affect the Net Asset Value of the Fund.

(n) *Taxation risk*: The Fund may invest in jurisdictions where the tax regime is not fully developed or is not sufficiently certain, and as such changes to the tax policies may be implemented without any prior notice and may also apply retrospectively. Any changes in tax policies may reduce the after-taxation returns of the underlying assets to which the performance of the Fund is linked to.

(o) *Restricted markets risk*: The Fund may invest in markets in respect of which the local government imposes limitations or restrictions on foreign ownership or holdings. In order to access such markets, the Fund may use instruments such as American depositary receipts (**ADRs**), global depositary receipts (**GDRs**), non-voting depositary receipts (**NVDRs**) or P-Notes in order to gain exposure to equity securities instead of using physical securities where, due to such local restrictions or quota limitations, it is not possible to hold these directly. Such legal and regulatory restrictions or limitations may have adverse effects on the liquidity and performance of the Fund holdings as compared to the performance of the Reference Index. This may increase the risk of tracking error and, at worst, the Fund may not be able to achieve its investment objective and/or the Fund may have to be closed to further subscriptions.

(p) *Liquidity Risk:* Primary market-investors should be aware that it may take up to nine Business Days following the Transaction Day to receive the proceeds of redemptions requests.

Concentration of the Reference Index

The market which the Reference Index seeks to represent has a high concentration to one or more sectors. Therefore, investors should be aware that changes in the conditions affecting the concentrated sector or sectors may have an adverse impact on the performance of the Reference Index and the portfolio of transferable securities and eligible assets held by the Fund.

Environmental, Social and Governance Standards

The Reference Index's environmental, social and governance standards limit the number of securities eligible for inclusion in the Reference Index. As a result, the Reference Index, and as such the Fund, may be more heavily weighted in securities, industry sectors or countries that underperform the market as a whole or underperform other funds screened for environmental, social and governance ("**ESG**") standards, or which do not screen for such standards.

Investors should note that the determination that the Fund is subject to the disclosure requirements of a financial product under Article 8(1) SFDR is made solely on the basis that the Reference Index promotes environmental and social characteristics. The Company is relying on the activities conducted by and information provided by the Index Administrator or other data providers (as further described under the heading "General Description of the Underlying Asset", where applicable) to make this determination. Neither the Company, nor any of its service providers, makes any representation or otherwise as to the suitability of the Reference Index and the Fund in meeting an investor's criteria on minimum ESG standards or otherwise. Investors are advised to carry out their own review as to whether the Reference Index and the Fund accords with their own ESG criteria. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Underlying Asset".

Investors should note that whilst the Fund and the Reference Index seek to ensure compliance with the criteria outlined under "General Description of the Underlying Asset" at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the Fund until it is possible and practicable to divest such positions.

Sustainability Data Risks

Investors should note that the Reference Index solely relies on analysis from the Index Administrator or other data providers (as applicable) in relation to sustainability considerations. Neither the Company, nor any of its service providers, makes any representation with respect to the accuracy, reliability, correctness of the sustainability related data or the way that these are implemented.

It should also be noted that analysis of companies' ESG performance may be based on models, estimates and assumptions. This analysis should not be taken as an indication or guarantee of current or future performance.

ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Index Administrator or other data providers (as applicable) may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the Reference Index and therefore the portfolio of the Fund.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

The Fund does not intend to make dividend payments.

General Information Relating to the Fund

Base Currency USD

Cut-off Time	Means 4:30 p.m. Dublin time on the Business Day before the relevant Transaction Day
Fund Classification (InvStG)	Equity Fund, target minimum percentage of 80%.
Minimum Fund Size	USD 50,000,000
Settlement Date	Means up to nine Business Days following the Transaction Day[80]
Securities Lending	No
Transparency under SFDR	The Fund promotes, among other characteristics, environmental and social characteristics and is subject to the disclosure requirements of a financial product under Article 8(1) SFDR. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Reference Index". Please also refer to "Environmental, Social and Governance Standards" under "Specific Risk Warning" above, to the section entitled "Sustainability-related disclosures under SFDR and EU Taxonomy Regulation" set out in the Prospectus and the annex to this Supplement.
Significant Market	Means a Direct Replication Significant Market.

Description of the Shares

Class	**"1C"**
ISIN Code	IE000V0GDVU7
German Security Identification Number (WKN)	DBX0TA
Currency	USD
Launch Date	13 December 2022

80 In the case that a Significant Market is closed for trading or settlement on any Business Day during the period between the relevant Transaction Day and the expected settlement date (inclusive), and/or settlement in the base currency of the Fund is not available on the expected settlement date, there may be corresponding delays to the settlement times indicated in this Supplement subject to the regulatory limit on settlement periods of 10 Business Days from the Cut-off Time. Earlier or later times may be determined by the Management Company at its discretion, whereby notice will be given on www.Xtrackers.com

Minimum Initial Investment Amount	USD 50,000
Minimum Additional Investment Amount	USD 50,000
Minimum Redemption Amount	USD 50,000
Currency hedged Share class	No

Fees and Expenses

Class	**"1C"**
Management Company Fee	Up to 0.20% per annum
Platform Fee	Up to 0.15% per annum
All-in Fee	Up to 0.35% per annum
Primary Market Transaction Costs	Applicable
Transaction Costs	Applicable
Anticipated Tracking Error	Up to 1.00% per annum

This section headed "Fees and Expenses" should be read in conjunction with the section headed "Fees and Expenses" in the Prospectus.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is based on the MSCI ACWI IMI Index (the "**Parent Index**"), which is administered by MSCI Limited (the "**Index Administrator**"). The Parent Index includes large, medium, and small-capitalisation companies across developed and emerging markets globally. Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 11 (make cities and human settlements inclusive, safe, resilient and sustainable) ("**SDG 11**") of the United Nations 2030 Agenda for Sustainable Development ("**UN 2030 Agenda**"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("**SDGs**") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

- Are unrated by MSCI ESG Research;
- Are assigned an MSCI ESG Rating of 'B' and below;
- Have any tie to controversial weapons;
- Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
- Fail to comply with the United Nations Global Compact principles;
- Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
- Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("**BISR"**) aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 11. Companies that meet a certain revenue threshold ("**SDG Revenue**") from business activities associated with SDG 11 ("**SDG 11 Aligned Business Activities**") are included in the selection universe (the "**SDG Impact Selection Universe**"). SDG 11 Aligned Business Activities may include, but are not limited to:

- Pollution prevention;
- Demand-side management;

- Smart grid;
- Clean transport infrastructure;
- LED/CFL lighting;
- Insulation;
- Green building; and
- Affordable real estate.

Constituents in the SDG Impact Selection Universe are assigned to a Global Industry Classification Standard (**GICS**) sector and are ranked according to their SDG Revenue. A certain threshold of top-ranking constituents from each GICS sector are selected for inclusion. For GICS sectors that have less constituents than the threshold, all securities are selected for inclusion.

SDG Thematic Selection

Constituents from the Parent Index which (i) *pass* the ESG exclusions criteria outlined above, but (ii) *do not pass* the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Smart Cities Index (the "**Thematic Parent Index**"*)*. Constituents' exposure to the theme of smart solutions for urban infrastructure (the "**Theme**"), which includes (but is not limited to) the development of new products and services focussed on smart connectivity for internet of things (e.g. nonstandard computing devices that connect wirelessly to a network and have the ability to transmit data), smart infrastructure, smart buildings, smart homes, smart safety and security, smart waste and water management, smart mobility, and smart energy and grids is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:

- Business segment information from company annual reports and third-party data sources; and
- Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (**SIC**) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Constituents that do not have any revenue that contributes to SDG 11 and securities which are mapped to certain GICS sub-industries are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:

- Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 11 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%; and
- Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their relevance score and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

The Reference Index includes (i) an issuer capping component, limiting the weight of each issuer to 4.5% at each quarterly index rebalance, (ii) a minimum weight filter, that excludes securities which would otherwise have comprised a very small percentage of the Reference Index in order to aid replication of the Reference Index and (iii) a GICS sector capping component, limiting the weight of all constituents assigned to a GICS sector to 20% per GICS sector.

The Reference Index is reviewed on a semi-annual basis and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of applicable withholding tax.

The Reference Index is calculated in US Dollars on a daily basis.

Further Information

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR AN MSCI SUB-FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

SUPPLEMENT 62: Xtrackers MSCI Global Circular Economy UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to the Xtrackers MSCI Global Circular Economy UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the ''Prospectus'') and the first addendum to the Prospectus dated 1 December 2023 (the ''Addendum'')), and must be read in conjunction with, the Prospectus and the Addendum.

Xtrackers (IE) plc

Dated 3 March 2025

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 12 (ensure sustainable consumption and production patterns) of the United Nations 2030 Agenda for Sustainable Development.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track, before fees and expenses, the performance of the MSCI ACWI IMI SDG 12 Responsible Consumption and Production Select Index (the "**Reference Index**"), by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*").

The Fund is managed according to a passive approach and is a Full Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus. Underlying Securities may include direct investment in China A Shares through Stock Connect. Further information about Stock Connect is available online at the website: https://www.hkex.com.hk/mutual-market/stock-connect?sc_lang=en

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the Prospectus.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities under the conditions and within the limits laid down by the Central Bank from time to time and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "**Use of Derivatives by Direct Investment Funds**" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund’s FDI positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund’s global exposure and to ensure that the Fund’s use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund’s Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Further, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund and provided that such borrowing is for temporary purposes only. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Emerging Markets

Investors in the Fund should be aware of the following risks associated with an investment in emerging markets:

(q) *Emerging Market Risk*: Investments in the market to which the Reference Index relates are currently exposed to risks pertaining to emerging markets generally. These include risks brought about by investment ceiling limits where foreign investors are subject to certain holding limits and constraints imposed on trading of listed securities where a registered foreign investor may only maintain a trading account with one licensed securities company in the relevant market. These may contribute to the illiquidity of the relevant securities market, as well as create inflexibility and uncertainty as to the trading environment.

(r) *Legal Risk*: The economies of most emerging markets are often less developed than those of other geographic regions such as the United States and Europe. The laws and regulations affecting these economies are also in a relatively early stage of development and are not as well established as the laws and

regulations of developed countries. Such countries' securities laws and regulations may still be in their development stages and not drafted in a very concise manner which may be subject to interpretation. In the event of a securities related dispute involving a foreign party, the laws of these countries would typically apply (unless an applicable international treaty provides otherwise). The court systems of these nations may not be as transparent and effective as court systems in more developed countries or territories and there can be no assurance of obtaining effective enforcement of rights through legal proceedings and generally the judgements of foreign courts are often not recognised.

(s) *Regulatory Risk:* Foreign investment in emerging economies' primary and secondary securities markets is often still relatively new and much of the relevant securities laws may be ambiguous and/or have been developed to regulate direct investment by foreigners rather than portfolio investment. Investors should note that because of a lack of precedent, securities market laws and the regulatory environment for primary and secondary market investments by foreign investors can be in the early stages of development, and may, in some jurisdictions, remain untested. The regulatory framework of the emerging economies' primary and secondary securities markets is often in the development stage compared to many of the world's leading stock markets, and accordingly there may be a lower level of regulatory monitoring of the activities of the emerging economies' primary and secondary securities markets.

(t) *Foreign Exchange Risk*: Some currencies of emerging markets are controlled. Investors should note the risks of limited liquidity in certain foreign exchange markets.

(u) *Trading Volumes and Volatility*: Often emerging market stock exchanges are smaller and have lower trading volumes and shorter trading hours than most OECD exchanges and the market capitalisations of listed companies are small compared to those on more developed exchanges in developed markets. The listed equity securities of many companies on such exchanges are accordingly materially less liquid, subject to greater dealer spreads and experience materially greater volatility than those of OECD countries. Many such exchanges have, in the past, experienced substantial price volatility and no assurance can be given that such volatility will not occur in the future. The above factors could negatively affect the Net Asset Value of the Fund.

(v) *Taxation risk*: The Fund may invest in jurisdictions where the tax regime is not fully developed or is not sufficiently certain, and as such changes to the tax policies may be implemented without any prior notice and may also apply retrospectively. Any changes in tax policies may reduce the after-taxation returns of the underlying assets to which the performance of the Fund is linked to.

(w) *Restricted markets risk*: The Fund may invest in markets in respect of which the local government imposes limitations or restrictions on foreign ownership or holdings. In order to access such markets, the Fund may use instruments such as American depositary receipts (**ADRs**), global depositary receipts (**GDRs**), non-voting depositary receipts (**NVDRs**) or P-Notes in order to gain exposure to equity securities instead of using physical securities where, due to such local restrictions or quota limitations, it is not possible to hold these directly. Such legal and regulatory restrictions or limitations may have adverse effects on the liquidity and performance of the Fund holdings as compared to the performance of the Reference Index. This may increase the risk of tracking error and, at worst, the Fund may not be able to achieve its investment objective and/or the Fund may have to be closed to further subscriptions.

(x) *Liquidity Risk:* Primary market-investors should be aware that it may take up to nine Business Days following the Transaction Day to receive the proceeds of redemptions requests.

Concentration of the Reference Index

The market which the Reference Index seeks to represent has a high concentration to one or more sectors. Therefore, investors should be aware that changes in the conditions affecting the concentrated sector or sectors may have an adverse impact on the performance of the Reference Index and the portfolio of transferable securities and eligible assets held by the Fund.

Environmental, Social and Governance Standards

The Reference Index's environmental, social and governance standards limit the number of securities eligible for inclusion in the Reference Index. As a result, the Reference Index, and as such the Fund, may be more heavily weighted in securities, industry sectors or countries that underperform the market as a whole or underperform other funds screened for environmental, social and governance ("**ESG**") standards, or which do not screen for such standards.

Investors should note that the determination that the Fund is subject to the disclosure requirements of a financial product under Article 8(1) SFDR is made solely on the basis that the Reference Index promotes environmental and social characteristics. The Company is relying on the activities conducted by and information provided by the Index Administrator or other data providers (as further described under the heading "General Description of the Underlying Asset", where applicable) to make this determination. Neither the Company, nor any of its service providers, makes any representation or otherwise as to the suitability of the Reference Index and the Fund in meeting an investor's criteria on minimum ESG standards or otherwise. Investors are advised to carry out their own review as to whether the Reference Index and the Fund accords with their own ESG criteria. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Underlying Asset".

Investors should note that whilst the Fund and the Reference Index seek to ensure compliance with the criteria outlined under "General Description of the Underlying Asset" at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or (ii) in the portfolio of the Fund until it is possible and practicable to divest such positions.

Sustainability Data Risks

Investors should note that the Reference Index solely relies on analysis from the Index Administrator or other data providers (as applicable) in relation to sustainability considerations. Neither the Company, nor any of its service providers, makes any representation with respect to the accuracy, reliability, correctness of the sustainability related data or the way that these are implemented.

It should also be noted that analysis of companies' ESG performance may be based on models, estimates and assumptions. This analysis should not be taken as an indication or guarantee of current or future performance.

ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Index Administrator or other data providers (as applicable) may incorrectly assess a security or

issuer, resulting in the incorrect inclusion or exclusion of a security in the Reference Index and therefore the portfolio of the Fund.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

The Fund does not intend to make dividend payments.

General Information Relating to the Fund

Base Currency	USD
Cut-off Time	Means 4:30 p.m. Dublin time on the Business Day before the relevant Transaction Day
Fund Classification (InvStG)	Equity Fund, target minimum percentage of 80%.

Minimum Fund Size	USD 50,000,000
Settlement Date	Means up to nine Business Days following the Transaction Day[81]
Securities Lending	No
Transparency under SFDR	The Fund promotes, among other characteristics, environmental and social characteristics and is subject to the disclosure requirements of a financial product under Article 8(1) SFDR. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Reference Index". Please also refer to "Environmental, Social and Governance Standards" under "Specific Risk Warning" above, to the section entitled "Sustainability-related disclosures under SFDR and EU Taxonomy Regulation" set out in the Prospectus and the annex to this Supplement.
Significant Market	Means a Direct Replication Significant Market.

Description of the Shares

Class	**"1C"**
ISIN Code	IE000Y6ZXZ48
German Security Identification Number (WKN)	DBX0TB
Currency	USD
Launch Date	13 December 2022
Minimum Initial Investment Amount	USD 50,000
Minimum Additional Investment Amount	USD 50,000
Minimum Redemption Amount	USD 50,000
Currency hedged Share class	No

[81] In the case that a Significant Market is closed for trading or settlement on any Business Day during the period between the relevant Transaction Day and the expected settlement date (inclusive), and/or settlement in the base currency of the Fund is not available on the expected settlement date, there may be corresponding delays to the settlement times indicated in this Supplement subject to the regulatory limit on settlement periods of 10 Business Days from the Cut-off Time. Earlier or later times may be determined by the Management Company at its discretion, whereby notice will be given on www.Xtrackers.com

Fees and Expenses

Class	**"1C"**
Management Company Fee	Up to 0.20% per annum
Platform Fee	Up to 0.15% per annum
All-in Fee	Up to 0.35% per annum
Primary Market Transaction Costs	Applicable
Transaction Costs	Applicable
Anticipated Tracking Error	Up to 1.00% per annum

This section headed "Fees and Expenses" should be read in conjunction with the section headed "Fees and Expenses" in the Prospectus.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is based on the MSCI ACWI IMI Index (the "**Parent Index**"), which is administered by MSCI Limited (the "**Index Administrator**"). The Parent Index includes large, medium, and small-capitalisation companies across developed and emerging markets globally. Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 12 (ensure sustainable consumption and production patterns) ("**SDG 12**") of the United Nations 2030 Agenda for Sustainable Development ("**UN 2030 Agenda**"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("**SDGs**") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

- Are unrated by MSCI ESG Research;
- Are assigned an MSCI ESG Rating of 'B' and below;
- Have any tie to controversial weapons;
- Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
- Fail to comply with the United Nations Global Compact principles;
- Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
- Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("**BISR"**) aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 12. Companies that meet a certain revenue threshold from business activities associated with SDG 12 are selected ("**SDG 12 Aligned Business Activities**"). Such SDG 12 Aligned Business Activities may include, but are not limited to:

- Alternative energy;
- Energy efficiency;
- Green building;
- Sustainable water;
- Pollution prevention; and
- Sustainable agriculture.

SDG Thematic Selection

Constituents from the Parent Index which (i) *pass* the ESG exclusions criteria outlined above, but (ii) *do not pass* the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria.

In order to assess constituents' exposure to the theme of helping enable the transition to a circular economy, the Index Administrator defines a circular transition universe (the "**Circular Transition Universe**"). The Circular Transition Universe is constructed using management scores of the following MSCI ESG Ratings' key issues: water stress, biodiversity & land use, raw material sourcing, toxic emissions & waste, packaging material & waste, and electronic waste (the "**Key Issue Management Scores**"), in order to identify companies that have better management strategies to protect natural resources and/or address waste issues relative to their sector peers.

An average management score ("**AMS**") is calculated for all companies in the Parent Index using the relevant Key Issue Management Scores. Constituents which are not assessed on any relevant key issues or do not have exposure above a certain threshold to any relevant key issues are excluded from the Circular Transition Universe. A sector-relative management score ("**SRMS**") is then calculated for each company by dividing its AMS by the AMS of the highest scoring company in its Global Industry Classification Standard (**GICS**) Sector. All companies belonging to GICS Sectors where the AMS of the highest scoring company does not meet a minimum AMS are excluded from the calculation of SRMS. To be eligible for inclusion in the Circular Transition Universe, securities must meet a certain SRMS threshold.

Constituents that do not have any revenue that contributes to SDG 12 and constituents that do not reach a certain threshold on any of the relevant Key Issue Management Scores are excluded from the eligible universe.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:

- Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 12 and

their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%; and

- Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted according to their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

The Reference Index includes (i) an issuer capping component, limiting the weight of each issuer to 4.5% at each quarterly index rebalance, and (ii) a minimum weight filter, that excludes securities which would otherwise have comprised a very small percentage of the Reference Index in order to aid replication of the Reference Index.

The Reference Index is reviewed on a semi-annual basis and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of applicable withholding tax.

The Reference Index is calculated in US Dollars on a daily basis.

Further Information

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

IMPORTANT

XTRACKERS MSCI GLOBAL CIRCULAR ECONOMY UCITS ETF (AN "**MSCI SUB-FUND**") IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI INC. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR AN MSCI SUB-FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

SUPPLEMENT 63: Xtrackers MSCI Global SDG 3 Good Health UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to the Xtrackers MSCI Global SDG 3 Good Health UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the ''Prospectus'') and the first addendum to the Prospectus dated 1 December 2023 (the ''Addendum'')), and must be read in conjunction with, the Prospectus and the Addendum.

Xtrackers (IE) plc

Dated 3 March 2025

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 3 (Ensure healthy lives and promote well-being for all at all ages) of the United Nations 2030 Agenda for Sustainable Development.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track, before fees and expenses, the performance of the MSCI ACWI IMI SDG 3 Good Health and Well-being Select Index (the "**Reference Index**"), by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference

Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*").

The Fund is managed according to a passive approach and is a Full Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus. Underlying Securities may include direct investment in China A Shares through Stock Connect. Further information about Stock Connect is available online at the website: https://www.hkex.com.hk/mutual-market/stock-connect?sc_lang=en

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the Prospectus.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities under the conditions and within the limits laid down by the Central Bank from time to time and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "**Use of Derivatives by Direct Investment Funds**" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Further, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund and provided that such borrowing is for temporary purposes only. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Emerging Markets

Investors in the Fund should be aware of the following risks associated with an investment in emerging markets:

(y) *Emerging Market Risk*: Investments in the market to which the Reference Index relates are currently exposed to risks pertaining to emerging markets generally. These include risks brought about by investment ceiling limits where foreign investors are subject to certain holding limits and constraints imposed on trading of listed securities where a registered foreign investor may only maintain a trading account with one licensed securities company in the relevant market. These may contribute to the illiquidity of the relevant securities market, as well as create inflexibility and uncertainty as to the trading environment.

(z) *Legal Risk*: The economies of most emerging markets are often less developed than those of other geographic regions such as the United States and Europe. The laws and regulations affecting these economies are also in a relatively early stage of development and are not as well established as the laws and

regulations of developed countries. Such countries' securities laws and regulations may still be in their development stages and not drafted in a very concise manner which may be subject to interpretation. In the event of a securities related dispute involving a foreign party, the laws of these countries would typically apply (unless an applicable international treaty provides otherwise). The court systems of these nations may not be as transparent and effective as court systems in more developed countries or territories and there can be no assurance of obtaining effective enforcement of rights through legal proceedings and generally the judgements of foreign courts are often not recognised.

(aa) *Regulatory Risk:* Foreign investment in emerging economies' primary and secondary securities markets is often still relatively new and much of the relevant securities laws may be ambiguous and/or have been developed to regulate direct investment by foreigners rather than portfolio investment. Investors should note that because of a lack of precedent, securities market laws and the regulatory environment for primary and secondary market investments by foreign investors can be in the early stages of development, and may, in some jurisdictions, remain untested. The regulatory framework of the emerging economies' primary and secondary securities markets is often in the development stage compared to many of the world's leading stock markets, and accordingly there may be a lower level of regulatory monitoring of the activities of the emerging economies' primary and secondary securities markets.

(bb) *Foreign Exchange Risk*: Some currencies of emerging markets are controlled. Investors should note the risks of limited liquidity in certain foreign exchange markets.

(cc) *Trading Volumes and Volatility*: Often emerging market stock exchanges are smaller and have lower trading volumes and shorter trading hours than OECD exchanges and the market capitalisations of listed companies are small compared to those on more developed exchanges in developed markets. The listed equity securities of many companies on such exchanges are accordingly materially less liquid, subject to greater dealer spreads and experience materially greater volatility than those of OECD countries. Many such exchanges have, in the past, experienced substantial price volatility and no assurance can be given that such volatility will not occur in the future. The above factors could negatively affect the Net Asset Value of the Fund.

(dd) *Taxation risk*: The Fund may invest in jurisdictions where the tax regime is not fully developed or is not sufficiently certain, and as such changes to the tax policies may be implemented without any prior notice and may also apply retrospectively. Any changes in tax policies may reduce the after-taxation returns of the underlying assets to which the performance of the Fund is linked to.

(ee) *Restricted markets risk*: The Fund may invest in markets in respect of which the local government imposes limitations or restrictions on foreign ownership or holdings. In order to access such markets, the Fund may use instruments such as American depositary receipts (**ADRs**), global depositary receipts (**DGRs**), non-voting depositary receipts (**NVDRs**) or P-Notes in order to gain exposure to equity securities instead of using physical securities where, due to such local restrictions or quota limitations, it is not possible to hold these directly. Such legal and regulatory restrictions or limitations may have adverse effects on the liquidity and performance of the Fund holdings as compared to the performance of the Reference Index. This may increase the risk of tracking error and, at worst, the Fund may not be able to achieve its investment objective and/or the Fund may have to be closed to further subscriptions.

(ff) *Liquidity Risk:* Primary market-investors should be aware that it may take up to nine Business Days following the Transaction Day to receive the proceeds of redemptions requests.

Concentration of the Reference Index

The market which the Reference Index seeks to represent has a high concentration to one or more sectors. Therefore, investors should be aware that changes in the conditions affecting the concentrated sector or sectors may have an adverse impact on the performance of the Reference Index and the portfolio of transferable securities and eligible assets held by the Fund.

Environmental, Social and Governance Standards

The Reference Index's environmental, social and governance standards limit the number of securities eligible for inclusion in the Reference Index. As a result, the Reference Index, and as such the Fund, may be more heavily weighted in securities, industry sectors or countries that underperform the market as a whole or underperform other funds screened for environmental, social and governance standards, or which do not screen for such standards.

Investors should note that the determination that the Fund is subject to the disclosure requirements of a financial product under Article 8(1) of SFDR is made solely on the basis that the Reference Index promotes environmental and social characteristics. The Company is relying on the activities conducted by and information provided by the Index Administrator or other data providers (as further described under the heading "General Description of the Underlying Asset", where applicable) to make this determination. Neither the Company, nor any of its service providers, makes any representation or otherwise as to the suitability of the Reference Index and the Fund in meeting an investor's criteria on minimum environmental, social and governance ("**ESG**") standards or otherwise. Investors are advised to carry out their own review as to whether the Reference Index and the Fund accords with their own ESG criteria. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Underlying Asset".

Investors should note that whilst the Fund and the Reference Index seek to ensure compliance with the criteria outlined under "General Description of the Underlying Asset" at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the Fund until it is possible and practicable to divest such positions.

Sustainability Data Risks

Investors should note that the Reference Index solely relies on analysis from the Index Administrator or other data providers (as applicable) in relation to sustainability considerations. Neither the Company, nor any of its service providers, makes any representation with respect to the accuracy, reliability, correctness of the sustainability related data or the way that these are implemented.

It should also be noted that analysis of companies' ESG performance may be based on models, estimates and assumptions. This analysis should not be taken as an indication or guarantee of current or future performance.

ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Index Administrator or other data providers (as applicable) may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the Reference Index and therefore the portfolio of the Fund.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

The Fund does not intend to make dividend payments.

General Information Relating to the Fund

Base Currency USD

Cut-off Time	Means 4:30 p.m. Dublin time on the Business Day before the relevant Transaction Day
Fund Classification (InvStG)	Equity Fund, target minimum percentage of 80%.
Minimum Fund Size	USD 50,000,000
Settlement Date	Means up to nine Business Days following the Transaction Day[82]
Securities Lending	No
Transparency under SFDR	The Fund promotes, among other characteristics, environmental and social characteristics and is subject to the disclosure requirements of a financial product under Article 8(1) of SFDR. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Reference Index". Please also refer to "Environmental, Social and Governance Standards" under "Specific Risk Warning" above, to the section entitled "Sustainability-related disclosures under SFDR and EU Taxonomy Regulation" set out in the Prospectus and the annex to this Supplement.
Significant Market	Means a Direct Replication Significant Market.

Description of the Shares

Class	**"1C"**
ISIN Code	IE00036F4K40
German Security Identification Number (WKN)	DBX0SM
Currency	USD

[82] In the case that a Significant Market is closed for trading or settlement on any Business Day during the period between the relevant Transaction Day and the expected settlement date (inclusive), and/or settlement in the base currency of the Fund is not available on the expected settlement date, there may be corresponding delays to the settlement times indicated in this Supplement subject to the regulatory limit on settlement periods of 10 Business Days from the Cut-off Time. Earlier or later times may be determined by the Management Company at its discretion, whereby notice will be given on www.Xtrackers.com

Launch Date	18 January 2023
Minimum Initial Investment Amount	USD 50,000
Minimum Additional Investment Amount	USD 50,000
Minimum Redemption Amount	USD 50,000
Currency hedged Share class	No

Fees and Expenses

Class	**"1C"**
Management Company Fee	Up to 0.20% per annum
Platform Fee	Up to 0.15% per annum
All-in Fee	Up to 0.35% per annum
Primary Market Transaction Costs	Applicable
Transaction Costs	Applicable
Anticipated Tracking Error	Up to 1.00% per annum

This section headed "Fees and Expenses" should be read in conjunction with the section headed "Fees and Expenses" in the Prospectus.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is based on the MSCI ACWI IMI Index (the "**Parent Index**"), which is administered by MSCI Limited (the "**Index Administrator**"). The Parent Index includes large, medium, and small-capitalisation companies across developed and emerging markets globally. Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 3 (Ensure healthy lives and promote well-being for all at all ages) ("**SDG 3**") of the United Nations 2030 Agenda for Sustainable Development ("**UN 2030 Agenda**"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("**SDGs**") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

- Are unrated by MSCI ESG Research;
- Are assigned an MSCI ESG Rating of 'B' and below;
- Have any tie to controversial weapons;
- Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
- Fail to comply with the United Nations Global Compact principles;
- Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
- Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("**BISR"**) aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics and MSCI BISR for their exposure to products and services which aim to contribute positively to SDG 3. Companies that meet a certain revenue threshold from business activities associated with SDG 3 are selected ("**SDG 3 Aligned Business Activities**"). Such SDG 3 Aligned Business Activities may include, but are not limited to:

- Major disease treatment;
- Sanitation;

- Contraceptives;
- Conventional pollution control solutions; and
- Low toxicity solutions and/or low volatile organic compounds solutions.

SDG Thematic Selection

Constituents from the Parent Index which (i) *pass* the ESG exclusions criteria outlined above, but (ii) *do not pass* the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Digital Health Index (the "**Thematic Parent Index**"*)*. Constituents' exposure to the theme of digital healthcare (the "**Theme**"), which includes (but is not limited to) the development of new products and services focussed on telehealth, medical robots, and automation in healthcare is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:

- Business segment information from company annual reports and third-party data sources; and
- Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Constituents that do not have any revenue that contributes to SDG 3 are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:

- Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 3 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%.
- Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their relevance score and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

The Reference Index includes (i) an issuer capping component, limiting the weight of each issuer to 4.5% at each quarterly index rebalance, and (ii) a minimum weight filter, that excludes securities which would otherwise have comprised a very small percentage of the Reference Index in order to aid replication of the Reference Index.

The Reference Index is reviewed on a semi-annual basis and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of applicable withholding tax.

The Reference Index is calculated in US Dollars on a daily basis.

Further Information

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

SUPPLEMENT 64: Xtrackers MSCI Global Clean Water & Sanitation UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to the Xtrackers MSCI Global Clean Water & Sanitation UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the ''Prospectus'') and the first addendum to the Prospectus dated 1 December 2023 (the ''Addendum'')), and must be read in conjunction with, the Prospectus and the Addendum.

Xtrackers (IE) plc

Dated 3 March 2025

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 6, (ensure availability and sustainable management of water and sanitation for all) of the United Nations 2030 Agenda for Sustainable Development.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track, before fees and expenses, the performance of the MSCI ACWI IMI SDG 6 Clean Water and Sanitation Select Index (the "**Reference Index**"), by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*").

The Fund is managed according to a passive approach and is a Full Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus. Underlying Securities may include direct investment in China A Shares through Stock Connect. Further information about Stock Connect is available online at the website: https://www.hkex.com.hk/mutual-market/stock-connect?sc_lang=en

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the Prospectus.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities under the conditions and within the limits laid down by the Central Bank from time to time and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "**Use of Derivatives by Direct Investment Funds**" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Further, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund and provided that such borrowing is for temporary purposes only. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Emerging Markets

Investors in the Fund should be aware of the following risks associated with an investment in emerging markets:

(gg) *Emerging Market Risk*: Investments in the market to which the Reference Index relates are currently exposed to risks pertaining to emerging markets generally. These include risks brought about by investment ceiling limits where foreign investors are subject to certain holding limits and constraints imposed on trading of listed securities where a registered foreign investor may only maintain a trading account with one licensed securities company in the relevant market. These may contribute to the illiquidity of the relevant securities market, as well as create inflexibility and uncertainty as to the trading environment.

(hh) *Legal Risk*: The economies of most emerging markets are often less developed than those of other geographic regions such as the United States and Europe. The laws and regulations affecting these economies are also in a relatively early stage of development and are not as well established as the laws and regulations of developed countries. Such countries' securities laws and regulations may still be in their development stages and not drafted in a very concise manner which may be subject to interpretation. In the event of a securities related dispute involving a foreign party, the laws of these countries would typically apply (unless an applicable international treaty provides otherwise). The court systems of these nations may not be as transparent and effective as court systems in more developed countries or territories and there can be no

assurance of obtaining effective enforcement of rights through legal proceedings and generally the judgements of foreign courts are often not recognised.

(ii) *Regulatory Risk:* Foreign investment in emerging economies' primary and secondary securities markets is often still relatively new and much of the relevant securities laws may be ambiguous and/or have been developed to regulate direct investment by foreigners rather than portfolio investment. Investors should note that because of a lack of precedent, securities market laws and the regulatory environment for primary and secondary market investments by foreign investors can be in the early stages of development, and may, in some jurisdictions, remain untested. The regulatory framework of the emerging economies' primary and secondary securities markets is often in the development stage compared to many of the world's leading stock markets, and accordingly there may be a lower level of regulatory monitoring of the activities of the emerging economies' primary and secondary securities markets.

(jj) *Foreign Exchange Risk*: Some currencies of emerging markets are controlled. Investors should note the risks of limited liquidity in certain foreign exchange markets.

(kk) *Trading Volumes and Volatility*: Often emerging market stock exchanges are smaller and have lower trading volumes and shorter trading hours than most OECD exchanges and the market capitalisations of listed companies are small compared to those on more developed exchanges in developed markets. The listed equity securities of many companies on such exchanges are accordingly materially less liquid, subject to greater dealer spreads and experience materially greater volatility than those of OECD countries. Many such exchanges have, in the past, experienced substantial price volatility and no assurance can be given that such volatility will not occur in the future. The above factors could negatively affect the Net Asset Value of the Fund.

(ll) *Taxation risk*: The Fund may invest in jurisdictions where the tax regime is not fully developed or is not sufficiently certain, and as such changes to the tax policies may be implemented without any prior notice and may also apply retrospectively. Any changes in tax policies may reduce the after-taxation returns of the underlying assets to which the performance of the Fund is linked to.

(mm) *Restricted markets risk*: The Fund may invest in markets in respect of which the local government imposes limitations or restrictions on foreign ownership or holdings. In order to access such markets, the Fund may use instruments such as American depositary receipts (**ADRs**), global depositary receipts (**GDRs**), non-voting depositary receipts (**NVDRs**) or P-Notes in order to gain exposure to equity securities instead of using physical securities where, due to such local restrictions or quota limitations, it is not possible to hold these directly. Such legal and regulatory restrictions or limitations may have adverse effects on the liquidity and performance of the Fund holdings as compared to the performance of the Reference Index. This may increase the risk of tracking error and, at worst, the Fund may not be able to achieve its investment objective and/or the Fund may have to be closed to further subscriptions.

(nn) *Liquidity Risk:* Primary market-investors should be aware that it may take up to nine Business Days following the Transaction Day to receive the proceeds of redemptions requests.

Concentration of the Reference Index

The market which the Reference Index seeks to represent has a high concentration to one or more sectors. Therefore, investors should be aware that changes in the conditions affecting the concentrated sector or sectors may have an adverse impact on the performance of the Reference Index and the portfolio of transferable securities and eligible assets held by the Fund.

Environmental, Social and Governance Standards

The Reference Index's environmental, social and governance standards limit the number of securities eligible for inclusion in the Reference Index. As a result, the Reference Index, and as such the Fund, may be more heavily weighted in securities, industry sectors or countries that underperform the market as a whole or underperform other funds screened for environmental, social and governance standards, or which do not screen for such standards.

Investors should note that the determination that the Fund is subject to the disclosure requirements of a financial product under Article 8(1) of SFDR is made solely on the basis that the Reference Index promotes environmental and social characteristics. The Company is relying on the activities conducted by and information provided by the Index Administrator or other data providers (as further described under the heading "General Description of the Underlying Asset", where applicable) to make this determination. Neither the Company, nor any of its service providers, makes any representation or otherwise as to the suitability of the Reference Index and the Fund in meeting an investor's criteria on minimum environmental, social and governance ("**ESG**") standards or otherwise. Investors are advised to carry out their own review as to whether the Reference Index and the Fund accords with their own ESG criteria. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Underlying Asset".

Investors should note that whilst the Fund and the Reference Index seek to ensure compliance with the criteria outlined under "General Description of the Underlying Asset" at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the Fund until it is possible and practicable to divest such positions.

Sustainability Data Risks

Investors should note that the Reference Index solely relies on analysis from the Index Administrator or other data providers (as applicable) in relation to sustainability considerations. Neither the Company, nor any of its service providers, makes any representation with respect to the accuracy, reliability, correctness of the sustainability related data or the way that these are implemented.

It should also be noted that analysis of companies' ESG performance may be based on models, estimates and assumptions. This analysis should not be taken as an indication or guarantee of current or future performance.

ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Index Administrator or other data providers (as applicable) may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the Reference Index and therefore the portfolio of the Fund.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

The Fund does not intend to make dividend payments.

General Information Relating to the Fund

Base Currency	USD
Cut-off Time	Means 4:30 p.m. Dublin time on the Business Day before the relevant Transaction Day
Fund Classification (InvStG)	Equity Fund, target minimum percentage of 80%.
Minimum Fund Size	USD 50,000,000

Settlement Date Means up to nine Business Days following the Transaction Day[83]

Securities Lending No

Transparency under SFDR The Fund promotes, among other characteristics, environmental and social characteristics and is subject to the disclosure requirements of a financial product under Article 8(1) of SFDR. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Reference Index". Please also refer to "Environmental, Social and Governance Standards" under "Specific Risk Warning" above, to the section entitled "Sustainability-related disclosures under SFDR and EU Taxonomy Regulation" set out in the Prospectus and the annex to this Supplement.

Significant Market Means a Direct Replication Significant Market.

Description of the Shares

Class	**"1C"**
ISIN Code	IE0007WJ6B10
German Security Identification Number (WKN)	DBX0SN
Currency	USD
Launch Date	18 January 2023
Minimum Initial Investment Amount	USD 50,000
Minimum Additional Investment Amount	USD 50,000
Minimum Redemption Amount	USD 50,000
Currency hedged Share class	No

Fees and Expenses

[83] In the case that a Significant Market is closed for trading or settlement on any Business Day during the period between the relevant Transaction Day and the expected settlement date (inclusive), and/or settlement in the base currency of the Fund is not available on the expected settlement date, there may be corresponding delays to the settlement times indicated in this Supplement subject to the regulatory limit on settlement periods of 10 Business Days from the Cut-off Time. Earlier or later times may be determined by the Management Company at its discretion, whereby notice will be given on www.Xtrackers.com

Class	**“1C”**
Management Company Fee	Up to 0.20% per annum
Platform Fee	Up to 0.15% per annum
All-in Fee	Up to 0.35% per annum
Primary Market Transaction Costs	Applicable
Transaction Costs	Applicable
Anticipated Tracking Error	Up to 1.00% per annum

This section headed "Fees and Expenses" should be read in conjunction with the section headed "Fees and Expenses" in the Prospectus.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is based on the MSCI ACWI IMI Index (the "**Parent Index**"), which is administered by MSCI Limited (the "**Index Administrator**"). The Parent Index includes large, medium, and small-capitalisation companies across developed and emerging markets globally. Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 6 (ensure availability and sustainable management of water and sanitation for all) ("**SDG 6**") of the United Nations 2030 Agenda for Sustainable Development ("**UN 2030 Agenda**"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("**SDGs**") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

- Are unrated by MSCI ESG Research;
- Are assigned an MSCI ESG Rating of 'B' and below;
- Have any tie to controversial weapons;
- Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
- Fail to comply with the United Nations Global Compact principles;
- Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
- Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("**BISR"**) aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 6. Companies that meet a certain revenue threshold from business activities associated with SDG 6 are selected ("**SDG 6 Aligned Business Activities**"). Such SDG 6 Aligned Business Activities may include, but are not limited to:

- Sustainable water;
- Sanitation; and
- Sustainable agriculture.

SDG Thematic Selection

Constituents from the Parent Index which (i) *pass* the ESG exclusions criteria outlined above, but (ii) *do not pass* the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Water Index (the "**Thematic Parent Index**"*)*. Constituents' exposure to the theme of water (the "**Theme**"), which consists of business activities such as; water supply, water treatment, water utilities, and water-related equipment is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:

- Business segment information from company annual reports and third-party data sources; and
- Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Additionally, all companies from the Global Industry Classification Standard (GICS) subindustry 'water utility' and companies that meet a certain sustainable water revenue threshold are also eligible for inclusion. Constituents that do not have any revenue that contributes to SDG 6 are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:

- Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 6 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%.
- Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted according to their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

The Reference Index includes (i) an issuer capping component, limiting the weight of each issuer to 4.5% at each quarterly index rebalance, and (ii) a minimum weight filter, that excludes securities which would otherwise have comprised a very small percentage of the Reference Index in order to aid replication of the Reference Index.

The Reference Index is reviewed on a semi-annual basis and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of applicable withholding tax.

The Reference Index is calculated in US Dollars on a daily basis.

Further Information

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

IMPORTANT

XTRACKERS MSCI GLOBAL CLEAN WATER & SANITATION UCITS ETF (AN "**MSCI SUB-FUND**") IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI INC. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR AN MSCI SUB-FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

SUPPLEMENT 65: Xtrackers MSCI Global SDG 7 Affordable and Clean Energy UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to the Xtrackers MSCI Global SDG 7 Affordable and Clean Energy UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus") and the first addendum to the Prospectus dated 1 December 2023 (the "Addendum")), and must be read in conjunction with, the Prospectus and the Addendum.

An Investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Xtrackers (IE) plc

Dated 3 March 2025

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 7 (Ensure access to affordable, reliable, sustainable and modern energy for all), of the United Nations 2030 Agenda for Sustainable Development.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track, before fees and expenses, the performance of the MSCI ACWI IMI SDG 7 Affordable and Clean Energy Select Index (the "**Reference Index**"), by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*").

The Fund is managed according to a passive approach and is a Full Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus. Underlying Securities may include direct investment in China A Shares through Stock Connect as further described below.

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the Prospectus.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Stock Connect

Under Stock Connect, overseas investors (including the Fund) may be allowed, subject to rules and regulations issued/amended from time to time, to directly trade certain eligible A-shares through the so-called Northbound Trading Links (see below).

Stock Connect currently comprises the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect. The Shanghai-Hong Kong Stock Connect is a securities trading and clearing links program developed by Hong Kong Exchanges and Clearing Limited ("**HKEx**"), China Securities Depository and Clearing Corporation Limited ("**ChinaClear**") and the Shanghai Stock Exchange ("**SSE**"), with an aim to achieve mutual stock market access between Shanghai and Hong Kong. Similarly, the Shenzhen-Hong Kong Stock Connect is a securities trading clearing links program developed by HKEx, ChinaClear and the Shenzhen Stock Exchange ("**SZSE**"), with an aim to achieve mutual stock market access between Shenzhen and Hong Kong.

Stock Connect comprises two Northbound Trading Links (for investment in A-shares), one between SSE and The Stock Exchange of Hong Kong Limited ("**SEHK**"), and the other between SZSE and SEHK. Investors may place orders to trade eligible A-shares listed on SSE (such securities, "**SSE Securities**") or on SZSE (such securities, "**SZSE Securities**", and SSE Securities and SZSE Securities collectively, "**Stock Connect Securities**") through their Hong Kong brokers, and such orders will be routed by the relevant securities trading service company established by the SEHK to the relevant trading platform of SSE or SZSE, as the case may be, for matching and execution on SSE or SZSE, as the case may be.

The SSE Securities include all the constituent stocks of the SSE 180 Index and the SSE 380 Index, and all the SSE-listed A-shares that are not included as constituent stocks of the relevant indices but which have corresponding H-Shares listed on SEHK, except (i) those SSE-listed shares which are not traded in Renminbi ("**RMB**") and (ii) those SSE-listed shares which are under "risk alert".

The SZSE Securities include all the constituent stocks of the SZSE Component Index and the SZSE Small/Mid Cap Innovation Index which have a market capitalisation of not less than RMB 6 billion and all the SZSE-listed A-shares which have corresponding H-Shares listed on SEHK, except (i) those SZSE-listed shares which are not traded in RMB and (ii) those SZSE-listed shares which are under "risk alert".

The list of eligible securities may be changed subject to the review and approval by the relevant regulators in the People's Republic of China ("**PRC**") from time to time.

Further information about Stock Connect is available online at the website: https://www.hkex.com.hk/mutual-market/stock-connect?sc_lang=en

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities under the conditions and within the limits laid down by the Central Bank from time to time and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "**Use of Derivatives by Direct Investment Funds**" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Further, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund and provided that such borrowing is for temporary purposes only. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Emerging Markets

Investors in the Fund should be aware of the following risks associated with an investment in emerging markets:

(oo) *Emerging Market Risk*: Investments in the market to which the Reference Index relates are currently exposed to risks pertaining to emerging markets generally. These include risks brought about by investment ceiling limits where foreign investors are subject to certain holding limits and constraints imposed on trading of listed securities where a registered foreign investor may only maintain a trading account with one licensed securities company in the relevant market. These may contribute to the illiquidity of the relevant securities market, as well as create inflexibility and uncertainty as to the trading environment.

(pp) *Legal Risk*: The economies of most emerging markets are often less developed than those of other geographic regions such as the United States and Europe. The laws and regulations affecting these economies are also in a relatively early stage of development and are not as well established as the laws and regulations of developed countries. Such countries' securities laws and regulations may still be in their development stages and not drafted in a very concise manner which may be subject to interpretation. In the event of a securities related dispute involving a foreign party, the laws of these countries would typically apply (unless an applicable international treaty provides otherwise). The court systems of these nations may not be as transparent and effective as court systems in more developed countries or territories and there can be no assurance of obtaining effective enforcement of rights through legal proceedings and generally the judgements of foreign courts are often not recognised.

(qq) *Regulatory Risk:* Foreign investment in emerging economies' primary and secondary securities markets is often still relatively new and much of the relevant securities laws may be ambiguous and/or have been developed to regulate direct investment by foreigners rather than portfolio investment. Investors should note that because of a lack of precedent, securities market laws and the regulatory environment for primary and secondary market investments by foreign investors can be in the early stages of development, and may, in some jurisdictions, remain untested. The regulatory framework of the emerging economies' primary and secondary securities markets is often in the development stage compared to many of the world's leading stock markets, and accordingly there may be a lower level of regulatory monitoring of the activities of the emerging economies' primary and secondary securities markets.

(rr) *Foreign Exchange Risk*: Some currencies of emerging markets are controlled. Investors should note the risks of limited liquidity in certain foreign exchange markets.

(ss) *Trading Volumes and Volatility*: Often emerging market stock exchanges are smaller and have lower trading volumes and shorter trading hours than most OECD exchanges and the market capitalisations of listed companies are small compared to those on more developed exchanges in developed markets. The listed equity securities of many companies on such exchanges are accordingly materially less liquid, subject to greater dealer spreads and experience materially greater volatility than those of OECD countries. Many such exchanges have, in the past, experienced substantial price volatility and no assurance can be given that such volatility will not occur in the future. The above factors could negatively affect the Net Asset Value of the Fund.

(tt) *Taxation risk*: The Fund may invest in jurisdictions where the tax regime is not fully developed or is not sufficiently certain, and as such changes to the tax policies may be implemented without any prior notice and may also apply retrospectively. Any changes in tax policies may reduce the after-taxation returns of the underlying assets to which the performance of the Fund is linked to.

(uu) *Restricted markets risk*: The Fund may invest in markets in respect of which the local government imposes limitations or restrictions on foreign ownership or holdings. In order to access such markets, the Fund may use instruments such as American depositary receipts (**ADRs**), global depositary receipts (**GDRs**), non-voting depositary receipts (**NVDRs**) or P-Notes in order to gain exposure to equity securities instead of using physical securities where, due to such local restrictions or quota limitations, it is not possible to hold these directly. Such legal and regulatory restrictions or limitations may have adverse effects on the liquidity and performance of the Fund holdings as compared to the performance of the Reference Index. This may increase the risk of tracking error and, at worst, the Fund may not be able to achieve its investment objective and/or the Fund may have to be closed to further subscriptions.

(vv) *Liquidity Risk:* Primary market-investors should be aware that it may take up to nine Business Days following the Transaction Day to receive the proceeds of redemptions requests.

Stock Connect Risks

Investors in the Fund should be aware of the following risks associated with an investment in through Stock Connect:

(s) *Quota limitations risk:* Stock Connect is subject to daily quota limitations on investment, which may restrict the Fund's ability to invest in A-shares through Stock Connect on a timely basis, and the Fund may not be able to effectively pursue its investment policy.

(t) *Suspension risk:* SEHK, SSE and SZSE reserve the right to suspend trading if necessary for ensuring an orderly and fair market and managing risks prudently which would adversely affect the Fund's ability to access the PRC market.

(u) *Differences in trading day:* Stock Connect operates on days when both the relevant PRC market and the Hong Kong market are open for trading and when banks in the relevant PRC market and the Hong Kong market are open on the corresponding settlement days. It is possible that there are occasions when it is a normal trading day for the relevant PRC market but Hong Kong and overseas investors (such as the Fund) cannot carry out any A-shares trading via Stock Connect. As a result, the Fund may be subject to a risk of price fluctuations in A-shares during the time when Stock Connect is not trading.

(v) *Restrictions on selling imposed by front-end monitoring*: PRC regulations require that before an investor sells any share, there should be sufficient shares in the account; otherwise SSE or SZSE (as the case may be) will reject the sell order concerned. SEHK will carry out pre-trade checking on A-shares sell orders of its participants (i.e. the stock brokers) to ensure there is no over-selling.

(w) *Clearing, settlement and custody risks:* The Hong Kong Securities Clearing Company Limited (the "**HKSCC**", which is a wholly owned subsidiary of HKEx) and ChinaClear establish the clearing links and each is a participant of each other to facilitate clearing and settlement of cross-boundary trades. As the national central counterparty of the PRC's securities market, ChinaClear operates a comprehensive network of clearing, settlement and stock holding infrastructure. ChinaClear has established a risk management framework and measures that are approved and supervised by the CSRC. The chances of a ChinaClear default are considered to be remote. Should the event of a ChinaClear default occur and ChinaClear be declared as a defaulter, HKSCC will in good faith, seek recovery of the outstanding stocks and monies from ChinaClear through available legal channels or through ChinaClear's liquidation. In that event, the Fund may suffer delay in the recovery process or may not be able to fully recover its losses from ChinaClear.

A-shares are issued in scripless form, so there will be no physical certificates of title representing the interests of the Fund in any A-shares. Hong Kong and overseas investors, such as the Fund, who have acquired Stock Connect Securities through Northbound Trading Links should maintain Stock Connect Securities with their brokers' or custodians' stock accounts with the Central Clearing and Settlement System operated by HKSCC for the clearing securities listed or traded on SEHK. Further information on the custody set-up relating to Stock Connect is available upon request at the registered office of the Management Company.

(x) *Operational risk:* Stock Connect provides a channel for investors from Hong Kong and overseas, such as the Fund, to access the China stock market directly. The securities regimes and legal systems of the two markets differ significantly and in order for the platform to operate, market participants may need to address issues arising from the differences on an on-going basis.

Stock Connect is premised on the functioning of the operational systems of the relevant market participants. Market participants are able to participate in this program subject to meeting certain information technology capability, risk management and other requirements as may be specified by the relevant exchange and/or clearing house.

Further, the "connectivity" in the Stock Connect program requires routing of orders across the border. This requires the development of new information technology systems on the part of the SEHK and exchange participants (i.e. an order routing system ("**China Stock Connect System**") set up by SEHK to which exchange participants need to connect). There is no assurance that the systems of the SEHK and market participants will function properly or will continue to be adapted to changes and developments in both markets. In the event that the relevant systems fail to function properly, trading in both markets through the program could be disrupted. The Fund's ability to access the A-share market (and hence to pursue its investment strategy) will be adversely affected.

(y) *Nominee arrangements in holding A-shares:* HKSCC is the "nominee holder" of the Stock Connect Securities acquired by overseas investors (including the Fund) through Stock Connect. The CSRC Stock Connect Rules expressly provide that investors enjoy the rights and benefits of the Stock Connect Securities acquired through Stock Connect in accordance with applicable laws. CSRC has also made statements dated 15 May 2015 and 30 September 2016 that overseas investors that hold Stock Connect Securities through HKSCC are entitled to proprietary interests in such securities as shareholders. However, it is still possible that the courts in the PRC may consider that any nominee or custodian as registered holder of Stock Connect Securities would have full ownership thereof, and that even if the concept of beneficial ownership is recognized under PRC law those Stock Connect Securities would form part of the pool of assets of such entity available for distribution to creditors of such entities and/or that a beneficial owner may have no rights whatsoever in respect thereof. Consequently, the Fund and the Depositary cannot ensure that the Fund's ownership of these securities or title thereto is assured in all circumstances.

Under the rules of the Central Clearing and Settlement System operated by HKSCC for the clearing of securities listed or traded on SEHK, HKSCC as nominee holder shall have no obligation to take any legal action or court proceeding to enforce any rights on behalf of the investors in respect of the Stock Connect Securities in the PRC or elsewhere. Therefore, although the relevant Fund's ownership may be ultimately recognised, the Fund may suffer difficulties or delays in enforcing their rights in A-shares.

To the extent that HKSCC is deemed to be performing safekeeping functions with respect to assets held through it, it should be noted that the Depositary and the Fund will have no legal relationship with HKSCC and no direct legal recourse against HKSCC in the event that the Fund suffers losses resulting from the performance or insolvency of HKSCC.

As a beneficial owner the Fund will not have the right to attend shareholder meetings or appoint proxies to do so on its behalf.

(z) *Investor compensation*: Investments of the Fund through Stock Connect will not be covered by Hong Kong's Investor Compensation Fund. Hong Kong's Investor Compensation Fund is established to pay compensation to investors of any nationality who suffer pecuniary losses as a result of default of a licensed intermediary or authorised financial institution in relation to exchange-traded products in Hong Kong.

Since Northbound trading via Stock Connect does not involve products listed or traded in SEHK or Hong Kong Futures Exchange Limited, such trading will not be covered by the Investor Compensation Fund. On the other hand, since the Fund is carrying out Northbound trading through securities brokers in Hong Kong but not PRC brokers, it is not protected by the China Securities Investor Protection Fund in the PRC.

(aa) *Trading costs:* In addition to paying trading fees and stamp duties in connection with A-share trading, the Fund may be subject to new portfolio fees, dividend tax and tax concerned with income arising from stock trades which are yet to be determined by the relevant authorities.

(bb) *Regulatory risk:* Stock Connect is relatively novel in nature and is subject to regulations promulgated by regulatory authorities and implementation rules made by the stock exchanges in the PRC and Hong Kong. Further, new regulations may be promulgated from time to time by the regulators in connection with operations and cross-border legal enforcement in connection with cross-border trades under Stock Connect. The regulations are untested so far and there is no certainty as to how they will be applied. Moreover, the current regulations are subject to change. There can be no assurance that Stock Connect will not be abolished. The Fund which may invest in the PRC markets through Stock Connect may be adversely affected as a result of such changes.

Concentration of the Reference Index

The market which the Reference Index seeks to represent has a high concentration to one or more sectors. Therefore, investors should be aware that changes in the conditions affecting the concentrated sector or sectors may have an adverse impact on the performance of the Reference Index and the portfolio of transferable securities and eligible assets held by the Fund.

Environmental, Social and Governance Standards

The Reference Index's environmental, social and governance standards limit the number of securities eligible for inclusion in the Reference Index. As a result, the Reference Index, and as such the Fund, may be more heavily weighted in securities, industry sectors or countries that underperform the market as a whole or underperform other funds screened for environmental, social and governance standards, or which do not screen for such standards.

Investors should note that the determination that the Fund is subject to the disclosure requirements of a financial product under Article 8(1) of SFDR is made solely on the basis that the Reference Index promotes environmental and social characteristics. The Company is relying on the activities conducted by and information provided by the Index Administrator or other data providers (as further described under the heading "General Description of the Underlying Asset", where applicable) to make this determination. Neither the Company, nor any of its service providers, makes any representation or otherwise as to the suitability of the Reference Index and the Fund in meeting an investor's criteria on minimum environmental, social and governance ("**ESG**") standards or otherwise. Investors are advised to carry out their own review as to whether the Reference Index and the Fund accords with their own ESG criteria. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Underlying Asset".

Investors should note that whilst the Fund and the Reference Index seek to ensure compliance with the criteria outlined under “General Description of the Underlying Asset” at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the Fund until it is possible and practicable to divest such positions.

Sustainability Data Risks

Investors should note that the Reference Index solely relies on analysis from the Index Administrator or other data providers (as applicable) in relation to sustainability considerations. Neither the Company, nor any of its service providers, makes any representation with respect to the accuracy, reliability, correctness of the sustainability related data or the way that these are implemented.

It should also be noted that analysis of companies’ ESG performance may be based on models, estimates and assumptions. This analysis should not be taken as an indication or guarantee of current or future performance.

ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Index Administrator or other data providers (as applicable) may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the Reference Index and therefore the portfolio of the Fund.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

The Fund does not intend to make dividend payments.

General Information Relating to the Fund

Base Currency	USD
Cut-off Time	Means 4:30 p.m. Dublin time on the Business Day before the relevant Transaction Day
Fund Classification (InvStG)	Equity Fund, target minimum percentage of 70%.
Minimum Fund Size	USD 50,000,000
Settlement Date	Means up to nine Business Days following the Transaction Day[84]
Securities Lending	No
Transparency under SFDR	The Fund promotes, among other characteristics, environmental and social characteristics and is subject to the disclosure requirements of a financial product under Article 8(1) of SFDR. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Reference Index". Please also refer to "Environmental, Social and Governance Standards" under "Specific Risk Warning" above, to the section entitled "Sustainability-related disclosures under SFDR and EU Taxonomy Regulation" set out in the Prospectus and the annex to this Supplement.

[84] In the case that a Significant Market is closed for trading or settlement on any Business Day during the period between the relevant Transaction Day and the expected settlement date (inclusive), and/or settlement in the base currency of the Fund is not available on the expected settlement date, there may be corresponding delays to the settlement times indicated in this Supplement subject to the regulatory limit on settlement periods of 10 Business Days from the Cut-off Time. Earlier or later times may be determined by the Management Company at its discretion, whereby notice will be given on www.Xtrackers.com

Significant Market Means a Direct Replication Significant Market.

Primary Market Transaction Costs	Applicable
Transaction Costs	Applicable
Anticipated Tracking Error	Up to 1.00% per annum

This section headed "Fees and Expenses" should be read in conjunction with the section headed "Fees and Expenses" in the Prospectus.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is based on the MSCI ACWI IMI Index (the "**Parent Index**"), which is administered by MSCI Limited (the "**Index Administrator**"). The Parent Index includes large, medium, and small-capitalisation companies across developed and emerging markets globally. Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 7 (Ensure access to affordable, reliable, sustainable and modern energy for all) ("**SDG 7**") of the United Nations 2030 Agenda for Sustainable Development ("**UN 2030 Agenda**"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("**SDGs**") contained in the UN 2030 Agenda is available on: https://sdgs.un.org.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

- Are unrated by MSCI ESG Research;
- Are assigned an MSCI ESG Rating of 'B' and below;
- Have any tie to controversial weapons;
- , fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
- Fail to comply with the United Nations Global Compact principles;
- Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
- Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("**BISR"**) aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics and MSCI Climate Change Metrics for their exposure to products and services which aim to contribute positively to SDG 7. Companies that meet a certain revenue threshold from business activities associated with SDG 7 are selected ("**SDG 7 Aligned Business Activities**"). Such SDG 7 Aligned Business Activities may include, but are not limited to:

- Alternative energy;
- Demand-side management;
- Smart grids;
- Other energy storage; and
- Hydro power generation.

SDG Thematic Selection

Constituents from the Parent Index which (i) *pass* the ESG exclusions criteria outlined above, but (ii) *do not* pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Clean Energy Infrastructure Index (the "**Thematic Parent Index**"*)*. Constituents' exposure to the theme of clean energy, which consists of business activities related to clean energy such as batteries, smart grids, and future fuels and technology (the "**Sub-Themes**") is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Sub-Themes and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:

- Business segment information from company annual reports and third-party data sources; and
- Descriptions of companies' activities from publicly available sources.

A combined relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Additionally, securities which correspond to certain Global Industry Classification Standard (GICS) sectors and sub-industries are removed from the eligible universe. Constituents that do not have any revenue that contributes to SDG 7 are also excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:

- Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 7 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%.
- Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their combined relevance score and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

The Reference Index includes (i) an issuer capping component, limiting the weight of each issuer to 4.5% at each quarterly index rebalance, and (ii) a minimum weight filter, that excludes securities which would otherwise have comprised a very small percentage of the Reference Index in order to aid replication of the Reference Index.

The Reference Index is reviewed on a semi-annual basis and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of applicable withholding tax.

The Reference Index is calculated in US Dollars on a daily basis.

Further Information

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

IMPORTANT

XTRACKERS MSCI GLOBAL SDG 7 AFFORDABLE AND CLEAN ENERGY UCITS ETF (AN "**MSCI SUB-FUND**") IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI INC. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

SUPPLEMENT 66: Xtrackers MSCI Global SDGs UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to the Xtrackers MSCI Global SDGs UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus") and the first addendum to the Prospectus dated 1 December 2023 (the "Addendum")), and must be read in conjunction with, the Prospectus and the Addendum.

Xtrackers (IE) plc

Dated 3 March 2025

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of the shares of companies that are associated with a positive contribution to the 17 Sustainable Development Goals of the United Nations 2030 Agenda for Sustainable Development.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track, before fees and expenses, the performance of the MSCI ACWI IMI SDG Impact Select Index (the "**Reference Index**"), by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*").

The Fund is managed according to a passive approach and is a Full Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus. Underlying Securities may include direct investment in China A Shares through Stock Connect. Further information about Stock Connect is available online at the website: https://www.hkex.com.hk/mutual-market/stock-connect?sc_lang=en

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the Prospectus.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities under the conditions and within the limits laid down by the Central Bank from time to time and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "Use of Derivatives by Direct Investment Funds" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund’s FDI positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund’s global exposure and to ensure that the Fund’s use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund’s Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Further, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund and provided that such borrowing is for temporary purposes only. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Emerging Markets

Investors in the Fund should be aware of the following risks associated with an investment in emerging markets:

(ww) *Emerging Market Risk*: Investments in the market to which the Reference Index relates are currently exposed to risks pertaining to emerging markets generally. These include risks brought about by investment ceiling limits where foreign investors are subject to certain holding limits and constraints imposed on trading of listed securities where a registered foreign investor may only maintain a trading account with one licensed securities company in the relevant market. These may contribute to the illiquidity of the relevant securities market, as well as create inflexibility and uncertainty as to the trading environment.

(xx) *Legal Risk*: The economies of most emerging markets are often less developed than those of other geographic regions such as the United States and Europe. The laws and regulations affecting these economies are also in a relatively early stage of development and are not as well established as the laws and regulations of developed countries. Such countries' securities laws and regulations may still be in their development stages and not drafted in a very concise manner which may be subject to interpretation. In the event of a securities related dispute involving a foreign party, the laws of these countries would typically apply (unless an applicable international treaty provides otherwise). The court systems of these nations may not be as transparent and effective as court systems in more developed countries or territories and there can be no

assurance of obtaining effective enforcement of rights through legal proceedings and generally the judgements of foreign courts are often not recognised.

(yy) *Regulatory Risk:* Foreign investment in emerging economies' primary and secondary securities markets is often still relatively new and much of the relevant securities laws may be ambiguous and/or have been developed to regulate direct investment by foreigners rather than portfolio investment. Investors should note that because of a lack of precedent, securities market laws and the regulatory environment for primary and secondary market investments by foreign investors can be in the early stages of development, and may, in some jurisdictions, remain untested. The regulatory framework of the emerging economies' primary and secondary securities markets is often in the development stage compared to many of the world's leading stock markets, and accordingly there may be a lower level of regulatory monitoring of the activities of the emerging economies' primary and secondary securities markets.

(zz) *Foreign Exchange Risk*: Some currencies of emerging markets are controlled. Investors should note the risks of limited liquidity in certain foreign exchange markets.

(aaa) *Trading Volumes and Volatility*: Often emerging market stock exchanges are smaller and have lower trading volumes and shorter trading hours than most OECD exchanges and the market capitalisations of listed companies are small compared to those on more developed exchanges in developed markets. The listed equity securities of many companies on such exchanges are accordingly materially less liquid, subject to greater dealer spreads and experience materially greater volatility than those of OECD countries. Many such exchanges have, in the past, experienced substantial price volatility and no assurance can be given that such volatility will not occur in the future. The above factors could negatively affect the Net Asset Value of the Fund.

(bbb) *Taxation risk*: The Fund may invest in jurisdictions where the tax regime is not fully developed or is not sufficiently certain, and as such changes to the tax policies may be implemented without any prior notice and may also apply retrospectively. Any changes in tax policies may reduce the after-taxation returns of the underlying assets to which the performance of the Fund is linked to.

(ccc) *Restricted markets risk*: The Fund may invest in markets in respect of which the local government imposes limitations or restrictions on foreign ownership or holdings. In order to access such markets, the Fund may use instruments such as American depositary receipts (**ADRs**), global depositary receipts (**GDRs**), non-voting depositary receipts (**NVDRs**) or P-Notes in order to gain exposure to equity securities instead of using physical securities where, due to such local restrictions or quota limitations, it is not possible to hold these directly. Such legal and regulatory restrictions or limitations may have adverse effects on the liquidity and performance of the Fund holdings as compared to the performance of the Reference Index. This may increase the risk of tracking error and, at worst, the Fund may not be able to achieve its investment objective and/or the Fund may have to be closed to further subscriptions.

(ddd) *Liquidity Risk:* Primary market-investors should be aware that it may take up to nine Business Days following the Transaction Day to receive the proceeds of redemptions requests.

Concentration of the Reference Index

The market which the Reference Index seeks to represent has a high concentration to one or more sectors. Therefore, investors should be aware that changes in the conditions affecting the concentrated sector or sectors may have an adverse impact on the performance of the Reference Index and the portfolio of transferable securities and eligible assets held by the Fund.

Environmental, Social and Governance Standards

The Reference Index's environmental, social and governance standards limit the number of securities eligible for inclusion in the Reference Index. As a result, the Reference Index, and as such the Fund, may be more heavily weighted in securities, industry sectors or countries that underperform the market as a whole or underperform other funds screened for environmental, social and governance standards, or which do not screen for such standards.

Investors should note that the determination that the Fund is subject to the disclosure requirements of a financial product under Article 8(1) of SFDR is made solely on the basis that the Reference Index promotes environmental and social characteristics. The Company is relying on the activities conducted by and information provided by the Index Administrator or other data providers (as further described under the heading "General Description of the Underlying Asset", where applicable) to make this determination. Neither the Company, nor any of its service providers, makes any representation or otherwise as to the suitability of the Reference Index and the Fund in meeting an investor's criteria on minimum environmental, social and governance ("**ESG**") standards or otherwise. Investors are advised to carry out their own review as to whether the Reference Index and the Fund accords with their own ESG criteria. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Underlying Asset".

Investors should note that whilst the Fund and the Reference Index seek to ensure compliance with the criteria outlined under "General Description of the Underlying Asset" at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the Fund until it is possible and practicable to divest such positions.

Sustainability Data Risks

Investors should note that the Reference Index solely relies on analysis from the Index Administrator or other data providers (as applicable) in relation to sustainability considerations. Neither the Company, nor any of its service providers, makes any representation with respect to the accuracy, reliability, correctness of the sustainability related data or the way that these are implemented.

It should also be noted that analysis of companies' ESG performance may be based on models, estimates and assumptions. This analysis should not be taken as an indication or guarantee of current or future performance.

ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Index Administrator or other data providers (as applicable) may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the Reference Index and therefore the portfolio of the Fund.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

The Fund does not intend to make dividend payments.

General Information Relating to the Fund

Base Currency	USD
Cut-off Time	Means 4:30 p.m. Dublin time on the Business Day before the relevant Transaction Day
Fund Classification (InvStG)	Equity Fund, target minimum percentage of 80%.
Minimum Fund Size	USD 50,000,000

Settlement Date Means up to nine Business Days following the Transaction Day[85]

Securities Lending No

Transparency under SFDR The Fund promotes, among other characteristics, environmental and social characteristics and is subject to the disclosure requirements of a financial product under Article 8(1) of SFDR. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Reference Index". Please also refer to "Environmental, Social and Governance Standards" under "Specific Risk Warning" above, to the section entitled "Sustainability-related disclosures under SFDR and EU Taxonomy Regulation" set out in the Prospectus and the annex to this Supplement.

Significant Market Means a Direct Replication Significant Market.

Fees and Expenses

[85] In the case that a Significant Market is closed for trading or settlement on any Business Day during the period between the relevant Transaction Day and the expected settlement date (inclusive), and/or settlement in the base currency of the Fund is not available on the expected settlement date, there may be corresponding delays to the settlement times indicated in this Supplement subject to the regulatory limit on settlement periods of 10 Business Days from the Cut-off Time. Earlier or later times may be determined by the Management Company at its discretion, whereby notice will be given on www.Xtrackers.com

Class	**“1C”**
Management Company Fee	Up to 0.20% per annum
Platform Fee	Up to 0.15% per annum
All-in Fee	Up to 0.35% per annum
Primary Market Transaction Costs	Applicable
Transaction Costs	Applicable
Anticipated Tracking Error	Up to 1.00% per annum

This section headed "Fees and Expenses" should be read in conjunction with the section headed "Fees and Expenses" in the Prospectus.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is based on the MSCI ACWI IMI Index (the "**Parent Index**"), which is administered by MSCI Limited (the "**Index Administrator**"). The Parent Index includes large, medium, and small-capitalisation companies across developed and emerging markets globally. Constituents of the Parent Index which are associated with a positive contribution to the 17 Sustainable Development Goals ("**SDGs**") of the United Nations 2030 Agenda for Sustainable Development ("**UN 2030 Agenda**"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the SDGs contained in the UN 2030 Agenda is available on: https://sdgs.un.org.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

- Are unrated by MSCI ESG Research;
- Are assigned an MSCI ESG Rating of 'B' and below;
- Have any tie to controversial weapons;
- Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
- Fail to comply with the United Nations Global Compact principles;
- Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
- Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("**BISR**") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics, MSCI Climate Change Metrics, and MSCI BISR for their exposure to products and services which aim to contribute positively to the SDGs. Companies that meet a certain revenue threshold (the "**SDG Revenue**") from business activities associated with the SDGs ("**SDG Aligned Business Activities**") are included in the selection universe ("**Selection Universe**"). Such SDG Aligned Business Activities may include, but are not limited to:

- Alternative energy;
- Hydro power generation;

- Energy efficiency;
- Green building;
- Sustainable water;
- Pollution prevention;
- Sustainable agriculture;
- Nutrition;
- Major disease treatment;
- Sanitation;
- Contraceptives;
- Affordable real estate;
- SME finance;
- Education; and
- Connectivity.

Constituents in the Selection Universe are assigned to a Global Industry Classification Standard (GICS) sector and are ranked according to their SDG Revenue. A certain threshold of top-ranking constituents from each GICS sector are selected for inclusion. For GICS sectors that have less constituents than the threshold, all securities are selected for inclusion.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted by the product of their percentage of SDG Revenue and their free float-adjusted market capitalisation.

The Reference Index includes (i) an issuer capping component, limiting the weight of each issuer to 4.5% at each quarterly index rebalance, (ii) a minimum weight filter, that excludes securities which would otherwise have comprised a very small percentage of the Reference Index in order to aid replication of the Reference Index, and (iii) a GICS sector capping component, limiting the weight of all constituents assigned to a GICS sector to 20% per GICS sector.

The Reference Index is reviewed on a semi-annual basis and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of applicable withholding tax.

The Reference Index is calculated in US Dollars on a daily basis.

Further Information

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

IMPORTANT

UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

SUPPLEMENT 67: Xtrackers MSCI Global Social Fairness Contributors UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to the Xtrackers MSCI Global Social Fairness Contributors UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus") and the first addendum to the Prospectus dated 1 December 2023 (the "Addendum")), and must be read in conjunction with, the Prospectus and the Addendum.

An Investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Xtrackers (IE) plc

Dated 3 March 2025

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of the shares of companies that are associated with a positive contribution to the Sustainable Development Goals which aim to ensure social fairness, including SDG 1, SDG 2, SDG 4, SDG 5, SDG 8, and SDG 10 (the "**Social Fairness SDGs**") of the United Nations 2030 Agenda for Sustainable Development (the "**UN 2030 Agenda**").

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track, before fees and expenses, the performance of the MSCI ACWI IMI SDG Social Fairness Select Index the "**Reference Index**"), by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*").

The Fund is managed according to a passive approach and is a Full Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus. Underlying Securities may include direct investment in China A Shares through Stock Connect. Further information about Stock Connect is available online at the website: HKEX (https://www.hkex.com.hk/?sc_lang=en)

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the

Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the Prospectus.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Board of Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities under the conditions and within the limits laid down by the Central Bank from time to time and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "Use of Derivatives by Direct Investment Funds" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

The Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Emerging Markets

Investors in the Fund should be aware of the following risks associated with an investment in emerging markets:

(eee) *Emerging Market Risk*: Investments in the market to which the Reference Index relates are currently exposed to risks pertaining to emerging markets generally. These include risks brought about by investment ceiling limits where foreign investors are subject to certain holding limits and constraints imposed on trading of listed securities where a registered foreign investor may only maintain a trading account with one licensed securities company in the relevant market. These may contribute to the illiquidity of the relevant securities market, as well as create inflexibility and uncertainty as to the trading environment.

(fff) *Legal Risk*: The economies of most emerging markets are often less developed than those of other geographic regions such as the United States and Europe. The laws and regulations affecting these economies are also in a relatively early stage of development and are not as well established as the laws and regulations of developed countries. Such countries' securities laws and regulations may still be in their development stages and not drafted in a very concise manner which may be subject to interpretation. In the event of a securities related dispute involving a foreign party, the laws of these countries would typically apply (unless an applicable international treaty provides otherwise). The court systems of these nations may not be as transparent and effective as court systems in more developed countries or territories and there can be no assurance of obtaining effective enforcement of rights through legal proceedings and generally the judgements of foreign courts are often not recognised.

(ggg) *Regulatory Risk:* Foreign investment in emerging economies' primary and secondary securities markets is often still relatively new and much of the relevant securities laws may be ambiguous and/or have been developed to regulate direct investment by foreigners rather than portfolio investment. Investors should note that because of a lack of precedent, securities market laws and the regulatory environment for primary and secondary market investments by foreign investors can be in the early stages of development, and may, in some jurisdictions, remain untested. The regulatory framework of the emerging economies' primary and secondary securities markets is often in the development stage compared to many of the world's leading stock markets, and accordingly there may be a lower level of regulatory monitoring of the activities of the emerging economies' primary and secondary securities markets.

(hhh) *Foreign Exchange Risk*: Some currencies of emerging markets are controlled. Investors should note the risks of limited liquidity in certain foreign exchange markets.

(iii) *Trading Volumes and Volatility*: Often emerging market stock exchanges are smaller and have lower trading volumes and shorter trading hours than most OECD exchanges and the market capitalisations of listed companies are small compared to those on more developed exchanges in developed markets. The listed equity securities of many companies on such exchanges are accordingly materially less liquid, subject to greater dealer spreads and experience materially greater volatility than those of OECD countries. Many such exchanges have, in the past, experienced substantial price volatility and no assurance can be given that such volatility will not occur in the future. The above factors could negatively affect the Net Asset Value of the Fund.

(jjj) *Taxation risk*: The Fund may invest in jurisdictions where the tax regime is not fully developed or is not sufficiently certain, and as such changes to the tax policies may be implemented without any

prior notice and may also apply retrospectively. Any changes in tax policies may reduce the after-taxation returns of the underlying assets to which the performance of the Fund is linked to.

(kkk) *Restricted markets risk*: The Fund may invest in markets in respect of which the local government imposes limitations or restrictions on foreign ownership or holdings. In order to access such markets, the Fund may use instruments such as American depositary receipts (**ADRs**), global depositary receipts (**GDRs**), non-voting depositary receipts (**NVDRs**) or P-Notes in order to gain exposure to equity securities instead of using physical securities where, due to such local restrictions or quota limitations, it is not possible to hold these directly. Such legal and regulatory restrictions or limitations may have adverse effects on the liquidity and performance of the Fund holdings as compared to the performance of the Reference Index. This may increase the risk of tracking error and, at worst, the Fund may not be able to achieve its investment objective and/or the Fund may have to be closed to further subscriptions.

(lll) *Liquidity Risk:* Primary market-investors should be aware that it may take up to nine Business Days following the Transaction Day to receive the proceeds of redemptions requests.

Concentration of the Reference Index

The market which the Reference Index seeks to represent has a high concentration to one or more sectors. Therefore, investors should be aware that changes in the conditions affecting the concentrated sector or sectors may have an adverse impact on the performance of the Reference Index and the portfolio of transferable securities and eligible assets held by the Fund.

Environmental, Social and Governance Standards

The Reference Index's environmental, social and governance standards limit the number of securities eligible for inclusion in the Reference Index. As a result, the Reference Index, and as such the Fund, may be more heavily weighted in securities, industry sectors or countries that underperform the market as a whole or underperform other funds screened for environmental, social and governance ("**ESG**") standards, or which do not screen for such standards.

Investors should note that the determination that the Fund is subject to the disclosure requirements of a financial product under Article 8(1) SFDR is made solely on the basis that the Reference Index promotes environmental and social characteristics. The Company is relying on the activities conducted by and information provided by the Index Administrator or other data providers (as further described under the heading "General Description of the Underlying Asset", where applicable) to make this determination. Neither the Company, nor any of its service providers, makes any representation or otherwise as to the suitability of the Reference Index and the Fund in meeting an investor's criteria on minimum ESG standards or otherwise. Investors are advised to carry out their own review as to whether the Reference Index and the Fund accords with their own ESG criteria. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Underlying Asset".

Investors should note that whilst the Fund and the Reference Index seek to ensure compliance with the criteria outlined under "General Description of the Underlying Asset" at each rebalance or review date,

between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) in the portfolio of the Fund until it is possible and practicable to divest such positions.

Sustainability Data Risks

Investors should note that the Reference Index solely relies on analysis from the Index Administrator or other data providers (as applicable) in relation to sustainability considerations. Neither the Company, nor any of its service providers, makes any representation with respect to the accuracy, reliability, correctness of the sustainability related data or the way that these are implemented.

It should also be noted that analysis of companies' ESG performance may be based on models, estimates and assumptions. This analysis should not be taken as an indication or guarantee of current or future performance.

ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Index Administrator or other data providers (as applicable) may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the Reference Index and therefore the portfolio of the Fund.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

The Fund does not intend to make dividend payments.

General Information Relating to the Fund

Base Currency	USD
Cut-off Time	Means 4:30 p.m. Dublin time on the Business Day before the relevant Transaction Day
Fund Classification (InvStG)	Equity Fund, target minimum percentage of 80%.
Minimum Fund Size	USD 50,000,000
Settlement Day	Means up to nine Settlement Days following the Transaction Day[86]
Securities Lending	No
Transparency under SFDR	The Fund promotes, among other characteristics, environmental and social characteristics and is subject to the disclosure requirements of a financial product under Article 8(1) SFDR. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Reference Index". Please also refer to "Environmental, Social and Governance Standards" under "Specific Risk Warning" above, to the section entitled "Sustainability-related disclosures under SFDR and EU Taxonomy Regulation" set out in the Prospectus and the annex to this Supplement.
Significant Market	Means a Direct Replication Significant Market.

---

86 *In the case that a Significant Market is closed for trading or settlement on any Settlement Day during the period between the relevant Transaction Day and the expected settlement date (inclusive), and/or settlement in the base currency of the Fund is not available on the expected settlement date, there may be corresponding delays to the settlement times indicated in this Supplement subject to the regulatory limit on settlement periods of 10 Business Days from the Cut-off Time. Earlier or later times may be determined by the Management Company at its discretion, whereby notice will be given on* www.Xtrackers.com

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is based on the MSCI ACWI IMI Index (the "**Parent Index**"), which is administered by MSCI Limited (the "**Index Administrator**"). The Parent Index includes large, medium, and small-capitalisation companies across developed and emerging markets globally.

Constituents of the Parent Index which are associated with a positive contribution to the Sustainable Development Goals which aim to ensure social fairness, including: SDG 1 (end poverty in all its forms everywhere), SDG 2 (end hunger, achieve food security and improved nutrition, and promote sustainable agriculture), SDG 4 (ensure inclusive and equitable quality education, and promote lifelong learning opportunities for all), SDG 5 (achieve gender equality and empower all women and girls), SDG 8 (promote sustained, inclusive, and sustainable economic growth; full and productive employment; and decent work) and SDG 10 (reduce inequality within and among countries) (the **"Social Fairness SDGs"**) of the UN 2030 Agenda, and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("**SDGs**") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

- Companies which are unrated by MSCI ESG Research;
- Companies which are assigned an MSCI ESG Rating of 'B' and below;
- Companies which have any tie to controversial weapons;
- Companies which are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
- Companies which fail to comply with the United Nations Global Compact principles;

- Companies which have an MSCI ESG Controversies score of 0, or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
- Companies which are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("**BISR"**) aims to enable institutional investors to manage ESG standards and restrictions. MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to the Social Fairness SDGs. Companies that meet a certain revenue threshold from business activities associated with the Social Fairness SDGs are selected ("**Social Fairness SDGs Aligned Business Activities**"). Such Social Fairness SDGs Aligned Business Activities may include, but are not limited to:

- Nutrition;
- Major Disease Treatment;
- Sanitation;
- Affordable Real Estate;
- Education;
- Contraceptives;
- Sustainable Agriculture;
- SME Finance; and
- Connectivity.

SDG Thematic Selection

Constituents from the Parent Index which (i) *pass* the ESG exclusions criteria outlined above, but (ii) *do not pass* the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria.

In order to assess constituents' exposure to the theme of helping promote growth, development, and safeguards for employees and communities, the Index Administrator defines a SDG management universe (the "**SDG Management Universe**"). The SDG Management Universe is constructed by using management scores of the following MSCI ESG Ratings' key issues: labour management, human capital development, supply chain labour standards, health & safety, community relations, controversial sourcing, access to finance, opportunities in nutrition & health, workforce diversity oversight & programs (the "**Key Issue Management Scores**"), in order to identify companies that have better management strategies geared towards promoting growth, development, and safeguards of key stakeholders relative to their sector peers. The workforce diversity oversight & programs key issue management score is determined by combining two separate indicators - workforce diversity oversight by management and programs to increase workforce diversity. These are converted and combined to give a key issue score.

An average management score ("**AMS**") is calculated for all companies in the Parent Index using the relevant Key Issue Management Scores. Constituents which are not assessed on any relevant key issues or do not have exposure above a certain threshold to any relevant key issues are excluded from the SDG Management Universe. A sector-relative management score ("**SRMS**") is then calculated for each company by dividing its AMS by the AMS of the highest scoring company in its Global Industry Classification Standard (**GICS**) Sector. All companies belonging to GICS Sectors where the AMS of the

highest scoring company does not meet a minimum AMS are excluded from the calculation of SRMS. To be eligible for inclusion in the SDG Management Universe, securities must meet a certain SRMS threshold.

Constituents that do not have any revenue that contributes to Social Fairness SDGs and constituents that do not reach a certain threshold on any of the relevant Key Issue Management Scores are excluded from the eligible universe.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:

- Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with Social Fairness SDGs and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 50%; and
- Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted according to their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 50%.

The Reference Index includes (i) a sector capping and an issuer capping component, the maximum weight of any sector is capped at 20%, while limiting the weight of each issuer to 4.5%, at each quarterly index rebalance, and (ii) a minimum weight filter, that excludes securities which would otherwise have comprised a very small percentage of the Reference Index in order to aid replication of the Reference Index.

The Reference Index is reviewed on a semi-annual basis and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of applicable withholding tax.

The Reference Index is calculated in US Dollars on a daily basis.

Further Information

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

SUPPLEMENT 68: Xtrackers MSCI EMU High Dividend Yield ESG UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers MSCI EMU High Dividend Yield ESG UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus")), and must be read in conjunction with, the Prospectus.

Xtrackers (IE) plc

Dated 26 November 2024

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of large and medium capitalisation companies in the European Economic and Monetary Union, with a focus on maximising the exposure to the dividend yield factor as well as meeting certain environmental, social and governance criteria.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track, before fees and expenses, the performance of the MSCI EMU High Dividend Yield Low Carbon SRI Screened Select Index (the "**Reference Index**"), by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*").

The Fund is managed according to a passive approach and is a Full Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges, which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus.

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets that the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the Prospectus.

The value of each Share Class is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities under the conditions and within the limits laid down by the Central Bank from time to time and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "Use of Derivatives by Direct Investment Funds" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Further, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Factor Focus

The Reference Index is based on a broad Parent Index, and selects securities which maximise exposure to the dividend yield factor as further described in the “General description of the Reference Index”.

Due to the dividend focus of the Reference Index, investors need to understand when market conditions would favour a dividend-driven approach or when investing in other strategies may be more appropriate.

Due to the dividend focus of the Reference Index, the performance and constituents of the Reference Index, and hence the Fund, may differ significantly from that of the Parent Index.

Concentration of the Reference Index

The market which the Reference Index seeks to represent has a high concentration to a particular region. Therefore, investors should be aware that any region-specific political or economic changes may have an adverse impact on the performance of the Reference Index and the portfolio of transferable securities and eligible assets held by the Fund.

Environmental, Social and Governance Standards

The Reference Index's environmental, social and governance standards limit the number of securities eligible for inclusion in the Reference Index. As a result, the Reference Index, and as such the Fund, may be more heavily weighted in securities, industry sectors or countries that underperform the market as a whole or underperform other funds screened for environmental, social and governance ("**ESG**") standards, or which do not screen for such standards.

Investors should note that the determination that the Fund is subject to the disclosure requirements of a financial product under Article 8(1) of SFDR is made solely on the basis that the Reference Index promotes environmental and social characteristics. The Company is relying on the activities conducted by and information provided by the Index Administrator or other data providers (as further described under the heading "General Description of the Underlying Asset", where applicable) to make this determination. Neither the Company, nor any of its service providers, makes any representation or otherwise as to the suitability of the Reference Index and the Fund in meeting an investor's criteria on minimum ESG standards or otherwise. Investors are advised to carry out their own review as to whether the Reference Index and the Fund accords with their own ESG criteria. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Underlying Asset".

Investors should note that whilst the Fund and the Reference Index seek to ensure compliance with the criteria outlined under "General Description of the Underlying Asset" at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the Fund until it is possible and practicable to divest such positions.

Sustainability Data Risks

Investors should note that the Reference Index solely relies on analysis from the Index Administrator or other data providers (as applicable) in relation to sustainability considerations. Neither the Company, nor any of its service providers, makes any representation with respect to the accuracy, reliability, correctness of the sustainability related data or the way that these are implemented.

It should also be noted that analysis of companies' ESG and carbon performance may be based on models, estimates and assumptions. This analysis should not be taken as an indication or guarantee of current or future performance.

ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Index Administrator or other data providers (as applicable) may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the Reference Index and therefore the portfolio of the Fund.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in, this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

Dividends may be declared and paid on the "1D" Shares up to four times per annum. The Fund does not intend to make dividend payments on the "1C" Share Class.

General Information Relating to the Fund

Base Currency	EUR
Cut-off Time	Means 2.30 p.m. Dublin time on the relevant Transaction Day.
Initial Offer Period	The Initial Offer Period in respect of the "1C" Shares shall be from 9:00 a.m. on 27 November 2024 to 2:30 p.m. (Dublin time) on 23 May 2025 or such earlier or later date as the Directors may determine and notify in advance to the Central Bank.
Fund Classification (InvStG)	Equity Fund, target minimum percentage of 80%.
Minimum Fund Size	EUR 50,000,000.
Settlement Date	Means up to nine Business Days following the Transaction Day[87].
Securities Lending	No.
Transparency under SFDR	The Fund promotes, among other characteristics, environmental and social characteristics and is subject to the disclosure requirements of a financial product under Article 8(1) of SFDR. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Parent Index and the Reference Index". Please also refer to "Environmental, Social and Governance Standards" under "Specific Risk Warning" above, to the section entitled "Sustainability-related disclosures under SFDR and EU Taxonomy Regulation" set out in the Prospectus and the annex to this Supplement.
Significant Market	Means a Direct Replication Significant Market.
Description of the Shares	

[87] *In the case that a Significant Market is closed for trading or settlement on any Business Day during the period between the relevant Transaction Day and the expected settlement date (inclusive), and/or settlement in the base currency of the Fund is not available on the expected settlement date, there may be corresponding delays to the settlement times indicated in this Supplement subject to the regulatory limit on settlement periods of 10 Business Days from the Cut-off Time. Earlier or later times may be determined by the Management Company at its discretion, whereby notice will be given on* www.Xtrackers.com.

Anticipated Level of Tracking Error	Up to 1.00% per annum	Up to 1.00% per annum

This section headed "Fees and Expenses" should be read in conjunction with the section headed "Fees and Expenses" in the Prospectus.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Parent Index and the Reference Index

The Reference Index is based on the MSCI EMU Index (the "**Parent Index**"), which is administered by MSCI Limited (the "**Index Administrator**"). The Parent Index reflects the performance of large and medium capitalisation listed companies in the European Economic and Monetary Union. The Reference Index looks to maximise its exposure to the dividend yield factor by optimising the Reference Index for the selection of securities with high dividend yields relative to the Parent Index whilst excluding companies from the Parent Index which do not fulfil certain ESG criteria, as described below.

ESG Exclusions

All of the companies from the Parent Index which breach the following ESG criteria are excluded:

- are unrated or missing coverage by MSCI ESG Research;
- are assigned an MSCI ESG Rating of CCC;
- have any involvement in controversial weapons;
- are classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas and power generation; and
- fail to comply with the United Nations Global Compact principles, have an MSCI ESG Controversies Score of 0, or have an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilises data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our-solutions/esg-investing/esg-ratings.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to: https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdf/4dfb3240-b5ed-0770-62c8-159c2ff785a0

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (**BISR**) aims to enable institutional investors to manage ESG standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support institutional investors seeking to integrate climate risk & opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to: https://www.msci.com/our-solutions/esg-investing/climate-solutions/climate-data-metrics

Security Selection and Weighting

Securities from the Parent Index which pass the ESG Exclusions outlined above will constitute the eligible universe (the "**Eligible Universe**"). Securities from the Eligible Universe are selected and weighted following an optimisation-based approach (including optimising for high dividend yields) subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe are subject to climate and other ESG constraints including, but not limited to:

- a minimum reduction in greenhouse gas intensity relative to the Parent Index;
- a minimum reduction in fossil fuel exposure relative to the Parent Index;
- a minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;
- a minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and
- a maximum weight in securities below a certain ESG score.

Diversification Objectives

Securities in the Eligible Universe are also subject to diversification constraints, including but not limited to:

- a minimum increase in the dividend yield relative to the Parent Index;
- a minimum control in the tracking error relative to the Parent Index;
- a maximum security weight, sector weight, and country weight deviation relative to the Parent Index;
- a maximum deviation in the exposure to certain factors relative to the Parent Index, as determined by the Index Administrator. Further information on the Index Administrator's factor assessment approach is available at https://www.msci.com/our-solutions/indexes/factor-indexing; and
- a minimum constituent weight.

The Reference Index is reviewed and rebalanced on at least a semi-annual basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers' ESG metrics.

The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of applicable withholding tax.

The Reference Index is calculated in EUR on an end of day basis.

Further Information

MSCI Limited has been granted authorisation by the UK FCA as a UK administrator for all MSCI equity

indices under the UK's Benchmarks Regulation and is listed on the FCA's register for administrators.

Additional information on the Reference Index, ESG criteria, its composition, calculation and rules for periodic review and re-balancing and on the general methodology behind the MSCI indices can be found on www.msci.com. Index constituents can be viewed under https://www.msci.com/constituents.

UNDER NO CIRCUMSTANCES MAY ANY PERSON OR

ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

SUPPLEMENT 69: Xtrackers MSCI Emerging Markets ex China UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers MSCI Emerging Markets ex China UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus"), and the first addendum to the Prospectus dated 1 December 2023 (the "Addendum")), and must be read in conjunction with, the Prospectus and the Addendum.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Xtrackers (IE) plc

Dated 31 July 2024

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of the shares of large and medium capitalisation companies in global emerging markets, excluding China.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track, before fees and expenses, the performance of the MSCI Emerging Markets ex China Index (the "**Reference Index**"), by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*").

The Fund is managed according to a passive approach and is a Full Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "Direct Investment Funds following a passive approach"). Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus.

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the main part of the Prospectus.

The value of the Fund's Shares is linked to the Reference Index (and, for Currency Hedged Share Classes, the relevant hedging arrangement, as described under "**Share Class Currency Hedging Methodology**"), the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Share Class Hedging

The “2C – EUR Hedged” Share Class ("**Currency Hedged Share Class**", as indicated under “Description of the Shares” below) is subject to currency hedging.

The Fund will seek to hedge against the currency exposures of the Underlying Securities in the portfolio which differ from the currency of the Currency Hedged Share Class in accordance with the “**Share Class Currency Hedging Methodology**” set out in the Prospectus.

Investors should note that the Currency Hedged Share Classes will not completely eliminate currency risk, or provide a precise hedge, and as such, investors may have exposures to currencies other than the currency of the Currency Hedged Share Class.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities from time to time under the conditions and within the limits laid down by the Central Bank and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes. The Fund may enter into securities lending transactions for efficient portfolio management purposes only in accordance with the conditions and limits set down by the Central Bank from time to time and the conditions set out in the Prospectus.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "**Use of Derivatives by Direct Investment Funds**" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Owing to the concentrated nature of the Reference Index, in exceptional market circumstances, the Fund intends to make use of the increased risk diversification limit of 35% for a single issuer permitted by the Central Bank, as further set out in sections "Index Tracking UCITS" and "Financial Derivative Instruments (FDIs)" of the Prospectus and "Concentration of the Reference Index" below.

The Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Emerging Markets

Investors in the Fund should be aware of the following risks associated with an investment in emerging markets:

(a) Emerging Market Risk: Investments in the markets to which the Reference Index relates are currently exposed to risks pertaining to emerging markets generally. These include risks brought about by investment ceiling limits where foreign investors are subject to certain holding limits and constraints imposed on trading of listed securities where a registered foreign investor may only maintain a trading account with one licensed securities company in the relevant market. These may contribute to the illiquidity of the relevant securities market, as well as create inflexibility and uncertainty as to the trading environment.

(b) Legal Risk: The economies of most emerging markets are often substantially less developed than those of other geographic regions such as the United States of America and Europe. The laws and regulations affecting these economies are also in a relatively early stage of development and are not as well established as the laws and regulations of developed countries. Such countries' securities laws and regulations may still be in their development stages and not drafted in a very concise manner which may be subject to interpretation. In the event of a securities related dispute involving a foreign party, the laws of these countries would typically apply (unless an applicable international treaty provides otherwise). The court systems of these nations are not as transparent and effective as court systems in more developed countries or territories and there can be no assurance of obtaining effective enforcement of rights through legal proceedings and generally the judgements of foreign courts are often not recognised.

(c) Regulatory Risk: Foreign investment in emerging economies' primary and secondary securities markets is often still relatively new and much of the relevant securities laws may be ambiguous and/or have been developed to regulate direct investment by foreigners rather than portfolio investment. Investors should note that because of a lack of precedent, securities market laws and the regulatory environment for primary and secondary market investments by foreign investors can be in the early stages of development, and may, in some jurisdictions, remain untested. The regulatory framework of the emerging economies' primary and secondary securities markets is often in the development stage compared to many of the world's leading stock markets, and accordingly there may be a lower level of regulatory monitoring of the activities of the emerging economies' primary and secondary securities markets.

(d) Foreign Exchange Risk: Some currencies of emerging markets are controlled. Investors should note the risks of limited liquidity in certain foreign exchange markets.

(e) Trading Volumes and Volatility: Often emerging market stock exchanges are smaller and have lower trading volumes and shorter trading hours than most OECD exchanges and the market capitalisations of listed companies are small compared to those on more developed exchanges in developed markets. The listed equity securities of many companies on such exchanges are accordingly materially less liquid, subject to greater dealer spreads and experience materially greater volatility than those of OECD countries. Many such exchanges have, in the past, experienced substantial price volatility and no assurance can be given that such volatility will not occur in the future. The above factors could negatively affect the Net Asset Value of the Fund.

(f) Taxation Risk: The Fund may invest in jurisdictions where the tax regime is not fully developed or is not sufficiently certain, and as such changes to the tax policies may be implemented without any prior notice and may also apply retrospectively. Any changes in tax policies may reduce the after-taxation returns of the underlying assets to which the performance of the Fund is linked.

(g) Restricted Markets Risk: The Fund may invest in markets in respect of which the local government imposes limitations or restrictions on foreign ownership or holdings. In order to access such markets, the Fund may use instruments such as American depositary receipts (**ADRs**), global depositary receipts (**GDRs**), non-voting depositary receipts (**NVDRs**) or P-Notes in order to gain exposure to equity securities instead of using physical securities where, due to such local restrictions or quota limitations, it is not possible to hold these directly. Such legal and regulatory restrictions or limitations may have adverse effects on the liquidity and performance of the Fund holdings as compared to the performance of the Reference Index. This may increase the risk of tracking error and, at worst, the Fund may not be able to achieve its investment objective and/or the Fund may have to be closed to further subscriptions.

(h) Liquidity Risk: Primary market-investors should be aware that it may take up to ten Settlement Days following the Transaction Day to receive the proceeds of redemptions requests.

Currency Hedging Risk

In order to mitigate against the risk of movements in the currency of a Currency Hedged Share Class against the currency of the portfolio constituents (where they are different to that of the relevant Currency Hedged Share Class currency), Share Class specific derivative transactions will be entered into for the purposes of acquiring currency hedges for each Currency Hedged Share Class. The return of the Share Class specific derivative transactions may not perfectly offset the actual fluctuations between the Currency Hedged Share Class currency and currency exposures of the securities that constitute the portion of the portfolio referable to the Currency Hedged Share Classes. No assurance can be given that such hedging activities will be entirely effective in achieving the purpose for which they have been entered into. While currency hedging reduces risks and losses in adverse market circumstances, it can also reduce and may completely offset gains in market circumstances that would otherwise have been beneficial had the position not been hedged. Consequently, the performance of a Currency Hedged Share Class may differ from that of the Underlying Asset as a result of the foreign exchange hedging transactions.

Concentration of the Reference Index

The market which the Reference Index seeks to represent has a high concentration to one or more countries. Therefore, investors should be aware that changes in the conditions affecting the concentrated country or countries may have an adverse impact on the performance of the Reference Index and the portfolio of transferable securities and eligible assets held by the Fund.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share

of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

The Fund does not intend to make dividend payments.

General Information Relating to the Fund

Base Currency	GBP
Cut-off Time	Means 4.30 p.m. Dublin time on the Business Day before the relevant Transaction Day.
Initial Offer Period	The Initial Offer Period in respect of the "2C – EUR Hedged" Shares shall be from 9:00 a.m. on 1 August 2024 to 4:30 p.m. (Dublin time) on 27 January 2025 or such earlier or later date as the Directors may determine and notify in advance to the Central Bank.
Fund Classification (InvStG)	Equity Fund, target minimum percentage of 75%.
Minimum Fund Size	GBP 50,000,000.
Settlement Date	Means up to nine Settlement Days following the Transaction Day[88].

[88] *In the case that a Significant Market is closed for trading or settlement on any Settlement Day during the period between the relevant Transaction Day and the expected settlement date (inclusive), and/or settlement in the base currency of the Fund is not available on the expected settlement date, there may be corresponding delays to the settlement times indicated in this Supplement subject to the regulatory limit on settlement periods of 10 Business Days from the Cut-off Time. Earlier or later times may be determined by the Management Company at its discretion, whereby notice will be given on* www.Xtrackers.com.

Securities Lending Yes

Securities Lending Agent Deutsche Bank AG, acting through its Frankfurt head office and its London and New York branches.

Securities Lending Fee

Allocation The Securities Lending Agent shall receive a fee for the services provided in respect of any Securities Lending Transactions.

Securities Lending Revenue To the extent the Fund undertakes securities lending to reduce costs, the Fund will ultimately be allocated 70% of the associated revenue generated, the Sub-Portfolio Manager will be allocated 15%, and the Securities Lending Agent will be allocated 15%. To facilitate this, the Fund will initially receive 85% of the associated revenue generated, from which the Sub-Portfolio Manager will receive their allocation. The Securities Lending Agent acts as the Company's agent in relation to securities lending transactions and the Sub-Portfolio Manager provides risk monitoring services to the Company in relation to securities lending transactions. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the figures set out under "Fees and Expenses" below.

Transparency under SFDR The Fund does not promote environmental or social characteristics and does not have sustainable investment or the reduction of carbon emissions as its objective. Therefore, the Fund discloses under Article 6 of SFDR.

Significant Market Means a Direct Replication Significant Market.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is administered by MSCI Limited (the "**Index Administrator**").

The Reference Index is a free float-adjusted market capitalisation weighted index reflecting the performance of large and medium capitalisation companies from global emerging markets, excluding China, identified according to the Index Administrator's country classification framework. For details on the framework please see https://www.msci.com/our-solutions/indexes/market-classification.

The underlying constituents of the Reference Index are listed in multiple currencies. The Reference Index is calculated in GBP on an end of day basis. The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested after the deduction of any taxes that may apply.

The Reference Index is reviewed and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

The Reference Index was launched on 09 March 2017.

Further Information

MSCI Limited has been granted authorisation by the UK FCA as a UK administrator for all MSCI equity indices under the UK's Benchmarks Regulation and is listed on the FCA's register for administrators.

Additional information on the Reference Index, its composition, calculation and rules for periodical review and re-balancing and the general methodology behind the MSCI indices can be found on www.msci.com. Index constituents can be viewed under https://www.msci.com/constituents.

SUPPLEMENT 70: Xtrackers MSCI World ex USA UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers MSCI World ex USA UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus"), and the first addendum to the Prospectus dated 1 December 2023 (the "Addendum")), and must be read in conjunction with, the Prospectus and the Addendum.

Xtrackers (IE) plc

Dated 4 February 2025

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses an index which is designed to reflect the performance of large and mid-cap companies across global developed markets, excluding the United States.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track before fees and expenses, the performance of the MSCI World ex USA Index (the "**Reference Index**"), by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*").

The Fund is managed according to a passive approach and is a Full Replication Fund (as described in the Prospectus under the heading "Direct Investment Funds following a passive approach"). Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus.

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the main part of the Prospectus.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities from time to time under the conditions and within the limits laid down by the Central Bank and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "Use of Derivatives by Direct Investment Funds" set out in the Prospectus

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund’s FDI positions and their contribution to the overall risk profile of the portfolio of assets of a Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund’s global exposure and to ensure that the Fund’s use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund’s Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Further, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

The Fund does not intend to make dividend payments on the "1C" Shares. Dividends may be declared and paid on the “1D” Shares up to four times per annum.

This section headed "Fees and Expenses" should be read in conjunction with the section headed "Fees and Expenses" in the Prospectus.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is administered by MSCI Limited (the "**Index Administrator"**).

The Reference Index is a free float-adjusted market capitalisation weighted index reflecting the performance of large and medium-capitalisation companies from global developed markets, excluding the United States, identified according to the Index Administrator's country classification framework. For details on the framework please see https://www.msci.com/our-solutions/indexes/market-classification.

The underlying constituents of the Reference Index are listed in multiple currencies. The Reference Index is calculated in US Dollars on an end of day basis. The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested after the deduction of any taxes that may apply.

The Reference Index is reviewed and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

The Reference Index has a base date of 31 May 1994.

Further Information

MSCI Limited has been granted authorisation by the UK FCA as a UK administrator for all MSCI equity indices under the UK's Benchmarks Regulation and is listed on the FCA's register for administrators.

Additional information on the Reference Index, its composition, calculation and rules for periodical review and re-balancing and the general methodology behind the MSCI indices can be found on www.msci.com. Index constituents can be viewed under https://www.msci.com/constituents.

IMPORTANT

XTRACKERS MSCI WORLD EX USA UCITS ETF (AN “MSCI SUB-FUND”) IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI INC. AND ITS SUBSIDIARIES (WHICH INCLUDE MSCI LIMITED) ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF AN MSCI SUB-FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN AN MSCI SUB-FUND PARTICULARLY OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO AN MSCI SUB-FUND OR THE ISSUER OR OWNERS OF AN MSCI SUB-FUND OR ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF AN MSCI SUB-FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF AN MSCI SUB-FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH AN MSCI SUB-FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF AN MSCI SUB-FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF AN MSCI SUB-FUND. ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF AN MSCI SUB-FUND, OWNERS OF AN MSCI SUB-FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR AN MSCI SUB-FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI’S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

SUPPLEMENT 71: Xtrackers Global Infrastructure ESG UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers Global Infrastructure ESG UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus")), the first addendum to the Prospectus dated 1 December 2023, and must be read in conjunction with, the Prospectus.

Xtrackers (IE) plc

Dated 26 September 2024

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of the shares of listed companies from developed markets that are owners and operators of infrastructure assets, and which meet certain, environmental, social and governance ("**ESG**") criteria.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track, before fees and expenses, the performance of the Dow Jones Brookfield Global Green Infrastructure Index (the "**Reference Index**"), by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "Direct Investment Funds following a passive approach").

The Fund is managed according to a passive approach and is a Full Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus.

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs"**) related to a constituent of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets that the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the Prospectus.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities under the conditions and within the limits laid down by the Central Bank from time to time and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "Use of Derivatives by Direct Investment Funds" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund’s FDI positions and their contribution to the overall risk profile of the portfolio of assets of a Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund’s global exposure and to ensure that the Fund’s use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund’s Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Furthermore, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warnings

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Concentration of the Reference Index

The market which the Reference Index seeks to represent has a high concentration to one or more sectors. Therefore, investors should be aware that changes in the conditions affecting the concentrated sector or sectors may have an adverse impact on the performance of the Reference Index and the portfolio of transferable securities and eligible assets held by the Fund.

Environmental, Social and Governance Standards

The Reference Index's environmental, social and governance standards limit the number of securities eligible for inclusion in the Reference Index. As a result, the Reference Index, and as such the Fund, may be more heavily weighted in securities, industry sectors or countries that underperform the market as a whole or underperform other funds screened for ESG standards, or which do not screen for such standards.

Investors should note that the determination that the Fund is subject to the disclosure requirements of a financial product under Article 8(1) of SFDR is made solely on the basis that the Reference Index promotes environmental and social characteristics. The Company is relying on the activities conducted by and information provided by the Index Administrator or other data providers (as further described under the heading "General Description of the

Underlying Asset", where applicable) to make this determination. Neither the Company, nor any of its service providers, makes any representation or otherwise as to the suitability of the Reference Index and the Fund in meeting an investor's criteria on minimum ESG standards or otherwise. Investors are advised to carry out their own review as to whether the Reference Index and the Fund accords with their own ESG criteria. Information on how the Reference Index is consistent with ESG characteristics is contained under "General Description of the Underlying Asset".

Investors should note that whilst the Fund and the Reference Index seek to ensure compliance with the criteria outlined under "General Description of the Underlying Asset" at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the Fund until it is possible and practicable to divest such positions.

Sustainability Data Risks

Investors should note that the Reference Index solely relies on analysis from the Index Administrator or other data providers (as applicable) in relation to sustainability considerations. Neither the Company, nor any of its service providers, makes any representation with respect to the accuracy, reliability, correctness of the sustainability related data or the way that these are implemented.

It should also be noted that analysis of companies' ESG and carbon performance may be based on models, estimates and assumptions. This analysis should not be taken as an indication or guarantee of current or future performance.

ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Index Administrator or other data providers (as applicable) may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the Reference Index and therefore the portfolio of the Fund.

Investors will also bear certain other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors

who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

The Fund does not intend to make dividend payments.

General Information Relating to the Fund

Base Currency	USD
Cut-off Time	Means 4.30 p.m. (Dublin time) on the Business Day before the relevant Transaction Day.
Fund Classification (InvStG)	Equity Fund, target minimum percentage of 51%.
Initial Offer Period	The Initial Offer Period in respect of the "1C" Shares shall be from 9:00 a.m. on 27 September 2024 to 4:30 p.m. (Dublin time) on 26 March 2025, or such earlier or later date as the Directors may determine and notify in advance to the Central Bank.
Minimum Fund Size	USD 50,000,000.
Settlement Day	Means up to nine Settlement Days following the Transaction Day[91].

[91] *In the case that a Significant Market is closed for trading or settlement on any Settlement Day during the period between the relevant Transaction Day and the expected settlement date (inclusive), and/or settlement in the base currency of the Fund is not available on the expected settlement date, there may be corresponding delays to the settlement times indicated in this Supplement subject to the regulatory limit on settlement periods of 10 Business Days from the Cut-off Time. Earlier or later times may be determined by the Management Company at its discretion, whereby notice will be given on www.Xtrackers.com.*

Securities Lending	No
Transparency under SFDR	The Fund promotes, among other characteristics, environmental and social characteristics and is subject to the disclosure requirements of a financial product under Article 8(1) SFDR. Information on how the Reference Index is consistent with environmental, social and governance characteristics is contained under "General Description of the Reference Index". Please also refer to "Environmental, Social and Governance Standards" under "Specific Risk Warning" above, to the section entitled "Sustainability-related disclosures under SFDR and EU Taxonomy Regulation" set out in the Prospectus and the annex to this Supplement.
Significant Market	Means a Direct Replication Significant Market.

Transaction Costs	Applicable
Anticipated Tracking Error	Up to 1.00% per annum

This section headed "Fees and Expenses" should be read in conjunction with the section headed "Fees and Expenses" in the Prospectus.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is based on the Dow Jones Brookfield Global Infrastructure Plus Index (the **"Parent Index"**), which is administered by S&P Dow Jones Indices LLC (the "**Index Administrator**"). The Parent Index is designed to reflect the performance of companies from global developed markets that are owners and operators of infrastructure assets, identified by their cash flows from certain infrastructure sectors, as classified by the Index Administrator. The Reference Index seeks to minimize the difference in constituent weights relative to the Parent Index, while aligning with certain ESG and climate-related criteria through the use of optimisation constraints (as defined below) and excluding companies which do not fulfil certain ESG criteria.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

- Are classified by S&P Global Sustainable1's ("**Sustainable1**") Business Involvement Screens as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, oil sands extraction, thermal coal, and conventional weapons;
- Are classified by S&P Trucost Limited ("**Trucost**") in their sector revenue dataset as breaching certain thresholds in controversial activities, including, but not limited to, fossil fuel exploration, processing and generation;
- Fail to comply with the United Nations Global Compact principles as determined by Sustainalytics by Morningstar ("**Sustainalytics**"); and
- Are assessed by S&P Global, using RepRisk data, to have been involved in certain controversies or ESG risk incidents.

The Reference Index utilises ESG data and research from Sustainable1, Trucost, Sustainalytics and RepRisk for the ESG Exclusions.

Sustainable1 Business Involvement Screens

Sustainable1 Business Involvement Screens aim to enable investors to align investment values with investment strategy by providing detailed assessments of common areas of concern pinpointing the level of involvement. For more details on S&P Global Business Involvement Screens, please refer to https://www.spglobal.com/ for more information.

Sustainalytics

Sustainalytics, a Morningstar company, is a leading independent ESG and corporate governance research, ratings and analytics firm that supports investors around the world with the development and implementation of responsible investment strategies. Companies without Sustainalytics coverage are ineligible for index inclusion until they receive such coverage. Please refer to http://www.sustainalytics.com/ for more information.

Trucost

Trucost (a part of S&P Global) is a leader in carbon and environmental data and risk analysis. Trucost assesses risks relating to climate change, natural resource constraints, and broader environmental, social, and governance factors. Companies and financial institutions use Trucost intelligence to understand their exposure to these factors, inform resilience, and identify transformative solutions for a more sustainable global economy. Please refer to https://www.spglobal.com/ for more information.

Reprisk

RepRisk, a leading data science company, is used for daily filtering, screening, and analysis of ESG risk incidents and controversial activities related to the companies which may result in further exclusions of companies from the Reference Index as determined by the Index Administrator. Please refer to http://www.reprisk.com/ for more information.

Security Selection and Weighting

Securities from the Parent Index which pass the ESG Exclusions outlined above will constitute the eligible universe (the "**Eligible Universe**"). Securities from the Eligible Universe are selected and weighted following an optimisation-based approach subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe are subject to climate and other ESG constraints including, but not limited to:

- A minimum improvement in the weighted average S&P Global ESG Score of the Reference Index relative to the Parent Index;
- A minimum reduction in the weighted average Trucost Total Impact Ratio of the Reference Index relative to the Parent Index;
- A minimum reduction in greenhouse gas ("**GHG**"), (expressed in CO2 equivalents) emissions intensity of the Reference Index relative to the Parent Index;
- A minimum reduction in the Physical Risk Score of the Reference Index relative to the Parent Index;
- A minimum reduction in Green-to-Brown Revenue Share of the Reference Index relative to the Parent Index; and
- A minimum improvement in the weight of eligible Science Based Target Companies relative to the Parent Index.

The Reference Index utilises ESG data and research from S&P Global ESG and Trucost for the Climate and other ESG Objectives.

S&P Global ESG

The S&P Global ESG Score is calculated by S&P Global Sustainable1 ("**Sustainable1**") using a company's 'Corporate Sustainability Assessment' ("**CSA**") which is derived using either company-provided data, publicly available information, or a combination thereof. Please refer to https://www.spglobal.com/ for more information.

Trucost

Trucost climate data, as defined above, is used for the Climate related Objectives. Additionally, the below two Trucost attributes are utilised in the climate and other ESG constraints:

- Trucost's Total Impact Ratio is a company level metric representing the sum of all the direct and indirect external environmental damage costs of a company, expressed as a percentage of revenue. Direct costs are those associated with a company's direct operations, while indirect costs are those that are borne in the company's supply chain. This includes coverage of the company's greenhouse gases, water use, waste generated, land, water and air pollutants generated, and natural resources used.
- Trucost's Green-to-Brown Revenue Share is the weighted average share of revenue derived from Green Sectors (including but not limited to renewable energy generation) over the weighted average share of revenue derived from Brown Sectors (including but not limited to non-renewable energy generation), as defined by Trucost Sectors.

Diversification and Deviation Objectives

Securities in the Reference Index are subject to diversification constraints to ensure diversification and representativeness of, for example, constituent weightings and liquidity constraints compared to the Parent Index.

The underlying constituents of the Reference Index are listed in multiple currencies.

The Reference Index is reviewed and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested after the deduction of any taxes that may apply.

The Reference Index is calculated in US Dollar on an end of day basis.

Further Information

Additional information on the Reference Index, its composition, calculation and rules for periodical review and re-balancing and the general methodology behind the S&P indices is available on https://www.spglobal.com/.

S&P Dow Jones Indices LLC has been granted authorisation as a benchmark administrator for the Reference Index and is included in the register of administrators and benchmarks maintained by ESMA pursuant to the Benchmark Regulations.

IMPORTANT

The "Dow Jones Brookfield Global Green Infrastructure Index" is a product of S&P Dow Jones Indices LLC or its affiliates ("**SPDJI**") and has been licensed for use by Xtrackers Global Infrastructure ESG UCITS ETF. It is not possible to invest directly in an index. Xtrackers Global Infrastructure ESG UCITS ETF is not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P, any of their respective affiliates (collectively, "**S&P Dow Jones Indices**"). S&P Dow Jones Indices do not make any representation or warranty, express or implied, to the owners of Xtrackers Global Infrastructure ESG UCITS ETF or any member of the public regarding the advisability of investing in securities generally or in Xtrackers Global Infrastructure ESG UCITS ETF particularly or the ability of the Dow Jones Brookfield Global Green Infrastructure Index to track general market performance. Past performance of an index is not an indication or guarantee of future results. S&P Dow Jones Indices' only relationship to Xtrackers Global Infrastructure ESG UCITS ETF with respect to the Dow Jones Brookfield Global Green Infrastructure Index is the licensing of the index and certain trademarks, service marks and/or trade names of S&P Dow Jones Indices and/or its licensors. The Dow Jones Brookfield Global Green Infrastructure Index is determined, composed and calculated by S&P Dow Jones Indices without regard to Xtrackers Global Infrastructure ESG UCITS ETF. S&P Dow Jones Indices have no obligation to take the needs of Xtrackers Global Infrastructure ESG UCITS ETF or the owners of Xtrackers Global Infrastructure ESG UCITS ETF into consideration in determining, composing or calculating the Dow Jones Brookfield Global Green Infrastructure Index. S&P Dow Jones Indices are not responsible for and have not participated in the determination of the prices, the value of Xtrackers Global Infrastructure ESG UCITS ETF or the timing of the issuance or sale of Xtrackers Global Infrastructure ESG UCITS ETF or in the determination or calculation of the equation by which Xtrackers Global Infrastructure ESG UCITS ETF is to be converted into cash, surrendered or redeemed, as the case may be. S&P Dow Jones Indices have no obligation or liability in connection with the administration, marketing or trading of Xtrackers Global Infrastructure ESG UCITS ETF. There is no assurance that investment products based on the Dow Jones Brookfield Global Green Infrastructure Index will accurately track index performance or provide positive investment returns. S&P Dow Jones Indices LLC is not an investment or tax advisor. A tax advisor should be consulted to evaluate the impact of any tax-exempt securities on portfolios and the tax consequences of making any particular investment decision. Inclusion of a security within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, nor is it considered to be investment advice.

S&P DOW JONES INDICES DOES NOT GUARANTEE THE ADEQUACY, ACCURACY, TIMELINESS AND/OR THE COMPLETENESS OF THE DOW JONES BROOKFIELD GLOBAL GREEN INFRASTRUCTURE INDEX OR ANY DATA RELATED THERETO OR ANY COMMUNICATION, INCLUDING BUT NOT LIMITED TO, ORAL OR WRITTEN COMMUNICATION (INCLUDING ELECTRONIC COMMUNICATIONS) WITH RESPECT THERETO. S&P DOW JONES INDICES SHALL NOT BE SUBJECT TO ANY DAMAGES OR LIABILITY FOR ANY ERRORS, OMISSIONS, OR DELAYS THEREIN. S&P DOW JONES INDICES MAKES NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIMS ALL WARRANTIES, OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE OR AS TO RESULTS TO BE OBTAINED BY XTRACKERS GLOBAL INFRASTRUCTURE ESG UCITS ETF, OWNERS OF XTRACKERS GLOBAL INFRASTRUCTURE ESG UCITS ETF, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE S&P GLOBAL INFRASTRUCTURE INDEX OR WITH RESPECT TO ANY DATA RELATED THERETO. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT WHATSOEVER SHALL S&P DOW JONES INDICES BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES INCLUDING BUT NOT LIMITED TO, LOSS OF PROFITS, TRADING LOSSES, LOST TIME OR GOODWILL, EVEN IF THEY HAVE BEEN ADVISED OF THE POSSIBLITY OF SUCH DAMAGES, WHETHER IN CONTRACT, TORT, STRICT LIABILITY, OR OTHERWISE. THERE ARE NO THIRD-PARTY BENEFICIARIES OF ANY

AGREEMENTS OR ARRANGEMENTS BETWEEN S&P DOW JONES INDICES AND XTRACKERS GLOBAL INFRASTRUCTURE ESG UCITS ETF, OTHER THAN THE LICENSORS OF S&P DOW JONES INDICES.

SUPPLEMENT 72: Xtrackers DJE US Equity Research UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers DJE US Equity Research UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the Prospectus of the Company dated 15 June 2023 (the "Prospectus") and the first addendum to the Prospectus dated 1 December 2023 (the "Addendum")), and must be read in conjunction with, the Prospectus and the Addendum.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Xtrackers (IE) plc

Dated 15 January 2025

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges. The Fund is actively managed and uses the term "Research" in its name to reflect that the portfolio will be selected from an investment universe determined by a research driven investment strategy.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to achieve a positive mid to long-term investment performance through investments in the equity securities of large and medium-capitalisation companies in the United States ("**US"**).

Investment Policy

In order to achieve the investment objective, the Fund will adopt a Direct Investment Policy, which is actively managed (as described in the Prospectus under the heading "**Direct Investment Funds following an active approach**"). For the avoidance of doubt, the Sub-Fund is not managed with reference to any benchmark. There is no assurance that the investment objective of the Fund will actually be achieved.

In order to seek to achieve its investment objective, the Fund will invest i) primarily in the equities of large and medium-capitalisation companies listed in the US ("**Equities**"); and ii) may also invest from time to time in other equities, equity related securities (such as ADRs and GDRs), money market instruments or collective investment schemes for purposes including, but not limited to, investing temporary cash balances and efficient portfolio management in accordance with the Investment Restrictions (together with the Equities, referred to as the "**Invested Assets**").

The Investment Manager for the Fund is DWS Investment GmbH. The Investment Manager has appointed DWS Investments UK Limited as Sub-Portfolio Manager for the Fund. DWS Investments UK Limited has appointed DJE Kapital AG (the "**Discretionary Investment Advisor**") to provide investment advice (as defined under MiFID II) with regard to the Equities, such advice as to the composition of the portfolio (the "**Proposed Allocation**"). The Discretionary Investment Advisor will have discretion over the allocation of the Proposed Allocation. The roles and responsibilities of the Discretionary Investment Advisor are detailed in the discretionary investment advisory agreement entered into between the Discretionary Investment Advisor and the Sub-Portfolio Manager (the "**Discretionary Investment Advisor Agreement**"). The Sub-Portfolio Manager may terminate the Discretionary Investment Advisor Agreement with immediate effect by giving written notice to the Discretionary Investment Advisor if immediate termination is necessary with a view to protecting the interests of the Shareholders of the Fund.

Investment Strategy

The Proposed Allocation will be selected from the investment universe, consisting of large and medium-sized companies listed on regulated markets in the US (the "**Investment Universe**").

The Discretionary Investment Advisor will select the Proposed Allocation using its proprietary, research driven, bottom-up strategy with the primary aim of generating capital appreciation. In order to achieve the investment objective, the Discretionary Investment Advisor will consider six quantitative and qualitative categories to determine a scoring model for each of the securities in the Investment Universe. The categories are valuation, momentum, safety and liquidity, sustainability, company meetings and (internal) analysts' recommendations. The categories are regularly reviewed regarding their contribution to the overall performance and are dynamically weighted within the scoring model as a result. Typically, the 50 highest scoring securities are selected to comprise the Proposed Allocation, with a higher weighting typically assigned to the top 25 securities.

The Proposed Allocation will be provided by the Discretionary Investment Advisor to the Sub-Portfolio Manager on a scheduled quarterly basis (the "**Asset Selection Date**"). The Discretionary Investment Advisor may also

provide a Proposed Allocation at other times where the Discretionary Investment Advisor wishes to update the Proposed Allocation on the basis of indicators which could impact the allocation, being economic or geopolicitcal indicators or otherwise at the request of the Sub-Portfolio Manager.

The Sub-Portfolio Manager will, in its absolute discretion, assess the Proposed Allocation with regards to the following criteria, amongst others and exclude and/or reweight any securities which do not comply with the following standards in order to arrive at the composition of the Invested Assets:

- Certain liquidity criteria, tradability of securities and portfolio diversification; and
- Certain environmental and social criteria as well as good governance practices, as further described below and in the pre-contractual disclosure set out in the Annex to this Supplement.

In addition to the determination of the composition of the Invested Assets, the Sub-Portfolio Manager will perform certain day-to-day portfolio management activities, which shall include, but not be limited to, order raising for the purchasing and selling of Invested Assets, management of Invested Assets following subscriptions and redemptions of Shares in the Fund, dividend re-investment, cash balance management and corporate action events management.

The Investment Manager will perform certain ongoing duties pursuant to the Investment Management Agreement, which shall include, but not be limited to, proxy voting, trade related downstream services, ongoing investment guideline monitoring and oversight and reporting services.

Environmental, social and governance standards

The Investment Universe will also be screened against the Investment Manager's ESG database. The Fund utilises data from MSCI ESG Research LLC ("**MSCI**") to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG Business Involvement Screening Research.

Companies in the Investment Universe which breach the following ESG standards, among others, will be excluded:

- Are assigned an MSCI ESG Rating of 'CCC';
- Fail to comply with the United Nations Global Compact principles or have a MSCI Controversies Score of 0;
- Have any involvement in controversial weapons, as categorised by MSCI ESG Research;
- Are classified by MSCI as breaching revenue thresholds of up to 10% in weapon-related activities, including civilian firearms, nuclear weapons, and conventional weapons;
- Are classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco, oil sands extraction, and thermal coal.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research aims to enable institutional investors to manage ESG standards and restrictions.

As further described in the "**Efficient Portfolio Management and Financial Derivative Instruments**" section below and in the Prospectus, the Fund may also invest in financial derivative instruments ("**FDIs**") for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile consistent with the investment objective

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy.

Invested Assets (other than permitted unlisted investments) will be listed or traded on the Markets referred to in Appendix I of the Prospectus.

Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

Investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment.

The return that the Shareholder will receive will be dependent on the performance of the Invested Assets.

The Fund will have no Final Repurchase Date. However, the Board of Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ FDIs and techniques and instruments relating to transferable securities under the conditions and within the limits laid down by the Central Bank from time to time and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes. Such FDIs will be futures, options, swaps or FX forwards for investing temporary cash balances and for hedging purposes as described in the Prospectus. For further details of these FDIs, please refer to the section entitled "Use of Derivatives by Direct Investment Funds" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of a Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Furthermore, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Prospective investors should be aware that the performance of the Invested Assets can go down as well as up and that the performance of the Invested Assets in any future period may not mirror its past performance.

The Fund should not be considered low risk and may not be appropriate for cautious investors. It is strongly recommended that you seek professional investment advice before considering investing in the Fund.

Conflicts of Interest

DWS Investments UK Limited acts as the Sub-Portfolio Manager, DWS Investments GmbH acts as the Investment Manager and DJE Kapital AG acts as the Discretionary Investment Advisor. DWS Investments UK Limited and DWS Investments GmbH are part of the DWS Group. Conflicts of interest may exist or arise between the Sub-Portfolio Manager or the Investment Manager on the one hand and, on the other hand, DWS entities acting in other capacities including as issuer, obligor, dealer or calculation agent of one or more of the shares constituting the Invested Assets. Subject always to the regulatory obligations of DWS entities in performing each or any of these roles, DWS entities do not act on behalf of, or accept any duty of care or any fiduciary duty to any investors or any other person. Each relevant DWS entity will pursue actions and take steps that it deems appropriate to protect its interests without regard to the consequences for investors. DWS entities may be in possession at any time of information in relation to one or more of the shares constituting the Invested Assets which may not be available to investors. There is no obligation on any DWS entity to disclose to any investor any such information.

DWS entities shall be entitled to receive fees or other payments pursuant to financial products linked to the Invested Assets or otherwise (any such fees or other payments may be deducted from the amounts otherwise payable to investors) and to exercise all rights, including rights of termination or resignation, which they may have, even though so doing may have a detrimental effect on investors.

DWS Investments UK Limited or DWS Investments GmbH may buy or sell proprietary positions or engage in other transactions for its account or the account of other clients in a manner inconsistent with the reconstitution and/or the administration of the Invested Assets.

DJE Kapital AG entities shall be entitled to receive fees or other payments pursuant to financial products linked to the Proposed Allocation, any such fees or other payments may be deducted from the amounts otherwise payable to investors.

DWS Group entities may act as service provider (including investment manager, market maker and/or counterparty to an ETF. Each of the DWS Group entities, acting in any such role, and the directors, the depositary, the administrative agent, any fund shareholder, other investment manager, portfolio manager, swap counterparty or distributor, and any market maker may undertake activities which may give rise to potential conflicts of interest including, but not limited to, financing or banking transactions with the ETF or investing and dealing in Fund Shares, other securities or assets (including sales to and purchases from the ETF) of the kind included in the Invested Assets

Environmental, social and governance standards

DWS bases its ESG assessments on external vendor data, which includes both quantitative (e.g. carbon intensities or share of sustainable activity) and qualitative data (e.g. ESG assessments or assessment of possible violations of international norms). However, potential expert-based subjectivity is more significant in qualitative measures than in quantitative ones. For instance, qualitative measures like general purpose ESG assessments may inherently carry subjectivity, while quantitative measures may involve estimations or be based on certain assumptions (e.g. determining the share of revenues from the share of produced energy). The prevalence of potential subjectivity poses a limitation that may need proper mitigation. Furthermore, there is a risk associated with ESG investments, as they may underperform the broad market. As ESG information obtained from third-party data providers may be incomplete, inaccurate, or unavailable, there is a risk that the Investment Manager may incorrectly assess a security or issuer, leading to the incorrect inclusion or exclusion of a security in the portfolio of the Sub-Fund.

Active management risk

The Fund's assets will be actively managed by the Investment Manager and Sub-Portfolio Manager who will have discretion (subject to the Fund's investment policy and restrictions) to invest the Fund's assets in investments that it considers will enable the Fund to achieve its investment objective. There is no guarantee that the Fund's investment objective will be achieved based on the investments selected.

Investors will also bear some other risks as described under the section "**Risk Factors**" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for retail investors who have knowledge of, and investment experience in this particular financial product and understand and can evaluate the investment objective, characteristics and risks in order to make an informed investment decision. Further, they have free and available cash for investment purposes and are looking to gain exposure to an actively managed portfolio of equities listed in the US. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders

and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

The Fund does not intend to make dividend payments.

SUPPLEMENT 73: Xtrackers Europe Equity Enhanced Active UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers Europe Equity Enhanced Active UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus") and the first addendum to the Prospectus dated 1 December 2023 (the "Addendum")), and must be read in conjunction with, the Prospectus and the Addendum.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Xtrackers (IE) plc

Dated 5 January 2026

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges. The Fund is actively managed and uses the term "Active" in its name to reflect that the portfolio will be selected to achieve excess returns over a benchmark.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to achieve mid to long-term capital appreciation in excess of a benchmark representing the shares of large and medium-capitalisation companies in developed market countries in Europe through investments in equities.

Investment Policy

In order to achieve the investment objective, the Fund will adopt a Direct Investment Policy, following an active approach (as described in the Prospectus under the heading "*Direct Investment Funds following an active approach*") against the MSCI Europe Index as a performance benchmark (the "**Performance Benchmark**"). The Fund may achieve its Investment Objective via a "low Active Share" approach, meaning that the composition of the portfolio of the Fund may not substantially differ to the composition of the Performance Benchmark. The Fund does not target any particular level of outperformance of the Performance Benchmark. Investors should note that any outperformance may be minimal, may be negatively impacted by fees and may ultimately be unachievable. Investors should note that the Fund will not seek to track the performance of or replicate the Performance Benchmark, rather the Fund will hold Invested Assets, as defined below and (which may include a selection but not all, of the securities represented in the Performance Benchmark, and may also include additional securities not represented in the Performance Benchmark) which are actively selected and managed with the aim of delivering an investment performance which exceeds that of the Performance Benchmark.

In order to seek to achieve its investment objective, the Fund will invest i) primarily in the equities of large and medium-capitalisation companies listed in developed market countries in Europe ("**Equities**"); and ii) may also invest from time to time in other equities, equity related securities (such as depositary receipts like ADRs and GDRs), money market instruments (such as secured and/or unsecured deposits) or collective investment schemes for purposes including, but not limited to, investing temporary cash balances and efficient portfolio management in accordance with the Investment Restrictions (together with the Equities, referred to as the "**Invested Assets**").

The Investment Manager for the Fund is DWS Investment GmbH. The Investment Manager has appointed DWS Investments UK Limited as Sub-Portfolio Manager for the Fund. DWS Investments UK Limited has appointed DWS International GmbH (the "**Discretionary Investment Advisor**") to provide investment advice (as defined under MiFID II) with regard to the Equities, such advice as to the composition of the portfolio (the "**Proposed Allocation**"). The Discretionary Investment Advisor will have discretion over the allocation of the Proposed Allocation. The roles and responsibilities of the Discretionary Investment Advisor are detailed in the investment advisory agreement entered into between the Discretionary Investment Advisor and the Sub-Portfolio Manager (the "**Investment Advisory Agreement**"). The Sub-Portfolio Manager may terminate the Investment Advisory Agreement with immediate effect by giving written notice to the Discretionary Investment Advisor if immediate termination is necessary with a view to protecting the interests of the Shareholders of the Fund.

Investment Strategy

The Proposed Allocation will be selected from the investment universe, consisting primarily of large and medium-sized companies listed on regulated markets in developed countries in Europe (the "**Investment Universe**"), which may include, but are not limited to, securities from the Performance Benchmark.

The Discretionary Investment Advisor will select the Proposed Allocation using a dynamic bottom-up stock selection strategy with the primary aim of generating capital appreciation. In order to achieve the investment objective, the Discretionary Investment Advisor will consider multiple quantitative categories of fundamental and price-driven stock characteristics to determine a scoring model for each of the securities in the Investment Universe. The categories include, but are not limited to: valuation, financial strength, technical indicators, analyst sentiment, and earnings growth. The categories are constantly reviewed for their contribution to overall performance and are dynamically weighted within the scoring model as a result. The scores are implemented in the final allocation using a risk-controlled approach.

The Proposed Allocation will be provided by the Discretionary Investment Advisor to the Sub-Portfolio Manager on a scheduled monthly basis (the "**Asset Selection Date**"). The Discretionary Investment Advisor may also provide a Proposed Allocation at other times where the Discretionary Investment Advisor wishes to update the Proposed Allocation on the basis of indicators which could impact the allocation, being economic or geopolicitcal indicators or otherwise at the request of the Sub-Portfolio Manager.

The Sub-Portfolio Manager will, in its absolute discretion, assess the Proposed Allocation with regards to the following criteria, amongst others and exclude and/or reweight any securities which do not comply with the following standards in order to arrive at the composition of the Invested Assets:

- Certain liquidity criteria, tradability of securities and portfolio diversification; and
- Certain environmental and social criteria as well as good governance practices, as further described below and in the pre-contractual disclosure set out in the Annex to this Supplement.

In addition to the determination of the composition of the Invested Assets, the Sub-Portfolio Manager will perform certain day-to-day portfolio management activities, which shall include, but not be limited to, order raising for the purchasing and selling of Invested Assets, management of Invested Assets following subscriptions and redemptions of Shares in the Fund, dividend re-investment, cash balance management and corporate action events management.

The Investment Manager will perform certain ongoing duties pursuant to the Investment Management Agreement, which shall include, but not be limited to, proxy voting, trade related downstream services, ongoing investment guideline monitoring and oversight and reporting services.

The Performance Benchmark

The Performance Benchmark is a market capitalisation-weighted index designated to provide a broad measure of the equity-market performance in various developed countries in Europe. The Performance Benchmark is maintained by MSCI Limited. The Performance Benchmark is rebalanced on a quarterly basis. The Performance Benchmark is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of applicable withholding taxes. Further information in relation to the Performance Benchmark is available at https://www.msci.com/.

Environmental, Social and Governance Standards

The Investment Universe will also be screened against the Investment Manager's ESG database. The Fund utilises data from Urgewald and MSCI ESG Research LLC ("**MSCI**") to apply certain ESG criteria using the following products: Urgewald Global Coal Exit List ("**GCEL**")**,** MSCI ESG Ratings, MSCI ESG Controversies and MSCI ESG Business Involvement Screening Research. Urgewald are a non-profit environmental organisation.

Companies in the Investment Universe which breach the following ESG standards, among others, will be excluded:

- Are assigned an MSCI ESG Rating of 'CCC';
- Fail to comply with the United Nations Global Compact principles or have a MSCI Controversies Score of 0;
- Have any involvement in controversial weapons, as categorised by MSCI ESG Research;
- Are classified by MSCI as breaching revenue thresholds of up to 5% in civilian firearms;
- Are classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco production, thermal coal mining and power, and unconventional oil and gas extraction (oil sands); and
- Are classified by GCEL as having any involvement in coal power expansion projects or coal mining expansion projects.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research aims to enable institutional investors to manage ESG standards and restrictions.

Urgewald Global Coal Exit List (GCEL)

The Urgewald Global Coal Exit List aims to give financial institutions a tool to remove coal from their portfolios. The GCEL aims to provide coal-related data for companies within the coverage universe. GCEL covers the entire thermal coal value chain from coal exploration and mining, to coal power production and coal gasification. For full details please refer to www.urgewald.org/english

As further described in the "**Efficient Portfolio Management and Financial Derivative Instruments**" section below and in the Prospectus, the Fund may also invest in financial derivative instruments ("**FDIs**") for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile consistent with the investment objective.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy.

Invested Assets (other than permitted unlisted investments) will be listed or traded on the Markets referred to in Appendix I of the Prospectus.

Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

Investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment.

The return that the Shareholder will receive will be dependent on the performance of the Invested Assets.

The Fund will have no Final Repurchase Date. However, the Board of Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ FDIs and techniques and instruments relating to transferable securities under the conditions and within the limits laid down by the Central Bank from time to time and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes. Such FDIs will be futures, options, swaps or FX forwards for investing temporary cash balances and for hedging purposes as described in the Prospectus. For further details of these FDIs, please refer to the section entitled "Use of Derivatives by Direct Investment Funds" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of a Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Furthermore, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Prospective investors should be aware that the performance of the Invested Assets can go down as well as up and that the performance of the Invested Assets in any future period may not mirror its past performance.

The Fund should not be considered low risk and may not be appropriate for cautious investors. It is strongly recommended that you seek professional investment advice before considering investing in the Fund.

Conflicts of Interest

DWS Investments UK Limited acts as the Sub-Portfolio Manager, DWS Investments GmbH acts as the Investment Manager and DWS International GmbH acts as the Discretionary Investment Advisor. DWS Investments UK Limited, DWS International GmbH and DWS Investments GmbH are part of the DWS Group. Conflicts of interest may exist or arise between the Sub-Portfolio Manager or the Investment Manager on the one hand and, on the other hand, DWS entities acting in other capacities including as issuer, obligor, dealer or calculation agent of one or more of the shares constituting the Invested Assets. Subject always to the regulatory obligations of DWS entities in performing each or any of these roles, DWS entities do not act on behalf of, or accept any duty of care or any fiduciary duty to any investors or any other person. Each relevant DWS entity will pursue actions and take steps that it deems appropriate to protect its interests without regard to the consequences for investors. DWS entities may be in possession at any time of information in relation to one or more of the shares constituting the Invested Assets which may not be available to investors. There is no obligation on any DWS entity to disclose to any investor any such information.

DWS entities shall be entitled to receive fees or other payments pursuant to financial products linked to the Invested Assets or otherwise (any such fees or other payments may be deducted from the amounts otherwise payable to investors) and to exercise all rights, including rights of termination or resignation, which they may have, even though so doing may have a detrimental effect on investors.

DWS Investments UK Limited or DWS Investments GmbH may buy or sell proprietary positions or engage in other transactions for its account or the account of other clients in a manner inconsistent with the reconstitution and/or the administration of the Invested Assets.

DWS Group entities may act as service provider (including investment manager, market maker and/or counterparty to an ETF. Each of the DWS Group entities, acting in any such role, and the directors, the depositary, the administrative agent, any fund shareholder, other investment manager, portfolio manager, swap counterparty or distributor, and any market maker may undertake activities which may give rise to potential conflicts of interest including, but not limited to, financing or banking transactions with the ETF or investing and dealing in Fund Shares, other securities or assets (including sales to and purchases from the ETF) of the kind included in the Invested Assets.

For further details, please refer to the section entitled "*Conflicts of Interest*" set out in the Prospectus.

Environmental, Social and Governance Standards

DWS bases its ESG assessments on external vendor data, which includes both quantitative (e.g. carbon intensities or share of sustainable activity) and qualitative data (e.g. ESG assessments or assessment of possible violations of international norms). However, potential expert-based subjectivity is more significant in qualitative measures than in quantitative ones. For instance, qualitative measures like general purpose ESG assessments may inherently carry subjectivity, while quantitative measures may involve estimations or be based on certain assumptions (e.g. determining the share of revenues from the share of produced energy). The prevalence of potential subjectivity poses a limitation that may need proper mitigation. Furthermore, there is a risk associated with ESG investments, as they may underperform the broad market. As ESG information obtained from third-party data providers may be incomplete, inaccurate, or unavailable, there is a risk that the Investment Manager may incorrectly assess a security or issuer, leading to the incorrect inclusion or exclusion of a security in the portfolio of the Fund.

Active management risk

The Fund's assets will be managed following an active approach by the Investment Manager and Sub-Portfolio Manager who will have discretion (subject to the Fund's investment policy and restrictions) to invest the Fund's assets in investments that it considers will enable the Fund to achieve its investment objective. There is no guarantee that the Fund's investment objective will be achieved based on the investments selected.

Investors will also bear some other risks as described under the section "**Risk Factors**" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for retail investors who have knowledge of, and investment experience in this particular financial product and understand and can evaluate the investment objective, characteristics and risks in order to make an informed investment decision. Further, they have free and available cash for investment purposes and are looking to gain exposure to a portfolio of equities listed in Europe selected using an active approach. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

The Fund does not intend to make dividend payments.

SUPPLEMENT 74: Xtrackers US Equity Enhanced Active UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers US Equity Enhanced Active UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus") and the first addendum to the Prospectus dated 1 December 2023 (the "Addendum")), and must be read in conjunction with, the Prospectus and the Addendum.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Xtrackers (IE) plc

Dated 5 January 2026

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges. The Fund is actively managed and uses the term "Active" in its name to reflect that the portfolio will be selected to achieve excess returns over a benchmark.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to achieve mid to long-term capital appreciation in excess of a benchmark representing the shares of large capitalisation companies in the United States ("**US**") through investments in equities.

Investment Policy

In order to achieve the investment objective, the Fund will adopt a Direct Investment Policy, following an active approach (as described in the Prospectus under the heading "*Direct Investment Funds following an active approach*") against the S&P 500 Index as a performance benchmark (the "**Performance Benchmark**"). The Fund may achieve its Investment Objective via a "low Active Share" approach, meaning that the composition of the portfolio of the Fund may not substantially differ to the composition of the Performance Benchmark. The Fund does not target any particular level of outperformance of the Performance Benchmark. Investors should note that any outperformance may be minimal, may be negatively impacted by fees and may ultimately be unachievable. Investors should note that the Fund will not seek to track the performance of or replicate the Performance Benchmark, rather the Fund will hold Invested Assets, as defined below and (which may include a selection but not all, of the securities represented in the Performance Benchmark, and may also include additional securities not represented in the Performance Benchmark) which are actively selected and managed with the aim of delivering an investment performance which exceeds that of the Performance Benchmark.

In order to seek to achieve its investment objective, the Fund will invest i) primarily in the equities of large - capitalisation companies listed in the US ("**Equities**"); and ii) may also invest from time to time in other equities, equity related securities (such as depositary receipts like ADRs and GDRs), money market instruments (such as secured and/or unsecured deposits) or collective investment schemes for purposes including, but not limited to, investing temporary cash balances and efficient portfolio management in accordance with the Investment Restrictions (together with the Equities, referred to as the "**Invested Assets**").

The Investment Manager for the Fund is DWS Investment GmbH. The Investment Manager has appointed DWS Investments UK Limited as Sub-Portfolio Manager for the Fund. DWS Investments UK Limited has appointed DWS International GmbH (the "**Discretionary Investment Advisor**") to provide investment advice (as defined under MiFID II) with regard to the Equities, such advice as to the composition of the portfolio (the "**Proposed Allocation**"). The Discretionary Investment Advisor will have discretion over the allocation of the Proposed Allocation. The roles and responsibilities of the Discretionary Investment Advisor are detailed in the investment advisory agreement entered into between the Discretionary Investment Advisor and the Sub-Portfolio Manager (the "**Investment Advisory Agreement**"). The Sub-Portfolio Manager may terminate the Investment Advisory Agreement with immediate effect by giving written notice to the Discretionary Investment Advisor if immediate termination is necessary with a view to protecting the interests of the Shareholders of the Fund.

Investment Strategy

The Proposed Allocation will be selected from the investment universe, consisting primarily of large-cap companies listed on regulated markets in the US (the "**Investment Universe**"), which may include, but are not limited to, securities from the Performance Benchmark.

The Discretionary Investment Advisor will select the Proposed Allocation using a dynamic bottom-up stock selection strategy with the primary aim of generating capital appreciation. In order to achieve the investment objective, the Discretionary Investment Advisor will consider multiple quantitative categories of fundamental and price-driven stock characteristics to determine a scoring model for each of the securities in the Investment Universe. The categories include, but are not limited to: valuation, financial strength, technical indicators, analyst sentiment, and earnings growth. The categories are constantly reviewed for their contribution to overall performance and are dynamically weighted within the scoring model as a result. The scores are implemented in the final allocation using a risk-controlled approach.

The Proposed Allocation will be provided by the Discretionary Investment Advisor to the Sub-Portfolio Manager on a scheduled monthly basis (the "**Asset Selection Date**"). The Discretionary Investment Advisor may also provide a Proposed Allocation at other times where the Discretionary Investment Advisor wishes to update the Proposed Allocation on the basis of indicators which could impact the allocation, being economic or geopolicitcal indicators or otherwise at the request of the Sub-Portfolio Manager.

The Sub-Portfolio Manager will, in its absolute discretion, assess the Proposed Allocation with regards to the following criteria, amongst others and exclude and/or reweight any securities which do not comply with the following standards in order to arrive at the composition of the Invested Assets:

- Certain liquidity criteria, tradability of securities and portfolio diversification; and
- Certain environmental and social criteria as well as good governance practices, as further described below and in the pre-contractual disclosure set out in the Annex to this Supplement.

In addition to the determination of the composition of the Invested Assets, the Sub-Portfolio Manager will perform certain day-to-day portfolio management activities, which shall include, but not be limited to, order raising for the purchasing and selling of Invested Assets, management of Invested Assets following subscriptions and redemptions of Shares in the Fund, dividend re-investment, cash balance management and corporate action events management.

The Investment Manager will perform certain ongoing duties pursuant to the Investment Management Agreement, which shall include, but not be limited to, proxy voting, trade related downstream services, ongoing investment guideline monitoring and oversight and reporting services.

The Performance Benchmark

The Performance Benchmark is a market capitalisation-weighted index designated to measure the performance of the large-cap segment of the US market. Considered to be a proxy of the US equity market, the Performance Benchmark is composed of 500 constituent companies. The Performance Benchmark a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of applicable withholding taxes. The Performance Benchmark is maintained by S&P Global Inc. and is rebalanced on a quarterly basis. Further information in relation to the Performance Benchmark is available at https://www.spglobal.com/

Environmental, Social and Governance Standards

The Investment Universe will also be screened against the Investment Manager's ESG database. The Fund utilises data from Urgewald and MSCI ESG Research LLC ("**MSCI**") to apply certain ESG criteria using the following products: Urgewald Global Coal Exit List ("**GCEL**")**,** MSCI ESG Ratings, MSCI ESG Controversies and MSCI ESG Business Involvement Screening Research. Urgewald are a non-profit environmental organisation.

Companies in the Investment Universe which breach the following ESG standards, among others, will be excluded:

- Are assigned an MSCI ESG Rating of 'CCC';
- Fail to comply with the United Nations Global Compact principles or have a MSCI Controversies Score of 0;

- Have any involvement in controversial weapons, as categorised by MSCI ESG Research;
- Are classified by MSCI as breaching revenue thresholds of up to 5% civilian firearms;
- Are classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco production, thermal coal mining and power, and unconventional oil and gas extraction (oil sands); and
- Are classified by GCEL as having any involvement in coal power expansion projects or coal mining expansion projects.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research aims to enable institutional investors to manage ESG standards and restrictions.

Urgewald Global Coal Exit List (GCEL)

The Urgewald Global Coal Exit List aims to give financial institutions a tool to remove coal from their portfolios. The GCEL aims to provide coal-related data for companies within the coverage universe. GCEL covers the entire thermal coal value chain from coal exploration and mining, to coal power production and coal gasification. For full details please refer to www.urgewald.org/english

As further described in the "**Efficient Portfolio Management and Financial Derivative Instruments**" section below and in the Prospectus, the Fund may also invest in financial derivative instruments ("**FDIs**") for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile consistent with the investment objective.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy.

Invested Assets (other than permitted unlisted investments) will be listed or traded on the Markets referred to in Appendix I of the Prospectus.

Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

Investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment.

The return that the Shareholder will receive will be dependent on the performance of the Invested Assets.

The Fund will have no Final Repurchase Date. However, the Board of Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ FDIs and techniques and instruments relating to transferable securities under the conditions and within the limits laid down by the Central Bank from time to time and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes. Such FDIs will be futures, options, swaps or FX forwards for investing temporary cash balances and for hedging purposes as described in the Prospectus. For further details of these FDIs, please refer to the section entitled "Use of Derivatives by Direct Investment Funds" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of a Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Furthermore, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Prospective investors should be aware that the performance of the Invested Assets can go down as well as up and that the performance of the Invested Assets in any future period may not mirror its past performance.

The Fund should not be considered low risk and may not be appropriate for cautious investors. It is strongly recommended that you seek professional investment advice before considering investing in the Fund.

Conflicts of Interest

DWS Investments UK Limited acts as the Sub-Portfolio Manager, DWS Investments GmbH acts as the Investment Manager and DWS International GmbH acts as the Discretionary Investment Advisor. DWS Investments UK Limited, DWS International GmbH and DWS Investments GmbH are part of the DWS Group. Conflicts of interest may exist or arise between the Sub-Portfolio Manager or the Investment Manager on the one hand and, on the other hand, DWS entities acting in other capacities including as issuer, obligor, dealer or calculation agent of one or more of the shares constituting the Invested Assets. Subject always to the regulatory obligations of DWS entities in performing each or any of these roles, DWS entities do not act on behalf of, or accept any duty of care or any fiduciary duty to any investors or any other person. Each relevant DWS entity will pursue actions and take steps that it deems appropriate to protect its interests without regard to the consequences for investors. DWS entities may be in possession at any time of information in relation to one or more of the shares constituting the Invested Assets which may not be available to investors. There is no obligation on any DWS entity to disclose to any investor any such information.

DWS entities shall be entitled to receive fees or other payments pursuant to financial products linked to the Invested Assets or otherwise (any such fees or other payments may be deducted from the amounts otherwise payable to investors) and to exercise all rights, including rights of termination or resignation, which they may have, even though so doing may have a detrimental effect on investors.

DWS Investments UK Limited or DWS Investments GmbH may buy or sell proprietary positions or engage in other transactions for its account or the account of other clients in a manner inconsistent with the reconstitution and/or the administration of the Invested Assets.

DWS Group entities may act as service provider (including investment manager, market maker and/or counterparty to an ETF. Each of the DWS Group entities, acting in any such role, and the directors, the depositary, the administrative agent, any fund shareholder, other investment manager, portfolio manager, swap counterparty or distributor, and any market maker may undertake activities which may give rise to potential conflicts of interest including, but not limited to, financing or banking transactions with the ETF or investing and dealing in Fund Shares, other securities or assets (including sales to and purchases from the ETF) of the kind included in the Invested Assets.

For further details, please refer to the section entitled "*Conflicts of Interest*" set out in the Prospectus.

Environmental, Social and Governance Standards

DWS bases its ESG assessments on external vendor data, which includes both quantitative (e.g. carbon intensities or share of sustainable activity) and qualitative data (e.g. ESG assessments or assessment of possible violations of international norms). However, potential expert-based subjectivity is more significant in qualitative measures than in quantitative ones. For instance, qualitative measures like general purpose ESG assessments may inherently carry subjectivity, while quantitative measures may involve estimations or be based on certain assumptions (e.g. determining the share of revenues from the share of produced energy). The prevalence of

potential subjectivity poses a limitation that may need proper mitigation. Furthermore, there is a risk associated with ESG investments, as they may underperform the broad market. As ESG information obtained from third-party data providers may be incomplete, inaccurate, or unavailable, there is a risk that the Investment Manager may incorrectly assess a security or issuer, leading to the incorrect inclusion or exclusion of a security in the portfolio of the Fund.

Active management risk

The Fund's assets will be managed following an active approach by the Investment Manager and Sub-Portfolio Manager who will have discretion (subject to the Fund's investment policy and restrictions) to invest the Fund's assets in investments that it considers will enable the Fund to achieve its investment objective. There is no guarantee that the Fund's investment objective will be achieved based on the investments selected.

Concentration Risk

The Fund is concentrated in securities from a single country. As a result, any country-specific political or economic changes may have an adverse impact on the performance of the portfolio of Invested Assets held by the Fund.

Investors will also bear some other risks as described under the section "**Risk Factors**" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for retail investors who have knowledge of, and investment experience in this particular financial product and understand and can evaluate the investment objective, characteristics and risks in order to make an informed investment decision. Further, they have free and available cash for investment purposes and are looking to gain exposure to a portfolio of equities listed in the US selected using an active approach. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

The Fund does not intend to make dividend payments.

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges. The Fund is actively managed and uses the term "Active" in its name to reflect that the portfolio will be selected to achieve excess returns over a benchmark.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to achieve mid to long-term capital appreciation in excess of a benchmark representing the shares of large and medium-capitalisation companies in developed market countries through investments in equities.

Investment Policy

In order to achieve the investment objective, the Fund will adopt a Direct Investment Policy, following an active approach (as described in the Prospectus under the heading "*Direct Investment Funds following an active approach*") against the MSCI World Index as a performance benchmark (the "**Performance Benchmark**"). The Fund may achieve its Investment Objective via a "low Active Share" approach, meaning that the composition of the portfolio of the Fund may not substantially differ to the composition of the Performance Benchmark. The Fund does not target any particular level of outperformance of the Performance Benchmark. Investors should note that any outperformance may be minimal, may be negatively impacted by fees and may ultimately be unachievable. Investors should note that the Fund will not seek to track the performance of or replicate the Performance Benchmark, rather the Fund will hold Invested Assets, as defined below and (which may include a selection but not all, of the securities represented in the Performance Benchmark, and may also include additional securities not represented in the Performance Benchmark) which are actively selected and managed with the aim of delivering an investment performance which exceeds that of the Performance Benchmark.

In order to seek to achieve its investment objective, the Fund will invest i) primarily in the equities of large and medium-capitalisation companies listed in developed market countries ("**Equities**"); and ii) may also invest from time to time in other equities, equity related securities (such as depositary receipts like ADRs and GDRs), money market instruments (such as secured and/or unsecured deposits) or collective investment schemes for purposes including, but not limited to, investing temporary cash balances and efficient portfolio management in accordance with the Investment Restrictions (together with the Equities, referred to as the "**Invested Assets**").

The Investment Manager for the Fund is DWS Investment GmbH. The Investment Manager has appointed DWS Investments UK Limited as Sub-Portfolio Manager for the Fund. DWS Investments UK Limited has appointed DWS International GmbH (the "**Discretionary Investment Advisor**") to provide investment advice (as defined under MiFID II) with regard to the Equities, such advice as to the composition of the portfolio (the "**Proposed Allocation**"). The Discretionary Investment Advisor will have discretion over the allocation of the Proposed Allocation. The roles and responsibilities of the Discretionary Investment Advisor are detailed in the investment advisory agreement entered into between the Discretionary Investment Advisor and the Sub-Portfolio Manager (the "**Investment Advisory Agreement**"). The Sub-Portfolio Manager may terminate the Investment Advisory Agreement with immediate effect by giving written notice to the Discretionary Investment Advisor if immediate termination is necessary with a view to protecting the interests of the Shareholders of the Fund.

Investment Strategy

The Proposed Allocation will be selected from the investment universe, consisting primarily of large and medium-sized companies listed on regulated markets in developed countries (the "**Investment Universe**"), which may include, but are not limited to, securities from the Performance Benchmark.

The Discretionary Investment Advisor will select the Proposed Allocation using a dynamic bottom-up stock selection strategy with the primary aim of generating capital appreciation. In order to achieve the investment objective, the Discretionary Investment Advisor will consider multiple quantitative categories of fundamental and price-driven stock characteristics to determine a scoring model for each of the securities in the Investment Universe. The categories include, but are not limited to: valuation, financial strength, technical indicators, analyst sentiment, and earnings growth. The categories are constantly reviewed for their contribution to overall performance and are dynamically weighted within the scoring model as a result. The scores are implemented in the final allocation using a risk-controlled approach.

The Proposed Allocation will be provided by the Discretionary Investment Advisor to the Sub-Portfolio Manager on a scheduled monthly basis (the "**Asset Selection Date**"). The Discretionary Investment Advisor may also provide a Proposed Allocation at other times where the Discretionary Investment Advisor wishes to update the Proposed Allocation on the basis of indicators which could impact the allocation, being economic or geopolicitcal indicators or otherwise at the request of the Sub-Portfolio Manager.

The Sub-Portfolio Manager will, in its absolute discretion, assess the Proposed Allocation with regards to the following criteria, amongst others and exclude and/or reweight any securities which do not comply with the following standards in order to arrive at the composition of the Invested Assets:

- Certain liquidity criteria, tradability of securities and portfolio diversification; and
- Certain environmental and social criteria as well as good governance practices, as further described below and in the pre-contractual disclosure set out in the Annex to this Supplement.

In addition to the determination of the composition of the Invested Assets, the Sub-Portfolio Manager will perform certain day-to-day portfolio management activities, which shall include, but not be limited to, order raising for the purchasing and selling of Invested Assets, management of Invested Assets following subscriptions and redemptions of Shares in the Fund, dividend re-investment, cash balance management and corporate action events management.

The Investment Manager will perform certain ongoing duties pursuant to the Investment Management Agreement, which shall include, but not be limited to, proxy voting, trade related downstream services, ongoing investment guideline monitoring and oversight and reporting services.

The Performance Benchmark

The Performance Benchmark is a market capitalisation-weighted index designated to provide a broad measure of the equity-market performance in various developed countries. The Performance Benchmark is maintained by MSCI Limited. The Performance Benchmark is rebalanced on a quarterly basis. The Performance Benchmark is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of applicable withholding taxes. Further information in relation to the Performance Benchmark is available at https://www.msci.com/.

Environmental, Social and Governance Standards

The Investment Universe will also be screened against the Investment Manager's ESG database. The Fund utilises data from Urgewald and MSCI ESG Research LLC ("**MSCI**") to apply certain ESG criteria using the following products: Urgewald Global Coal Exit List ("**GCEL**")*,* MSCI ESG Ratings, MSCI ESG Controversies and MSCI ESG Business Involvement Screening Research. Urgewald are a non-profit environmental organisation.

Companies in the Investment Universe which breach the following ESG standards, among others, will be excluded:

- Are assigned an MSCI ESG Rating of 'CCC';
- Fail to comply with the United Nations Global Compact principles or have a MSCI Controversies Score of 0;

- Have any involvement in controversial weapons, as categorised by MSCI ESG Research;
- Are classified by MSCI as breaching certain thresholds of up to 5% in civilian firearms;
- Are classified by MSCI as breaching certain thresholds of up to 5% in controversial activities, including tobacco production, thermal coal mining and power, and unconventional oil and gas extraction (oil sands); and
- Are classified by GCEL as having any involvement in coal power expansion projects or coal mining expansion projects.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research aims to enable institutional investors to manage ESG standards and restrictions.

Urgewald Global Coal Exit List (GCEL)

The Urgewald Global Coal Exit List aims to give financial institutions a tool to remove coal from their portfolios. The GCEL aims to provide coal-related data for companies within the coverage universe. GCEL covers the entire thermal coal value chain from coal exploration and mining, to coal power production and coal gasification. For full details please refer to www.urgewald.org/english

As further described in the "**Efficient Portfolio Management and Financial Derivative Instruments**" section below and in the Prospectus, the Fund may also invest in financial derivative instruments ("**FDIs**") for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile consistent with the investment objective.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy.

Invested Assets (other than permitted unlisted investments) will be listed or traded on the Markets referred to in Appendix I of the Prospectus.

Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

Investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment.

The return that the Shareholder will receive will be dependent on the performance of the Invested Assets.

The Fund will have no Final Repurchase Date. However, the Board of Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ FDIs and techniques and instruments relating to transferable securities under the conditions and within the limits laid down by the Central Bank from time to time and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes. Such FDIs will be futures, options, swaps or FX forwards for investing temporary cash balances and for hedging purposes as described in the Prospectus. For further details of these FDIs, please refer to the section entitled "Use of Derivatives by Direct Investment Funds" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of a Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Furthermore, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Prospective investors should be aware that the performance of the Invested Assets can go down as well as up and that the performance of the Invested Assets in any future period may not mirror its past performance.

The Fund should not be considered low risk and may not be appropriate for cautious investors. It is strongly recommended that you seek professional investment advice before considering investing in the Fund.

Conflicts of Interest

DWS Investments UK Limited acts as the Sub-Portfolio Manager, DWS Investments GmbH acts as the Investment Manager and DWS International GmbH acts as the Discretionary Investment Advisor. DWS Investments UK Limited, DWS International GmbH and DWS Investments GmbH are part of the DWS Group. Conflicts of interest may exist or arise between the Sub-Portfolio Manager or the Investment Manager on the one hand and, on the other hand, DWS entities acting in other capacities including as issuer, obligor, dealer or calculation agent of one or more of the shares constituting the Invested Assets. Subject always to the regulatory obligations of DWS entities in performing each or any of these roles, DWS entities do not act on behalf of, or accept any duty of care or any fiduciary duty to any investors or any other person. Each relevant DWS entity will pursue actions and take steps that it deems appropriate to protect its interests without regard to the consequences for investors. DWS entities may be in possession at any time of information in relation to one or more of the shares constituting the Invested Assets which may not be available to investors. There is no obligation on any DWS entity to disclose to any investor any such information.

DWS entities shall be entitled to receive fees or other payments pursuant to financial products linked to the Invested Assets or otherwise (any such fees or other payments may be deducted from the amounts otherwise payable to investors) and to exercise all rights, including rights of termination or resignation, which they may have, even though so doing may have a detrimental effect on investors.

DWS Investments UK Limited or DWS Investments GmbH may buy or sell proprietary positions or engage in other transactions for its account or the account of other clients in a manner inconsistent with the reconstitution and/or the administration of the Invested Assets.

DWS Group entities may act as service provider (including investment manager, market maker and/or counterparty to an ETF. Each of the DWS Group entities, acting in any such role, and the directors, the depositary, the administrative agent, any fund shareholder, other investment manager, portfolio manager, swap counterparty or distributor, and any market maker may undertake activities which may give rise to potential conflicts of interest including, but not limited to, financing or banking transactions with the ETF or investing and dealing in Fund Shares, other securities or assets (including sales to and purchases from the ETF) of the kind included in the Invested Assets.

For further details, please refer to the section entitled "*Conflicts of Interest*" set out in the Prospectus.

Environmental, Social and Governance Standards

DWS bases its ESG assessments on external vendor data, which includes both quantitative (e.g. carbon intensities or share of sustainable activity) and qualitative data (e.g. ESG assessments or assessment of possible violations of international norms). However, potential expert-based subjectivity is more significant in qualitative measures than in quantitative ones. For instance, qualitative measures like general purpose ESG assessments may inherently carry subjectivity, while quantitative measures may involve estimations or be based on certain assumptions (e.g. determining the share of revenues from the share of produced energy). The prevalence of

potential subjectivity poses a limitation that may need proper mitigation. Furthermore, there is a risk associated with ESG investments, as they may underperform the broad market. As ESG information obtained from third-party data providers may be incomplete, inaccurate, or unavailable, there is a risk that the Investment Manager may incorrectly assess a security or issuer, leading to the incorrect inclusion or exclusion of a security in the portfolio of the Fund.

Active management risk

The Fund's assets will be managed following an active approach by the Investment Manager and Sub-Portfolio Manager who will have discretion (subject to the Fund's investment policy and restrictions) to invest the Fund's assets in investments that it considers will enable the Fund to achieve its investment objective. There is no guarantee that the Fund's investment objective will be achieved based on the investments selected.

Investors will also bear some other risks as described under the section "**Risk Factors**" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for retail investors who have knowledge of, and investment experience in this particular financial product and understand and can evaluate the investment objective, characteristics and risks in order to make an informed investment decision. Further, they have free and available cash for investment purposes and are looking to gain exposure to a portfolio of equities listed in various developed global markets selected using an active approach. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

The Fund does not intend to make dividend payments.

General Information Relating to the Fund

Base Currency	USD
Cut-off Time	Means for subscription and redemption orders, 4:30 p.m. Dublin time on the Business Day before the relevant Transaction Day.

Fund Classification (InvStG)	Equity Fund, target minimum percentage of 51%

SUPPLEMENT 76: Xtrackers NASDAQ 100 Swap UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers NASDAQ 100 Swap UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus"), the first addendum to the Prospectus dated 1 December 2023 and the second addendum to the Prospectus dated 16 April 2026 (the "Addenda")), and must be read in conjunction with, the Prospectus and the Addenda.

Xtrackers (IE) plc

Dated 22 June 2026

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to reflect the performance before fees and expenses of an index which is designed to reflect the performance of the shares of a fixed number of the largest US and international non-financial companies listed on the NASDAQ stock exchange.

Investment Policy

In order to achieve the investment objective, the Fund will adopt an Indirect Investment Policy and will aim to replicate or track, before fees and expenses, the performance of the Nasdaq-100 Index (the "**Reference Index**") by investing in transferable securities (the "**Invested Assets**") use index swap agreements (a "**Swap(s)**") negotiated at arm's length with the Swap Counterparty all in accordance with the investment restrictions. Further information on the Reference Index is contained under "General Description of the Reference Index".

The purpose of the Swap is to exchange the performance and/or income of the Invested Assets against the performance of either the net total return version of the Reference Index or the gross total return version of the Reference Index (the "**Swap Reference Index**"). A gross total return index calculates the performance of the stocks assuming that all dividends and distributions are reinvested on a gross basis. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested after the deduction of any taxes that may apply. The constituent selection and rebalancing rules described under "General Description of the Reference Index" apply to both the gross and net total return versions of the Reference Index. The particular Swap Reference Index shall be selected in the absolute discretion of the Investment Manager in order to seek to reduce OTC Swap Transactions Costs and enhance cost efficiencies of the Fund. There is no guarantee that the selection of the Swap Reference Index will result in lower OTC Swap Transaction Costs as this will depend on prevailing market conditions. For the Fund, all references to "Reference Index" in this Supplement, the Prospectus and any addendum thereto, shall also be read as a reference to "Swap Reference Index" where there are references to derivatives or OTC Swap Transaction(s) in relation to the Reference Index.

The Invested Assets that the Fund will invest in, will be equity securities and equity related securities (which may include global depositary receipts (GDR) and American depositary receipts (ADR)) of issuers listed or traded on an official stock exchange of an OECD Member State. The Fund is managed according to a passive approach.

There is no assurance that the investment objective of the Fund will actually be achieved.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no

guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index and the performance of the Swap.

The Fund will have no Final Repurchase Date. However, the Board of Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

The Fund may invest in ancillary liquid assets which may include secured and/or unsecured deposits.

The investments and liquid assets the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the main part of the Prospectus.

OTC Swap Transaction Costs

The Fund will invest in Swaps subject to the conditions and limits laid down by the Central Bank. With regard to the Swaps entered into, the Fund shall receive the performance of the Reference Index adjusted to reflect certain index replication costs. The nature of these costs will be associated with (i) the buying and selling by the Swap Counterparty of the constituents of the Reference Index in order to reflect the Reference Index performance; or (ii) custody or other related costs incurred by the Swap Counterparty in relation to holding the constituents of the Reference Index; or (iii) taxes or other duties imposed on the buying or selling of the constituents of the Reference Index; or (iv) taxes imposed on any income derived from the constituents of the Reference Index; or (v) any other transactions performed by the Swap Counterparty in relation to the constituents of the Reference Index. The Swap Counterparty will be responsible for any transaction costs incurred by the Fund in investing in the Invested Assets.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's financial derivative instrument positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

The Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Concentration of the Reference Index

The Reference Index is concentrated in securities from a single country. As a result, any country-specific political or economic changes may have an adverse impact on the performance of the Reference Index and the Net Asset Value of the Fund.

Distribution Shares

There is no guarantee that distributing Share Classes will make dividend payments. Where a dividend payment is made by the D Share Class(es), the Net Asset Value of such Share Class(es) will be reduced by the gross amount of such dividends on the ex-dividend date.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate

and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

Dividends are not expected to be declared and paid on the "1C" Shares. Dividends may be declared and paid on the "1D" Shares up to four times per annum.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is administered by Nasdaq, Inc. (the "**Index Administrator**").

The Reference Index is a free float-adjusted market capitalisation weighted index reflecting the performance of shares of companies from 100 of the largest US and international non-financial stocks listed on the NASDAQ Stock Market, which must comply with certain eligibility and liquidity criteria including that the constituents are classified as a non-financial company according to FTSE International Limited's Industry Classification Benchmark (ICB).

A security must have a three-month average daily traded value of at least $5 million (USD).

To be eligible for initial inclusion in the Reference Index, a security must have been listed and available for trading on an eligible exchange for at least three full calendar months, not including the month of initial listing. For initial eligibility purposes, eligible exchanges include: Nasdaq, NYSE, NYSE American and CBOE BZX. Further information in relation to the eligibility and liquidity criteria can be found on https://indexes.nasdaqomx.com.

The Reference Index is calculated in US Dollars on an end of day basis.

The Reference Index is a total return net index.

The Reference Index composition is reviewed on an annual basis, at which time all eligible companies are ranked based on market capitalization, and is rebalanced on a quarterly basis. It may also be rebalanced at other times where it is determined to be necessary to maintain the integrity of the Reference Index.

Further Information

Additional information on the Reference Index, its general methodology, eligibility criteria, composition, calculation and rules for periodical review and re-balancing can be found on https://indexes.nasdaqomx.com

IMPORTANT

The Fund is not sponsored, endorsed, sold or promoted by Nasdaq, Inc. or its affiliates (Nasdaq along with its affiliates, are referred to as the "**Corporations**"). The Corporations have not passed on the legality or suitability of, or the accuracy or adequacy of descriptions and disclosures relating to, the Fund. The Corporations make no representation or warranty, express or implied to the owners of the Fund or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly, or the ability of the NASDAQ-100 Index to track general stock market performance. The Corporations' only relationship to the Company ("**Licensee**") is in the licensing of the Nasdaq®, and certain trade names of the Corporations and the use of the NASDAQ-100 Index which is determined, composed and calculated by Nasdaq without regard to Licensee or the Fund. Nasdaq has no obligation to take the needs of the Licensee or the owners of the Fund into consideration in determining, composing or calculating the NASDAQ-100 Index. The Corporations are not responsible for and have not participated in the determination of the timing of, prices at, or quantities of the Fund to be issued or in the determination or calculation of the equation by which the Fund is to be converted into cash. The Corporations have no liability in connection with the administration, marketing or trading of the Fund.

THE CORPORATIONS DO NOT GUARANTEE THE ACCURACY AND/OR UNINTERRUPTED CALCULATION OF NASDAQ-100 INDEX OR ANY DATA INCLUDED THEREIN. THE CORPORATIONS MAKE NO WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY LICENSEE, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE NASDAQ-100 INDEX OR ANY DATA INCLUDED THEREIN. THE CORPORATIONS MAKE NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE NASDAQ-100 INDEX OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL THE CORPORATIONS HAVE ANY LIABILITY FOR ANY LOST PROFITS OR SPECIAL, INCIDENTAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES, EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

SUPPLEMENT 77: Xtrackers S&P 500 Equal Weight Swap UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers S&P 500 Equal Weight Swap UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus") and the first addendum to the Prospectus dated 1 December 2023 (the "Addendum")), and must be read in conjunction with, the Prospectus and the Addendum.

Xtrackers (IE) plc

Dated 28 July 2025

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to reflect the performance before fees and expenses of an index which is designed to reflect the performance of the large-cap segment of the US equity market, with each constituent company allocated a fixed weight of 0.20% at each rebalance.

Investment Policy

In order to achieve the investment objective, the Fund will adopt an Indirect Investment Policy and will aim to replicate or track, before fees and expenses, the performance of the S&P 500 Equal Weight Index (the "**Reference Index**") by investing in transferable securities (the "**Invested Assets**") and use index swap agreements (a "**Swap(s)**") negotiated at arm's length with the Swap Counterparty all in accordance with the investment restrictions. Further information on the Reference Index is contained under "General Description of the Reference Index".

The purpose of the Swap is to exchange the performance and/or income of the Invested Assets against the performance of either the net total return version of the Reference Index or the gross total return version of the Reference Index (the "**Swap Reference Index**"). A gross total return index calculates the performance of the stocks assuming that all dividends and distributions are reinvested on a gross basis. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested after the deduction of any taxes that may apply. The constituent selection and rebalancing rules described under "General Description of the Reference Index" apply to both the gross and net total return versions of the Reference Index. The particular Swap Reference Index shall be selected in the absolute discretion of the Investment Manager in order to seek to reduce OTC Swap Transactions Costs and enhance cost efficiencies of the Fund. There is no guarantee that the selection of the Swap Reference Index will result in lower OTC Swap Transaction Costs as this will depend on prevailing market conditions. For the Fund, all references to "Reference Index" in this Supplement, the Prospectus and any addendum thereto, shall also be read as a reference to "Swap Reference Index" where there are references to derivatives or OTC Swap Transaction(s) in relation to the Reference Index.

The Invested Assets that the Fund will invest in, will be equity securities and equity related securities (which may include global depositary receipts (GDR) and American depositary receipts (ADR)) of issuers listed or traded on an official stock exchange of an OECD Member State. The Fund is managed according to a passive approach.

There is no assurance that the investment objective of the Fund will actually be achieved.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index and the performance of the Swap.

The Fund will have no Final Repurchase Date. However, the Board of Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

The Fund may invest in ancillary liquid assets which may include secured and/or unsecured deposits.

The investments and liquid assets the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the main part of the Prospectus.

OTC Swap Transaction Costs

The Fund will invest in Swaps subject to the conditions and limits laid down by the Central Bank. With regard to the Swaps entered into, the Fund shall receive the performance of the Reference Index adjusted to reflect certain index replication costs. The nature of these costs will be associated with (i) the buying and selling by the Swap Counterparty of the constituents of the Reference Index in order to reflect the Reference Index performance; or (ii) custody or other related costs incurred by the Swap Counterparty in relation to holding the constituents of the Reference Index; or (iii) taxes or other duties imposed on the buying or selling of the constituents of the Reference Index; or (iv) taxes imposed on any income derived from the constituents of the Reference Index; or (v) any other transactions performed by the Swap Counterparty in relation to the constituents of the Reference Index. The Swap Counterparty will be responsible for any transaction costs incurred by the Fund in investing in the Invested Assets.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund’s financial derivative instrument positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund’s global exposure and to ensure that the Fund’s use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund’s Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

The Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Concentration of the Reference Index

The Reference Index is concentrated in securities from a single country. As a result, any country-specific political or economic changes may have an adverse impact on the performance of the Reference Index and the Net Asset Value of the Fund.

Distribution Shares

There is no guarantee that distributing Share Classes will make dividend payments. Where a dividend payment is made by the D Share Class(es), the Net Asset Value of such Share Class(es) will be reduced by the gross amount of such dividends on the ex-dividend date.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

Dividends are not expected to be declared and paid on the "1C" Shares. Dividends may be declared and paid on the “1D” Shares up to four times per annum.

General Information Relating to the Fund

Base Currency	USD
Cut-off Time	Means 4.30 p.m. Dublin time on the relevant Transaction Day.
Initial Offer Period	The Initial Offer Period in respect of the “1C” and “1D” Shares shall be from 9:00 a.m. on 29 July 2025 to 4:30 p.m. (Dublin time) on 15 January 2026 or such earlier or later date as the Directors may determine and notify in advance to the Central Bank.
Fund Classification (InvStG)	Equity Fund, target minimum percentage of 70%.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is administered by S&P Dow Jones Indices LLC (the "**Index Administrator**"). The Reference Index is an equal weighted index which measures the performance of the companies in the S&P 500 index (which is a capitalisation weighted index comprising 500 large-cap common stocks of publicly held companies actively traded on either the NYSE, NASDAQ or CBOE domestic markets) in equal weights. Each company in the Reference Index is allocated a fixed weight of 0.20%.

The Reference Index is a total return net index.

The Reference Index is calculated in US Dollars on a real-time basis.

The Reference Index is rebalanced quarterly to coincide with the quarterly share adjustments of the S&P 500

index and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

The Reference Index has an inception date of 29 December 1989.

Further Information

Additional information on the Reference Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the S&P indices can be found on http://us.spindices.com/.

S&P Dow Jones Indices LLC has been granted authorisation as a benchmark administrator for the Index and is included in the register of administrators and benchmarks maintained by ESMA pursuant to the Benchmark Regulations.

THERE ARE NO THIRD-PARTY BENEFICIARIES OF ANY AGREEMENTS OR ARRANGEMENTS BETWEEN S&P DOW JONES INDICES AND XTRACKERS S&P 500 EQUAL WEIGHT SWAP UCITS ETF, OTHER THAN THE LICENSORS OF S&P DOW JONES INDICES.

SUPPLEMENT 78: Xtrackers S&P 500 Swap II UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers S&P 500 Swap II UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus") and the first addendum to the Prospectus dated 1 December 2023 (the "Addendum")), and must be read in conjunction with, the Prospectus and the Addendum.

Xtrackers (IE) plc

Dated 28 July 2025

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to reflect the performance before fees and expenses of an index which is designed to reflect the performance of the large-cap segment of the US equity market.

Investment Policy

In order to achieve the investment objective, the Fund will adopt an Indirect Investment Policy and will aim to replicate or track, before fees and expenses, the performance of the S&P 500 Index (the "**Reference Index**") by investing in transferable securities (the "**Invested Assets**") and use index swap agreements (a "**Swap(s)**") negotiated at arm's length with the Swap Counterparty, all in accordance with the investment restrictions. Further information on the Reference Index is contained under "General Description of the Reference Index".

The purpose of the Swap is to exchange the performance and/or income of the Invested Assets against the performance of either the net total return version of the Reference Index or the gross total return version of the Reference Index (the "**Swap Reference Index**"). A gross total return index calculates the performance of the stocks assuming that all dividends and distributions are reinvested on a gross basis. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested after the deduction of any taxes that may apply. The constituent selection and rebalancing rules described under "General Description of the Reference Index" apply to both the gross and net total return versions of the Reference Index. The particular Swap Reference Index shall be selected in the absolute discretion of the Investment Manager in order to seek to reduce OTC Swap Transactions Costs and enhance cost efficiencies of the Fund. There is no guarantee that the selection of the Swap Reference Index will result in lower OTC Swap Transaction Costs as this will depend on prevailing market conditions. For the Fund, all references to "Reference Index" in this Supplement, the Prospectus and any addendum thereto, shall also be read as a reference to "Swap Reference Index" where there are references to derivatives or OTC Swap Transaction(s) in relation to the Reference Index.

The Invested Assets that the Fund will invest in, will be equity securities and equity related securities (which may include global depositary receipts (GDR) and American depositary receipts (ADR)) of issuers listed or traded on an official stock exchange of an OECD Member State. The Fund is managed according to a passive approach.

There is no assurance that the investment objective of the Fund will actually be achieved.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there

is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index and the performance of the Swap.

The Fund will have no Final Repurchase Date. However, the Board of Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

The Fund may invest in ancillary liquid assets which may include secured and/or unsecured deposits.

The investments and liquid assets the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the main part of the Prospectus.

OTC Swap Transaction Costs

The Fund will invest in Swaps subject to the conditions and limits laid down by the Central Bank. With regard to the Swaps entered into, the Fund shall receive the performance of the Reference Index adjusted to reflect certain index replication costs. The nature of these costs will be associated with (i) the buying and selling by the Swap Counterparty of the constituents of the Reference Index in order to reflect the Reference Index performance; or (ii) custody or other related costs incurred by the Swap Counterparty in relation to holding the constituents of the Reference Index; or (iii) taxes or other duties imposed on the buying or selling of the constituents of the Reference Index; or (iv) taxes imposed on any income derived from the constituents of the Reference Index; or (v) any other transactions performed by the Swap Counterparty in relation to the constituents of the Reference Index. The Swap Counterparty will be responsible for any transaction costs incurred by the Fund in investing in the Invested Assets.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's financial derivative instrument positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

The Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Concentration of the Reference Index

The Reference Index is concentrated in securities from a single country. As a result, any country-specific political or economic changes may have an adverse impact on the performance of the Reference Index and the Net Asset Value of the Fund.

Distribution Shares

There is no guarantee that distributing Share Classes will make dividend payments. Where a dividend payment is made by the D Share Class(es), the Net Asset Value of such Share Class(es) will be reduced by the gross amount of such dividends on the ex-dividend date.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and

are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

Dividends are not expected to be declared and paid on the "1C" Shares. Dividends may be declared and paid on the “1D” Shares up to four times per annum.

General Information Relating to the Fund

Base Currency	USD
Cut-off Time	Means 4.30 p.m. Dublin time on the relevant Transaction Day.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is administered by S&P Dow Jones Indices LLC (the "**Index Administrator**"). The Reference Index is designed to reflect the performance of shares of 500 companies representing major US industries. The Reference Index contains shares of large capitalisation companies traded on the relevant domestic NYSE, NASDAQ, or CBOE markets (the "**Eligible Markets**"). The Reference Index is a free float market capitalisation weighted index, where a company's weighting in the Reference Index depends on its relative size based on the combined value of a company's readily available shares as compared to other companies on the Eligible Markets.

Constituent selection is at the discretion of the Index Administrator's index committee and is based on certain eligibility criteria, including, public float, financial viability, liquidity, sector representativeness, and company and share type criteria.

The Reference Index is calculated on a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax.

The Reference Index is calculated on a real-time basis.

The Reference Index is rebalanced on a quarterly basis.

The Reference Index has a base date of 1941.

Further Information

Additional information on the Reference Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the S&P indices can be found on https://www.spglobal.com/en.

S&P Dow Jones Indices LLC has been granted authorisation as a benchmark administrator for the Index and is included in the register of administrators and benchmarks maintained by ESMA pursuant to the Benchmark Regulations.

IMPORTANT

The " S&P 500 Index" is a product of S&P Dow Jones Indices LLC or its affiliates ("**SPDJI**"), and has been licensed for use by Xtrackers S&P 500 Swap II UCITS ETF. SUPPLEMENT 79: Xtrackers DJE Europe Equity Research UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers DJE Europe Equity Research UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the Prospectus of the Company dated 15 June 2023 (the ''Prospectus'') and the first addendum to the Prospectus dated 1 December 2023 (the ''Addendum'')), and must be read in conjunction with, the Prospectus and the Addendum.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Xtrackers (IE) plc

Dated 17 November 2025

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges. The Fund is actively managed and uses the term "Research" in its name to reflect that the portfolio will be selected from an investment universe determined by a research driven investment strategy.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to achieve a positive mid to long-term investment performance through investments in the equity securities of large and medium-capitalisation companies in Europe.

Investment Policy

In order to achieve the investment objective, the Fund will adopt a Direct Investment Policy, which is actively managed (as described in the Prospectus under the heading "**Direct Investment Funds following an active approach**"). For the avoidance of doubt, the Fund is not managed with reference to any benchmark. There is no assurance that the investment objective of the Fund will actually be achieved.

In order to seek to achieve its investment objective, the Fund will invest i) primarily in the equities of large and medium-capitalisation companies listed in Europe ("**Equities**"); and ii) may also invest from time to time in other equities, equity related securities (such as ADRs and GDRs), money market instruments or collective investment schemes for purposes including, but not limited to, investing temporary cash balances and efficient portfolio management in accordance with the Investment Restrictions (together with the Equities, referred to as the "**Invested Assets**").

The Investment Manager for the Fund is DWS Investment GmbH. The Investment Manager has appointed DWS Investments UK Limited as Sub-Portfolio Manager for the Fund. DWS Investments UK Limited has appointed DJE Kapital AG (the "**Discretionary Investment Advisor**") to provide investment advice (as defined under MiFID II) with regard to the Equities, such advice as to the composition of the portfolio (the "**Proposed Allocation**"). The Discretionary Investment Advisor will have discretion over the allocation of the Proposed Allocation. The roles and responsibilities of the Discretionary Investment Advisor are detailed in the discretionary investment advisory agreement entered into between the Discretionary Investment Advisor and the Sub-Portfolio Manager (the "**Discretionary Investment Advisor Agreement**"). The Sub-Portfolio Manager may terminate the Discretionary Investment Advisor Agreement with immediate effect by giving written notice to the Discretionary Investment Advisor if immediate termination is necessary with a view to protecting the interests of the Shareholders of the Fund.

Investment Strategy

The Proposed Allocation will be selected from the investment universe, consisting of large and medium-sized companies listed on regulated markets in Europe (the "**Investment Universe**").

The Discretionary Investment Advisor will select the Proposed Allocation using its proprietary, research driven, bottom-up strategy with the primary aim of generating capital appreciation. In order to achieve the investment objective, the Discretionary Investment Advisor will consider six quantitative and qualitative categories to determine a scoring model for each of the securities in the Investment Universe. The categories are valuation, momentum, safety and liquidity, sustainability, company meetings and (internal) analysts' recommendations. The categories are regularly reviewed regarding their contribution to the overall performance and are dynamically weighted within the scoring model as a result. Typically, the 50 highest scoring securities are selected to comprise the Proposed Allocation, with a higher weighting typically assigned to the top 25 securities.

The Proposed Allocation will be provided by the Discretionary Investment Advisor to the Sub-Portfolio Manager on a scheduled quarterly basis (the "**Asset Selection Date**"). The Discretionary Investment Advisor may also provide a Proposed Allocation at other times where the Discretionary Investment Advisor wishes to update the Proposed Allocation on the basis of indicators which could impact the allocation, being economic or geopolitical indicators or otherwise at the request of the Sub-Portfolio Manager.

The Sub-Portfolio Manager will, in its absolute discretion, assess the Proposed Allocation with regards to the following criteria, amongst others and exclude and/or reweight any securities which do not comply with the following standards in order to arrive at the composition of the Invested Assets:

- Certain liquidity criteria, tradability of securities and portfolio diversification; and
- Certain environmental and social criteria as well as good governance practices, as further described below and in the pre-contractual disclosure set out in the Annex to this Supplement.

In addition to the determination of the composition of the Invested Assets, the Sub-Portfolio Manager will perform certain day-to-day portfolio management activities, which shall include, but not be limited to, order raising for the purchasing and selling of Invested Assets, management of Invested Assets following subscriptions and redemptions of Shares in the Fund, dividend re-investment, cash balance management and corporate action events management.

The Investment Manager will perform certain ongoing duties pursuant to the Investment Management Agreement, which shall include, but not be limited to, proxy voting, trade related downstream services, ongoing investment guideline monitoring and oversight and reporting services.

Environmental, social and governance standards

The Investment Universe will also be screened against the Investment Manager's ESG database. The Fund utilises data from MSCI ESG Research LLC ("**MSCI**") to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG Business Involvement Screening Research.

Companies in the Investment Universe which breach the following ESG standards, among others, will be excluded:

- Are assigned an MSCI ESG Rating of 'CCC';
- Fail to comply with the United Nations Global Compact principles or have a MSCI Controversies Score of 0;
- Have any involvement in controversial weapons, as categorised by MSCI ESG Research;
- Are classified by MSCI as breaching revenue thresholds of up to 5% in civilian firearms;
- Are classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco and oil sands extraction;
- Are classified by MSCI as breaching revenue thresholds of up to 30% in thermal coal activities.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research aims to enable institutional investors to manage ESG standards and restrictions.

As further described in the "**Efficient Portfolio Management and Financial Derivative Instruments**" section below and in the Prospectus, the Fund may also invest in financial derivative instruments ("**FDIs**") for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile consistent with the investment objective

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy.

Invested Assets (other than permitted unlisted investments) will be listed or traded on the Markets referred to in Appendix I of the Prospectus.

Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

Investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment.

The return that the Shareholder will receive will be dependent on the performance of the Invested Assets.

The Fund will have no Final Repurchase Date. However, the Board of Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ FDIs and techniques and instruments relating to transferable securities under the conditions and within the limits laid down by the Central Bank from time to time and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes. Such FDIs will be futures, options, swaps or FX forwards for investing temporary cash balances and for hedging purposes as described in the Prospectus. For further details of these FDIs, please refer to the section entitled "Use of Derivatives by Direct Investment Funds" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Furthermore, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Prospective investors should be aware that the performance of the Invested Assets can go down as well as up and that the performance of the Invested Assets in any future period may not mirror its past performance.

The Fund should not be considered low risk and may not be appropriate for cautious investors. It is strongly recommended that you seek professional investment advice before considering investing in the Fund.

Conflicts of Interest

DWS Investments UK Limited acts as the Sub-Portfolio Manager, DWS Investments GmbH acts as the Investment Manager and DJE Kapital AG acts as the Discretionary Investment Advisor. DWS Investments UK Limited and DWS Investments GmbH are part of the DWS Group. Conflicts of interest may exist or arise between the Sub-Portfolio Manager or the Investment Manager on the one hand and, on the other hand, DWS entities acting in other capacities including as issuer, obligor, dealer or calculation agent of one or more of the shares constituting the Invested Assets. Subject always to the regulatory obligations of DWS entities in performing each or any of these roles, DWS entities do not act on behalf of, or accept any duty of care or any fiduciary duty to any investors or any other person. Each relevant DWS entity will pursue actions and take steps that it deems appropriate to protect its interests without regard to the consequences for investors. DWS entities may be in possession at any time of information in relation to one or more of the shares constituting the Invested Assets which may not be available to investors. There is no obligation on any DWS entity to disclose to any investor any such information.

DWS entities shall be entitled to receive fees or other payments pursuant to financial products linked to the Invested Assets or otherwise (any such fees or other payments may be deducted from the amounts otherwise payable to investors) and to exercise all rights, including rights of termination or resignation, which they may have, even though so doing may have a detrimental effect on investors.

DWS Investments UK Limited or DWS Investments GmbH may buy or sell proprietary positions or engage in other transactions for its account or the account of other clients in a manner inconsistent with the reconstitution and/or the administration of the Invested Assets.

DJE Kapital AG entities shall be entitled to receive fees or other payments pursuant to financial products linked to the Proposed Allocation, any such fees or other payments may be deducted from the amounts otherwise payable to investors.

DWS Group entities may act as service provider (including investment manager, market maker and/or counterparty to an ETF. Each of the DWS Group entities, acting in any such role, and the directors, the depositary, the administrative agent, any fund shareholder, other investment manager, portfolio manager, swap counterparty or distributor, and any market maker may undertake activities which may give rise to potential conflicts of interest including, but not limited to, financing or banking transactions with the ETF or investing and dealing in Fund Shares, other securities or assets (including sales to and purchases from the ETF) of the kind included in the Invested Assets

Environmental, social and governance standards

DWS bases its ESG assessments on external vendor data, which includes both quantitative (e.g. carbon intensities or share of sustainable activity) and qualitative data (e.g. ESG assessments or assessment of possible violations of international norms). However, potential expert-based subjectivity is more significant in qualitative measures than in quantitative ones. For instance, qualitative measures like general purpose ESG assessments may inherently carry subjectivity, while quantitative measures may involve estimations or be based on certain assumptions (e.g. determining the share of revenues from the share of produced energy). The prevalence of potential subjectivity poses a limitation that may need proper mitigation. Furthermore, there is a risk associated with ESG investments, as they may underperform the broad market. As ESG information obtained from third-party data providers may be incomplete, inaccurate, or unavailable, there is a risk that the Investment Manager may incorrectly assess a security or issuer, leading to the incorrect inclusion or exclusion of a security in the portfolio of the Fund.

Active management risk

The Fund's assets will be actively managed by the Investment Manager and Sub-Portfolio Manager who will have discretion (subject to the Fund's investment policy and restrictions) to invest the Fund's assets in investments that it considers will enable the Fund to achieve its investment objective. There is no guarantee that the Fund's investment objective will be achieved based on the investments selected.

Investors will also bear some other risks as described under the section "**Risk Factors**" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for retail investors who have knowledge of, and investment experience in this particular financial product and understand and can evaluate the investment objective, characteristics and risks in order to make an informed investment decision. Further, they have free and available cash for investment purposes and are looking to gain exposure to an actively managed portfolio of equities listed in Europe. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders

and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

The Fund does not intend to make dividend payments.

SUPPLEMENT 80: Xtrackers Floating Rate Notes Active UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers Floating Rate Notes Active UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus") and the first addendum to the Prospectus dated 1 December 2023 (the "Addendum")), and must be read in conjunction with, the Prospectus and the Addendum.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Xtrackers (IE) plc

Dated 17 November 2025

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges. The Fund is actively managed and uses the term "Active" in its name to reflect that the portfolio will be selected to achieve excess return over a benchmark.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to achieve before fees and expenses an excess return over a benchmark reflecting the performance of EUR-denominated, investment grade floating-rate notes with a maturity of up to three years through investment in fixed income securities.

Investment Policy

In order to achieve the investment objective, the Fund will adopt a Direct Investment Policy, which is actively managed (as described in the Prospectus under the heading "*Direct Investment Funds following an active approach*") against the iBoxx EUR FRN Investment Grade 0-3 Capped Index as a performance benchmark (the "**Performance Benchmark**"). The Fund may achieve its Investment Objective via a "low Active Share" approach, meaning that the composition of the portfolio of the Fund may not substantially differ to the composition of the Performance Benchmark. The Fund does not target any particular level of outperformance of the Performance Benchmark. Investors should note that any outperformance may be minimal, may be negatively impacted by fees and may ultimately be unachievable. Investors should note that the Fund will not seek to track the performance of or replicate the Benchmark, rather the Fund will hold Invested Assets, as defined below and (which may include but will not be limited to Benchmark Issuer Securities) which are actively selected and managed with the aim of delivering an investment performance which exceeds that of the Performance Benchmark.

In order to seek to achieve its investment objective, the Fund: (i) will invest primarily in floating rate notes issued by issuers contained in the Performance Benchmark ("**Benchmark Issuer Securities**"); and ii) may also invest from time to time in other fixed income securities (such as non-Euro denominated floating rate notes hedged against the Euro and other corporate or government bonds), money market instruments (such as secured and/or unsecured deposits), collective investment schemes or other ancillary liquid assets which may include bank deposits, certificates of deposit, fixed or floating rate instruments, commercial paper, and freely transferable promissory notes for purposes including, but not limited to, investing temporary cash balances and efficient portfolio management in accordance with the Investment Restrictions (together with the Benchmark Issuer Securities, referred to as the "**Invested Assets**").

The Investment Manager for the Fund is DWS Investment GmbH. The Sub-Portfolio Manager is DWS Investments UK Limited. Both the Investment Manager and Sub-Portfolio Manager will be responsible for the day-to-day investment management of the Fund, including the allocation of the Invested Assets and cash re-investments.

Investment Strategy

The Invested Assets will be selected by the Investment Manager and/or Sub-Portfolio Manager with the primary aim of generating excess return over the Performance Benchmark, whilst providing a balanced profile between liquidity and yield enhancement. The selection of the Invested Assets may be based on in-depth analysis of various indicators, including, but not limited to, analysis of:

- Relevant industries, which may consider factors such as industry trends and competitive landscape;
- The issuer, which may consider factors such as balance sheet analysis and management assessment;
- Instrument specific characteristics, which may consider factors such as liquidity risk, debt ranking, and analysis of documents and covenants; and/or
- Macroeconomic and market conditions.

In addition to the determination of the composition of the Invested Assets, the Sub-Portfolio Manager will primarily perform certain day-to-day portfolio management activities, which shall include, but not be limited to, coupon re-investment, cash balance management and corporate action events management.

In addition to the determination of the composition of the Invested Assets, the Investment Manager will perform certain ongoing duties pursuant to the Investment Management Agreement, which shall include, but not be limited to, issuer engagement, trade related downstream services, ongoing investment guideline monitoring and oversight and reporting services.

The Performance Benchmark

The Performance Benchmark is a market-value weighted index representing investment grade, euro-denominated floating-rate notes with a maturity up to three years The Performance Benchmark is owned by S&P Dow Jones Indices, LLC. The Performance Benchmark is administered by IHS Markit Benchmark Administration Limited. The Performance Benchmark is a total return gross index. A total return gross index calculates the performance of the index constituents on the basis that any distributions are reinvested.

Further information in relation to the Performance Benchmark is available at https://indicesweb.ihsmarkit.com/iBoxx/Screener.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ FDIs and techniques and instruments relating to transferable securities under the conditions and within the limits laid down by the Central Bank from time to time and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes. Such FDIs will be futures, options, swaps or FX forwards for investing temporary cash balances and for hedging purposes as described in the Prospectus. For further details of these FDIs, please refer to the section entitled "Use of Derivatives by Direct Investment Funds" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of a Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Furthermore, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Prospective investors should be aware that the performance of the Invested Assets can go down as well as up and that the performance of the Invested Assets in any future period may not mirror its past performance.

The Fund should not be considered low risk and may not be appropriate for cautious investors. It is strongly recommended that you seek professional investment advice before considering investing in the Fund.

Conflicts of Interest

DWS Investments UK Limited acts as the Sub-Portfolio Manager and DWS Investments GmbH acts as the Investment Manager. DWS Investments UK Limited and DWS Investments GmbH are part of the DWS Group. Conflicts of interest may exist or arise between the Sub-Portfolio Manager or the Investment Manager on the one hand and, on the other hand, DWS entities acting in other capacities including as issuer, obligor, dealer or calculation agent of one or more of the shares constituting the Invested Assets. Subject always to the regulatory obligations of DWS entities in performing each or any of these roles, DWS entities do not act on behalf of, or accept any duty of care or any fiduciary duty to any investors or any other person. Each relevant DWS entity will pursue actions and take steps that it deems appropriate to protect its interests without regard to the consequences for investors. DWS entities may be in possession at any time of information in relation to one or more of the shares constituting the Invested Assets which may not be available to investors. There is no obligation on any DWS entity to disclose to any investor any such information.

DWS entities shall be entitled to receive fees or other payments pursuant to financial products linked to the Invested Assets or otherwise (any such fees or other payments may be deducted from the amounts otherwise payable to investors) and to exercise all rights, including rights of termination or resignation, which they may have, even though so doing may have a detrimental effect on investors.

DWS Investments UK Limited or DWS Investments GmbH may buy or sell proprietary positions or engage in other transactions for its account or the account of other clients in a manner inconsistent with the reconstitution and/or the administration of the Invested Assets.

DWS Group entities may act as service provider (including investment manager, market maker and/or counterparty to an ETF. Each of the DWS Group entities, acting in any such role, and the directors, the depositary, the administrative agent, any fund shareholder, other investment manager, portfolio manager, swap counterparty or distributor, and any market maker may undertake activities which may give rise to potential conflicts of interest including, but not limited to, financing or banking transactions with the ETF or investing and dealing in Fund Shares, other securities or assets (including sales to and purchases from the ETF) of the kind included in the Invested Assets.

For further details, please refer to the section entitled "*Conflicts of Interes*t" set out in the Prospectus.

Active management risk

The Fund's assets will be actively managed by the Investment Managers who will have discretion (subject to the Fund's investment policy and restrictions) to invest the Fund's assets in investments that it considers will enable the Fund to achieve its investment objective. There is no guarantee that the Fund's investment objective will be achieved based on the investments selected.

Investors will also bear some other risks as described under the section "**Risk Factors**" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for retail investors who have knowledge of, and investment experience in this particular financial product and understand and can evaluate the investment objective, characteristics and risks in order to make an informed investment decision. Further, they have free and available cash for investment purposes and are looking to gain exposure to an actively managed portfolio of fixed income securities. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

The Fund does not intend to make dividend payments.

General Information Relating to the Fund

Base Currency	EUR
Cut-off Time	Means for subscription and redemption orders, 2:30 p.m. Dublin time on the relevant Transaction Day.
Initial Offer Period	The Initial Offer Period in respect of the "1C" Shares shall be from 9:00 a.m. on 18 November 2025 to 2:30 p.m. (Irish time) on 15 May 2026 or such earlier or later date as the Directors may determine and notify in advance to the Central Bank.
Transparency under SFDR	The Fund does not promote environmental or social characteristics and does not have sustainable investment or the reduction of carbon emissions as its objective. Therefore, the Fund discloses under Article 6 of SFDR. Please refer to the section entitled "Sustainability-related disclosures under SFDR and EU Taxonomy Regulation" set out in the Prospectus for further information in relation to sustainability risks, their integration by the Management Company and their impact on the Fund.
Minimum Fund Size	EUR 50,000,000.
Settlement Period	Means up to nine Settlement Days following the Transaction Day[101].

SUPPLEMENT 81: Xtrackers Electrification Technologies & Smart Grid UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers Electrification Technologies & Smart Grid UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus"), the first addendum to the Prospectus dated 1 December 2023 and the second addendum to the Prospectus dated 16 April 2026 (the "Addenda")), and must be read in conjunction with, the Prospectus and the Addenda.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Xtrackers (IE) plc

Dated 29 July 2026

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of the shares of companies from global markets that are exposed to themes related to the electrification of energy systems and smart grid infrastructure.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track, before fees and expenses, the performance of the Nasdaq Global Electrification Technologies and Smart Grid Index (the "**Reference Index**") by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "Direct Investment Funds following a passive approach").

The Fund is managed according to a passive approach and is a Full Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus. Underlying Securities may include direct investment in China A Shares through Stock Connect. Further information about Stock Connect is available online at the website: https://www.hkex.com.hk/mutual-market/stock-connect?sc_lang=en.

As further described in the "Efficient Portfolio Management and Financial Derivative Instruments" section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return

profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the main part of the Prospectus.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities from time to time under the conditions and within the limits laid down by the Central Bank and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "Use of Derivatives by Direct Investment Funds" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund’s FDI positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Further, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total amount of capital invested.

Emerging Markets

Investors in the Fund should be aware of the following risks associated with an investment in emerging markets:

(mmm) *Emerging Market Risk*: Investments in the market to which the Reference Index relates are currently exposed to risks pertaining to emerging markets generally. These include risks brought about by investment ceiling limits where foreign investors are subject to certain holding limits and constraints imposed on trading of listed securities where a registered foreign investor may only maintain a trading account with one licensed securities company in the relevant market. These may contribute to the illiquidity of the relevant securities market, as well as create inflexibility and uncertainty as to the trading environment.

(nnn) *Legal Risk*: The economies of most emerging markets are often substantially less developed than those of other geographic regions such as the United States and Europe. The laws and regulations affecting these

economies are also in a relatively early stage of development and are not as well established as the laws and regulations of developed countries. Such countries' securities laws and regulations may still be in their development stages and not drafted in a very concise manner which may be subject to interpretation. In the event of a securities related dispute involving a foreign party, the laws of these countries would typically apply (unless an applicable international treaty provides otherwise). The court systems of these nations may not be as transparent and effective as court systems in more developed countries or territories and there can be no assurance of obtaining effective enforcement of rights through legal proceedings and generally the judgements of foreign courts are often not recognised.

(ooo) *Regulatory Risk:* Foreign investment in emerging economies' primary and secondary securities markets is often still relatively new and much of the relevant securities laws may be ambiguous and/or have been developed to regulate direct investment by foreigners rather than portfolio investment. Investors should note that because of a lack of precedent, securities market laws and the regulatory environment for primary and secondary market investments by foreign investors can be in the early stages of development, and may, in some jurisdictions, remain untested. The regulatory framework of the emerging economies' primary and secondary securities markets is often in the development stage compared to many of the world's leading stock markets, and accordingly there may be a lower level of regulatory monitoring of the activities of the emerging economies' primary and secondary securities markets.

(ppp) *Foreign Exchange Risk*: Some currencies of emerging markets are controlled. Investors should note the risks of limited liquidity in certain foreign exchange markets.

(qqq) *Trading Volumes and Volatility*: Often emerging market stock exchanges are smaller and have lower trading volumes and shorter trading hours than most OECD exchanges and the market capitalisations of listed companies are small compared to those on more developed exchanges in developed markets. The listed equity securities of many companies on such exchanges are accordingly materially less liquid, subject to greater dealer spreads and experience materially greater volatility than those of OECD countries. Many such exchanges have, in the past, experienced substantial price volatility and no assurance can be given that such volatility will not occur in the future. The above factors could negatively affect the Net Asset Value of the Fund.

(rrr) *Taxation risk*: The Fund may invest in jurisdictions where the tax regime is not fully developed or is not sufficiently certain, and as such changes to the tax policies may be implemented without any prior notice and may also apply retrospectively. Any changes in tax policies may reduce the after-taxation returns of the underlying assets to which the performance of the Fund is linked to.

(sss) *Restricted markets risk*: The Fund may invest in markets in respect of which the local government imposes limitations or restrictions on foreign ownership or holdings. In order to access such markets, the Fund may use instruments such as American depositary receipts (**ADRs**), global depositary receipts (**GDRs**), non-voting depositary receipts (**NVDRs**) or P-Notes in order to gain exposure to equity securities instead of using physical securities where, due to such local restrictions or quota limitations, it is not possible to hold these directly. Such legal and regulatory restrictions or limitations may have adverse effects on the liquidity and performance of the Fund holdings as compared to the performance of the Reference Index. This may increase the risk of tracking error and, at worst, the Fund may not be able to achieve its investment objective and/or the Fund may have to be closed to further subscriptions.

(ttt) *Liquidity Risk:* Primary market-investors should be aware that it may take up to nine Business Days following the Transaction Day to receive the proceeds of redemptions requests.

Concentration of the Reference Index

The market which the Reference Index seeks to represent has a high concentration to one or more sectors. Therefore, investors should be aware that changes in the conditions affecting the concentrated sector or sectors may have an adverse impact on the performance of the Reference Index and the portfolio of transferable securities and eligible assets held by the Fund.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

The Fund does not intend to make dividend payments.

General Information Relating to the Fund

Base Currency	USD
Cut-off Time	Means 4.30 p.m. Dublin time on the Business Day before the relevant Transaction Day.

Fund Classification (InvStG) Equity Fund, target minimum percentage of 80%.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is administered by Nasdaq Inc. ("**Nasdaq**" or the "**Index Administrator**").

The objective of the Reference Index is to represent the shares of certain companies from both developed and emerging markets which are engaged in the sub-themes related to electrification technologies and smart grid infrastructure (the "**Sub-Themes**").

The Nasdaq Global Disruptive Technology Benchmark2 Index (the "**Parent Index**") is used as the universe of eligible securities for the Reference Index. The constituents of the Reference Index are determined by applying certain foreign ownership availability criteria, minimum liquidity and market capitalisation criteria, listing on eligible stock exchanges (as further detailed in the Reference Index methodology), and the following thematic selection criteria:

Thematic Selection Criteria:

Nasdaq utilise a proprietary theme and sub-theme classification process designed to assess a company's exposure to specific Sub-Themes by reviewing global patent activity. Nasdaq initially defines a set of Sub-Themes which are perceived by the Index Administrator to be associated with the theme of electrification. Such Sub-Themes have been deemed to include: smart grids, smart energy transmission, smart grid components, smart metering, stationary energy storage, clean energy, and nuclear power. This process involves analysing approved patents filed across global patent offices on a rolling two-year basis. This patent data is used to illustrate the extent to which a company has intellectual property and invests in research and development relevant to the Sub-Themes.

For each company in the Parent Index, Nasdaq calculates two scores for all securities in the Parent Index for each Sub-Theme, based on their analysis of the approved patents. The first score is based on the extent to which a constituent is involved in a particular Sub-Theme relative to all the other Sub-Themes that it is involved in (the "**Pure Score**"). The Pure Score measures how strongly a company is focused on a specific Sub-Theme compared

with its involvement in other Sub-Themes. The second score represents the extent to which a constituent is involved in a particular Sub-Theme relative to the other constituents involved in that Sub-Theme (the "**Contribution Score**"). The Contribution Score measures how significant a company is within a specific Sub-Theme compared with other companies participating in that same Sub-Theme.

The universe is filtered such that only the securities falling within a set percentile within each market capitalisation size segment (large, mid, and small) based on their Pure Score and Contribution Score remain. During this process, an additional score for every security is also calculated to represent the number of Sub-Themes in which its issuing company qualifies during the filtering process (the "**Intensity Score**").

An additional screen is then applied, requiring any securities to have membership in identified theme relevant sub-sectors ("**Sector Relevant Securities**"). Sector Relevant Securities are ranked from highest to lowest based on Intensity Score, Contribution Score, and six-month average daily traded value. Non-sector relevant securities are considered when they exhibit a higher Intensity Score than Sector Relevant Securities and adhere to the aforementioned criteria. The proportion of such non-Sector Relevant Securities eligible for inclusion shall be subject to a maximum cap within the Reference Index. The Reference Index aims to include up to 100 securities.

Weighting Criteria:

The Reference Index is a float-adjusted market capitalisation-weighted index. The initial weights of the securities in the Reference Index are determined by dividing each security's float-adjusted market capitalisation by the aggregate float-adjusted company market capitalisation of all securities of the Reference Index. Individual securities in the Reference Index are capped at 4.5% at each semi-annual rebalancing.

The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested after the deduction of any taxes that may apply.

The Reference Index is calculated in USD on an end of day basis.

The Reference Index is reviewed and rebalanced semi-annually, in line with the Intensity Score (as described above), and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

Further Information

Additional information on the Reference Index, its general methodology, screens, the scoring process, the eligible sub-sectors and themes or sub-themes, composition, calculation and rules for periodical review and re-balancing can be found on https://indexes.nasdaqomx.com/

IMPORTANT

The Fund is not sponsored, endorsed, sold or promoted by NASDAQ, Inc., or its affiliates (NASDAQ along with its affiliates, are referred to as the "**Corporations**"). The Corporations have not passed on the legality or suitability of, or the accuracy or adequacy of descriptions and disclosures relating to, the Fund. The Corporations make no representation or warranty, express or implied to the owners of the Fund or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly, or the ability of the Nasdaq Global Electrification Technologies and Smart Grid Index to track general stock market performance. The Corporations' only relationship to Xtrackers (IE) plc ("**Licensee**") is in the licensing of the Nasdaq®, and certain trade names of the Corporations and the use of the Nasdaq Global Electrification Technologies and Smart Grid Index which is determined, composed and calculated by NASDAQ without regard to Licensee or the Fund. NASDAQ has no obligation to take the needs of the Licensee or the owners of the Fund into consideration in determining, composing or calculating the Nasdaq Global Electrification Technologies and Smart Grid Index. The Corporations are not responsible for and have not participated in the determination of the timing of, prices at, or quantities of the Fund to be issued or in the determination or calculation of the equation by which the Fund is to be converted into cash. The Corporations have no liability in connection with the administration, marketing or trading of the Fund.

THE CORPORATIONS DO NOT GUARANTEE THE ACCURACY AND/OR UNINTERRUPTED CALCULATION OF NASDAQ GLOBAL ELECTRIFICATION TECHNOLOGIES AND SMART GRID INDEX OR ANY DATA INCLUDED THEREIN. THE CORPORATIONS MAKE NO WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY LICENSEE, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE NASDAQ GLOBAL ELECTRIFICATION TECHNOLOGIES AND SMART GRID INDEX OR ANY DATA INCLUDED THEREIN. THE CORPORATIONS MAKE NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE NASDAQ GLOBAL ELECTRIFICATION TECHNOLOGIES AND SMART GRID INDEX OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL THE CORPORATIONS HAVE ANY LIABILITY FOR ANY LOST PROFITS OR SPECIAL, INCIDENTAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES, EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

SUPPLEMENT 82: **Xtrackers FTSE All-World ex US UCITS ETF**

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers FTSE All-World ex US UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus"), the first addendum to the Prospectus dated 1 December 2023 (the "Addendum")), and must be read in conjunction with, the Prospectus and the Addendum.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Xtrackers (IE) plc

Dated 20 February 2026

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of the shares of large and medium capitalisation companies across global developed and emerging markets, excluding the United States.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track before fees and expenses, the performance of the FTSE All-World ex US Index (the "**Reference Index**"), by holding a portfolio of equity securities that comprises all, or a representation of the securities comprised in the Reference Index or unrelated transferable securities being equity securities which would typically be similar to the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*").

The Fund is managed according to a passive approach and is an Optimised Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). The optimised sample of securities determined will be selected with the aim of providing the most representative sample of the Reference Index based on its evaluation of the Underlying Securities against factors including, but not limited to, the correlation of the Underlying Securities to the Reference Index and the exposure, liquidity and risk of the Underlying Securities. Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus. Underlying Securities may include direct investment in China A Shares through Stock Connect. Further information about Stock Connect is available online at the website: HKEX (https://www.hkex.com.hk/?sc_lang=en)

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the main part of the Prospectus.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities from time to time under the conditions and within the limits laid down by the Central Bank and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "**Use of Derivatives by Direct Investment Funds**" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Emerging Markets

Investors in the Fund should be aware of the following risks associated with an investment in emerging markets:

(a) *Emerging Market Risk*: Investments in the market to which the Reference Index relates are currently exposed to risks pertaining to emerging markets generally. These include risks brought about by investment ceiling limits where foreign investors are subject to certain holding limits and constraints imposed on trading of listed securities where a registered foreign investor may only maintain a trading account with one licensed securities company in the relevant market. These may contribute to the illiquidity of the relevant securities market, as well as create inflexibility and uncertainty as to the trading environment.

(b) *Legal Risk*: The economies of most frontier markets are often substantially less developed than those of other geographic regions such as the United States and Europe. The laws and regulations affecting these economies are also in a relatively early stage of development and are not as well established as the laws and regulations of developed countries. Such countries' securities laws and regulations may still be in their development stages and not drafted in a very concise manner which may be subject to interpretation. In the event of a securities related dispute involving a foreign party, the laws of these countries would typically apply (unless an applicable international treaty provides otherwise). The court systems of these nations are not as transparent and effective as court systems in more developed countries or territories and there can be no assurance of obtaining effective enforcement of rights through legal proceedings and generally the judgements of foreign courts are often not recognised.

(c) *Regulatory Risk*: Foreign investment in frontier economies' primary and secondary securities markets is often still relatively new and much of the relevant securities laws may be ambiguous and/or have been developed to regulate direct investment by foreigners rather than portfolio investment. Investors should note that because of a lack of precedent, securities market laws and the regulatory environment for primary and secondary market investments by foreign investors can be in the early stages of development, and may, in some jurisdictions, remain untested. The regulatory framework of the frontier economies' primary and secondary securities markets is often in the development stage compared to many of the world's leading stock markets, and accordingly there may be a lower level of regulatory monitoring of the activities of the frontier economies' primary and secondary securities markets.

(d) *Foreign Exchange Risk*: Some currencies of emerging markets are controlled. Investors should note the risks of limited liquidity in certain foreign exchange markets.

(e) *Trading Volumes and Volatility*: Often frontier market stock exchanges are smaller and have lower trading volumes and shorter trading hours than most OECD exchanges and the market capitalisations of listed companies are small compared to those on more developed exchanges in developed markets. The listed equity securities of many companies on such exchanges are accordingly materially less liquid, subject to greater dealer spreads and experience materially greater volatility than those of OECD countries. Many such exchanges have, in the past, experienced substantial price volatility and no assurance can be given that such volatility will not occur in the future. The above factors could negatively affect the Net Asset Value of the Sub-Fund.

(f) *Taxation risk*: The Fund may invest in jurisdictions where the tax regime is not fully developed or is not sufficiently certain, and as such changes to the tax policies may be implemented without any prior notice and may also apply retrospectively. Any changes in tax policies may reduce the after-taxation returns of the underlying assets to which the performance of the Fund is linked to.

(g) *Restricted markets risk*: The Fund may invest in markets in respect of which the local government imposes limitations or restrictions on foreign ownership or holdings. In order to access such markets, the Fund may use instruments such as American depositary receipts (ADRs), global depositary receipts (GDRs), non-voting depositary receipts (NVDRs) or P-Notes in order to gain exposure to equity securities instead of using physical securities where, due to such local restrictions or quota limitations, it is not possible to hold these directly. Such legal and regulatory restrictions or limitations may have adverse effects on the liquidity and performance of the Fund holdings as compared to the performance of the Reference Index. This may increase the risk of tracking error and, at worst, the Fund may not be able to achieve its investment objective and/or the Fund may have to be closed to further subscriptions.

(h) *Liquidity Risk*: Primary market-investors should be aware that it may take up to nine Business Days following the Transaction Day to receive the proceeds of redemptions requests.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

Dividends are not expected to be declared and paid on the "1C" Shares.

General Information Relating to the Fund

Base Currency	USD
Cut-off Time	Means 4.30 p.m. Dublin time on the Business Day before the relevant Transaction Day.
Initial Offer Period	The Initial Offer Period in respect of the "1C" Shares shall be from 9:00 a.m. on 23 February 2026 to 4:30 p.m. (Dublin time) on 21 August 2026 or such earlier or later date as the Directors may determine and notify in advance to the Central Bank.
Fund Classification (InvStG)	Equity Fund, target minimum percentage of 60%.
Minimum Fund Size	USD 50,000,000.
Settlement Day	Means up to nine Settlement Days following the Transaction Day[103].
Securities Lending	No

[103] *In the case that a Significant Market is closed for trading or settlement on any Settlement Day during the period between the relevant Transaction Day and the expected settlement date (inclusive), and/or settlement in the base currency of the Fund is not available on the expected settlement date, there may be corresponding delays to the settlement times indicated in this Supplement subject to the regulatory limit on settlement periods of 10 Business Days from the Cut-off Time. Earlier or later times may be determined by the Management Company at its discretion, whereby notice will be given on* www.Xtrackers.com.

Transparency under SFDR The Fund does not promote environmental or social characteristics and does not have sustainable investment or the reduction of carbon emissions as its objective. Therefore, the Fund discloses under Article 6 of SFDR. Please refer to the section entitled "Sustainability-related disclosures under SFDR and EU Taxonomy Regulation" set out in the Prospectus for further information in relation to sustainability risks, their integration by the Management Company and their impact on the Fund.

Significant Market Means a Direct Replication Significant Market.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is administered by FTSE International Limited (the "**Index Administrator"**).

The Reference Index is a market capitalisation weighted index reflecting the performance of large and medium capitalisation companies across global developed and emerging markets, excluding the United States, identified according to the Index Administrator's classification framework. For details on the equity country inclusion criteria please see https://www.lseg.com/en/ftse-russell/equity-country-classification.

The Reference Index is a subset of the FTSE Global Equity Index Series. In order to be eligible for inclusion in the FTSE Global Equity Index Series and the Reference Index, securities are required to pass certain screening criteria including, but not limited to:

- Investability, on the basis of free-float and foreign ownership limits;
- Listing requirements, incorporating an eligible listing on an eligible stock exchange or trading venue, recognised by a relevant governing body;
- Trading, excluding existing and non-constituent securities that have not traded for a certain number of days during the past year; and
- Liquidity, on the basis of a security's monthly median of daily trading volume.

For details on the FTSE Global Equity Index Series and the Reference Index, please refer to the respective methodology, which can be found on FTSE Global Equity Index Series (FTSE GEIS) | LSEG.

The underlying constituents of the Reference Index are listed in multiple currencies. The Reference Index is calculated in US Dollars on an end of day basis. The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested after the deduction of any taxes that may apply.

The Reference Index is reviewed and rebalanced on a semi-annual basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

The Reference Index has a base date of 31 December 1986.

Further Information

FTSE International Limited has been granted authorisation by the UK FCA as a UK administrator for this index under the UK's Benchmark Regulation and is listed on the FCA's register for administrators.

Additional information on the Reference Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the FTSE indices can be found on the Index Administrator's website www.ftserussell.com.

IMPORTANT

XTRACKERS FTSE ALL-WORLD EX US UCITS ETF (“SUB-FUND”) HAS BEEN DEVELOPED SOLELY BY THE COMPANY. THE SUB-FUND IS NOT IN ANY WAY CONNECTED TO OR SPONSORED, ENDORSED, SOLD OR PROMOTED BY THE LONDON STOCK EXCHANGE GROUP PLC AND ITS GROUP UNDERTAKINGS (COLLECTIVELY, THE "LSE GROUP"). FTSE RUSSELL IS A TRADING NAME OF CERTAIN OF THE LSE GROUP COMPANIES.

ALL RIGHTS IN THE FTSE ALL-WORLD EX US INDEX ("INDEX") VEST IN THE RELEVANT LSE GROUP COMPANY WHICH OWNS THE INDEX. "FTSE®" IS A TRADE MARK OF THE RELEVANT LSE GROUP COMPANY AND IS USED BY ANY OTHER LSE GROUP COMPANY UNDER LICENSE.

THE INDEX IS CALCULATED BY OR ON BEHALF OF FTSE INTERNATIONAL LIMITED OR ITS AFFILIATE, AGENT OR PARTNER. THE LSE GROUP DOES NOT ACCEPT ANY LIABILITY WHATSOEVER TO ANY PERSON ARISING OUT OF (A) THE USE OF, RELIANCE ON OR ANY ERROR IN THE INDEX OR (B) INVESTMENT IN OR OPERATION OF THE SUBFUND. THE LSE GROUP MAKES NO CLAIM, PREDICTION, WARRANTY OR REPRESENTATION EITHER AS TO THE RESULTS TO BE OBTAINED FROM THE SUB-FUND OR THE SUITABILITY OF THE INDEX FOR THE PURPOSE TO WHICH IT IS BEING PUT BY THE COMPANY.

SUPPLEMENT 83: **Xtrackers FTSE All-World UCITS ETF**

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers FTSE All-World UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus"), the first addendum to the Prospectus dated 1 December 2023 (the "Addendum")), and must be read in conjunction with, the Prospectus and the Addendum.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Xtrackers (IE) plc

Dated 20 February 2026

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of the shares of large and medium capitalisation companies across global developed and emerging markets.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track before fees and expenses, the performance of the FTSE All-World Index (the "**Reference Index**"), by holding a portfolio of equity securities that comprises all, or a representation of the securities comprised in the Reference Index or unrelated transferable securities being equity securities which would typically be similar to the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*").

The Fund is managed according to a passive approach and is an Optimised Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). The optimised sample of securities determined will be selected with the aim of providing the most representative sample of the Reference Index based on its evaluation of the Underlying Securities against factors including, but not limited to, the correlation of the Underlying Securities to the Reference Index and the exposure, liquidity and risk of the Underlying Securities. Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus. Underlying Securities may include direct investment in China A Shares through Stock Connect. Further information about Stock Connect is available online at the website: HKEX (https://www.hkex.com.hk/?sc_lang=en)

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the main part of the Prospectus.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities from time to time under the conditions and within the limits laid down by the Central Bank and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "**Use of Derivatives by Direct Investment Funds**" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Further, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Emerging Markets

Investors in the Fund should be aware of the following risks associated with an investment in emerging markets:

(a) *Emerging Market Risk*: Investments in the market to which the Reference Index relates are currently exposed to risks pertaining to emerging markets generally. These include risks brought about by investment ceiling limits where foreign investors are subject to certain holding limits and constraints imposed on trading of listed securities where a registered foreign investor may only maintain a trading account with one licensed securities company in the relevant market. These may contribute to the illiquidity of the relevant securities market, as well as create inflexibility and uncertainty as to the trading environment.

(b) *Legal Risk*: The economies of most frontier markets are often substantially less developed than those of other geographic regions such as the United States and Europe. The laws and regulations affecting these economies are also in a relatively early stage of development and are not as well established as the laws and regulations of developed countries. Such countries' securities laws and regulations may still be in their development stages and not drafted in a very concise manner which may be subject to interpretation. In the event of a securities related dispute involving a foreign party, the laws of these countries would typically apply (unless an applicable international treaty provides otherwise). The court systems of these nations are not as transparent and effective as court systems in more developed countries or territories and there can be no assurance of obtaining effective enforcement of rights through legal proceedings and generally the judgements of foreign courts are often not recognised.

(c) *Regulatory Risk*: Foreign investment in frontier economies' primary and secondary securities markets is often still relatively new and much of the relevant securities laws may be ambiguous and/or have been developed to regulate direct investment by foreigners rather than portfolio investment. Investors should note that because of a lack of precedent, securities market laws and the regulatory environment for primary and secondary market investments by foreign investors can be in the early stages of development, and may, in some jurisdictions, remain untested. The regulatory framework of the frontier economies' primary and secondary securities markets is often in the development stage compared to many of the world's leading stock markets, and accordingly there may be a lower level of regulatory monitoring of the activities of the frontier economies' primary and secondary securities markets.

(d) *Foreign Exchange Risk*: Some currencies of emerging markets are controlled. Investors should note the risks of limited liquidity in certain foreign exchange markets.

(e) *Trading Volumes and Volatility*: Often frontier market stock exchanges are smaller and have lower trading volumes and shorter trading hours than most OECD exchanges and the market capitalisations of listed companies are small compared to those on more developed exchanges in developed markets. The listed equity securities of many companies on such exchanges are accordingly materially less liquid, subject to greater dealer spreads and experience materially greater volatility than those of OECD countries. Many such exchanges have, in the past, experienced substantial price volatility and no assurance can be given that such volatility will not occur in the future. The above factors could negatively affect the Net Asset Value of the Sub-Fund.

(f) *Taxation risk*: The Fund may invest in jurisdictions where the tax regime is not fully developed or is not sufficiently certain, and as such changes to the tax policies may be implemented without any prior notice and may also apply retrospectively. Any changes in tax policies may reduce the after-taxation returns of the underlying assets to which the performance of the Fund is linked to.

(g) *Restricted markets risk*: The Fund may invest in markets in respect of which the local government imposes limitations or restrictions on foreign ownership or holdings. In order to access such markets, the Fund may use instruments such as American depositary receipts (ADRs), global depositary receipts (GDRs), non-voting depositary receipts (NVDRs) or P-Notes in order to gain exposure to equity securities instead of using physical securities where, due to such local restrictions or quota limitations, it is not possible to hold these directly. Such legal and regulatory restrictions or limitations may have adverse effects on the liquidity and performance of the Fund holdings as compared to the performance of the Reference Index. This may increase the risk of tracking error and, at worst, the Fund may not be able to achieve its investment objective and/or the Fund may have to be closed to further subscriptions.

(h) *Liquidity Risk*: Primary market-investors should be aware that it may take up to nine Business Days following the Transaction Day to receive the proceeds of redemptions requests.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share

of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

Dividends are not expected to be declared and paid on the "1C" Shares.

General Information Relating to the Fund

Base Currency	USD
Cut-off Time	Means 4.30 p.m. Dublin time on the Business Day before the relevant Transaction Day.
Initial Offer Period	The Initial Offer Period in respect of the "1C" Shares shall be from 9:00 a.m. on 23 February 2026 to 4:30 p.m. (Dublin time) on 21 August 2026 or such earlier or later date as the Directors may determine and notify in advance to the Central Bank.
Fund Classification (InvStG)	Equity Fund, target minimum percentage of 60%.
Minimum Fund Size	USD 50,000,000.
Settlement Day	Means up to nine Settlement Days following the Transaction Day[104].

[104] *In the case that a Significant Market is closed for trading or settlement on any Settlement Day during the period between the relevant Transaction Day and the expected settlement date (inclusive), and/or settlement in the base currency of the Fund is not available on the expected settlement date, there may be corresponding delays to the settlement times indicated in this Supplement subject to the regulatory limit on settlement periods of 10 Business Days from the Cut-off Time. Earlier or later times may be determined by the Management Company at its discretion, whereby notice will be given on* www.Xtrackers.com.

Securities Lending No

Transparency under SFDR The Fund does not promote environmental or social characteristics and does not have sustainable investment or the reduction of carbon emissions as its objective. Therefore, the Fund discloses under Article 6 of SFDR. Please refer to the section entitled "Sustainability-related disclosures under SFDR and EU Taxonomy Regulation" set out in the Prospectus for further information in relation to sustainability risks, their integration by the Management Company and their impact on the Fund.

Significant Market Means a Direct Replication Significant Market.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is administered by FTSE International Limited (the "**Index Administrator"**).

The Reference Index is a market capitalisation weighted index reflecting the performance of large and medium capitalisation companies across global developed and emerging markets, identified according to the Index Administrator's classification framework. For details on the equity country inclusion criteria please see https://www.lseg.com/en/ftse-russell/equity-country-classification.

The Reference Index is a subset of the FTSE Global Equity Index Series. In order to be eligible for inclusion in the FTSE Global Equity Index Series and the Reference Index, securities are required to pass certain screening criteria including, but not limited to:

- Investability, on the basis of free-float and foreign ownership limits;
- Listing requirements, incorporating an eligible listing on an eligible stock exchange or trading venue, recognised by a relevant governing body;
- Trading, excluding existing and non-constituent securities that have not traded for a certain number of days during the past year; and
- Liquidity, on the basis of a security's monthly median of daily trading volume.

For details on the FTSE Global Equity Index Series and the Reference Index, please refer to the respective methodology, which can be found on FTSE Global Equity Index Series (FTSE GEIS) | LSEG.

The underlying constituents of the Reference Index are listed in multiple currencies. The Reference Index is calculated in US Dollars on an end of day basis. The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested after the deduction of any taxes that may apply.

The Reference Index is reviewed and rebalanced on a semi-annual basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

The Reference Index has a base date of 31 December 1986.

Further Information

FTSE International Limited has been granted authorisation by the UK FCA as a UK administrator for this index under the UK's Benchmark Regulation and is listed on the FCA's register for administrators.

Additional information on the Reference Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the FTSE indices can be found on the Index Administrator's website www.ftserussell.com.

IMPORTANT

XTRACKERS FTSE ALL-WORLD UCITS ETF (“SUB-FUND”) HAS BEEN DEVELOPED SOLELY BY THE COMPANY. THE SUB-FUND IS NOT IN ANY WAY CONNECTED TO OR SPONSORED, ENDORSED, SOLD OR PROMOTED BY THE LONDON STOCK EXCHANGE GROUP PLC AND ITS GROUP UNDERTAKINGS (COLLECTIVELY, THE "LSE GROUP"). FTSE RUSSELL IS A TRADING NAME OF CERTAIN OF THE LSE GROUP COMPANIES.

ALL RIGHTS IN THE FTSE ALL-WORLD INDEX ("INDEX") VEST IN THE RELEVANT LSE GROUP COMPANY WHICH OWNS THE INDEX. "FTSE®" IS A TRADE MARK OF THE RELEVANT LSE GROUP COMPANY AND IS USED BY ANY OTHER LSE GROUP COMPANY UNDER LICENSE.

THE INDEX IS CALCULATED BY OR ON BEHALF OF FTSE INTERNATIONAL LIMITED OR ITS AFFILIATE, AGENT OR PARTNER. THE LSE GROUP DOES NOT ACCEPT ANY LIABILITY WHATSOEVER TO ANY PERSON ARISING OUT OF (A) THE USE OF, RELIANCE ON OR ANY ERROR IN THE INDEX OR (B) INVESTMENT IN OR OPERATION OF THE SUBFUND. THE LSE GROUP MAKES NO CLAIM, PREDICTION, WARRANTY OR REPRESENTATION EITHER AS TO THE RESULTS TO BE OBTAINED FROM THE SUB-FUND OR THE SUITABILITY OF THE INDEX FOR THE PURPOSE TO WHICH IT IS BEING PUT BY THE COMPANY.

SUPPLEMENT 84: **Xtrackers MSCI USA Swap II UCITS ETF**

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers MSCI USA Swap II UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the ''Prospectus'') and the first addendum to the Prospectus dated 1 December 2023 (the ''Addendum'')), and must be read in conjunction with, the Prospectus and the Addendum.

Xtrackers (IE) plc

Dated 10 February 2026

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to reflect the performance before fees and expenses of an index which is designed to reflect the performance of the shares of certain large and medium capitalisation companies in the USA.

Investment Policy

In order to achieve the investment objective, the Fund will adopt an Indirect Investment Policy and will aim to replicate or track, before fees and expenses, the performance of the MSCI USA Index (the "**Reference Index**") by investing in transferable securities (the "**Invested Assets**") and use index swap agreements (a "**Swap(s)**") negotiated at arm's length with the Swap Counterparty, all in accordance with the investment restrictions. Further information on the Reference Index is contained under "General Description of the Reference Index".

The purpose of the Swap is to exchange the performance and/or income of the Invested Assets against the performance of either the net total return version of the Reference Index or the gross total return version of the Reference Index (the "**Swap Reference Index**"). A gross total return index calculates the performance of the stocks assuming that all dividends and distributions are reinvested on a gross basis. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested after the deduction of any taxes that may apply. The constituent selection and rebalancing rules described under "General Description of the Reference Index" apply to both the gross and net total return versions of the Reference Index. The particular Swap Reference Index shall be selected in the absolute discretion of the Investment Manager in order to seek to reduce OTC Swap Transactions Costs and enhance cost efficiencies of the Fund. There is no guarantee that the selection of the Swap Reference Index will result in lower OTC Swap Transaction Costs as this will depend on prevailing market conditions. For the Fund, all references to "Reference Index" in this Supplement, the Prospectus and any addendum thereto, shall also be read as a reference to "Swap Reference Index" where there are references to derivatives or OTC Swap Transaction(s) in relation to the Reference Index.

The Invested Assets that the Fund will invest in, will be equity securities and equity related securities (which may include global depositary receipts (GDR) and American depositary receipts (ADR)) of issuers listed or traded on an official stock exchange of an OECD Member State.

The Fund is managed according to a passive approach.

There is no assurance that the investment objective of the Fund will actually be achieved.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index and the performance of the Swap.

The Fund will have no Final Repurchase Date. However, the Board of Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

The Fund may invest in ancillary liquid assets which may include secured and/or unsecured deposits.

The investments and liquid assets the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the main part of the Prospectus.

OTC Swap Transaction Costs

The Fund will invest in Swaps subject to the conditions and limits laid down by the Central Bank. With regard to the Swaps entered into, the Fund shall receive the performance of the Reference Index adjusted to reflect certain index replication costs. The nature of these costs will be associated with (i) the buying and selling by the Swap Counterparty of the constituents of the Reference Index in order to reflect the Reference Index performance; or (ii) custody or other related costs incurred by the Swap Counterparty in relation to holding the constituents of the Reference Index; or (iii) taxes or other duties imposed on the buying or selling of the constituents of the Reference Index; or (iv) taxes imposed on any income derived from the constituents of the Reference Index; or (v) any other transactions performed by the Swap Counterparty in relation to the constituents of the Reference Index. The Swap Counterparty will be responsible for any transaction costs incurred by the Fund in investing in the Invested Assets.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund’s financial derivative instrument positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund’s global exposure and to ensure that the Fund’s use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund’s Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

The Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Concentration of the Reference Index

The Reference Index is concentrated in securities from a single country. As a result, any country-specific political or economic changes may have an adverse impact on the performance of the Reference Index and the Net Asset Value of the Fund.

Distribution Shares

There is no guarantee that distributing Share Classes will make dividend payments. Where a dividend payment is made by the D Share Class(es), the Net Asset Value of such Share Class(es) will be reduced by the gross amount of such dividends on the ex-dividend date.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

Dividends are not expected to be declared and paid on the "1C" Shares. Dividends may be declared and paid on the “1D” Shares up to four times per annum.

General Information Relating to the Fund

Base Currency USD

Cut-off Time Means 4.30 p.m. Dublin time on the relevant Transaction Day.

Initial Offer Period The Initial Offer Period in respect of the “1C” and “1D” Shares shall be from 9:00 a.m. on 11 February 2026 to 4:30 p.m. (Dublin time) on 10 August 2026 or such earlier or later date as the Directors may determine and notify in advance to the Central Bank.

Fund Classification (InvStG) Equity Fund, target minimum percentage of 70%.

Minimum Fund Size USD 50,000,000.

Settlement Day	Means up to nine Settlement Days following the Transaction Day[105].

[105] *In the case that a Significant Market is closed for trading or settlement on any Settlement Day during the period between the relevant Transaction Day and the expected settlement date (inclusive), and/or settlement in the base currency of the Fund is not available on the expected settlement date, there may be corresponding delays to the settlement times indicated in this Supplement subject to the regulatory limit on settlement periods of 10 Business Days from the Cut-off Time. Earlier or later times may be determined by the Management Company at its discretion, whereby notice will be given on* www.Xtrackers.com.

Significant Market Means an Indirect Replication Significant Market.

Transparency under SFDR The Fund does not promote environmental or social characteristics and does not have sustainable investment or the reduction of carbon emissions as its objective. Therefore, the Fund discloses under Article 6 of SFDR. Please refer to the section entitled "Sustainability-related disclosures under SFDR and EU Taxonomy Regulation" set out in the Prospectus for further information in relation to sustainability risks, their integration by the Management Company and their impact on the Fund.

This section headed "Fees and Expenses" should be read in conjunction with the section headed "Fees and Expenses" in the Prospectus.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is administered by MSCI Limited (the "**Index Administrator**").

The Reference Index is a free float-adjusted market capitalisation weighted index reflecting the performance of large and mid-capitalisation companies in the USA.

In order to be eligible for inclusion in the Reference Index, securities are assessed in accordance with eligibility criteria which include country classification, minimum size and minimum liquidity requirements described in the MSCI Global Investable Market Indexes Methodology (e.g., frequency of trading of the security or annual traded value ratio). For details on the Global Investable Market Indexes and the Reference Index, please refer to the respective methodology, which can be found on www.msci.com.

The Reference Index is calculated in US Dollars on an end of day basis.

The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested after the deduction of any taxes that may apply.

The Reference Index is reviewed and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

The Reference Index has a base date of 31 December 1986.

Further Information

MSCI Limited has been granted authorisation by the UK FCA as a UK administrator for all MSCI equity indices under the UK's Benchmarks Regulation and is listed on the FCA's register for administrators.

Additional information on the Reference Index, its composition, calculation and rules for periodical review and re-balancing and the general methodology behind the MSCI indices can be found on www.msci.com. Index constituents can be viewed under https://www.msci.com/constituents.

UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

SUPPLEMENT 85: Xtrackers MSCI World IMI UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers MSCI World IMI UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus"), the first addendum to the Prospectus dated 1 December 2023 (the "Addendum")), and must be read in conjunction with, the Prospectus and the Addendum.

Xtrackers (IE) plc

Dated 20 February 2026

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of the shares of large, medium and small capitalisation companies across global developed markets.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track before fees and expenses, the performance of the MSCI World Investable Market Index (the "**Reference Index**"), by holding a portfolio of equity securities that comprises all, or a representation of the securities comprised in the Reference Index or unrelated transferable securities being equity securities which would typically be similar to the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*").

The Fund is managed according to a passive approach and is an Optimised Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). The optimised sample of securities determined will be selected with the aim of providing the most representative sample of the Reference Index based on its evaluation of the Underlying Securities against factors including, but not limited to, the correlation of the Underlying Securities to the Reference Index and the exposure, liquidity and risk of the Underlying Securities. Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus.

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the main part of the Prospectus.

The value of the Fund's Shares is linked to the Reference Index, the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities from time to time under the conditions and within the limits laid down by the Central Bank and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "**Use of Derivatives by Direct Investment Funds**" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Further, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

Dividends are not expected to be declared and paid on the "1C" Shares.

General Information Relating to the Fund

Base Currency USD

Cut-off Time Means 4.30 p.m. Dublin time on the Business Day before the relevant Transaction Day.

This section headed "Fees and Expenses" should be read in conjunction with the section headed "Fees and Expenses" in the Prospectus.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is administered by MSCI Limited (the "**Index Administrator"**).

The Reference Index is a free float-adjusted market capitalisation weighted index reflecting the performance of large, medium, and small capitalisation companies across global developed markets, identified according to the Index Administrator's classification framework. For details on the MSCI classification framework please see https://www.msci.com/our-solutions/indexes/market-classification.

In order to be eligible for inclusion in the Reference Index, securities are assessed in accordance with eligibility criteria which include:

- Country classification, being from developed market countries only;
- Minimum size, incorporating 99% of the free float-adjusted market capitalisation of the investable equity universe;
- Minimum liquidity, incorporating a minimum of one eligible listing, frequency of trading of the security or minimum annual traded value ratio requirements; and
- Minimum foreign inclusion factor requirements, incorporating the proportion of shares outstanding that is available for purchase in the public equity markets by international investors.

Securities are identified as large, medium and small capitalisation according to the Index Administrator's size segment methodology. The Reference Index covers approximately 99% of the free-float adjusted market capitalisation of each developed market country.

For details on the Global Investable Market Indexes and the Reference Index, please refer to the respective methodology, which can be found on www.msci.com.

The underlying constituents of the Reference Index are listed in multiple currencies. The Reference Index is calculated in US Dollars on an end of day basis. The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested after the deduction of any taxes that may apply.

The Reference Index is reviewed and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

The Reference Index has a base date of 31 May 1994.

Further Information

MSCI Limited has been granted authorisation by the UK FCA as a UK administrator for all MSCI equity indices under the UK's Benchmarks Regulation and is listed on the FCA's register for administrators.

Additional information on the Reference Index, its composition, calculation and rules for periodical review and re-balancing and the general methodology behind the MSCI indices can be found on www.msci.com. Index constituents can be viewed under https://www.msci.com/constituents.

SUPPLEMENT 86: Xtrackers Global Corporate Bond UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers Global Corporate Bond UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus"), the first addendum to the Prospectus dated 1 December 2023 and the second addendum to the Prospectus dated 16 April 2026 (the "Addenda")), and must be read in conjunction with the Prospectus and the Addenda.

Xtrackers (IE) plc

Dated 8 July 2026

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of investment grade corporate debt publicly issued in major domestic and Eurobond markets.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track before fees and expenses, the performance of the ICE BofA Global Corporate Index (the "**Reference Index**"), by holding a portfolio of investment grade corporate debt securities (being corporate bonds) that comprises all, or a representation of the securities comprised in the Reference Index or unrelated transferable securities being fixed income securities which would typically be similar to the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*").

The Fund is managed according to a passive approach and is an Optimised Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). The optimised sample of securities determined will be selected with the aim of providing the most representative sample of the Reference Index based on its evaluation of the Underlying Securities against factors including, but not limited to, the correlation of the Underlying Securities to the Reference Index and the exposure, liquidity and risk of the Underlying Securities. Any unrelated transferable securities held by the Fund will typically be similar to the securities comprised in the Reference Index. Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus.

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets that the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the Prospectus.

The value of the Fund's Shares is linked to the Reference Index (and, for Currency Hedged Share Classes, the relevant hedging arrangement, as described under "**Share Class Hedging**"), the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Share Class Hedging

The "2C – EUR Hedged", "3C – USD Hedged", "4C – GBP Hedged", "4D – GBP Hedged" and "5C – CHF Hedged" Share Classes ("**Currency Hedged Share Class**", as indicated under Description of the Shares below) are subject to currency hedging.

The Fund will seek to hedge against the currency exposures of the Underlying Securities in the portfolio which differ from the currency of the respective Currency Hedged Share Class in accordance with the "**Share Class Currency Hedging Methodology**" set out in the Prospectus.

Investors should note that the Currency Hedged Share Classes will not completely eliminate currency risk, or provide a precise hedge, and as such, investors may have exposures to currencies other than the currency of the Currency Hedged Share Class.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities from time to time under the conditions and within the limits laid down by the Central Bank and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "**Use of Derivatives by Direct Investment Funds**" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of a Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Further, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS Directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities from time to time under the conditions and within the limits laid down by the Central Bank and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "**Use of Derivatives by Direct Investment Funds**" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of a Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Further, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS Directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities from time to time under the conditions and within the limits laid down by the Central Bank and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "**Use of Derivatives by Direct Investment Funds**" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of a Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Further, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS Directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

General Information Relating to the Fund

Base Currency	USD
Cut-off Time	Means 4.30 p.m. Dublin time on the Business Day before the relevant Transaction Day.
Initial Offer Period	The Initial Offer Period in respect of the "1C", "1D", "2C – EUR Hedged", "3C - USD Hedged", "4C - GBP Hedged", "4D – GBP Hedged" and "5C – CHF Hedged" Shares shall be from 9:00 a.m. on 9 July 2026 to 4:30 p.m. (Dublin time) on 5 January 2027 or such earlier or later date as the Directors may determine and notify in advance to the Central Bank.
Minimum Fund Size	USD 50,000,000.
Settlement Day	Means up to nine Settlement Days following the Transaction Day[107].
Securities Lending	No
Transparency under SFDR	The Fund does not promote environmental or social characteristics and does not have sustainable investment or the reduction of carbon emissions as its objective. Therefore, the Fund discloses under Article 6 of SFDR. Please refer to the section entitled "Sustainability-related disclosures under SFDR and EU Taxonomy Regulation" set out in the Prospectus for further information in relation to sustainability risks, their integration by the Management Company and their impact on the Fund.

[107] *In the case that a Significant Market is closed for trading or settlement on any Settlement Day during the period between the relevant Transaction Day and the expected settlement date (inclusive), and/or settlement in the base currency of the Fund is not available on the expected settlement date, there may be corresponding delays to the settlement times indicated in this Supplement subject to the regulatory limit on settlement periods of 10 Business Days from the Cut-off Time. Earlier or later times may be determined by the Management Company at its discretion, whereby notice will be given on* www.Xtrackers.com.

Significant Market Means a Direct Replication Significant Market.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is administered by ICE Data Indices, LLC. ("**ICE**") (the "**Index Administrator**").

The Reference Index represents the performance of investment grade corporate debt publicly issued in major domestic and Eurobond markets which meet certain currency, minimum amount outstanding, bond type and maturity criteria. For bonds to be eligible for inclusion they must be rated investment grade (BBB3 or higher) using the ICE composite rating. This consists of the average rating of the applicable ratings of Moody's, S&P and Fitch; when a rating from only two agencies is available, the average of these is used; when only one agency rates a bond, that rating is used.

The composition of the Reference Index is rebalanced on a monthly basis, at each month-end. On each rebalancing date, the criteria above will be applied to the universe of eligible bonds in order to determine those bonds which shall be included in the Reference Index. The bonds included in the Reference Index are weighted on each rebalancing date according to the relative market value of each issuance.

The Reference Index is calculated on a total return basis which means that the payments from coupons are reinvested in the Reference Index. Payments from coupons and scheduled partial and unscheduled full redemptions are held as cash until the next rebalancing, when the cash is reinvested in the Reference Index.

Bonds in the Reference Index are priced on the bid side. New corporate issuances entering the Reference Index are priced on the offer side and are then priced on the bid side.

The Reference Index is calculated in USD on an end of day basis.

Further Information

ICE Data Indices, LLC has been granted authorisation by the UK FCA as a UK administrator for all ICE fixed income indices under the UK's Benchmarks Regulation and is listed on the FCA's register for administrators.

Additional information on the Reference Index, its composition, calculation and rules for periodical review and re-balancing and the general methodology behind the ICE indices can be found on https://indices.ice.com. Index constituents can be viewed under https://indices.ice.com.

IMPORTANT

SUPPLEMENT 87: Xtrackers Global High Yield Corporate Bond UCITS ETF

Supplement to the Prospectus

This Supplement contains information in relation to Xtrackers Global High Yield Corporate Bond UCITS ETF (the "**Fund**"), a sub-fund of Xtrackers (IE) plc (the "**Company**") an umbrella type open-ended investment company with segregated liability between sub-funds and with variable capital governed by the laws of Ireland and authorised by the Central Bank of Ireland (the "**Central Bank**").

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the prospectus of the Company dated 15 June 2023 (the "Prospectus"), the first addendum to the Prospectus dated 1 December 2023 and the second addendum to the Prospectus dated 16 April 2026 (the "Addenda")), and must be read in conjunction with the Prospectus and the Addenda.

An investment in the sub-fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Xtrackers (IE) plc

Dated 8 July 2026

IMPORTANT INFORMATION

The Fund is an ETF. The Shares of this Fund are fully transferable to investors and will be listed for trading on one or more stock exchanges.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the performance before fees and expenses of an index which is designed to reflect the performance of below investment grade corporate debt publicly issued in major domestic and Eurobond markets.

Investment Policy

In order to seek to achieve the investment objective, the Fund will adopt a Direct Investment Policy and will aim to replicate or track before fees and expenses, the performance of the ICE BofA Global High Yield Index (the "**Reference Index**"), by holding a portfolio of below investment grade corporate debt securities (being corporate bonds) that comprises all, or a representation of the securities comprised in the Reference Index or unrelated transferable securities being fixed income securities which would typically be similar to the securities comprised in the Reference Index (the "**Underlying Securities**"). Further information on the Reference Index is contained under "General Description of the Underlying Asset". The Investment Manager reserves the right to exclude from the portfolio of the Fund any securities from the Reference Index that do not comply with the Investment Manager's policies or standards (examples of which are described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*").

The Fund is managed according to a passive approach and is an Optimised Replication Fund (as described in the Prospectus under the heading "*Direct Investment Funds following a passive approach*"). The optimised sample of securities determined will be selected with the aim of providing the most representative sample of the Reference Index based on its evaluation of the Underlying Securities against factors including, but not limited to, the correlation of the Underlying Securities to the Reference Index and the exposure, liquidity and risk of the Underlying Securities. Any unrelated transferable securities held by the Fund will typically be similar to the securities comprised in the Reference Index. Full disclosure on the composition of the Fund's portfolio will be available on a daily basis at www.Xtrackers.com.

There is no assurance that the investment objective of the Fund will actually be achieved.

The Underlying Securities are listed or traded on markets and exchanges which are set out at Appendix I of the Prospectus, with the Underlying Securities being bought by the Fund from any broker or counterparty who trades on the markets and exchanges listed at Appendix I of the Prospectus.

As further described in the 'Efficient Portfolio Management and Financial Derivative Instruments' section below and in the Prospectus, the Fund may also invest in securities which are not constituents of the Reference Index and/or financial derivative instruments ("**FDIs**") related to a constituent or constituents of the Reference Index, for efficient portfolio management purposes, where such securities and/or FDIs would achieve a risk and return profile similar to that of the Reference Index, a constituent of the Reference Index or a sub-set of constituents of the Reference Index.

The Fund may invest in ancillary liquid assets which will include secured and/or unsecured deposits, and/or units or shares of other UCITS or other collective investment schemes which pursue a money market/cash strategy or which are related to the Reference Index or constituents of the Reference Index.

The investments and liquid assets that the Fund may hold on an ancillary basis will, together with any fees and expenses, be valued by the Administrator on each Valuation Day in order to determine the Net Asset Value of the Fund in accordance with the rules set out in the Prospectus.

The value of the Fund's Shares is linked to the Reference Index (and, for Currency Hedged Share Classes, the relevant hedging arrangement, as described under "**Share Class Hedging**"), the performance of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that they will recover their initial investment. The return that the Shareholder may receive will be dependent on the performance of the Reference Index.

The Fund will have no Final Repurchase Date. However, the Directors may decide to terminate the Fund in accordance with the terms set out in the Prospectus and/or the Articles of Association.

Share Class Hedging

The "2C – EUR Hedged", "3C – USD Hedged","4C – GBP Hedged", "4D – GBP Hedged" and "5C – CHF Hedged" Share Classes ("**Currency Hedged Share Class**", as indicated under Description of the Shares below) are subject to currency hedging.

The Fund will seek to hedge against the currency exposures of the Underlying Securities in the portfolio which differ from the currency of the respective Currency Hedged Share Class in accordance with the "**Share Class Currency Hedging Methodology**" set out in the Prospectus.

Investors should note that the Currency Hedged Share Classes will not completely eliminate currency risk, or provide a precise hedge, and as such, investors may have exposures to currencies other than the currency of the Currency Hedged Share Class.

Efficient Portfolio Management and Financial Derivative Instruments

The Fund may employ techniques and instruments relating to transferable securities from time to time under the conditions and within the limits laid down by the Central Bank and the conditions set out in the Prospectus and this Supplement for efficient portfolio management purposes.

The Fund may also invest in FDIs subject to the conditions and limits laid down by the Central Bank for efficient portfolio management purposes and as described in the Prospectus. For details of any FDIs the Fund may use, please refer to the section entitled "**Use of Derivatives by Direct Investment Funds**" set out in the Prospectus.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the risks attached to the Fund's FDI positions and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments in respect of the relevant Fund.

Calculation of Global Exposure

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage will not be in excess of 100% of the Fund's Net Asset Value.

Investment Restrictions

The general investment restrictions set out under "Investment Restrictions" in the Prospectus apply to the Fund.

Further, the Fund will not invest more than 10% of its assets in units or shares of other UCITS or other collective investment schemes in order to be eligible for investment by UCITS governed by the UCITS Directive.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders, in order to comply with the laws and regulations of the countries where Shareholders are located. Such investment restrictions will be included in an updated Supplement.

Borrowing

The Company may only borrow, for the account of the Fund, up to 10% of the Net Asset Value of the Fund provided that such borrowing is for temporary purposes. The assets of the Fund may be charged as security for any such borrowings.

Specific Risk Warning

Investors should note that the Fund is not capital protected or guaranteed and that the capital invested is not protected or guaranteed and investors in this Fund should be prepared and able to sustain losses up to the total capital invested.

Currency Hedging Risk

In order to mitigate against the risk of movements in the currency of a Currency Hedged Share Class against the currency of the portfolio constituents (where they are different to that of the relevant Currency Hedged Share Class currency), Share Class specific derivative transactions will be entered into for the purposes of acquiring currency hedges for each Currency Hedged Share Class. The return of the Share Class specific derivative transactions may not perfectly offset the actual fluctuations between the Currency Hedged Share Class currency and currency exposures of the securities that constitute the portion of the portfolio referable to the Currency Hedged Share Classes. No assurance can be given that such hedging activities will be entirely effective in achieving the purpose for which they have been entered into. While currency hedging reduces risks and losses in adverse market circumstances, it can also reduce and may completely offset gains in market circumstances that would otherwise have been beneficial had the position not been hedged. Consequently, the performance of a Currency Hedged Share Class may differ from that of the Underlying Asset as a result of the foreign exchange hedging transactions.

Emerging Markets

Investors in the Fund should be aware of the following risks associated with an investment in emerging markets:

a. *Emerging Market Risk*: Investments in the markets to which the Reference Index relates are currently exposed to risks pertaining to emerging markets generally. These include risks brought about by investment ceiling limits where foreign investors are subject to certain holding limits and constraints imposed on trading of listed securities where a registered foreign investor may only maintain a trading account with one licensed securities company in the relevant market. These may contribute to the illiquidity of the relevant securities market, as well as create inflexibility and uncertainty as to the trading environment.

b. *Legal Risk*: The economies of most emerging markets are often substantially less developed than those of other geographic regions such as the United States of America and Europe. The laws and regulations affecting these economies are also in a relatively early stage of development and are not as well established as the laws and regulations of developed countries. Such countries' securities laws and regulations may still be in their development stages and not drafted in a very concise manner which may be subject to interpretation. In the event of a securities related dispute involving a foreign party, the laws of these countries would typically apply (unless an applicable international treaty provides otherwise). The court systems of these nations are not as transparent and effective as court systems in more developed countries or territories and there can be no assurance of obtaining effective enforcement of rights through legal proceedings and generally the judgements of foreign courts are often not recognised.

c. *Regulatory Risk:* Foreign investment in emerging economies' primary and secondary securities markets is often still relatively new and much of the relevant securities laws may be ambiguous and/or have been developed to regulate direct investment by foreigners rather than portfolio investment. Investors should note that because of a lack of precedent, securities market laws and the regulatory environment for primary and secondary market investments by foreign investors can be in the early stages of development, and may, in some jurisdictions, remain untested. The regulatory framework of the emerging economies' primary and secondary securities markets is often in the development stage compared to many of the world's leading stock markets, and accordingly there may be a lower level of regulatory monitoring of the activities of the emerging economies' primary and secondary securities markets.

d. *Taxation Risk*: The Fund may invest in jurisdictions where the tax regime is not fully developed or is not sufficiently certain, and as such changes to the tax policies may be implemented without any prior notice and may also apply retrospectively. Any changes in tax policies may reduce the after-taxation returns of the underlying assets to which the performance of the Fund is linked.

e. *Liquidity Risk*: Primary market investors should be aware that it may take up to nine Settlement Days following the Transaction Day to receive the proceeds of redemptions requests.

Sub-Investment Grade (High Yield) Bonds

The Fund is exposed to the performance of bonds that are rated sub-investment grade, which may be more volatile than higher-rated bonds of similar maturity. High yield bonds may also be subject to greater levels of credit or default risk than higher rated bonds. The value of high yield bonds can be adversely affected by overall economic conditions, such as an economic downturn or a period of rising interest rates, and high yield bonds may be less liquid and more difficult to value or sell at an advantageous time or price than higher rated bonds. In particular, high yield bonds are often issued by smaller, less creditworthy companies or by highly leveraged (indebted) firms, which are generally less able than more financially stable firms to make scheduled payments of interest and principal. Potential investors in the Fund should consider the relative risks of investing in the Fund carefully and understand that high yield bonds are generally not meant for short-term investing. Prices for high yield bonds may be affected by a sudden lack of market liquidity, legislative and/or regulatory developments which could adversely affect the performance of the Fund.

Investors will also bear some other risks as described under the section "Risk Factors" in the Prospectus.

Profile of a Typical Investor

Prospective investors in the Fund should ensure that they understand fully the nature of the Fund, as well as the extent of their exposure to risks associated with an investment in the Fund and should consider the suitability of an investment in the Fund.

Investment in the Fund may be appropriate for investors who have knowledge of, and investment experience in this type of financial product and understand and can evaluate the strategy and characteristics in order to make an informed investment decision. Further, they may have free and available cash for investment purposes and

are looking to gain exposure to the securities making up the Reference Index. As the Net Asset Value per Share of the Fund will fluctuate and may fall in value, investment in the Fund should be viewed as suitable for investors who seek a return over the medium to long term. However, prospective investors should be prepared and able to sustain losses up to the total amount of capital invested.

The Prospectus sets out statements on taxation regarding the law and practice in force in the relevant jurisdiction at the date of the Prospectus. The statements are by way of a general guide to potential investors and Shareholders only and do not constitute legal or tax advice to Shareholders or potential investors. Shareholders and potential investors are therefore advised to consult their professional advisers concerning any investment in the Fund particularly as the tax position of an investor and the rates of tax may change over time.

Dividend Policy

Dividends are not expected to be declared and paid on the "1C", “2C – EUR Hedged”, “3C – USD Hedged”, “4C – GBP Hedged”, “4D – GBP Hedged” and “5C – CHF Hedged” Shares. Dividends may be declared and paid on the “1D” Shares up to four times per annum.

General Information Relating to the Fund

Base Currency	USD
Cut-off Time	Means 4.30 p.m. Dublin time on the relevant Transaction Day.
Initial Offer Period	The Initial Offer Period in respect of the "1C", “1D” “2C – EUR Hedged”, “3C – USD Hedged”, “4C – GBP Hedged”, “4D – GBP Hedged” and “5C – CHF Hedged” Shares shall be from 9:00 a.m. on 9 July 2026 to 4:30 p.m. (Dublin time) on 5 January 2027 or such earlier or later date as the Directors may determine and notify in advance to the Central Bank.
Minimum Fund Size	USD 50,000,000.
Settlement Day	Means up to nine Settlement Days following the Transaction Day[109].
Securities Lending	No

[109] *In the case that a Significant Market is closed for trading or settlement on any Settlement Day during the period between the relevant Transaction Day and the expected settlement date (inclusive), and/or settlement in the base currency of the Fund is not available on the expected settlement date, there may be corresponding delays to the settlement times indicated in this Supplement subject to the regulatory limit on settlement periods of 10 Business Days from the Cut-off Time. Earlier or later times may be determined by the Management Company at its discretion, whereby notice will be given on* www.Xtrackers.com.

Transparency under SFDR	The Fund does not promote environmental or social characteristics and does not have sustainable investment or the reduction of carbon emissions as its objective. Therefore, the Fund discloses under Article 6 of SFDR. Please refer to the section entitled "Sustainability-related disclosures under SFDR and EU Taxonomy Regulation" set out in the Prospectus for further information in relation to sustainability risks, their integration by the Management Company and their impact on the Fund.
Significant Market	Means a Direct Replication Significant Market.

GENERAL DESCRIPTION OF THE UNDERLYING ASSET

This section is a brief overview of the Reference Index. It contains a summary of the principal features of the Reference Index and is not a complete description of the Reference Index. In case of inconsistency between the summary of the Reference Index in this section and the complete description of the Reference Index, the complete description of the Reference Index prevails. Information on the Reference Index appears on the website identified below in "Further Information". Such information may change from time to time and details of the changes will appear on that website.

General Description of the Reference Index

The Reference Index is administered by ICE Data Indices, LLC. ("**ICE**") (the "**Index Administrator**").

The Reference Index represents the performance of below investment grade corporate debt publicly issued in major domestic and Eurobond markets which meet certain currency, minimum amount outstanding, bond type and maturity criteria. For bonds to be eligible for inclusion they must be rated below investment grade (less than BBB3) using the ICE composite rating. This consists of the average rating of the applicable ratings of Moody's, S&P and Fitch; when a rating from only two agencies is available, the average of these is used; when only one agency rates a bond, that rating is used.

The composition of the Reference Index is rebalanced on a monthly basis, at each month-end. On each rebalancing date, the criteria above will be applied to the universe of eligible bonds in order to determine those bonds which shall be included in the Reference Index. The bonds included in the Reference Index are weighted on each rebalancing date according to the relative market value of each issuance.

The Reference Index is calculated on a total return basis which means that the payments from coupons are reinvested in the Reference Index. Payments from coupons and scheduled partial and unscheduled full redemptions are held as cash until the next rebalancing, when the cash is reinvested in the Reference Index.

Bonds in the Reference Index are priced on the bid side. New corporate issuances entering the Reference Index are priced on the offer side, and then priced on the bid side.

The Reference Index is calculated in USD on an end of day basis.

Further Information

ICE Data Indices, LLC has been granted authorisation by the UK FCA as a UK administrator for all ICE fixed income indices under the UK's Benchmarks Regulation and is listed on the FCA's register for administrators.

Additional information on the Reference Index, its composition, calculation and rules for periodical review and re-balancing and the general methodology behind the ICE indices can be found on https://indices.ice.com. Index constituents can be viewed under https://indices.ice.com.

APPENDIX III: PRE-CONTRACTUAL INFORMATION ON SUSTAINBLE INVESTMENTS

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI AC World Screened UCITS ETF

Legal entity identifier: 549300T1PSHCUYSNHE68

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	No
[ ] It will make a minimum of **sustainable investments with an environmental objective:** __%	[X] It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 1% of sustainable investments
[ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy	[ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
[ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	[X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	[X] with a social objective
[ ] It will make a minimum of **sustainable investments with a social objective:** __%	[ ] It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index selects companies from the Parent Index (as defined below) that meet certain minimum Environmental, Social and Governance ("**ESG**") standards, by excluding companies from the Parent Index which do not fulfil the following specific ESG criteria:

- Are unrated by MSCI ESG Research
- Are assigned an MSCI ESG Rating of CCC
- Have any involvement in controversial weapons
- Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction, and palm oil
- Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("**GHG**") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

The Reference Index uses company ratings and research provided by MSCI ESG Research. In particular, the following four components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aims to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.

• **Controversial Weapons Involvement**: The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

• **Tobacco involvement**: The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 1% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the MSCI ACWI Select Screened Index. The Reference Index is based on the MSCI AC World Index (the "Parent Index"). The Parent Index is designed to reflect the performance of the shares of large and medium capitalisation companies in global developed and emerging market countries. The Reference Index consists of companies from the Parent Index which meet certain minimum environmental, social and governance ("ESG") criteria.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index, which excludes companies from the Parent Index which do not fulfil specific ESG (environmental, social and governance) criteria:

- Are unrated by MSCI ESG Research;
- Are assigned an MSCI ESG Rating of CCC;
- Have any involvement in controversial weapons;
- Are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, tobacco, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil; and
- Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies.

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("**GHG**") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

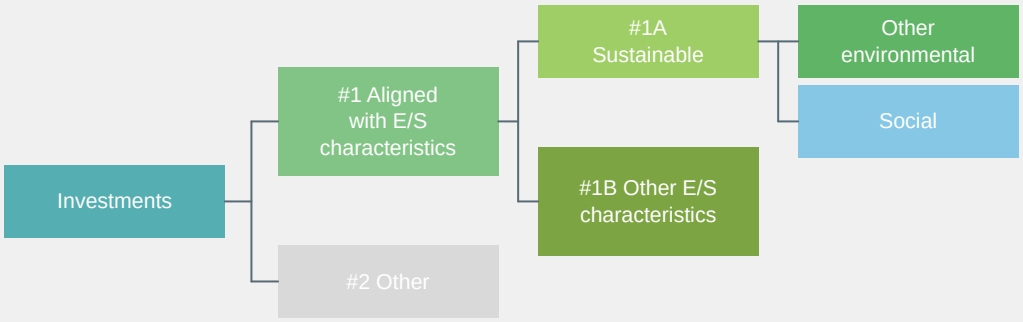
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 1% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments (“FDIs”) may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

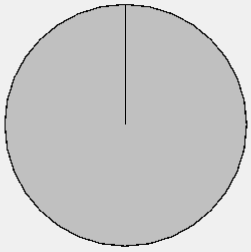
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

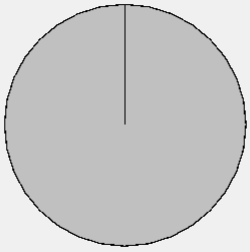
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 1%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 1%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the MSCI ACWI Select Screened Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by excluding companies from the Parent Index which do not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. Any unrelated transferable securities held by the financial product will typically be similar to the securities comprised in the Reference Index.

The financial product may enter into securities lending transactions for efficient portfolio management purposes. Where the financial product enters into securities lending transactions, the collateral received in relation to such transactions shall comply with ESG standards as determined by the relevant investment manager, sub-portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards shall be identified by reference to an appropriate developed market ESG equity index and will incorporate as a minimum ESG screens substantially similar to those of the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in global developed and emerging market countries. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

- Are unrated by MSCI ESG Research;
- Are assigned an MSCI ESG Rating of CCC;
- Have any involvement in controversial weapons;
- Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil; and
- Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies.

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas (“**GHG**”) intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI USA Screened UCITS ETF

Legal entity identifier: 5493001R2VWIV9D4XH46

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	X No
☐ It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 1% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective: __%**	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selects companies from the Parent Index (as defined below) that meet certain minimum Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which do not fulfil the following specific ESG criteria:

- Are unrated by MSCI ESG Research
- Are assigned an MSCI ESG Rating of CCC
- Have any involvement in controversial weapons
- Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction, and palm oil
- Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("**GHG**") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

The Reference Index uses company ratings and research provided by MSCI ESG Research. In particular, the following four components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aims to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.

• **Controversial Weapons Involvement**: The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

• **Tobacco involvement**: The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 1% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the MSCI USA Select Screened Index. The Reference Index is based on the MSCI USA Index (the "Parent Index"). The Parent Index is designed to reflect the performance of the shares of of large and medium capitalisation companies in the USA. The Reference Index consists of companies from the Parent Index which meet certain minimum environmental, social and governance ("ESG") criteria.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index, which excludes companies from the Parent Index which do not fulfil specific ESG (environmental, social and governance) criteria:

- Are unrated by MSCI ESG Research;
- Are assigned an MSCI ESG Rating of CCC;
- Have any involvement in controversial weapons;
- Are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, tobacco, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil; and
- Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies.

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("**GHG**") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

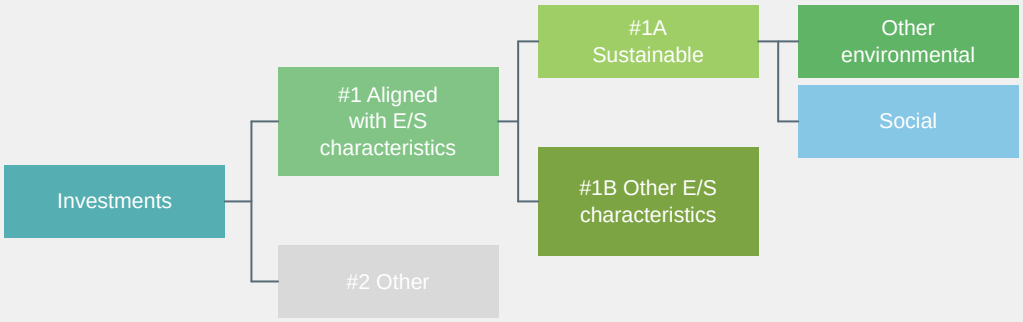
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 1% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments (“FDIs”) may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

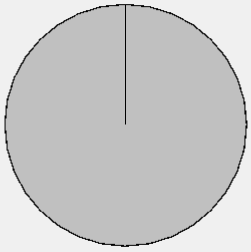
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

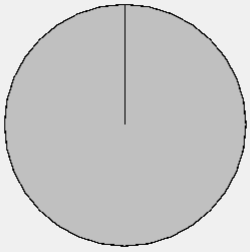
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 1%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 1%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the MSCI USA Select Screened Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by excluding companies from the Parent Index which do not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

The financial product may enter into securities lending transactions for efficient portfolio management purposes. Where the financial product enters into securities lending transactions, the collateral received in relation to such transactions shall comply with ESG standards as determined by the relevant investment manager, sub-portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards shall be identified by reference to an appropriate developed market ESG equity index and will incorporate as a minimum ESG screens substantially similar to those of the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in the USA. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

- Are unrated by MSCI ESG Research;
- Are assigned an MSCI ESG Rating of CCC;
- Have any involvement in controversial weapons;
- Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil; and
- Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies.

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("**GHG**") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers ESG USD Emerging Markets Bond Quality Weighted UCITS ETF

Legal entity identifier: 549300BQBF21JCBVKV46

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	X No
☐ It will make a minimum of **sustainable investments with an environmental objective: __%**	☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of __% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective: __%**	X It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of securities that comprises all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index is designed to offer a targeted coverage of the USD denominated emerging market sovereign bonds universe with adjusted weights, by allocating higher weights to countries with relatively solid fundamentals and higher MSCI ESG Government Ratings while reducing weights of countries with relatively weak fundamentals and lower MSCI ESG Government Ratings, with a minimum of 20% of the eligible universe being excluded solely on the basis of the MSCI ESG Government Ratings.

The weighting methodology aims to achieve an index country weight reflecting the relative fundamental strength and higher MSCI ESG Government Rating of each of the underlying index countries. Relative fundamental scores are utilised to determine the index country weights in the Reference Index.

Following the application of financial screening criteria, the Reference Index normalises country weights such that they add up to 100% and ranks countries which are still eligible for inclusion by their MSCI Government ESG Rating. The MSCI Government ESG Rating assesses a country's exposure to and management of environmental, social and governance risks and explain how these factors might impact the longterm sustainability of its economy. The factors which measure a country's exposure to and management of ESG risks include but are not limited to: efficiency of resource utilisation, performance in relation to socio-economic factors, financial management, corruption control, political stability. These factors take into account a wide range of underlying data points, covering sub-factors including but not limited to: energy security risk, water resources, vulnerability to environmental events, higher education and technological readiness, the judicial and penal system, and governance effectiveness. By providing a long-term view on sustainability the ratings aim to complement traditional government debt analysis in order to analyse a country's credit worthiness. Starting with the lowest MSCI Government ESG Rating, countries will be excluded until the cumulative market value weight of such exclusions reaches a minimum 20% threshold (effectively a "best-in-universe" approach). The remaining eligible country weights are then normalised again so that the cumulative weightings in the Reference Index add up to 100%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Country Environment Pillar Score:** The weighted average of the financial product's portfolio's market value sovereign environmental risk score, assessing issuers' overall performance on environmental risk factors as measured by MSCI.

• **Country Social Pillar Score:** The weighted average of the financial product's portfolio's market value sovereign social risk score, assessing issuers' overall performance on social risk factors as measured by MSCI.

• **Country Governance Pillar Score:** The weighted average of the financial product's portfolio's market value sovereign governance risk score, assessing issuers' overall performance on governance risk factors as measured by MSCI.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

N/A - Given the financial product does not intend to make sustainable investments and invests solely into sovereign debt, it is not expected that the financial product will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2(17) of SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that issuers follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

N/A - Given the financial product does not intend to make sustainable investments and invests solely into sovereign debt, it is not expected that the financial product will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2(17) of SFDR.

How have the indicators for adverse impacts on sustainability factors been taken into account?

N/A - Given the financial product does not intend to make sustainable investments and invests solely into sovereign debt, indicators for adverse impacts on sustainability factors have not been taken into account for the purposes of determining sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2(17) of SFDR.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A - Given the financial product does not intend to make sustainable investments and invests solely into sovereign debt, it is not expected that the financial product will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2(17) of SFDR.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Investee countries subject to social violations (no. 16).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the iBoxx MSCI ESG USD Emerging Markets Sovereigns Quality Weighted Index, which is designed to offer a targeted coverage of the USD denominated emerging market sovereign bonds universe with adjusted weights, by allocating higher weights to countries with relatively solid fundamentals and higher MSCI ESG Government Ratings while reducing weights of countries with relatively weak fundamentals and lower MSCI ESG Government Ratings, with a minimum of 20% of the eligible universe being excluded solely on the basis of the MSCI ESG Government Ratings.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index.

The weighting methodology aims to achieve an index country weight reflecting the relative fundamental strength and higher MSCI ESG Government Rating of each of the underlying index countries. Relative fundamental scores are utilised to determine the index country weights in the Reference Index.

Following the application of financial screening criteria, the Reference Index normalises country weights such that they add up to 100% and ranks countries which are still eligible for inclusion by their MSCI Government ESG Rating. The MSCI Government ESG Rating assesses a country's exposure to and management of environmental, social and governance risks and explain how these factors might impact the longterm sustainability of its economy. The factors which measure a country's exposure to and management of ESG risks include but are not limited to: efficiency of resource utilisation, performance in relation to socio-economic factors, financial management, corruption control, political stability. These factors take into account a wide range of underlying data points, covering sub-factors including but not limited to: energy security risk, water resources, vulnerability to environmental events, higher education and technological readiness, the judicial and penal system, and governance effectiveness. By providing a long-term view on sustainability the ratings aim to complement traditional government debt analysis in order to analyse a country's credit worthiness. Starting with the lowest MSCI Government ESG Rating, countries will be excluded until the cumulative market value weight of such exclusions reaches a minimum 20% threshold (effectively a "best-in-universe" approach). The remaining eligible country weights are then normalised again so that the cumulative weightings in the Reference Index add up to 100%.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

Given the financial product invests solely into sovereign debt, there is no policy to assess good governance practices of investee companies. Nonetheless, the investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes and/or underweights countries that have an ESG Score (which assesses, amongst other things, a country's governance risks) below a certain threshold.

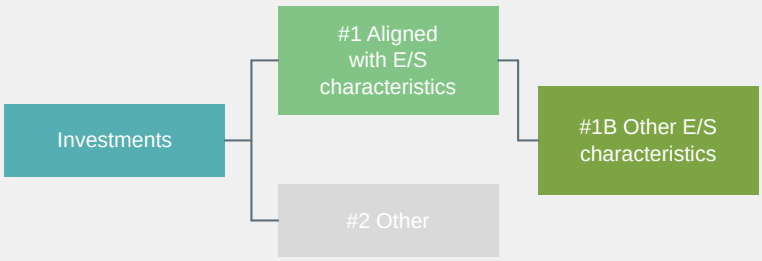
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 0% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments (“FDIs”) may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

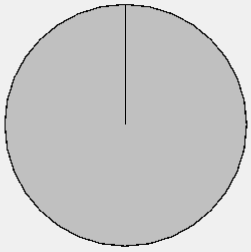
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

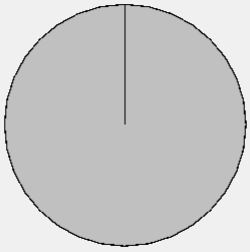
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the iBoxx MSCI ESG USD Emerging Markets Sovereigns Quality Weighted Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by adjusting weights, by allocating higher weights to countries with relatively solid fundamentals and higher MSCI ESG Government Ratings while reducing weights of countries with relatively weak fundamentals and lower MSCI ESG Government Ratings, with a minimum of 20% of the eligible universe being excluded solely on the basis of the MSCI ESG Government Ratings.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to track, before fees and expenses, the performance of the Reference Index by holding a portfolio mainly comprised of fixed rate USD denominated government bonds issued by emerging market countries that comprises all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. Any unrelated transferable securities held by the financial product will typically be similar to the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index differs from a broad market index representing the performance of USD denominated sovereign bonds issued by emerging markets by adjusting weights, allocating higher weights to countries with relatively solid fundamentals and higher MSCI ESG Government Ratings while reducing weights of countries with relatively weak fundamentals and lower MSCI ESG Government Ratings.

The weighting methodology aims to achieve an index country weight reflecting the relative fundamental strength and higher MSCI ESG Government Rating of each of the underlying index countries. Relative fundamental scores are utilised to determine the index country weights in the Reference Index.

Following the application of financial screening criteria, the Reference Index normalises country weights such that they add up to 100% and ranks countries which are still eligible for inclusion by their MSCI Government ESG Rating. The MSCI Government ESG Rating assesses a country's exposure to and management of environmental, social and governance risks and explain how these factors might impact the longterm sustainability of its economy. The factors which measure a country's exposure to and management of ESG risks include but are not limited to: efficiency of resource utilisation, performance in relation to socio-economic factors, financial management, corruption control, political stability. These factors take into account a wide range of underlying data points, covering sub-factors including but not limited to: energy security risk, water resources, vulnerability to environmental events, higher education and technological readiness, the judicial and penal system, and governance effectiveness. By providing a long-term view on sustainability the ratings aim to complement traditional government debt analysis in order to analyse a country's credit worthiness. Starting with the lowest MSCI Government ESG Rating, countries will be excluded until the cumulative market value weight of such exclusions reaches a minimum 20% threshold (effectively a "best-in-universe" approach). The remaining eligible country weights are then normalised again so that the cumulative weightings in the Reference Index add up to 100%.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its general methodology, composition, ESG criteria, calculation and rules for periodical review and re-balancing can be found on https://ihsmarkit.com/products/indices.html.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI EMU Screened UCITS ETF

Legal entity identifier: 549300KF3LBYJA2KD428

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

Yes	X No
☐ It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 1% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** __%	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selects companies from the Parent Index (as defined below) that meet certain minimum Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which do not fulfil the following specific ESG criteria:

- Are unrated by MSCI ESG Research
- Are assigned an MSCI ESG Rating of CCC
- Have any involvement in controversial weapons
- Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction, and palm oil
- Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("**GHG**") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

The Reference Index uses company ratings and research provided by MSCI ESG Research. In particular, the following four components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aims to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.

• **Controversial Weapons Involvement**: The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

• **Tobacco involvement**: The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 1% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the MSCI EMU Select Screened Index. The Reference Index is based on the MSCI EMU Index (the "Parent Index"). The Parent Index is designed to reflect the performance of the shares of large and medium-capitalisation companies in developed market countries in the European Economic and Monetary Union. The Reference Index consists of companies from the Parent Index which meet certain minimum environmental, social and governance ("ESG") criteria.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index, which excludes companies from the Parent Index which do not fulfil specific ESG (environmental, social and governance) criteria:

- Are unrated by MSCI ESG Research;
- Are assigned an MSCI ESG Rating of CCC;
- Have any involvement in controversial weapons;
- Are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, tobacco, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil; and
- Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies.

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("**GHG**") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

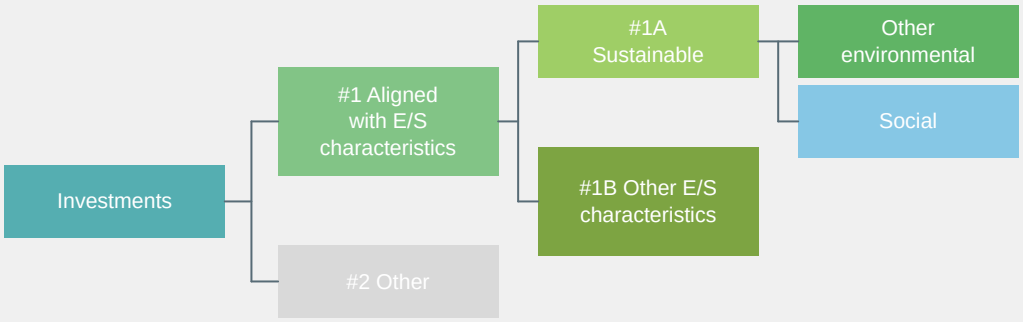
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 1% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments (“FDIs”) may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

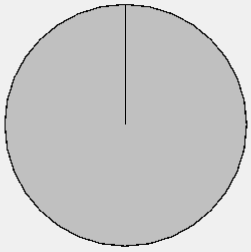
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

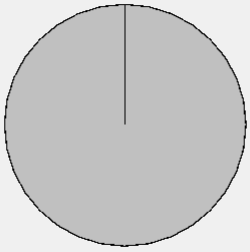
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 1%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 1%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the MSCI EMU Select Screened Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by excluding companies from the Parent Index which do not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

The financial product may enter into securities lending transactions for efficient portfolio management purposes. Where the financial product enters into securities lending transactions, the collateral received in relation to such transactions shall comply with ESG standards as determined by the relevant investment manager, sub-portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards shall be identified by reference to an appropriate developed market ESG equity index and will incorporate as a minimum ESG screens substantially similar to those of the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium-capitalisation companies in developed market countries in the European Economic and Monetary Union. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

- Are unrated by MSCI ESG Research;
- Are assigned an MSCI ESG Rating of CCC;
- Have any involvement in controversial weapons;
- Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil; and
- Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies.

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("**GHG**") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers Global Infrastructure ESG UCITS ETF

Legal entity identifier: 254900RTC4KIYT715444

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	X No
☐ It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** __%	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The financial product specifically promotes, amongst others, the environmental characteristics of: a reduction in greenhouse gas ("GHG") intensity; and the social characteristics of: a reduction in human and labour rights controversy occurrences and a reduction in controversial weapon production.

In order to promote these characteristics, the financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of the shares of listed companies from developed markets that are owners and operators of infrastructure assets, and which meet certain, environmental, social and governance ("ESG") criteria.

The Reference Index is based on the Parent Index (as defined below). The Reference Index seeks to minimize the difference in constituent weights relative to the Parent Index, while aligning with certain ESG and climate-related criteria through the use of optimisation constraints (as defined below) and excluding companies which do not fulfil certain ESG criteria.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

• Are classified by S&P Global Sustainable1's ("Sustainable1") Business Involvement Screens as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, oil sands extraction, thermal coal, and conventional weapons;
• Are classified by S&P Trucost Limited ("Trucost") in their sector revenue dataset as breaching certain thresholds in controversial activities, including, but not limited to, fossil fuel exploration, processing, and generation;
• Fail to comply with the United Nations Global Compact principles as determined by Sustainalytics by Morningstar ("Sustainalytics"); and
• Are assessed by S&P Global, using RepRisk data, to have been involved in certain controversies or ESG risk incidents.

The Reference Index utilises ESG data and research from Sustainable1, Trucost, Sustainalytics and RepRisk for the ESG Exclusions.

Sustainable1 Business Involvement Screens

Sustainable1 Business Involvement Screens aim to enable investors to align investment values with investment strategy by providing detailed assessments of common areas of concern pinpointing the level of involvement.
For more details on S&P Global Business Involvement Screens, please refer to https://www.spglobal.com for more information.

Sustainalytics

Sustainalytics, a Morningstar company, is a leading independent ESG and corporate governance research, ratings and analytics firm that supports investors around the world with the development and implementation of responsible investment strategies. Companies without Sustainalytics coverage are ineligible for index inclusion until they receive such coverage. Please refer to http://www.sustainalytics.com for more information.

Trucost

S&P Trucost Limited (a part of S&P Global) is a leader in carbon and environmental data and risk analysis. S&P Trucost Limited assesses risks relating to climate change, natural resource constraints, and broader environmental, social, and governance factors. Companies and financial institutions use Trucost intelligence to understand their exposure to these factors, inform resilience, and identify transformative solutions for a more sustainable global economy. Please refer to https://www.spglobal.com for more information.

Reprisk

RepRisk is a leading data science company, is used for daily filtering, screening, and analysis of ESG risk incidents and controversial activities related to the companies which may result in further exclusions of companies from the Reference Index as determined by the Index Administrator. Please refer to http://www.reprisk.com for more information.

Security Selection and Weighting

Securities from the Parent Index which pass the ESG Exclusions outlined above will constitute the eligible universe (the **"Eligible Universe**"). Securities from the Eligible Universe are selected and weighted following an optimisation-based approach subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe are subject to climate and other ESG constraints including, but not limited to:

•A minimum improvement in the weighted average S&P Global ESG Score of the Reference Index relative to the Parent Index;
• A minimum reduction in the weighted average Trucost Total Impact Ratio of the Reference Index relative to the Parent Index;
• A minimum reduction in greenhouse gas ("GHG"), (expressed in CO2 equivalents) emissions intensity of the Reference Index relative to the Parent Index;
• A minimum reduction in the Physical Risk Score of the Reference Index relative to the Parent Index;
• A minimum reduction in Green-to-Brown Revenue Share of the Reference Index relative to the Parent Index; and
• A minimum improvement in the weight of eligible Science Based Target Companies relative to the Parent Index.

The Reference Index utilises ESG data and research from S&P Global ESG and Trucost for the Climate and other ESG Objectives.

S&P Global ESG

The S&P Global ESG Score is calculated by S&P Global Sustainable1 ("Sustainable1") using a company's 'Corporate Sustainability Assessment' ("CSA") which is derived using either company-provided data, publicly available information, or a combination thereof. Please refer to https://www.spglobal.com for more information.

Trucost

Trucost climate data, as defined above, is used for the Climate related Objectives. Additionally, the below two Trucost attributes are utilised in the climate and other ESG constraints:

•Trucost's Total Impact Ratio is a company level metric representing the sum of all the direct and indirect external environmental damage costs of a company, expressed as a percentage of revenue. Direct costs are those associated with a company's direct operations, while indirect costs are those that are borne in the company's supply chain. This includes coverage of the company's greenhouse gases, water use, waste generated, land, water and air pollutants generated, and natural resources used.

•Trucost's Green-to-Brown Revenue Share is the weighted average share of revenue derived from Green Sectors (including but not limited to renewable energy generation) over the weighted average share of revenue derived from Brown Sectors (including but not limited to non-renewable energy generation), as defined by Trucost Sectors.

Diversification and Deviation Objectives

Securities in the Reference Index are subject to diversification constraints to ensure diversification and representativeness of, for example, constituent weightings and liquidity constraints compared to the Parent Index.

The Reference Index is reviewed and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies:** The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as determined by either MSCI, Sustainalytics, or RepRisk. Details on the provider used are available upon request.

• **Greenhouse Gas Intensity:** The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) , as determined by either MSCI or Trucost. Details on the provider used are available upon request.

• **Controversial Weapons Involvement:** The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments, as determined by either MSCI, Sustainalytics, or RepRisk. Details on the provider used are available upon request.

• **Tobacco involvement:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, as determined by either MSCI or ISS ESG. Details on the provider used are available upon request.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

At least 10% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

•Carbon footprint (no. 2);
•GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity-sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no.14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

X

Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

•Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity-sensitive areas (no. 7)
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no.14).

No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the “Reference Index”, which is the Dow Jones Brookfield Global Green Infrastructure Index, which is designed to reflect the performance of the shares of listed companies from developed markets that are owners and operators of infrastructure assets, and which meet certain, environmental, social and governance criteria. The Reference Index is based on the Dow Jones Brookfield Global Infrastructure Plus Index (the“**Parent Index**”). The Parent Index is designed to reflect the performance of companies from global developed markets that are owners and operators of infrastructure assets, identified by their cash flows from certain infrastructure sectors, as classified by the Index Administrator. The Reference Index seeks to minimize the difference in constituent weights relative to the Parent Index, while aligning with certain ESG and climate-related criteria through the use of optimisation constraints and excluding companies which do not fulfil certain ESG criteria.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index is based on the Parent Index. The Reference Index seeks to minimize the difference in constituent weights relative to the Parent Index, while aligning with certain ESG and climate-related criteria through the use of optimisation constraints and excluding companies which do not fulfil certain ESG criteria.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

• Are classified by S&P Global Sustainable1’s (“Sustainable1”) Business Involvement Screens as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, oil sands extraction, thermal coal, and conventional weapons;
• Are classified by S&P Trucost Limited (“Trucost”) in their sector revenue dataset as breaching certain thresholds in controversial activities, including, but not limited to, fossil fuel exploration, processing and generation;
• Fail to comply with the United Nations Global Compact principles as determined by Sustainalytics by Morningstar (“Sustainalytics”); and
•Are assessed by S&P Global, using RepRisk data, to have been involved in certain controversies or ESG risk incidents.

The Reference Index utilises ESG data and research from Sustainable, Trucost, Sustainalytics and RepRisk for the ESG Exclusions.

Security Selection and Weighting

Securities from the Parent Index which pass the ESG Exclusions outlined above will constitute the eligible universe (the “**Eligible Universe**”). Securities from the Eligible Universe are selected and weighted following an optimisation-based approach subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe are subject to climate and other ESG constraints including, but not limited to:

• A minimum improvement in the weighted average S&P Global ESG Score of the Reference Index relative to the Parent Index;
• A minimum reduction in the weighted average Trucost Total Impact Ratio of the Reference Index relative to the Parent Index;
• A minimum reduction in greenhouse gas (“GHG”), (expressed in CO2 equivalents) emissions intensity of the Reference Index relative to the Parent Index;
•A minimum reduction in the Physical Risk Score of the Reference Index relative to the Parent Index;
• A minimum reduction in Green-to-Brown Revenue Share of the Reference Index relative to the Parent Index; and
• A minimum improvement in the weight of eligible Science Based Target Companies relative to the Parent Index.

The Reference Index utilises ESG data and research from S&P Global ESG and Trucost for the Climate and other ESG Objectives.

S&P Global ESG

The S&P Global ESG Score is calculated by S&P Global Sustainable1 (“Sustainable1”) using a company’s ‘Corporate Sustainability Assessment’ (CSA) which is derived using either company-provided data, publicly available information, or a combination thereof. Please refer to https://www.spglobal.com for more information.

Trucost

Trucost climate data, as defined above, is used for the Climate related Objectives. Additionally, the below two Trucost attributes are utilised in the climate and other ESG constraints:

•Trucost’s Total Impact Ratio is a company level metric representing the sum of all the direct and indirect external environmental damage costs of a company, expressed as a percentage of revenue. Direct costs are those associated with a company’s direct operations, while indirect costs are those that are borne in the company’s supply chain. This includes coverage of the company’s greenhouse gases, water use, waste generated, land, water and air pollutants generated, and natural resources used.
•Trucost’s Green-to-Brown Revenue Share is the weighted average share of revenue derived from Green Sectors (including but not limited to renewable energy generation) over the weighted average share of revenue derived from Brown Sectors (including but not limited to non-renewable energy generation), as defined by Trucost Sectors.

Diversification and Deviation Objectives

Securities in the Reference Index are subject to diversification constraints to ensure diversification and representativeness of, for example, constituent weightings and liquidity constraints compared to the Parent Index.

The Reference Index is reviewed and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies which breach certain international norm standards (including governance controversies) using Sustainalytics ESG data. The weighted average S&P Global ESG rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) of the index must be higher than the rating of the investment universe after eliminating at least 25% of the least well-rated securities.

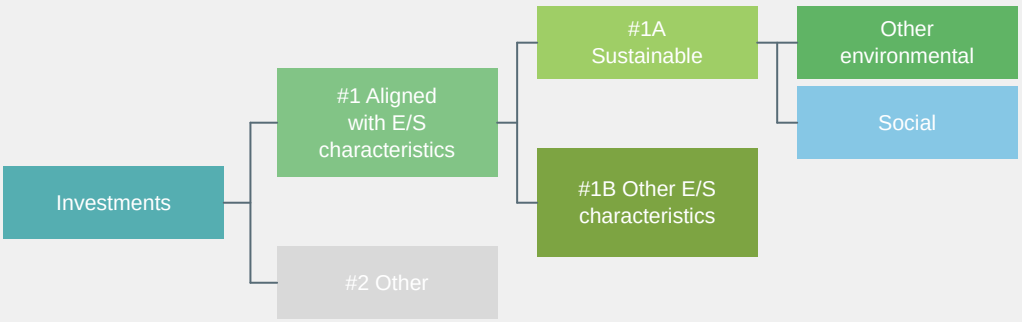
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 10% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("**FDIs**") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

Although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

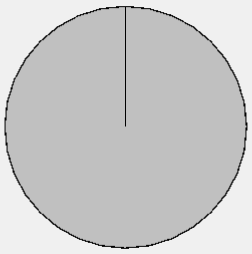
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

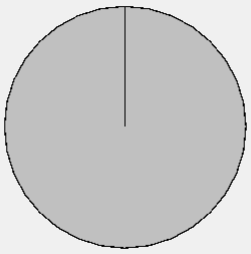
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the Dow Jones Brookfield Global Green Infrastructure Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by excluding companies from the Parent Index which do not fulfil the specific ESG criteria and selecting and weighting eligible securities following an optimisation-based approach subject to certain climate and ESG objectives outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index. The Reference Index seeks to minimize the difference in constituent weights relative to the Parent Index, while aligning with certain ESG and climate-related criteria through the use of optimisation constraints and excluding companies which do not fulfil certain ESG criteria. :

ESG Exclusions:

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

• Are classified by S&P Global Sustainable1 (“Sustainable1”) Business Involvement Screens as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, oil sands extraction, thermal coal, and conventional weapons;
• Are classified by S&P Trucost Limited (“Trucost”) in their sector revenue dataset as breaching certain thresholds in controversial activities, including, but not limited to, fossil fuel exploration, processing and generation;
• Fail to comply with the United Nations Global Compact principles as determined by Sustainalytics by Morningstar (“Sustainalytics”); and
• Are assessed by S&P Global, using RepRisk data, to have been involved in certain controversies or ESG risk incidents.

The Reference Index utilises ESG data and research from Sustainable1, Trucost, Sustainalytics and RepRisk for the ESG Exclusions.

Sustainable1 Business Involvement Screens

Sustainable1 Business Involvement Screens aim to enable investors to align investment values with investment strategy by providing detailed assessments of common areas of concern pinpointing the level of involvement. For more details on S&P Global Business Involvement Screens, please refer to https://www.spglobal.com

Sustainalytics

Sustainalytics, a Morningstar company, is a leading independent ESG and corporate governance research, ratings and analytics firm that supports investors around the world with the development and implementation of responsible investment strategies. Companies without Sustainalytics coverage are ineligible for index inclusion until they receive such coverage. Please refer to http://www.sustainalytics.com for more information.

Trucost

S&P Trucost Limited (a part of S&P Global) is a leader in carbon and environmental data and risk analysis. S&P Trucost Limited assesses risks relating to climate change, natural resource constraints, and broader environmental, social, and governance factors. Companies and financial institutions use Trucost intelligence to understand their exposure to these factors, inform resilience, and identify transformative solutions for a more sustainable global economy. Please refer to https://www.spglobal.com

Reprisk:

RepRisk is a leading data science company, is used for daily filtering, screening, and analysis of ESG risk incidents and controversial activities related to the companies which may result in further exclusions of companies from the Reference Index as determined by the Index Administrator. Please refer to to http://www.reprisk.com for more information.

Security Selection and Weighting:

Securities from the Parent Index which pass the ESG Exclusions outlined above will constitute the eligible universe (the “Eligible Universe”). Securities from the Eligible Universe are selected and weighted following an optimisation-based approach subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives:

Securities in the Eligible Universe are subject to climate and other ESG constraints including, but not

limited to: :

• A minimum improvement in the weighted average S&P Global ESG Score of the Reference Index relative to the Parent Index;

• A minimum reduction in the weighted average Trucost Total Impact Ratio of the Reference Index relative to the Parent Index;

• A minimum reduction in greenhouse gas (“GHG”), (expressed in CO2 equivalents) emissions intensity of the Reference Index relative to the Parent Index;

• A minimum reduction in the Physical Risk Score of the Reference Index relative to the Parent Index;

• A minimum reduction in Green-to-Brown Revenue Share of the Reference Index relative to the Parent Index; and

• A minimum improvement in the weight of eligible Science Based Target Companies relative to the Parent Index.

The Reference Index utilises ESG data and research from S&P Global ESG and Trucost for the Climate and other ESG Objectives.

S&P Global ESG

The S&P Global ESG Score is calculated by S&P Global Sustainable1 (“Sustainable1”) using a company’s ‘Corporate Sustainability Assessment’ (“CSA”) which is derived using either company-provided data, publicly available information, or a combination thereof. Please refer to to https://www.spglobal.com for more information.

Trucost

Trucost climate data, as defined above, is used for the Climate related Objectives. Additionally, the below two Trucost attributes are utilised in the climate and other ESG constraints:

• Trucost’s Total Impact Ratio is a company level metric representing the sum of all the direct and indirect external environmental damage costs of a company, expressed as a percentage of revenue. Direct costs are those associated with a company’s direct operations, while indirect costs are those that are borne in the company’s supply chain. This includes coverage of the company’s greenhouse gases, water use, waste generated, land, water and air pollutants generated, and natural resources used.

• Trucost’s Green-to-Brown Revenue Share is the weighted average share of revenue derived from Green Sectors (including but not limited to renewable energy generation) over the weighted average share of revenue derived from Brown Sectors (including but not limited to non-renewable energy generation), as defined by Trucost Sectors.

Diversification and Deviation Objectives

Securities in the Reference Index are subject to diversification constraints to ensure diversification and representativeness of, for example, constituent weightings and liquidity constraints compared to the Parent Index.

The Reference Index is reviewed and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the S&P indices can be found on https://www.spglobal.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers USD Corporate Bond Short Duration SRI PAB UCITS ETF

Legal entity identifier: 549300QIFH7Y0VUSB550

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

● ● ☐ Yes	● ○ X No
☐ It will make a minimum of **sustainable investments with an environmental objective: __%**	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective: __%**	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of securities that comprises all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index is designed to reflect the performance of the investment grade, USD-denominated, short-duration corporate bond market, excluding bonds which do not fulfil specific ESG (environmental, social, and governance) criteria. The Reference Index aims to comply with the minimum standards laid out for EU PAB in the PAB Regulation.

The Reference Index will set an initial 50% decarbonization of absolute greenhouse gas ("GHG") emissions relative to the Parent Index (as defined below), followed by an annual 7% decarbonization trajectory of absolute GHG emissions. In addition, the Reference Index will exclude bonds which do not fulfil specific ESG criteria.

In particular, the following bonds will be excluded from the Reference Index:

• Issuers where MSCI does not have reported or estimated absolute GHG emissions data;

• Securities that are unrated by MSCI ESG Research LLC;

• Bonds issued by issuers rated BB or below by MSCI ESG Research LLC. MSCI ESG ratings provide scores to measure a company's ESG characteristics, relative to their industry peers and takes into account over 30 Environmental, Social and Governance Key Issues;

• Issuers with a "red" MSCI ESG Controversies Score or issuers which breach a MSCI Environmental Controversy Score. MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited to, United Nations Global Compact, Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work;

• Issuers that are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal; and

• Issuers with any involvement in controversial weapons or fossil fuel reserves.

If having applied the above ESG exclusion criteria, less than 20% of the total number of issuers in the universe of eligible bonds (the "Relevant Threshold") are excluded, the remaining issuers are ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking will be excluded from the Reference Index, until the number of excluded issuers is higher than the Relevant Threshold.

The MSCI GHG emissions data, MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research are sourced from MSCI ESG Research LLC.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Total GHG Emissions:** The financial product's portfolio's weighted average of its issuers' total GHG emissions (Scopes 1, 2 and 3) as determined by MSCI.

• **Exposure to Fossil Fuels:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation.

• **Exposure to Very Severe Controversies**: The percentage of financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, and includes violations of the United Nations Global Compact, as well as the OECD Guidelines for Multinational Enterprises.

• **Exposure to Worst-in-Class issuers:** The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 10% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);

• GHG emissions (Scope 1, 2, 3 and total) (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Share of non-renewable energy consumption and production (no. 5);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

X

Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Carbon footprint (no. 2);

• GHG emissions (Scope 1, 2, 3 and total) (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Share of non-renewable energy consumption and production (no. 5); • Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the “Reference Index”, which is the Bloomberg MSCI USD Corporate SRI 0-5 Years PAB Index, which is designed to reflect the performance of USD-denominated, investment grade, fixed-rate corporate bonds with at least 1 month and up to (but not including) 5 years to maturity. The Reference Index aims to comply with the minimum standards laid out for EU PAB in the PAB Regulation. The Reference Index will set an initial 50% decarbonisation of absolute greenhouse gas (“GHG”) emissions relative to the Bloomberg USD Corporate 0-5 Years Index (the “Parent Index”), followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index will exclude bonds which do not fulfil specific ESG (environmental, social, and governance) criteria.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index.

The Reference Index will set an initial 50% decarbonization of absolute greenhouse gas (“GHG”) emissions relative to the Parent Index, followed by an annual 7% decarbonization trajectory of absolute GHG emissions. In addition, the Reference Index will exclude bonds which do not fulfil specific ESG criteria.

In particular, the following bonds will be excluded from the Reference Index:

• Issuers where MSCI does not have reported or estimated absolute GHG emissions data;

• Securities that are unrated by MSCI ESG Research LLC;

• Bonds issued by issuers rated BB or below by MSCI ESG Research LLC. MSCI ESG ratings provide scores to measure a company’s ESG characteristics, relative to their industry peers and takes into account over 30 Environmental, Social and Governance Key Issues;

• Issuers with a "red" MSCI ESG Controversies Score or issuers which breach a MSCI Environmental Controversy Score. MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited to, United Nations Global Compact, Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work;

• Issuers that are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal; and

• Issuers with any involvement in controversial weapons or fossil fuel reserves.

If having applied the above ESG exclusion criteria, less than 20% of the total number of issuers in the universe of eligible bonds (the “Relevant Threshold”) are excluded, the remaining issuers are ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking will be excluded from the Reference Index, until the number of excluded issuers is higher than the Relevant Threshold.

The MSCI GHG emissions data, MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research are sourced from MSCI ESG Research LLC.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

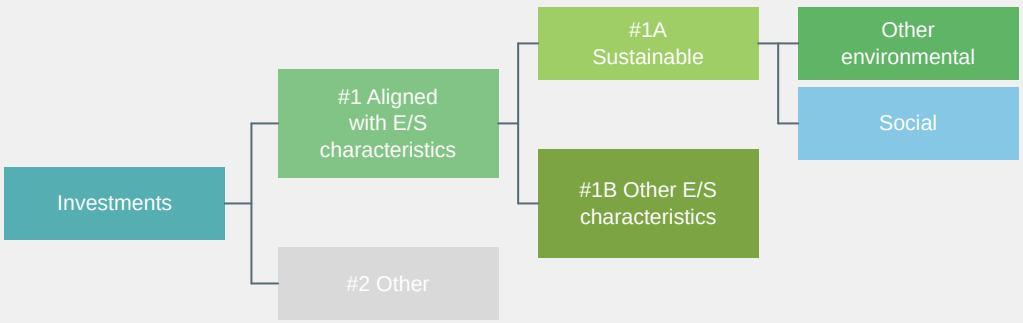
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 10% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

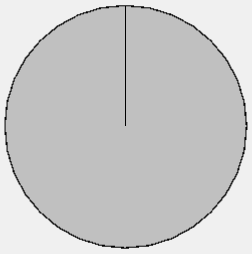
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

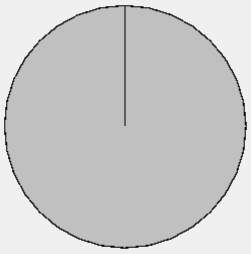
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the Bloomberg MSCI USD Corporate SRI 0-5 Years PAB Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by aiming to comply with the minimum standards laid out for EU PAB in the PAB Regulation. The Reference Index will set an initial 50% decarbonisation of absolute greenhouse gas (“GHG”) emissions relative to the Parent Index, followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index will exclude bonds which do not fulfil specific ESG (environmental, social, and governance) criteria.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio that comprises all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. Any unrelated transferable securities held by the financial product will typically be similar to the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index will set an initial 50% decarbonisation of absolute greenhouse gas (“GHG”) emissions relative to the Parent Index, which is the relevant broad market index, followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index will exclude bonds which do not fulfil specific ESG (environmental, social, and governance) criteria.

In particular, the following bonds will be excluded from the Reference Index:

• Issuers where MSCI does not have reported or estimated absolute GHG emissions data;

• Securities that are unrated by MSCI ESG Research LLC;

• Bonds issued by issuers rated BB or below by MSCI ESG Research LLC. MSCI ESG ratings provide scores to measure a company’s ESG characteristics, relative to their industry peers and takes into account over 30 Environmental, Social and Governance Key Issues;

• Issuers with a "red" MSCI ESG Controversies Score or issuers which breach a MSCI Environmental Controversy Score. MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to United Nations Global Compact, Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work;

• Issuers that are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal; and

• Issuers with any involvement in controversial weapons or fossil fuel reserves.

If having applied the above ESG exclusion criteria less than 20% of the total number of issuers in the universe of eligible bonds (the "Relevant Threshold") are excluded, the remaining issuers are ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking will be excluded from the Reference Index, until the number of excluded issuers is higher than the Relevant Threshold.

The MSCI GHG emissions data, MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research are sourced from MSCI ESG Research LLC.

Where can the methodology used for the calculation of the designated index be found?

Full information on the Reference Index including ESG criteria, eligibility rules and constituents can be found on the relevant Bloomberg website (https://www.bloombergindices.com).

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI World ESG UCITS ETF

Legal entity identifier: 549300KBPMH7CRUHUW62

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

Yes	X No
[ ] It will make a minimum of **sustainable investments with an environmental objective:** __%	[X] It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
[ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy	[ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
[ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	[X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	[X] with a social objective
[ ] It will make a minimum of **sustainable investments with a social objective:** __%	[ ] It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of the shares of large and medium capitalisation companies in global developed markets. The constituents of the Reference Index have comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their regional and sector peers in the Parent Index (as defined below).

The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules"). The Low Carbon Transition Risk Assessment Rules and High ESG Performance Selection Rules are applied simultaneously, followed by the Low Carbon Emissions Rules. The Rules use research products provided by MSCI ESG Research LLC., a subsidiary of the Index Administrator. These products include MSCI Climate Change Metrics, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research ("**BISR**") and MSCI ESG Controversies.

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition is assessed. This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any

involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 (“PAB Exclusions”).

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria.

MSCI ESG Ratings aims to measure companies’ resilience to long-term, industry-specific ESG risks, by rating them on a scale from AAA to CCC based on their exposure to and management of these risks relative to their industry sector peer group. In order to calculate the ESG rating for each company, MSCI ESG Ratings considers various ESG key issues including, but not limited to:

- *Environmental key issues*: Climate Change, Natural Resources, Pollution & Waste, and Environmental Opportunities;
- *Social key issues:* Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities; and
- *Governance key issues:* Corporate Governance and Corporate Behaviour.

The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies’ MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. In accordance with the MSCI ESG Leaders Indexes methodology, the Reference Index targets companies with high ESG Ratings relative to sector peers by targeting 50% of the free-float adjusted market capitalisation within each sector of the Parent Index, with the remaining stocks excluded (effectively a “best-in-class” approach).

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.

• **Controversial Weapons Involvement**: The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

• **Greenhouse Gas Intensity**: The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) as determined by MSCI.

• **Exposure to Fossil Fuels:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 10% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the MSCI World Low Carbon SRI Selection Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in global developed markets. The constituents of the Reference Index have comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their regional and sector peers in the "Parent Index" which is the MSCI World Index.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index.The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the “Rules”). The Low Carbon Transition Risk Assessment Rules and High ESG Performance Selection Rules are applied simultaneously, followed by the Low Carbon Emissions Rules. The Rules use research products provided by MSCI ESG Research LLC., a subsidiary of the Index Administrator. These products include MSCI Climate Change Metrics, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research (“BISR”) and MSCI ESG Controversies.

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC’s Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for “stranding” of a company’s physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company’s current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company’s management of risks and opportunities presented by the low carbon transition is assessed. This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 (“PAB Exclusions”).

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria.

MSCI ESG Ratings aims to measure companies' resilience to long-term, industry-specific ESG risks, by rating them on a scale from AAA to CCC based on their exposure to and management of these risks relative to their industry sector peer group. In order to calculate the ESG rating for each company, MSCI ESG Ratings considers various ESG key issues including, but not limited to:

- *Environmental key issues*: Climate Change, Natural Resources, Pollution & Waste, and Environmental Opportunities;
- *Social key issues:* Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities; and
- *Governance key issues:* Corporate Governance and Corporate Behaviour.

The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. In accordance with the MSCI ESG Leaders Indexes methodology, the Reference Index targets companies with high ESG Ratings relative to sector peers by targeting 50% of the free-float adjusted market capitalisation within each sector of the Parent Index, with the remaining stocks excluded (effectively a "best-in-class" approach).

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until itis possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

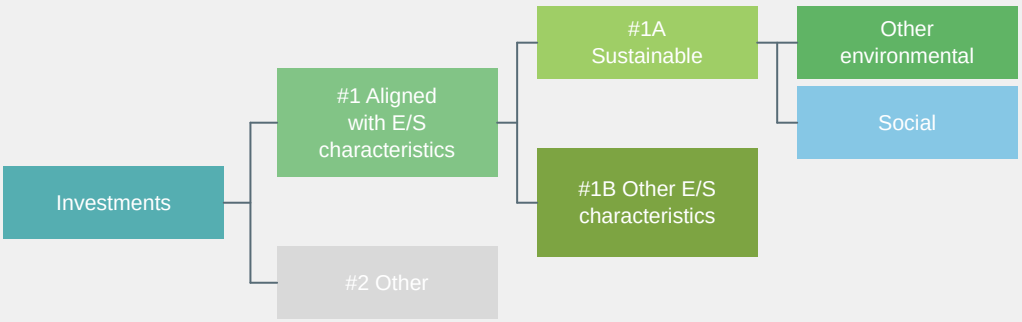
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 10% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

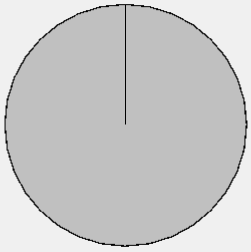
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

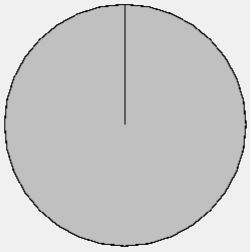
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the MSCI World Low Carbon SRI Selection Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by applying the Low Carbon Transition Risk Assessment Rules, High ESG Performance Selection Rules, and the Low Carbon Emissions Rules outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of certain listed large and medium capitalisation companies in global developed markets. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules"). The Low Carbon Transition Risk Assessment Rules and High ESG Performance Selection Rules are applied simultaneously, followed by the Low Carbon Emissions Rules. The Rules use research products provided by MSCI ESG Research LLC., a subsidiary of the Index Administrator. These products include MSCI Climate Change Metrics, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research ("BISR") and MSCI ESG Controversies.

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition is assessed. This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria.

MSCI ESG Ratings aims to measure companies' resilience to long-term, industry-specific ESG risks, by rating them on a scale from AAA to CCC based on their exposure to and management of these risks relative to their industry sector peer group. In order to calculate the ESG rating for each company, MSCI ESG Ratings considers various ESG key issues including, but not limited to:

- *Environmental key issues*: Climate Change, Natural Resources, Pollution & Waste, and Environmental Opportunities;
- *Social key issues:* Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities; and
- *Governance key issues:* Corporate Governance and Corporate Behaviour.

The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. In accordance with the MSCI ESG Leaders Indexes methodology, the Reference Index targets companies with high ESG Ratings relative to sector peers by targeting 50% of the free-float adjusted market capitalisation within each sector of the Parent Index, with the remaining stocks excluded (effectively a "best-in-class" approach).

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI Emerging Markets ESG UCITS ETF

Legal entity identifier: 54930068DSSGNFYYVR85

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	X No
☐ It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** __%	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index is designed to reflect the performance of the shares of large and medium capitalisation companies in global emerging markets. The constituents of the Reference Index have comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their regional and sector peers in the Parent Index (as defined below).

The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules"). The Low Carbon Transition Risk Assessment Rules and High ESG Performance Selection Rules are applied simultaneously, followed by the Low Carbon Emissions Rules. The Rules use research products provided by MSCI ESG Research LLC., a subsidiary of the Index Administrator. These products include MSCI Climate Change Metrics, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research ("**BISR**") and MSCI ESG Controversies.

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition is assessed. This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil &

gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria.

MSCI ESG Ratings aims to measure companies' resilience to long-term, industry-specific ESG risks, by rating them on a scale from AAA to CCC based on their exposure to and management of these risks relative to their industry sector peer group. In order to calculate the ESG rating for each company, MSCI ESG Ratings considers various ESG key issues including, but not limited to:

- *Environmental key issues*: Climate Change, Natural Resources, Pollution & Waste, and Environmental Opportunities;
- *Social key issues:* Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities; and
- *Governance key issues:* Corporate Governance and Corporate Behaviour.

The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. In accordance with the MSCI ESG Leaders Indexes methodology, the Reference Index targets companies with high ESG Ratings relative to sector peers by targeting 50% of the free-float adjusted market capitalisation within each sector of the Parent Index, with the remaining stocks excluded (effectively a "best-in-class" approach).

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.

• **Controversial Weapons Involvement**: The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

• **Greenhouse Gas Intensity**: The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) as determined by MSCI.

• **Exposure to Fossil Fuels:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 5% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the MSCI Emerging Markets Low Carbon SRI Selection Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in global emerging markets. The constituents of the Reference Index have comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their regional and sector peers in the "Parent Index" which is the MSCI Emerging Markets Index.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules"). The Low Carbon Transition Risk Assessment Rules and High ESG Performance Selection Rules are applied simultaneously, followed by the Low Carbon Emissions Rules. The Rules use research products provided by MSCI ESG Research LLC., a subsidiary of the Index Administrator. These products include MSCI Climate Change Metrics, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research ("BISR") and MSCI ESG Controversies.

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition is assessed. This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria.

MSCI ESG Ratings aims to measure companies' resilience to long-term, industry-specific ESG risks, by rating them on a scale from AAA to CCC based on their exposure to and management of these risks relative to their industry sector peer group. In order to calculate the ESG rating for each company, MSCI ESG Ratings considers various ESG key issues including, but not limited to:

- *Environmental key issues*: Climate Change, Natural Resources, Pollution & Waste, and Environmental Opportunities;
- *Social key issues:* Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities; and
- *Governance key issues:* Corporate Governance and Corporate Behaviour.

The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. In accordance with the MSCI ESG Leaders Indexes methodology, the Reference Index targets companies with high ESG Ratings relative to sector peers by targeting 50% of the free-float adjusted market capitalisation within each sector of the Parent Index, with the remaining stocks excluded (effectively a "best-in-class" approach).

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until itis possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

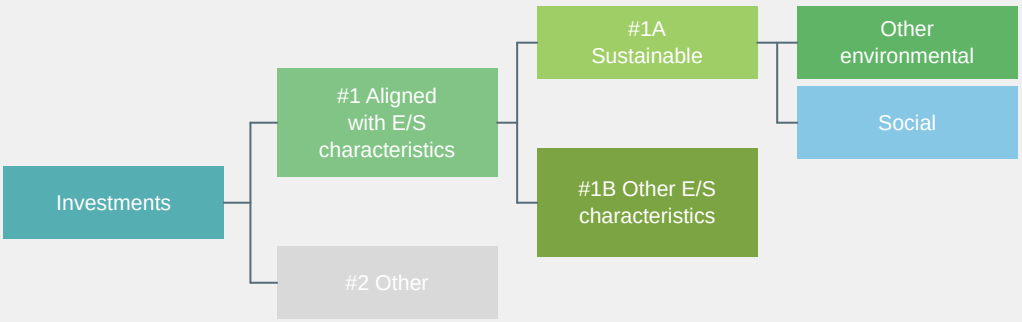
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 5% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

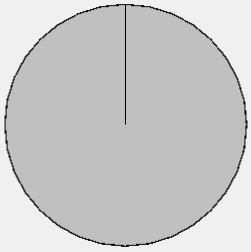
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

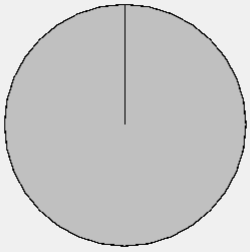
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 5%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 5%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the MSCI Emerging Markets Low Carbon SRI Selection Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by applying the Low Carbon Transition Risk Assessment Rules, High ESG Performance Selection Rules, and the Low Carbon Emissions Rules outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of certain listed large and medium capitalisation companies in global emerging markets. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules"). The Low Carbon Transition Risk Assessment Rules and High ESG Performance Selection Rules are applied simultaneously, followed by the Low Carbon Emissions Rules. The Rules use research products provided by MSCI ESG Research LLC., a subsidiary of the Index Administrator. These products include MSCI Climate Change Metrics, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research ("BISR") and MSCI ESG Controversies.

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition is assessed. This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria.

MSCI ESG Ratings aims to measure companies' resilience to long-term, industry-specific ESG risks, by rating them on a scale from AAA to CCC based on their exposure to and management of these risks relative to their industry sector peer group. In order to calculate the ESG rating for each company, MSCI ESG Ratings considers various ESG key issues including, but not limited to:

- *Environmental key issues*: Climate Change, Natural Resources, Pollution & Waste, and Environmental Opportunities;
- *Social key issues:* Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities; and
- *Governance key issues:* Corporate Governance and Corporate Behaviour.

The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. In accordance with the MSCI ESG Leaders Indexes methodology, the Reference Index targets companies with high ESG Ratings relative to sector peers by targeting 50% of the free-float adjusted market capitalisation within each sector of the Parent Index, with the remaining stocks excluded (effectively a "best-in-class" approach).

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI Europe ESG UCITS ETF

Legal entity identifier: 549300I5MYV9MCPQD952

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	X No
☐ It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective: __%**	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of the shares of large and medium capitalisation companies in developed market countries in Europe. The constituents of the Reference Index have comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their regional and sector peers in the Parent Index (as defined below).

The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules"). The Low Carbon Transition Risk Assessment Rules and High ESG Performance Selection Rules are applied simultaneously, followed by the Low Carbon Emissions Rules. The Rules use research products provided by MSCI ESG Research LLC., a subsidiary of the Index Administrator. These products include MSCI Climate Change Metrics, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research ("**BISR**") and MSCI ESG Controversies.

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition is assessed. This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil &

gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria.

MSCI ESG Ratings aims to measure companies' resilience to long-term, industry-specific ESG risks, by rating them on a scale from AAA to CCC based on their exposure to and management of these risks relative to their industry sector peer group. In order to calculate the ESG rating for each company, MSCI ESG Ratings considers various ESG key issues including, but not limited to:

- *Environmental key issues*: Climate Change, Natural Resources, Pollution & Waste, and Environmental Opportunities;
- *Social key issues:* Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities; and
- *Governance key issues:* Corporate Governance and Corporate Behaviour.

The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. In accordance with the MSCI ESG Leaders Indexes methodology, the Reference Index targets companies with high ESG Ratings relative to sector peers by targeting 50% of the free-float adjusted market capitalisation within each sector of the Parent Index, with the remaining stocks excluded (effectively a "best-in-class" approach).

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.

• **Controversial Weapons Involvement**: The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

• **Greenhouse Gas Intensity**: The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) as determined by MSCI.

• **Exposure to Fossil Fuels:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 10% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the MSCI Europe Low Carbon SRI Selection Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in developed market countries in Europe. The constituents of the Reference Index have comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their peers in the "Parent Index" which is the MSCI Europe Index.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules"). The Low Carbon Transition Risk Assessment Rules and High ESG Performance Selection Rules are applied simultaneously, followed by the Low Carbon Emissions Rules. The Rules use research products provided by MSCI ESG Research LLC., a subsidiary of the Index Administrator. These products include MSCI Climate Change Metrics, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research ("BISR") and MSCI ESG Controversies.

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition is assessed. This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria.

MSCI ESG Ratings aims to measure companies' resilience to long-term, industry-specific ESG risks, by rating them on a scale from AAA to CCC based on their exposure to and management of these risks relative to their industry sector peer group. In order to calculate the ESG rating for each company, MSCI ESG Ratings considers various ESG key issues including, but not limited to:

- *Environmental key issues*: Climate Change, Natural Resources, Pollution & Waste, and Environmental Opportunities;
- *Social key issues:* Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities; and
- *Governance key issues:* Corporate Governance and Corporate Behaviour.

The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. In accordance with the MSCI ESG Leaders Indexes methodology, the Reference Index targets companies with high ESG Ratings relative to sector peers by targeting 50% of the free-float adjusted market capitalisation within each sector of the Parent Index, with the remaining stocks excluded (effectively a "best-in-class" approach).

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until itis possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

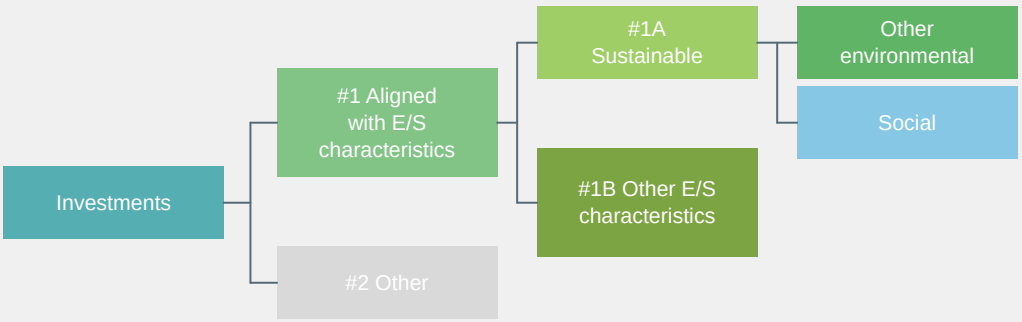
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 10% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

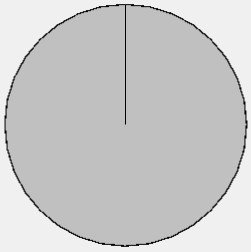
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

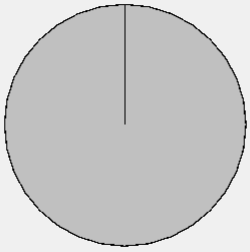
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the MSCI Europe Low Carbon SRI Selection Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by applying the Low Carbon Transition Risk Assessment Rules, High ESG Performance Selection Rules, and the Low Carbon Emissions Rules outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in developed market countries in Europe. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules"). The Low Carbon Transition Risk Assessment Rules and High ESG Performance Selection Rules are applied simultaneously, followed by the Low Carbon Emissions Rules. The Rules use research products provided by MSCI ESG Research LLC., a subsidiary of the Index Administrator. These products include MSCI Climate Change Metrics, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research ("BISR") and MSCI ESG Controversies.

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition is assessed. This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria.

MSCI ESG Ratings aims to measure companies' resilience to long-term, industry-specific ESG risks, by rating them on a scale from AAA to CCC based on their exposure to and management of these risks relative to their industry sector peer group. In order to calculate the ESG rating for each company, MSCI ESG Ratings considers various ESG key issues including, but not limited to:

- *Environmental key issues*: Climate Change, Natural Resources, Pollution & Waste, and Environmental Opportunities;
- *Social key issues:* Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities; and
- *Governance key issues:* Corporate Governance and Corporate Behaviour.

The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. In accordance with the MSCI ESG Leaders Indexes methodology, the Reference Index targets companies with high ESG Ratings relative to sector peers by targeting 50% of the free-float adjusted market capitalisation within each sector of the Parent Index, with the remaining stocks excluded (effectively a "best-in-class" approach).

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI Japan ESG UCITS ETF

Legal entity identifier: 549300VT3CD217Z7Q476

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	X No
☐ It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** __%	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of the shares of large and medium capitalisation companies in Japan. The constituents of the Reference Index have comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their regional and sector peers in the Parent Index (as defined below).

The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules"). The Low Carbon Transition Risk Assessment Rules and High ESG Performance Selection Rules are applied simultaneously, followed by the Low Carbon Emissions Rules. The Rules use research products provided by MSCI ESG Research LLC., a subsidiary of the Index Administrator. These products include MSCI Climate Change Metrics, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research ("**BISR**") and MSCI ESG Controversies.

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition is assessed. This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil &

gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria.

MSCI ESG Ratings aims to measure companies' resilience to long-term, industry-specific ESG risks, by rating them on a scale from AAA to CCC based on their exposure to and management of these risks relative to their industry sector peer group. In order to calculate the ESG rating for each company, MSCI ESG Ratings considers various ESG key issues including, but not limited to:

- *Environmental key issues*: Climate Change, Natural Resources, Pollution & Waste, and Environmental Opportunities;
- *Social key issues:* Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities; and
- *Governance key issues:* Corporate Governance and Corporate Behaviour.

The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. In accordance with the MSCI ESG Leaders Indexes methodology, the Reference Index targets companies with high ESG Ratings relative to sector peers by targeting 50% of the free-float adjusted market capitalisation within each sector of the Parent Index, with the remaining stocks excluded (effectively a "best-in-class" approach).

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.

• **Controversial Weapons Involvement**: The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

• **Greenhouse Gas Intensity**: The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) as determined by MSCI.

• **Exposure to Fossil Fuels:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 10% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the MSCI Japan Low Carbon SRI Selection Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in Japan. The constituents of the Reference Index have comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their peers in the "Parent Index" which is the MSCI Japan Index.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules"). The Low Carbon Transition Risk Assessment Rules and High ESG Performance Selection Rules are applied simultaneously, followed by the Low Carbon Emissions Rules. The Rules use research products provided by MSCI ESG Research LLC., a subsidiary of the Index Administrator. These products include MSCI Climate Change Metrics, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research ("BISR") and MSCI ESG Controversies.

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition is assessed. This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria.

MSCI ESG Ratings aims to measure companies' resilience to long-term, industry-specific ESG risks, by rating them on a scale from AAA to CCC based on their exposure to and management of these risks relative to their industry sector peer group. In order to calculate the ESG rating for each company, MSCI ESG Ratings considers various ESG key issues including, but not limited to:

- *Environmental key issues*: Climate Change, Natural Resources, Pollution & Waste, and Environmental Opportunities;
- *Social key issues:* Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities; and
- *Governance key issues:* Corporate Governance and Corporate Behaviour.

The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. In accordance with the MSCI ESG Leaders Indexes methodology, the Reference Index targets companies with high ESG Ratings relative to sector peers by targeting 50% of the free-float adjusted market capitalisation within each sector of the Parent Index, with the remaining stocks excluded (effectively a "best-in-class" approach).

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until itis possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

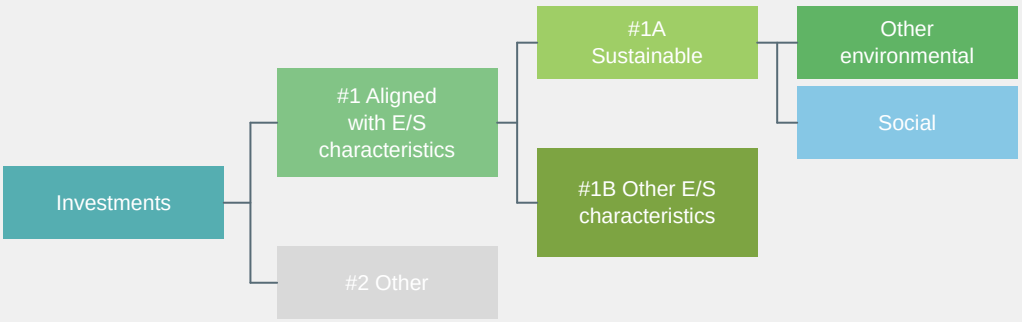
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 10% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

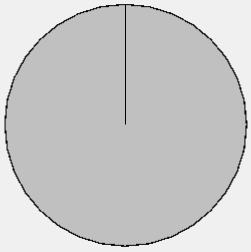
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

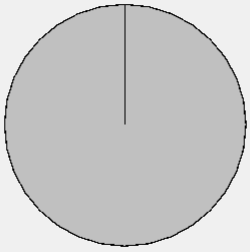
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the MSCI Japan Low Carbon SRI Selection Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by applying the Low Carbon Transition Risk Assessment Rules, High ESG Performance Selection Rules, and the Low Carbon Emissions Rules outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in Japan. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules"). The Low Carbon Transition Risk Assessment Rules and High ESG Performance Selection Rules are applied simultaneously, followed by the Low Carbon Emissions Rules. The Rules use research products provided by MSCI ESG Research LLC., a subsidiary of the Index Administrator. These products include MSCI Climate Change Metrics, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research ("BISR") and MSCI ESG Controversies.

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition is assessed. This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria.

MSCI ESG Ratings aims to measure companies' resilience to long-term, industry-specific ESG risks, by rating them on a scale from AAA to CCC based on their exposure to and management of these risks relative to their industry sector peer group. In order to calculate the ESG rating for each company, MSCI ESG Ratings considers various ESG key issues including, but not limited to:

- *Environmental key issues*: Climate Change, Natural Resources, Pollution & Waste, and Environmental Opportunities;
- *Social key issues:* Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities; and
- *Governance key issues:* Corporate Governance and Corporate Behaviour.

The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. In accordance with the MSCI ESG Leaders Indexes methodology, the Reference Index targets companies with high ESG Ratings relative to sector peers by targeting 50% of the free-float adjusted market capitalisation within each sector of the Parent Index, with the remaining stocks excluded (effectively a "best-in-class" approach).

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI USA ESG UCITS ETF

Legal entity identifier: 549300GV7ND6DPBVN624

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	X No
It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
in economic activities that qualify as environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
It will make a minimum of **sustainable investments with a social objective:** __%	It promotes E/S characteristics, but **will not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of the shares of large and medium capitalisation companies in the USA. The constituents of the Reference Index have comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their peers in the Parent Index (as defined below).

The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules"). The Low Carbon Transition Risk Assessment Rules and High ESG Performance Selection Rules are applied simultaneously, followed by the Low Carbon Emissions Rules. The Rules use research products provided by MSCI ESG Research LLC., a subsidiary of the Index Administrator. These products include MSCI Climate Change Metrics, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research ("**BISR**") and MSCI ESG Controversies.

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition is assessed. This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any

involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 (“PAB Exclusions”).

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria.

MSCI ESG Ratings aims to measure companies’ resilience to long-term, industry-specific ESG risks, by rating them on a scale from AAA to CCC based on their exposure to and management of these risks relative to their industry sector peer group. In order to calculate the ESG rating for each company, MSCI ESG Ratings considers various ESG key issues including, but not limited to:

- *Environmental key issues*: Climate Change, Natural Resources, Pollution & Waste, and Environmental Opportunities;
- *Social key issues:* Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities; and
- *Governance key issues:* Corporate Governance and Corporate Behaviour.

The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies’ MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. In accordance with the MSCI ESG Leaders Indexes methodology, the Reference Index targets companies with high ESG Ratings relative to sector peers by targeting 50% of the free-float adjusted market capitalisation within each sector of the Parent Index, with the remaining stocks excluded (effectively a “best-in-class” approach).

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.

• **Controversial Weapons Involvement**: The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

• **Greenhouse Gas Intensity**: The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) as determined by MSCI.

• **Exposure to Fossil Fuels:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 10% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the MSCI USA Low Carbon SRI Selection Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in the USA. The constituents of the Reference Index have comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their peers in the "Parent Index" which is the MSCI USA Index.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules"). The Low Carbon Transition Risk Assessment Rules and High ESG Performance Selection Rules are applied simultaneously, followed by the Low Carbon Emissions Rules. The Rules use research products provided by MSCI ESG Research LLC., a subsidiary of the Index Administrator. These products include MSCI Climate Change Metrics, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research ("BISR") and MSCI ESG Controversies.

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition is assessed. This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria.

MSCI ESG Ratings aims to measure companies' resilience to long-term, industry-specific ESG risks, by rating them on a scale from AAA to CCC based on their exposure to and management of these risks relative to their industry sector peer group. In order to calculate the ESG rating for each company, MSCI ESG Ratings considers various ESG key issues including, but not limited to:

- *Environmental key issues*: Climate Change, Natural Resources, Pollution & Waste, and Environmental Opportunities;
- *Social key issues:* Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities; and
- *Governance key issues:* Corporate Governance and Corporate Behaviour.

The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. In accordance with the MSCI ESG Leaders Indexes methodology, the Reference Index targets companies with high ESG Ratings relative to sector peers by targeting 50% of the free-float adjusted market capitalisation within each sector of the Parent Index, with the remaining stocks excluded (effectively a "best-in-class" approach).

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until itis possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

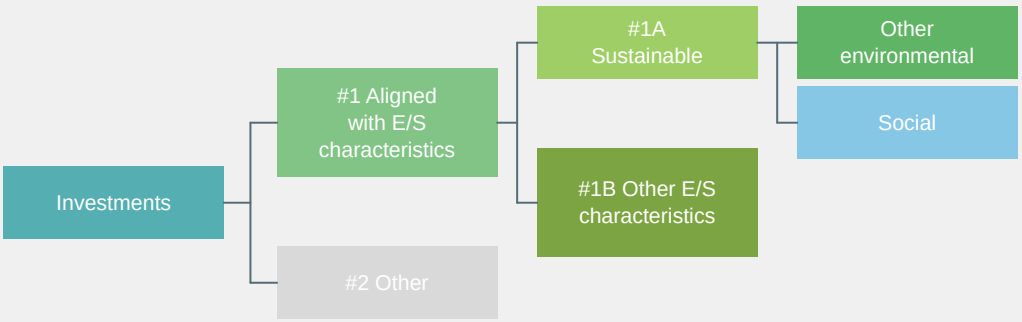
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 10% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

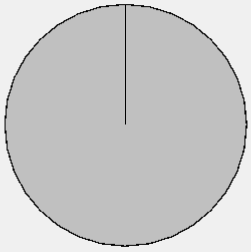
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

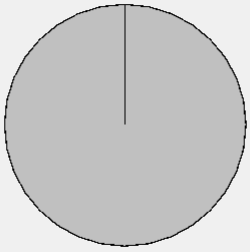
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the MSCI USA Low Carbon SRI Selection Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by applying the Low Carbon Transition Risk Assessment Rules, High ESG Performance Selection Rules, and the Low Carbon Emissions Rules outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in the USA. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules"). The Low Carbon Transition Risk Assessment Rules and High ESG Performance Selection Rules are applied simultaneously, followed by the Low Carbon Emissions Rules. The Rules use research products provided by MSCI ESG Research LLC., a subsidiary of the Index Administrator. These products include MSCI Climate Change Metrics, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research ("BISR") and MSCI ESG Controversies.

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition is assessed. This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria.

MSCI ESG Ratings aims to measure companies' resilience to long-term, industry-specific ESG risks, by rating them on a scale from AAA to CCC based on their exposure to and management of these risks relative to their industry sector peer group. In order to calculate the ESG rating for each company, MSCI ESG Ratings considers various ESG key issues including, but not limited to:

- *Environmental key issues*: Climate Change, Natural Resources, Pollution & Waste, and Environmental Opportunities;
- *Social key issues:* Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities; and
- *Governance key issues:* Corporate Governance and Corporate Behaviour.

The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. In accordance with the MSCI ESG Leaders Indexes methodology, the Reference Index targets companies with high ESG Ratings relative to sector peers by targeting 50% of the free-float adjusted market capitalisation within each sector of the Parent Index, with the remaining stocks excluded (effectively a "best-in-class" approach).

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers USD Corporate Bond SRI PAB UCITS ETF

Legal entity identifier: 254900YQ6CUXP95AXP64

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

Yes	X No
☐ It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** __%	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of securities that comprises all or a representation of the securities comprised in the Reference Index or unrelated transferable securities. The Reference Index is designed to reflect the performance of fixed-rate, investment grade, US Dollar denominated corporate bonds, excluding bonds which do not fulfil specific ESG (environmental, social, and governance) criteria. The Reference Index aims to comply with the minimum standards laid out for EU PAB in the PAB Regulation.

The Reference Index will set an initial 50% decarbonization of absolute greenhouse gas ("GHG") emissions relative to the Parent Index (as defined below), followed by an annual 7% decarbonization trajectory of absolute GHG emissions. In addition, the Reference Index will exclude bonds which do not fulfil specific ESG criteria.

In particular, the following bonds will be excluded from the Reference Index:

• Issuers where MSCI does not have reported or estimated absolute GHG emissions data;

• Securities that are unrated by MSCI ESG Research LLC;

• Bonds issued by issuers rated BB or below by MSCI ESG Research LLC. MSCI ESG ratings provide scores to measure a company's ESG characteristics, relative to their industry peers and takes into account over 30 Environmental, Social and Governance Key Issues;

• Issuers with a "red" MSCI ESG Controversies Score or issuers which breach a MSCI Environmental Controversy Score. MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited to, United Nations Global Compact, Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work;

• Issuers that are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal; and

• Issuers with any involvement in controversial weapons or fossil fuel reserves.

If having applied the above ESG exclusion criteria, less than 20% of the total number of issuers in the universe of eligible bonds (the "Relevant Threshold") are excluded, the remaining issuers are ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking will be excluded from the Reference Index, until the number of excluded issuers is higher than the Relevant Threshold.

The MSCI GHG emissions data, MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research are sourced from MSCI ESG Research LLC.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Total GHG Emissions:** The financial product's portfolio's weighted average of its issuers' total GHG emissions (Scopes 1, 2 and 3) as determined by MSCI.

• **Exposure to Fossil Fuels:** The percentage of financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation.

• **Exposure to Very Severe Controversies**: The percentage of financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, and includes violations of the United Nations Global Compact, as well as the OECD Guidelines for Multinational Enterprises.

• **Exposure to Worst-in-Class issuers:** The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 10% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);

• GHG emissions (Scope 1, 2, 3 and total) (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Share of non-renewable energy consumption and production (no. 5);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

X

Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Carbon footprint (no. 2);

• GHG emissions (Scope 1, 2, 3 and total) (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Share of non-renewable energy consumption and production (no. 5); • Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the “Reference Index”, which is the Bloomberg MSCI USD Liquid Investment Grade Corporate SRI PAB Index, which is designed to reflect the performance of US Dollar denominated, investment grade, fixed-rate corporate bonds. The Reference Index aims to comply with the minimum standards laid out for EU PAB in the PAB Regulation. The Reference Index will set an initial 50% decarbonisation of absolute greenhouse gas (“GHG”) emissions relative to the Bloomberg USD Liquid Investment Grade Corporate Index (the “Parent Index”), followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index will exclude bonds which do not fulfil specific ESG (environmental, social, and governance) criteria.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index.

The Reference Index will set an initial 50% decarbonization of absolute greenhouse gas (“GHG”) emissions relative to the Parent Index, followed by an annual 7% decarbonization trajectory of absolute GHG emissions. In addition, the Reference Index will exclude bonds which do not fulfil specific ESG criteria.

In particular, the following bonds will be excluded from the Reference Index:

• Issuers where MSCI does not have reported or estimated absolute GHG emissions data;

• Securities that are unrated by MSCI ESG Research LLC;

• Bonds issued by issuers rated BB or below by MSCI ESG Research LLC. MSCI ESG ratings provide scores to measure a company’s ESG characteristics, relative to their industry peers and takes into account over 30 Environmental, Social and Governance Key Issues;

• Issuers with a "red" MSCI ESG Controversies Score or issuers which breach a MSCI Environmental Controversy Score. MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited to, United Nations Global Compact, Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work;

• Issuers that are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal; and

• Issuers with any involvement in controversial weapons or fossil fuel reserves.

If having applied the above ESG exclusion criteria, less than 20% of the total number of issuers in the universe of eligible bonds (the “Relevant Threshold”) are excluded, the remaining issuers are ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking will be excluded from the Reference Index, until the number of excluded issuers is higher than the Relevant Threshold.

The MSCI GHG emissions data, MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research are sourced from MSCI ESG Research LLC.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

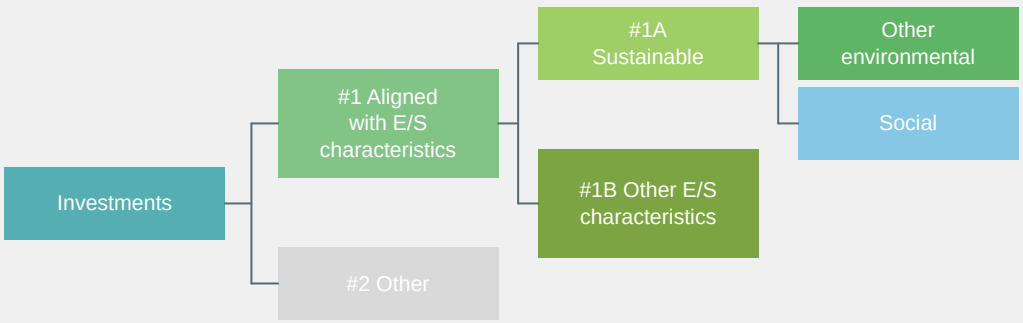
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 10% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

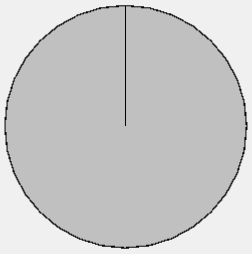
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

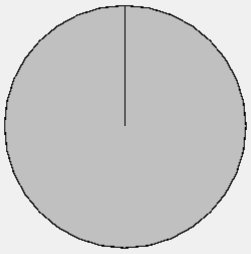
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the Bloomberg MSCI USD Liquid Investment Grade Corporate SRI PAB Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by aiming to comply with the minimum standards laid out for EU PAB in the PAB Regulation. The Reference Index will set an initial 50% decarbonisation of absolute greenhouse gas (“GHG”) emissions relative to the Parent Index, followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index will exclude bonds which do not fulfil specific ESG (environmental, social, and governance) criteria.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to track, before fees and expenses, the performance of the Reference Index by holding a portfolio of securities that comprises all or a representation of the securities comprised in the Reference Index or unrelated transferable securities. Any unrelated transferable securities held by the financial product will typically be similar to the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index will set an initial 50% decarbonisation of absolute greenhouse gas (“GHG”) emissions relative to the Parent Index, which is the relevant broad market index, followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index will exclude bonds which do not fulfil specific ESG (environmental, social, and governance) criteria.

In particular, the following bonds will be excluded from the Reference Index:

• Issuers where MSCI does not have reported or estimated absolute GHG emissions data;

• Securities that are unrated by MSCI ESG Research LLC;

• Bonds issued by issuers rated BB or below by MSCI ESG Research LLC. MSCI ESG ratings provide scores to measure a company’s ESG characteristics, relative to their industry peers and takes into account over 30 Environmental, Social and Governance Key Issues;

• Issuers with a "red" MSCI ESG Controversies Score or issuers which breach a MSCI Environmental Controversy Score. MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to United Nations Global Compact, Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work;

• Issuers that are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal; and

• Issuers with any involvement in controversial weapons or fossil fuel reserves.

If having applied the above ESG exclusion criteria less than 20% of the total number of issuers in the universe of eligible bonds (the "Relevant Threshold") are excluded, the remaining issuers are ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking will be excluded from the Reference Index, until the number of excluded issuers is higher than the Relevant Threshold.

The MSCI GHG emissions data, MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research are sourced from MSCI ESG Research LLC.

Where can the methodology used for the calculation of the designated index be found?

Full information on the Reference Index including ESG criteria, eligibility rules and constituents can be found on the relevant Bloomberg website (https://www.bloombergindices.com).

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI EMU ESG UCITS ETF

Legal entity identifier: 254900OARN1CRQBI4D27

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

Yes	X No
☐ It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** __%	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of the shares of large and medium capitalisation companies in developed market countries in the European Economic and Monetary Union. The constituents of the Reference Index have comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their regional and sector peers in the Parent Index (as defined below).

The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules"). The Low Carbon Transition Risk Assessment Rules and High ESG Performance Selection Rules are applied simultaneously, followed by the Low Carbon Emissions Rules. The Rules use research products provided by MSCI ESG Research LLC., a subsidiary of the Index Administrator. These products include MSCI Climate Change Metrics, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research ("**BISR**") and MSCI ESG Controversies.

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition is assessed. This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil &

gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria.

MSCI ESG Ratings aims to measure companies' resilience to long-term, industry-specific ESG risks, by rating them on a scale from AAA to CCC based on their exposure to and management of these risks relative to their industry sector peer group. In order to calculate the ESG rating for each company, MSCI ESG Ratings considers various ESG key issues including, but not limited to:

- *Environmental key issues*: Climate Change, Natural Resources, Pollution & Waste, and Environmental Opportunities;
- *Social key issues:* Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities; and
- *Governance key issues:* Corporate Governance and Corporate Behaviour.

The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. In accordance with the MSCI ESG Leaders Indexes methodology, the Reference Index targets companies with high ESG Ratings relative to sector peers by targeting 50% of the free-float adjusted market capitalisation within each sector of the Parent Index, with the remaining stocks excluded (effectively a "best-in-class" approach).

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.

• **Controversial Weapons Involvement**: The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

• **Greenhouse Gas Intensity**: The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) as determined by MSCI.

• **Exposure to Fossil Fuels:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 5% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the MSCI EMU Low Carbon SRI Selection Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in developed market countries in the European Economic and Monetary Union. The constituents of the Reference Index have comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their regional and sector peers in the "Parent Index" which is the MSCI EMU Index.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules"). The Low Carbon Transition Risk Assessment Rules and High ESG Performance Selection Rules are applied simultaneously, followed by the Low Carbon Emissions Rules. The Rules use research products provided by MSCI ESG Research LLC., a subsidiary of the Index Administrator. These products include MSCI Climate Change Metrics, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research ("BISR") and MSCI ESG Controversies.

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition is assessed. This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria.

MSCI ESG Ratings aims to measure companies' resilience to long-term, industry-specific ESG risks, by rating them on a scale from AAA to CCC based on their exposure to and management of these risks relative to their industry sector peer group. In order to calculate the ESG rating for each company, MSCI ESG Ratings considers various ESG key issues including, but not limited to:

- *Environmental key issues*: Climate Change, Natural Resources, Pollution & Waste, and Environmental Opportunities;
- *Social key issues:* Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities; and
- *Governance key issues:* Corporate Governance and Corporate Behaviour.

The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. In accordance with the MSCI ESG Leaders Indexes methodology, the Reference Index targets companies with high ESG Ratings relative to sector peers by targeting 50% of the free-float adjusted market capitalisation within each sector of the Parent Index, with the remaining stocks excluded (effectively a "best-in-class" approach).

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until itis possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

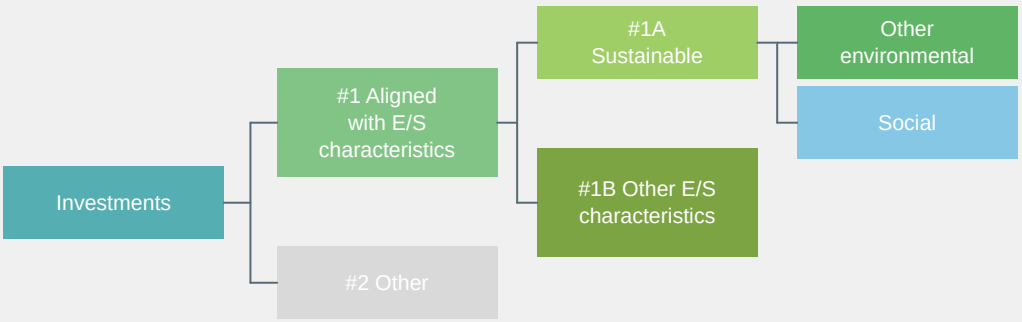
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 5% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

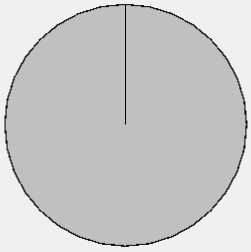
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

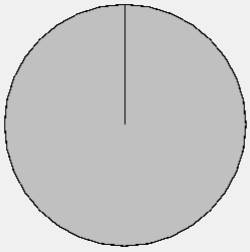
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 5%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 5%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the MSCI EMU Low Carbon SRI Selection Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by applying the Low Carbon Transition Risk Assessment Rules, High ESG Performance Selection Rules, and the Low Carbon Emissions Rules outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of certain listed large and medium capitalisation companies in developed market countries in the European Economic and Monetary Union. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules"). The Low Carbon Transition Risk Assessment Rules and High ESG Performance Selection Rules are applied simultaneously, followed by the Low Carbon Emissions Rules. The Rules use research products provided by MSCI ESG Research LLC., a subsidiary of the Index Administrator. These products include MSCI Climate Change Metrics, MSCI ESG Ratings, MSCI ESG Business Involvement Screening Research ("BISR") and MSCI ESG Controversies.

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3-step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition is assessed. This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:

- The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
- The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology. These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria.

MSCI ESG Ratings aims to measure companies' resilience to long-term, industry-specific ESG risks, by rating them on a scale from AAA to CCC based on their exposure to and management of these risks relative to their industry sector peer group. In order to calculate the ESG rating for each company, MSCI ESG Ratings considers various ESG key issues including, but not limited to:

- *Environmental key issues*: Climate Change, Natural Resources, Pollution & Waste, and Environmental Opportunities;
- *Social key issues:* Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities; and
- *Governance key issues:* Corporate Governance and Corporate Behaviour.

The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry-adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. In accordance with the MSCI ESG Leaders Indexes methodology, the Reference Index targets companies with high ESG Ratings relative to sector peers by targeting 50% of the free-float adjusted market capitalisation within each sector of the Parent Index, with the remaining stocks excluded (effectively a "best-in-class" approach).

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index-methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

ANNEX

Pre-contractual disclosure for financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainableeconomic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers EUR Corporate Green Bond UCITS ETF
Legal entity identifier: 2549007L0TWXK1EJB707

Sustainable investment objective

Does this financial product have a sustainable investment objective?

☒ **Yes**	☐ **No**
☒ It will make a minimum of **sustainable investments with an environmental objective:** 90%	☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of_____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It will make a minimum of **sustainable investments with a social objective:**	☐ with a social objective
	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What is the sustainable investment objective of this financial product?

The financial product has sustainable investment as its objective and qualifies as a financial product subject to Article 9(1) SFDR by tracking the Reference Index (as defined below). The financial product holds a portfolio of securities that comprises all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index is designed to represent the performance of Euro denominated fixed income securities issued by certain corporate and agency (entities which are majority government-owned with no government guarantee, or government sponsored entities) issuers to fund projects with direct environmental benefits. The Reference Index includes fixed income securities that meet specific credit quality, liquidity, ESG and green bond eligibility and classification requirements.

The universe of eligible bonds must meet the green bond eligibility criteria. The universe of potential constituents is independently evaluated by MSCI ESG Research LLC along four dimensions to determine whether bonds should be classified as a "green bond" and therefore eligible for inclusion in the Reference Index. These eligibility criteria reflect themes articulated in the green bond principles endorsed by the International Capital Market Association in 2014, and require commitments about a bond's:

- Stated use of proceeds: For bonds to be eligible for inclusion, the proceeds must be used for at least one of the eligible environmental categories defined by MSCI ESG Research LLC, which as of the date of the financial product's Supplement to the Prospectus include; alternative energy, energy efficiency, pollution prevention and control, sustainable water, green buildings, and climate adaption;
- Process for green project evaluation and selection;
- Process for management of proceeds: For bonds to be eligible for inclusion, an eligible mechanism to ring-fence the net proceeds must be disclosed in the bond's prospectus or offering documentation; and
- Commitment to ongoing reporting of the environmental performance of the use of proceeds.

Certain green bonds issued prior to 2014 that are widely accepted by investors as green bonds may still qualify for inclusion in the Reference Index, even if all principles are not satisfied. Such acceptance is assessed by MSCI ESG Research LLC and includes as a minimum conformity with principle one of the 2014 green bond principals, "stated use of proceeds", as described above.

The Reference Index also applies an ESG screening approach where all of the issuers which breach the following ESG standards, amongst others, are excluded:

- Are associated to certain extents with controversial, civilian and nuclear weapons and tobacco;
- Are assigned an MSCI ESG Rating of 'CCC';
- Derive certain revenue thresholds from thermal coal, oil sands extraction and military defence weapons; and
- Are assigned an MSCI ESG Controversies Score of 0 (red flag).

What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

- **Green Bond Exposure**: The percentage of the financial product's portfolio which is exposed to securities identified as "green bonds" as determined by Refinitiv, incorporating data and classifications from the Climate Bond Initiative. In order to be identified as a green bond the asset and issuer must meet the following requirements:

  (i) CBI Certified Green Bond: These are issued either based on issuer's own green bond principles or CBI green bond principles and is also certified by CBI as a green.

  ii) Self-Labelled Green Bond: These are labelled as green by the issuers but do not meet CBI criteria.

(iii) CBI Verified Green Bond: These are labelled securities which also meet CBI green bond principles. These issuers issue green bonds based on their own green bond principles.

- **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights
- **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.
- **Controversial Weapons Involvement**: The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investmentdecisions based on factors such as investment objectives and risk tolerance.

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the Bloomberg MSCI EUR Corporate and Agency Green Bond Index, which is designed to reflect the performance of Euro denominated fixed income securities issued by certain corporate and agency (entities which are majority government-owned with no government guarantee, or government sponsored entities) issuers to fund projects with direct environmental benefits. The Reference Index includes fixed income securities that meet specific credit quality, liquidity, ESG and green bond eligibility and classification requirements.

What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index.

Within the Reference Index, the universe of eligible bonds must meet the green bond eligibility criteria. The universe of potential constituents is independently evaluated by MSCI ESG Research LLC along four dimensions to determine whether bonds should be classified as a "green bond" and therefore eligible for inclusion in the Reference Index. These eligibility criteria reflect themes articulated in the green bond principles endorsed by the International Capital Market Association in 2014, and require commitments about a bond's:

- Stated use of proceeds: For bonds to be eligible for inclusion, the proceeds must be used for at least one of the eligible environmental categories defined by MSCI ESG Research LLC, which as of the date of the financial product's Supplement to the Prospectus include; alternative energy, energy efficiency, pollution

prevention and control, sustainable water, green buildings, and climate adaption;
- Process for green project evaluation and selection;
- Process for management of proceeds: For bonds to be eligible for inclusion, an eligible mechanism to ring-fence the net proceeds must be disclosed in the bond's prospectus or offering documentation; and
- Commitment to ongoing reporting of the environmental performance of the use of proceeds.

Certain green bonds issued prior to 2014 that are widely accepted by investors as green bonds may still qualify for inclusion in the Reference Index, even if all principles are not satisfied. Such acceptance is assessed by MSCI ESG Research LLC and includes as a minimum conformity with principle one of the 2014 green bond principals, "stated use of proceeds", as described above.

The Reference Index also applies an ESG screening approach where all of the issuers which breach the following ESG standards, amongst others, are excluded:
- Are associated with controversial, civilian and nuclear weapons and tobacco;
- Are assigned an MSCI ESG Rating of 'CCC';
- Derive revenues from thermal coal, oil sands extraction and military defence weapons; and
- Are assigned an MSCI ESG Controversies Score of 0 (red flag).

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the policy to assess good governance practices of the investee companies?

Good governance practices include sound management structures,employee relations, remuneration of staff and tax compliance.

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

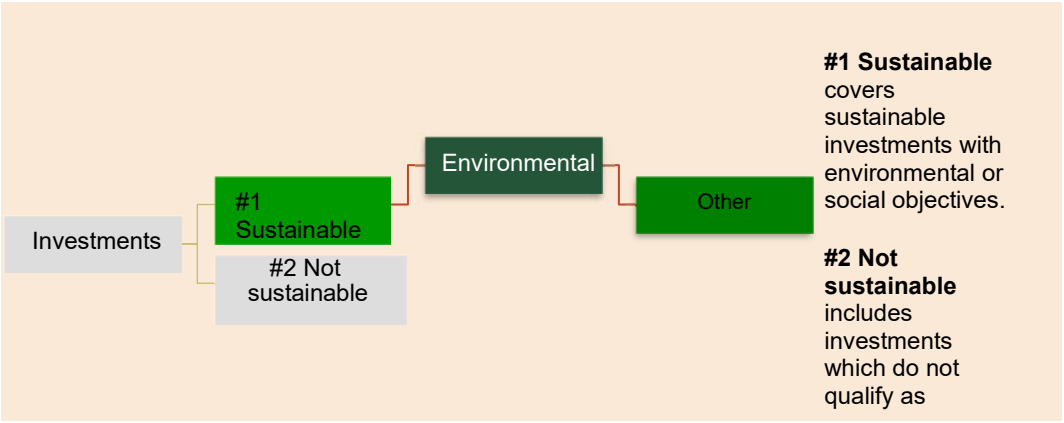
What is the asset allocation and the minimum share of sustainable investments?

Asset allocation describes the share of investments in specific assets.

This financial product invests at least 90% of its net assets in investments that are aligned with the sustainable investments with an environmental or social objective (#1 Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Not sustainable).

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



How does the use of derivatives attain the sustainable investment objective?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the sustainable investments with environmental or social objectives (#2 Not sustainable).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

While the financial product promotes environmental characteristics, technical screening criteria have only been defined through delegated acts, for two of the six environmental objectives under the EU Taxonomy Regulation - climate change mitigation and climate change adaptation. Until all RTS are available and in force, the management company considers that 0% of the financial product's investments are taxonomy-aligned investments.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[2]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

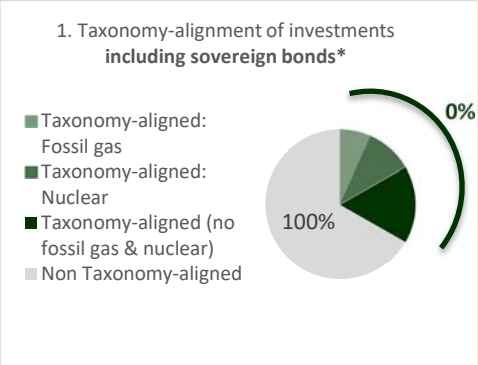
☒ No. However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

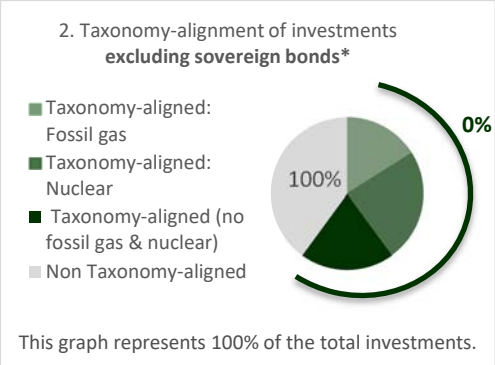
[2] *Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* ***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures***

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The financial product intends to make a minimum allocation of 90% to sustainable economic activities that contribute to an environmental objective that are not aligned with the EU Taxonomy.

What is the minimum share of sustainable investments with a social objective?

The financial product does not make a minimum allocation to sustainable economic activities that contribute to a social objective.

What investments are included under "#2 Not sustainable", what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are sustainable investments with an environmental objective (#1 Sustainable).

Those investments included under "#2 Not sustainable", may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment

schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

Yes. The financial product has designated the Bloomberg MSCI EUR Corporate and Agency Green Bond Index as the reference benchmark.

- ***How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?***

  The Reference Index takes into account sustainability factors in line with the sustainable investment objective by representing the performance of Euro-denominated, investment grade bonds issued by corporate or agency bodies (entities which are majority government-owned with no government guarantee, or government sponsored entities) which meet certain ESG requirements and eligibility criteria with regard to green bond classification, in which the proceeds will be exclusively and formally applied to projects or activities that promote climate or other environmental sustainability purposes through their use of proceeds, as independently evaluated by MSCI ESG Research LLC.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

  In order to seek to achieve the investment objective, the financial product will adopt a "Direct Investment Policy" which means that the financial product will aim to track, before fees and expenses, the performance of the Reference Index by holding a portfolio of investment grade, EUR-denominated green bonds, that comprises all or a representation of the securities comprised in the Reference Index or unrelated transferable securities. Any unrelated transferable securities held by the financial product will typically be similar to the securities comprised in the Reference Index.

- ***How does the designated index differ from a relevant broad market index*?**

  The Reference Index differs from a relevant broad market index by only including those bonds that meet certain ESG requirements and eligibility criteria with regard to green bond classification, in which the proceeds will be exclusively and formally applied to projects or activities that promote climate or other environmental sustainability purposes through their use of proceeds.

  The universe of eligible bonds must meet the green bond eligibility criteria. The universe of potential constituents is independently evaluated by MSCI ESG Research LLC along four dimensions to determine whether bonds should be classified as a "green bond" and therefore eligible for inclusion in the Reference Index. These eligibility criteria reflect themes articulated in the green bond principles endorsed by the International Capital Market Association in 2014, and require commitments about a bond's:

  - Stated use of proceeds: For bonds to be eligible for inclusion, the proceeds must be

used for at least one of the eligible environmental categories defined by MSCI ESG Research LLC, which as of the date of the financial product's Supplement to the Prospectus include; alternative energy, energy efficiency, pollution prevention and control, sustainable water, green buildings, and climate adaption;

- Process for green project evaluation and selection;
- Process for management of proceeds: For bonds to be eligible for inclusion, an eligible mechanism to ring-fence the net proceeds must be disclosed in the bond's prospectus or offering documentation; and
- Commitment to ongoing reporting of the environmental performance of the use of proceeds.

Certain green bonds issued prior to 2014 that are widely accepted by investors as green bonds may still qualify for inclusion in the Reference Index, even if all principles are not satisfied. Such acceptance is assessed by MSCI ESG Research LLC and includes as a minimum conformity with principle one of the 2014 green bond principals, "stated use of proceeds", as described above.

The Reference Index also applies an ESG screening approach where all of the issuers which breach the following ESG standards, amongst others, are excluded:

- Are associated with controversial, civilian and nuclear weapons and tobacco;
- Are assigned an MSCI ESG Rating of 'CCC';
- Derive revenues from thermal coal, oil sands extraction and military defence weapons; and
- Are assigned an MSCI ESG Controversies Score of 0 (red flag).

Where can the methodology used for the calculation of the designated index be found?

Full information on the Reference Index including ESG criteria, eligibility rules and constituents can be found on the relevant Bloomberg website (https://www.bloombergindices.com).

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

ANNEX

Pre-contractual disclosure for financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers USD Corporate Green Bond UCITS ETF
Legal entity identifier: 2549001CWO1OWBWUGJ52

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ **Yes**	☐ **No**
☒ It will make a minimum of **sustainable investments with an environmental objective:** 90%	☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of_____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It will make a minimum of **sustainable investments with a social objective:**	☐ with a social objective
	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What is the sustainable investment objective of this financial product?

The financial product has sustainable investment as its objective and qualifies as a financial product subject to Article 9(1) SFDR by tracking the Reference Index (as defined below). The financial product holds a portfolio of securities that comprises all or a representation of the securities comprised in the Reference Index or unrelated transferable securities. The Reference Index is designed to represent the performance of USD denominated fixed income securities issued by certain corporate and agency (entities which are majority government-owned with no government guarantee, or government sponsored entities) issuers to fund projects with direct environmental benefits. The Reference Index includes fixed income securities that meet specific credit

quality, liquidity, ESG and green bond eligibility and classification requirements.

The universe of eligible bonds must meet the green bond eligibility criteria. The universe of potential constituents is independently evaluated by MSCI ESG Research LLC along four dimensions to determine whether bonds should be classified as a "green bond" and therefore eligible for inclusion in the Reference Index. These eligibility criteria reflect themes articulated in the green bond principles endorsed by the International Capital Market Association in 2014, and require commitments about a bond's:

- Stated use of proceeds: For bonds to be eligible for inclusion, the proceeds must be used for at least one of the eligible environmental categories defined by MSCI ESG Research LLC, which as of the date of the financial product's Supplement to the Prospectus include; alternative energy, energy efficiency, pollution prevention and control, sustainable water, green buildings, and climate adaption;
- Process for green project evaluation and selection;
- Process for management of proceeds: For bonds to be eligible for inclusion, an eligible mechanism to ring-fence the net proceeds must be disclosed in the bond's prospectus or offering documentation; and
- Commitment to ongoing reporting of the environmental performance of the use of proceeds.

Certain green bonds issued prior to 2014 that are widely accepted by investors as green bonds may still qualify for inclusion in the Reference Index, even if all principles are not satisfied. Such acceptance is assessed by MSCI ESG Research LLC and includes as a minimum conformity with principle one of the 2014 green bond principals, "stated use of proceeds", as described above.

The Reference Index also applies an ESG screening approach where all of the issuers which breach the following ESG standards, amongst others, are excluded:

- Are associated to certain extents with controversial, civilian and nuclear weapons and tobacco;
- Are assigned an MSCI ESG Rating of 'CCC';
- Derive certain revenue thresholds from thermal coal, oil sands extraction and military defence weapons; and
- Are assigned an MSCI ESG Controversies Score of 0 (red flag).

What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

- **Green Bond Exposure**: The percentage of the financial product's portfolio which is exposed to securities identified as "green bonds" as determined by Refinitiv, incorporating data and classifications from the Climate Bond Initiative. In order to be identified as a green bond the asset and issuer must meet the following requirements:

  (i) CBI Certified Green Bond: These are issued either based on issuer's own green bond principles or CBI green bond principles and is also certified by CBI as a green.

ii) Self-Labelled Green Bond: These are labelled as green by the issuers but do not meet CBI criteria.

(iii) CBI Verified Green Bond: These are labelled securities which also meet CBI green bond principles. These issuers issue green bonds based on their own green bond principles.

- **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights
- **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.
- **Controversial Weapons Involvement**: The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the Bloomberg MSCI USD Corporate and Agency Green Bond Index, which is designed to reflect the performance of USD denominated fixed income securities issued by certain corporate and agency (entities which are majority government-owned with no government guarantee, or government sponsored entities) issuers to fund projects with direct environmental benefits. The Reference Index includes fixed income securities that meet specific credit quality, liquidity, ESG and green bond eligibility and classification requirements.

What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index.

Within the Reference Index, the universe of eligible bonds must meet the green bond eligibility criteria. The universe of potential constituents is independently evaluated by MSCI ESG Research LLC along four dimensions to determine whether bonds should be classified as a "green bond" and therefore eligible for inclusion in the Reference Index. These eligibility criteria reflect themes articulated in the green bond principles endorsed by the International Capital Market Association in 2014, and require commitments about a bond's:

- Stated use of proceeds: For bonds to be eligible for inclusion, the proceeds must

be used for at least one of the eligible environmental categories defined by MSCI ESG Research LLC, which as of the date of the financial product's Supplement to the Prospectus include; alternative energy, energy efficiency, pollution prevention and control, sustainable water, green buildings, and climate adaption;

- Process for green project evaluation and selection;
- Process for management of proceeds: For bonds to be eligible for inclusion, an eligible mechanism to ring-fence the net proceeds must be disclosed in the bond's prospectus or offering documentation; and
- Commitment to ongoing reporting of the environmental performance of the use of proceeds.

Certain green bonds issued prior to 2014 that are widely accepted by investors as green bonds may still qualify for inclusion in the Reference Index, even if all principles are not satisfied. Such acceptance is assessed by MSCI ESG Research LLC and includes as a minimum conformity with principle one of the 2014 green bond principals, "stated use of proceeds", as described above.

The Reference Index also applies an ESG screening approach where all of the issuers which breach the following ESG standards, amongst others, are excluded:

- Are associated with controversial, civilian and nuclear weapons and tobacco;
- Are assigned an MSCI ESG Rating of 'CCC';
- Derive revenues from thermal coal, oil sands extraction and military defence weapons; and
- Are assigned an MSCI ESG Controversies Score of 0 (red flag).

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the policy to assess good governance practices of the investee companies?

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

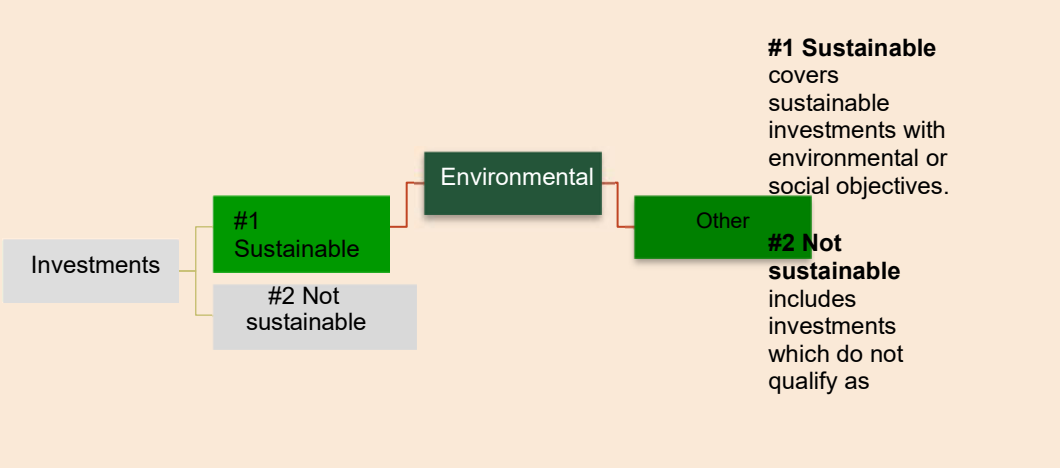
Asset allocation describes the share of investments in specific assets.

What is the asset allocation and the minimum share of sustainable investments?

This financial product invests at least 90% of its net assets in investments that are aligned with the sustainable investments with an environmental or social objective (#1 Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Not sustainable).

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



- ***How does the use of derivatives attain the sustainable investment objective?***

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the sustainable investments with environmental or social objectives (#2 Not sustainable).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, technical screening criteria have only been defined through delegated acts, for two of the six environmental objectives under the EU Taxonomy Regulation - climate change mitigation and climate change adaptation. Until all RTS are available and in force, the management company considers that 0% of the financial product's investments are taxonomy-aligned investments.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[3]?**

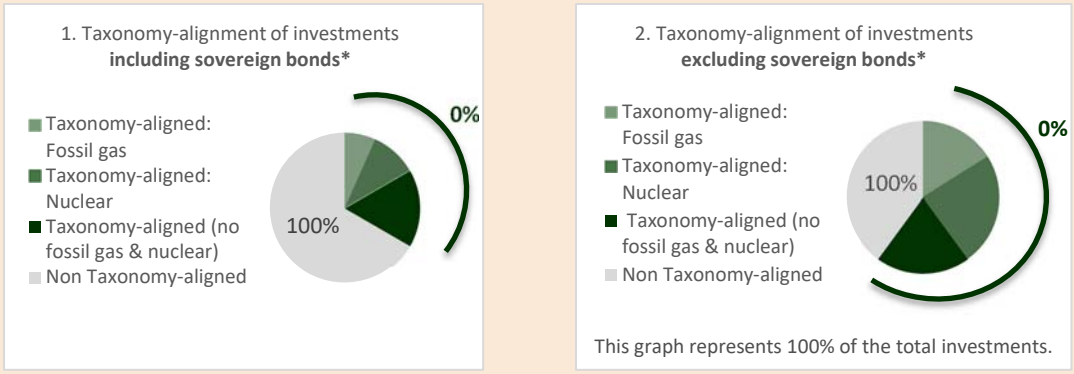
and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No. However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.



* ***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures***

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product intends to make a minimum allocation of 90% to sustainable economic activities that contribute to an environmental objective that are not aligned with the EU Taxonomy.

What is the minimum share of sustainable investments with a social objective?

The financial product does not make a minimum allocation to sustainable economic activities that contribute to a social objective.

What investments are included under "#2 Not sustainable", what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are sustainable investments with an environmental objective (#1 Sustainable).

Those investments included under "#2 Not sustainable", may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

Yes. The financial product has designated the Bloomberg MSCI USD Corporate and Agency Green Bond Index as the reference benchmark.

- ***How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?***

The Reference Index takes into account sustainability factors in line with the sustainable investment objective by representing the performance of USD-denominated, investment grade bonds issued by corporate or agency bodies (entities which are majority government-owned with no government guarantee, or government sponsored entities) which meet certain ESG requirements and eligibility criteria with regard to green bond classification, in which the proceeds will be exclusively and formally applied to projects or activities that promote climate or other environmental sustainability purposes through their use of proceeds, as independently evaluated by MSCI ESG Research LLC.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

In order to seek to achieve the investment objective, the financial product will adopt a "Direct Investment Policy" which means that the financial product will aim to track, before fees and expenses, the performance of the Reference Index by holding a portfolio of investment grade, USD-denominated green bonds, that comprises all or a representation of the securities comprised in the Reference Index or unrelated transferable securities. Any unrelated transferable securities held by the financial product will typically be similar to the securities comprised in the Reference Index.

- ***How does the designated index differ from a relevant broad market index*?**

The Reference Index differs from a relevant broad market index by only including those bonds that meet certain ESG requirements and eligibility criteria with regard to green bond classification, in which the proceeds will be exclusively and formally applied to projects or activities that promote climate or other environmental sustainability purposes through their use of proceeds.

The universe of eligible bonds must meet the green bond eligibility criteria. The universe of potential constituents is independently evaluated by MSCI ESG Research LLC along four dimensions to determine whether bonds should be classified as a "green bond" and therefore eligible for inclusion in the Reference Index. These eligibility criteria reflect themes articulated in the green bond principles endorsed by the International Capital Market Association in 2014, and require commitments about a bond's:

- Stated use of proceeds: For bonds to be eligible for inclusion, the proceeds must be used for at least one of the eligible environmental categories defined by MSCI ESG Research LLC, which as of the date of the financial product's Supplement to the Prospectus include; alternative energy, energy efficiency, pollution prevention and control, sustainable water, green buildings, and climate adaption;
- Process for green project evaluation and selection;
- Process for management of proceeds: For bonds to be eligible for inclusion, an eligible mechanism to ring-fence the net proceeds must be disclosed in the bond's prospectus or offering documentation; and
- Commitment to ongoing reporting of the environmental performance of the use of proceeds.

Certain green bonds issued prior to 2014 that are widely accepted by investors as green bonds may still qualify for inclusion in the Reference Index, even if all principles are not satisfied. Such acceptance is assessed by MSCI ESG Research LLC and includes as a minimum conformity with principle one of the 2014 green bond principals, "stated use of proceeds", as described above.

The Reference Index also applies an ESG screening approach where all of the issuers which breach the following ESG standards, amongst others, are excluded:

- Are associated with controversial, civilian and nuclear weapons and tobacco;
- Are assigned an MSCI ESG Rating of 'CCC';
- Derive revenues from thermal coal, oil sands extraction and military defence weapons; and
- Are assigned an MSCI ESG Controversies Score of 0 (red flag).

Where can the methodology used for the calculation of the designated index be found?

Full information on the Reference Index including ESG criteria, eligibility rules and constituents can be found on the relevant Bloomberg website (https://www.bloombergindices.com).

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers World Net Zero Pathway Paris Aligned UCITS ETF

Legal entity identifier: 254900HPXE8UO093JP04

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

Yes	X No
[ ] It will make a minimum of **sustainable investments with an environmental objective:** __%	[X] It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
[ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy	[ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
[ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	[X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	[X] with a social objective
[ ] It will make a minimum of **sustainable investments with a social objective:** __%	[ ] It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of large and medium capitalisation companies across global developed markets which are selected and weighted with the aim of seeking alignment with EU Paris-aligned Benchmark ("EU PAB") standards and certain net zero frameworks. The Reference Index is based on the Parent Index (as defined below).

The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. ("ISS"). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Are assigned an ISS ESG rating of D- or below; and

• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent's initial weight tilted based on a scoring process for each of the three pillars listed below (the "Tilted Weights"):

• Science-based targets relating to reducing carbon emissions;

• Climate disclosure standards; and

• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the

selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Greenhouse Gas Intensity**: The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) , as determined by either MSCI or ISS. Details on the provider used are available upon request.

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as determined by either MSCI or ISS. Details on the provider used are available upon request.

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" or "D-" or below, as determined by either MSCI or ISS. Details on the provider used are available upon request.

• **Exposure to Fossil Fuels:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, as determined by either MSCI or ISS. Details on the provider used are available upon request.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 10% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Share of non-renewable energy consumption and production (no. 5);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X]

Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Share of non-renewable energy consumption and production (no. 5);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the “Reference Index”, which is the Solactive ISS ESG Developed Markets Net Zero Pathway Index, which is designed to reflect the performance of large and medium capitalisation companies across global developed markets which are selected and weighted with the aim of seeking alignment with EU Paris-aligned Benchmark (“EU PAB”) standards and certain net zero frameworks. The Reference Index is based on the Solactive GBS Developed Markets Large & Mid Cap Index (the “Parent Index”). The Parent Index includes large and medium capitalisation companies across global developed markets, selected according to the Solactive country classification framework. Details on the classification of countries is available at http://www.solactive.com.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Are assigned an ISS ESG rating of D- or below; and

• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent's initial weight tilted based on a scoring process for each of the three pillars listed below (the "Tilted Weights"):

• Science-based targets relating to reducing carbon emissions;

• Climate disclosure standards; and

• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.
Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with verified failure to respect established norms as well as severe or very severe controversies (including governance controversies) using the ISS Norm-Based Research, and companies that have an ISS ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an ISS ESG Rating.

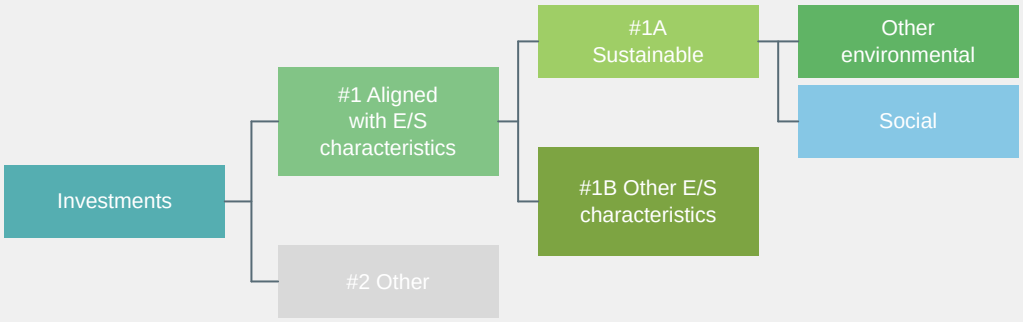
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 10% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments (“FDIs”) may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

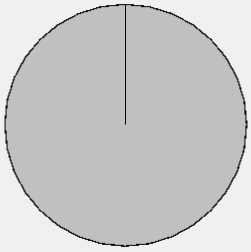
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

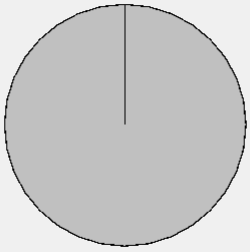
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the Solactive ISS ESG Developed Markets Net Zero Pathway Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by selecting and weighting the constituents with the aim of seeking alignment with EU Paris-aligned Benchmark (“EU PAB”) standards and certain net zero frameworks and removing securities from the Parent Index that do not meet certain ESG criteria as outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large and medium capitalisation companies across global developed markets, selected according to the Solactive country classification framework.

The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Are assigned an ISS ESG rating of D- or below; and

• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science-based targets relating to reducing carbon emissions;

• Climate disclosure standards; and

• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Reference Index can be found on www.solactive.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers EMU Net Zero Pathway Paris Aligned UCITS ETF

Legal entity identifier: 254900YFWZKFQI5JGH16

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	X No
☐ It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** __%	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of large and medium capitalisation companies across developed market countries in the European Economic and Monetary Union which are selected and weighted with the aim of seeking alignment with EU Paris-aligned Benchmark ("EU PAB") standards and certain net zero frameworks. The Reference Index is based on the Parent Index (as defined below).

The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. ("ISS"). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Are assigned an ISS ESG rating of D- or below; and

• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent's initial weight tilted based on a scoring process for each of the three pillars listed below (the "Tilted Weights"):

• Science-based targets relating to reducing carbon emissions;

• Climate disclosure standards; and

• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the

selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Greenhouse Gas Intensity**: The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by either MSCI or ISS. Details on the provider used are available upon request.

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as determined by either MSCI or ISS. Details on the provider used are available upon request.

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" or "D-" or below, as determined by either MSCI or ISS. Details on the provider used are available upon request.

• **Exposure to Fossil Fuels:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, as determined by either MSCI or ISS. Details on the provider used are available upon request.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 10% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Share of non-renewable energy consumption and production (no. 5);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X]

Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Share of non-renewable energy consumption and production (no. 5);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the “Reference Index”, which is the Solactive ISS ESG Developed Markets Eurozone Net Zero Pathway Index, which is designed to reflect the performance of large and medium capitalisation companies across developed market countries in the European Economic and Monetary Union which are selected and weighted with the aim of seeking alignment with EU Paris-aligned Benchmark (“EU PAB”) standards and certain net zero frameworks. The Reference Index is based on the Solactive GBS Developed Markets Eurozone Large & Mid Cap Index (the “Parent Index”). The Parent Index includes large and medium capitalisation companies across global developed markets in the European Economic and Monetary Union, selected according to the Solactive country classification framework. Details on the classification of countries is available at http://www.solactive.com.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Are assigned an ISS ESG rating of D- or below; and

• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent's initial weight tilted based on a scoring process for each of the three pillars listed below (the "Tilted Weights"):

• Science-based targets relating to reducing carbon emissions;

• Climate disclosure standards; and

• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.
Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with verified failure to respect established norms as well as severe or very severe controversies (including governance controversies) using the ISS Norm-Based Research, and companies that have an ISS ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an ISS ESG Rating.

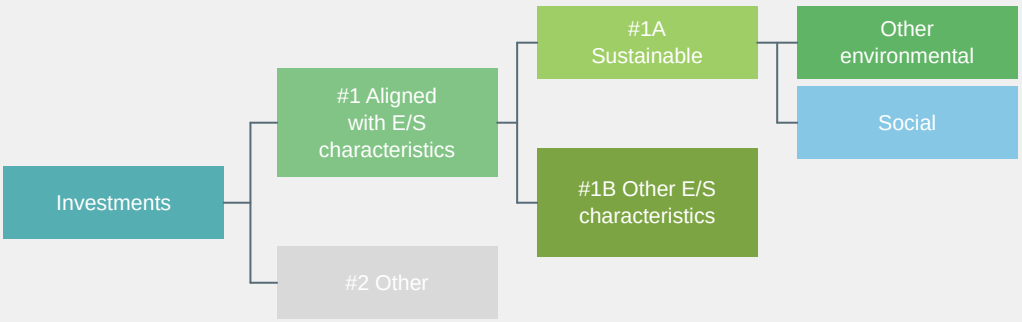
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 10% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

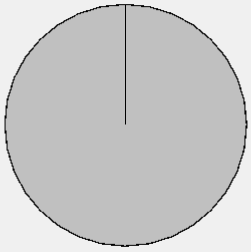
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

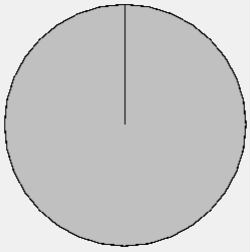
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the Solactive ISS ESG Developed Markets Eurozone Net Zero Pathway Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by selecting and weighting the constituents with the aim of seeking alignment with EU Paris-aligned Benchmark (“EU PAB”) standards and certain net zero frameworks and removing securities from the Parent Index that do not meet certain ESG criteria as outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large and medium capitalisation companies across global developed markets in the European Economic and Monetary Union, selected according to the Solactive country classification framework.

The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Are assigned an ISS ESG rating of D- or below; and

• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science-based targets relating to reducing carbon emissions;

• Climate disclosure standards; and

• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Reference Index can be found on www.solactive.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers Emerging Markets Net Zero Pathway Paris Aligned UCITS ETF

Legal entity identifier: 254900U9UGAB0UE17H62

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	No
[ ] It will make a minimum of **sustainable investments with an environmental objective: __%**	[X] It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments
[ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy	[ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
[ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	[X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	[X] with a social objective
[ ] It will make a minimum of **sustainable investments with a social objective: __%**	[ ] It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of large and medium capitalisation companies across global emerging markets which are selected and weighted with the aim of seeking alignment with EU Paris-aligned Benchmark ("EU PAB") standards and certain net zero frameworks. The Reference Index is based on the Parent Index (as defined below).

The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. ("ISS"). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Are assigned an ISS ESG rating of D- or below; and

• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent's initial weight tilted based on a scoring process for each of the three pillars listed below (the "Tilted Weights"):

• Science-based targets relating to reducing carbon emissions;

• Climate disclosure standards; and

• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the

selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Greenhouse Gas Intensity**: The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) , as determined by either MSCI or ISS. Details on the provider used are available upon request.

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as determined by either MSCI or ISS. Details on the provider used are available upon request.

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" or "D-" or below, as determined by either MSCI or ISS. Details on the provider used are available upon request.

• **Exposure to Fossil Fuels:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, as determined by either MSCI or ISS. Details on the provider used are available upon request.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 5% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Share of non-renewable energy consumption and production (no. 5);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X]

Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Share of non-renewable energy consumption and production (no. 5);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the “Reference Index”, which is the Solactive ISS ESG Emerging Markets Net Zero Pathway Index, which is designed to reflect the performance of large and medium capitalisation companies across global emerging markets which are selected and weighted with the aim of seeking alignment with EU Paris-aligned Benchmark (“EU PAB”) standards and certain net zero frameworks. The Reference Index is based on the Solactive GBS Emerging Markets Large & Mid Cap Index (the “Parent Index”). The Parent Index includes large and medium capitalisation companies across global emerging markets, selected according to the Solactive country classification framework. Details on the classification of countries is available at http://www.solactive.com.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Are assigned an ISS ESG rating of D- or below; and

• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent's initial weight tilted based on a scoring process for each of the three pillars listed below (the "Tilted Weights"):

• Science-based targets relating to reducing carbon emissions;

• Climate disclosure standards; and

• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.
Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with verified failure to respect established norms as well as severe or very severe controversies (including governance controversies) using the ISS Norm-Based Research, and companies that have an ISS ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an ISS ESG Rating.

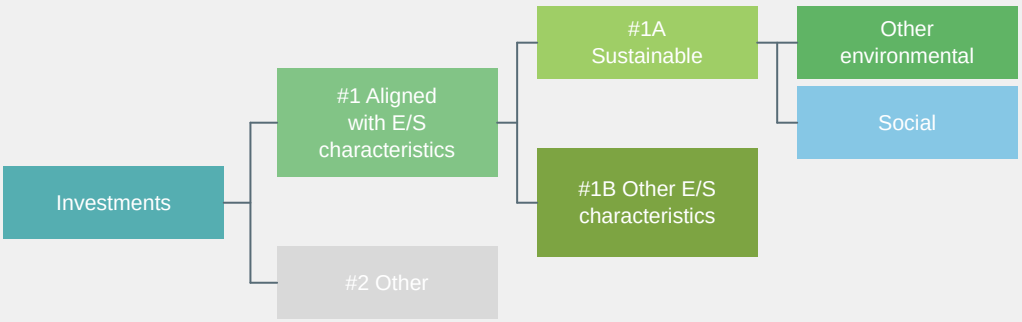
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 5% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

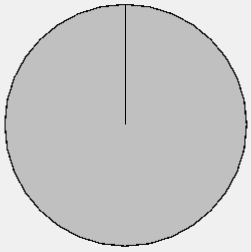
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

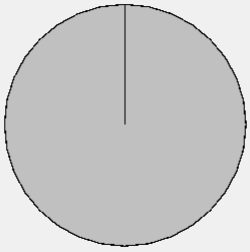
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 5%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 5%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the Solactive ISS ESG Emerging Markets Net Zero Pathway Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by selecting and weighting the constituents with the aim of seeking alignment with EU Paris-aligned Benchmark (“EU PAB”) standards and certain net zero frameworks and removing securities from the Parent Index that do not meet certain ESG criteria as outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large and medium capitalisation companies across global emerging markets, selected according to the Solactive country classification framework. The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Are assigned an ISS ESG rating of D- or below; and

• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science-based targets relating to reducing carbon emissions;

• Climate disclosure standards; and

• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Reference Index can be found on www.solactive.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers Europe Net Zero Pathway Paris Aligned UCITS ETF

Legal entity identifier: 2549002T5XXP0M95D589

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

Yes	No
[ ] It will make a minimum of **sustainable investments with an environmental objective:** __%	[X] It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
[ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy	[ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
[ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	[X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	[X] with a social objective
[ ] It will make a minimum of **sustainable investments with a social objective:** __%	[ ] It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of large and medium capitalisation companies in developed markets in Europe which are selected and weighted with the aim of seeking alignment with EU Paris-aligned Benchmark ("EU PAB") standards and certain net zero frameworks. The Reference Index is based on the Parent Index (as defined below).

The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. ("ISS"). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Are assigned an ISS ESG rating of D- or below; and

• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent's initial weight tilted based on a scoring process for each of the three pillars listed below (the "Tilted Weights"):

• Science-based targets relating to reducing carbon emissions;

• Climate disclosure standards; and

• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the

selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Greenhouse Gas Intensity**: The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) , as determined by either MSCI or ISS. Details on the provider used are available upon request.

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as determined by either MSCI or ISS. Details on the provider used are available upon request.

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" or "D-" or below, as determined by either MSCI or ISS. Details on the provider used are available upon request.

• **Exposure to Fossil Fuels:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, as determined by either MSCI or ISS. Details on the provider used are available upon request.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 10% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Share of non-renewable energy consumption and production (no. 5);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

X

Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Share of non-renewable energy consumption and production (no. 5);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the “Reference Index”, which is the Solactive ISS ESG Developed Markets Europe Net Zero Pathway Index, which is designed to reflect the performance of large and medium capitalisation companies in developed markets in Europe which are selected and weighted with the aim of seeking alignment with EU Paris-aligned Benchmark (“EU PAB”) standards and certain net zero frameworks. The Reference Index is based on the Solactive GBS Developed Markets Europe Large & Mid Cap Index (the “Parent Index”). The Parent Index includes large and medium capitalisation companies in developed markets in Europe, selected according to the Solactive country classification framework. Details on the classification of countries is available at http://www.solactive.com.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Are assigned an ISS ESG rating of D- or below; and

• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent's initial weight tilted based on a scoring process for each of the three pillars listed below (the "Tilted Weights"):

• Science-based targets relating to reducing carbon emissions;

• Climate disclosure standards; and

• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.
Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with verified failure to respect established norms as well as severe or very severe controversies (including governance controversies) using the ISS Norm-Based Research, and companies that have an ISS ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an ISS ESG Rating.

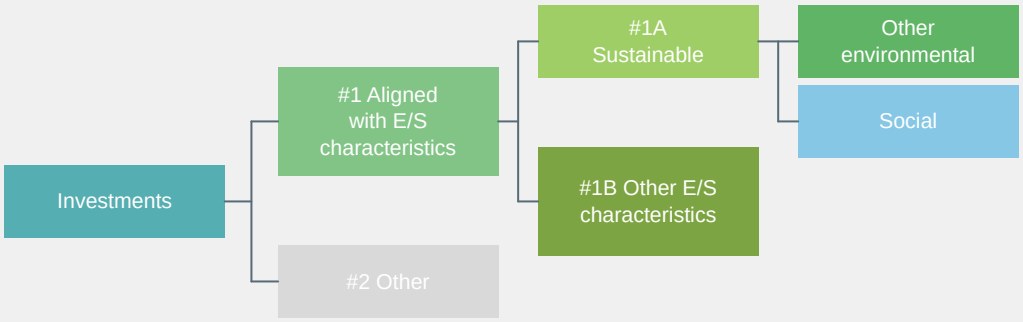
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 10% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments (“FDIs”) may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

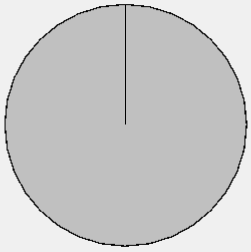
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

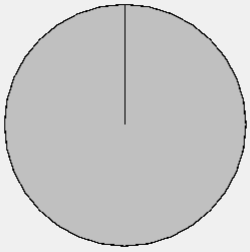
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the Solactive ISS ESG Developed Markets Europe Net Zero Pathway Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by selecting and weighting the constituents with the aim of seeking alignment with EU Paris-aligned Benchmark (“EU PAB”) standards and certain net zero frameworks and removing securities from the Parent Index that do not meet certain ESG criteria as outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large and medium capitalisation companies in developed markets in Europe, selected according to the Solactive country classification framework.

The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Are assigned an ISS ESG rating of D- or below; and

• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science-based targets relating to reducing carbon emissions;

• Climate disclosure standards; and

• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Reference Index can be found on www.solactive.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers USA Net Zero Pathway Paris Aligned UCITS ETF

Legal entity identifier: 2549009WFP828ETBW934

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

Yes	X No
☐ It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** __%	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of large and medium capitalisation companies in the USA which are selected and weighted with the aim of seeking alignment with EU Paris-aligned Benchmark ("EU PAB") standards and certain net zero frameworks. The Reference Index is based on the Parent Index (as defined below).

The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. ("ISS"). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Are assigned an ISS ESG rating of D- or below; and

• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent's initial weight tilted based on a scoring process for each of the three pillars listed below (the "Tilted Weights"):

• Science-based targets relating to reducing carbon emissions;

• Climate disclosure standards; and

• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the

selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Greenhouse Gas Intensity**: The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) , as determined by either MSCI or ISS. Details on the provider used are available upon request.

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as determined by either MSCI or ISS. Details on the provider used are available upon request.

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" or "D-" or below, as determined by either MSCI or ISS. Details on the provider used are available upon request.

• **Exposure to Fossil Fuels:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, as determined by either MSCI or ISS. Details on the provider used are available upon request.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 10% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Share of non-renewable energy consumption and production (no. 5);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

X

Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Share of non-renewable energy consumption and production (no. 5);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the “Reference Index”, which is the Solactive ISS ESG United States Net Zero Pathway Index, which is designed to reflect the performance of large and medium capitalisation companies in the USA which are selected and weighted with the aim of seeking alignment with EU Paris-aligned Benchmark (“EU PAB”) standards and certain net zero frameworks. The Reference Index is based on the Solactive GBS United States Large & Mid Cap Index (the “Parent Index”). The Parent Index includes large and medium capitalisation companies in the USA, selected according to the Solactive country classification framework. Details on the classification of countries is available at http://www.solactive.com.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Are assigned an ISS ESG rating of D- or below; and

• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent's initial weight tilted based on a scoring process for each of the three pillars listed below (the "Tilted Weights"):

• Science-based targets relating to reducing carbon emissions;

• Climate disclosure standards; and

• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.
Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with verified failure to respect established norms as well as severe or very severe controversies (including governance controversies) using the ISS Norm-Based Research, and companies that have an ISS ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an ISS ESG Rating.

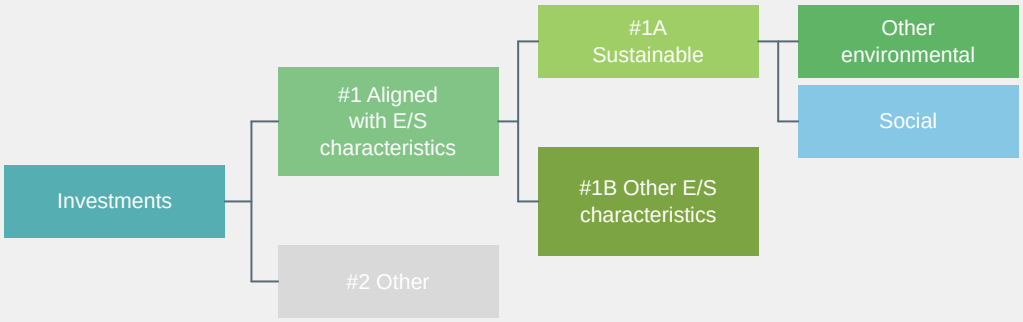
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 10% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments (“FDIs”) may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

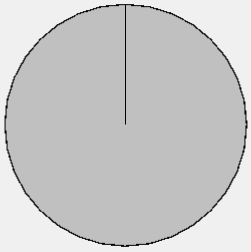
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

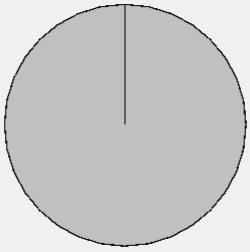
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the Solactive ISS ESG United States Net Zero Pathway Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by selecting and weighting the constituents with the aim of seeking alignment with EU Paris-aligned Benchmark (“EU PAB”) standards and certain net zero frameworks and removing securities from the Parent Index that do not meet certain ESG criteria as outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large and medium capitalisation companies in the USA, selected according to the Solactive country classification framework.

The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Are assigned an ISS ESG rating of D- or below; and

• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science-based targets relating to reducing carbon emissions;

• Climate disclosure standards; and

• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Reference Index can be found on www.solactive.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers Japan Net Zero Pathway Paris Aligned UCITS ETF

Legal entity identifier: 254900D5JGXF6U1L9Z45

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	X No
☐ It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective: __%**	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of large and medium capitalisation companies in Japan which are selected and weighted with the aim of seeking alignment with EU Paris-aligned Benchmark ("EU PAB") standards and certain net zero frameworks. The Reference Index is based on the Parent Index (as defined below).

The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. ("ISS"). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Are assigned an ISS ESG rating of D- or below; and

• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent's initial weight tilted based on a scoring process for each of the three pillars listed below (the "Tilted Weights"):

• Science-based targets relating to reducing carbon emissions;

• Climate disclosure standards; and

• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the

selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Greenhouse Gas Intensity**: The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) , as determined by either MSCI or ISS. Details on the provider used are available upon request.

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as determined by either MSCI or ISS. Details on the provider used are available upon request.

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" or "D-" or below, as determined by either MSCI or ISS. Details on the provider used are available upon request.

• **Exposure to Fossil Fuels:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, as determined by either MSCI or ISS. Details on the provider used are available upon request.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 10% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Share of non-renewable energy consumption and production (no. 5);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X]

Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Share of non-renewable energy consumption and production (no. 5);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the “Reference Index”, which is the Solactive ISS ESG Japan Net Zero Pathway Index, which is designed to reflect the performance of large and medium capitalisation companies in Japan which are selected and weighted with the aim of seeking alignment with EU Paris-aligned Benchmark (“EU PAB”) standards and certain net zero frameworks. The Reference Index is based on the Solactive GBS Japan Large & Mid Cap Index (the “Parent Index”). The Parent Index includes large and medium capitalisation companies in Japan, selected according to the Solactive country classification framework. Details on the classification of countries is available at http://www.solactive.com.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Are assigned an ISS ESG rating of D- or below; and

• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent's initial weight tilted based on a scoring process for each of the three pillars listed below (the "Tilted Weights"):

• Science-based targets relating to reducing carbon emissions;

• Climate disclosure standards; and

• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.
Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with verified failure to respect established norms as well as severe or very severe controversies (including governance controversies) using the ISS Norm-Based Research, and companies that have an ISS ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an ISS ESG Rating.

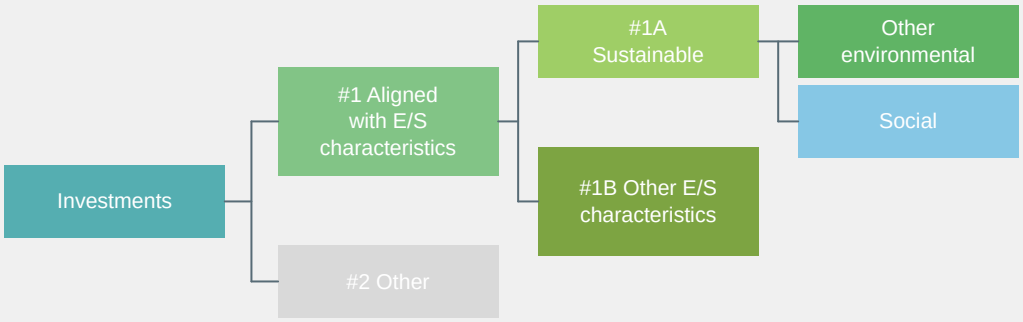
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 10% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments (“FDIs”) may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

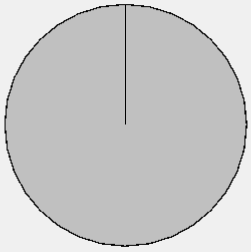
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

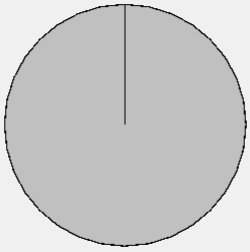
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the Solactive ISS ESG Japan Net Zero Pathway Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by selecting and weighting the constituents with the aim of seeking alignment with EU Paris-aligned Benchmark (“EU PAB”) standards and certain net zero frameworks and removing securities from the Parent Index that do not meet certain ESG criteria as outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large and medium capitalisation companies in Japan, selected according to the Solactive country classification framework.

The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Are assigned an ISS ESG rating of D- or below; and

• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science-based targets relating to reducing carbon emissions;

• Climate disclosure standards; and

• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression. Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the Reference Index can be found on www.solactive.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI Global Clean Water & Sanitation UCITS ETF

Legal entity identifier: 2549006CWZHL0FBC5B98

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	No
☐ It will make a minimum of **sustainable investments with an environmental objective:** __%	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective: __%**	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 6 (ensure availability and sustainable management of water and sanitation for all) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index (as defined below) which are associated with a positive contribution to Sustainable Development Goal 6 ("SDG 6") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are

assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 6. Companies that meet a certain revenue threshold from business activities associated with SDG 6 are selected ("SDG 6 Aligned Business Activities"). Such SDG 6 Aligned Business Activities may include, but are not limited to:
• Sustainable water;
• Sanitation; and
• Sustainable agriculture.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Water Index (the "Thematic Parent Index"). Constituents' exposure to the theme of water (the "Theme"), which consists of business activities such as; water supply, water treatment, water utilities, and water-related equipment is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:
• Business segment information from company annual reports and third-party data sources; and
• Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Additionally, all companies from the Global Industry Classification Standard (GICS) subindustry 'water utility' and companies that meet a certain sustainable water revenue threshold are also eligible for inclusion. Constituents that do not have any revenue that contributes to SDG 6 are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 6 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%.
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted according to their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.

• **Controversial Weapons Involvement**: The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

• **SDG 6 Net Product and Service Alignment Score:** The financial product's portfolio's weighted average of each company's net product and service alignment score to SDG 6, based on companies' revenues from sanitation related products and services, sustainable agriculture and sustainable water projects, measured by MSCI on a scale of -10 (strongly misaligned) to 10 (strongly aligned).

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 25% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no.14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Exposure to companies active in the fossil fuel sector (no. 4);

• Activities negatively affecting biodiversity-sensitive areas (no. 7)

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no.14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the MSCI ACWI IMI SDG 6 Clean Water and Sanitation Select Index, which is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 6 (ensure availability and sustainable management of water and sanitation for all) of the United Nations 2030 Agenda for Sustainable Development. The Reference Index is based on the MSCI ACWI IMI Index (the "Parent Index"). The Parent Index includes large, medium, and small-capitalisation companies across developed and emerging markets globally.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 6 (ensure availability and sustainable management of water and sanitation for all) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 6 ("SDG 6") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on:https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 6. Companies that meet a certain revenue threshold from business activities associated with SDG 6 are selected ("SDG 6 Aligned Business

Activities"). Such SDG 6 Aligned Business Activities may include, but are not limited to:
• Sustainable water;
• Sanitation; and
• Sustainable agriculture.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Water Index (the "Thematic Parent Index"). Constituents' exposure to the theme of water (the "Theme"), which consists of business activities such as; water supply, water treatment, water utilities, and water-related equipment is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:

• Business segment information from company annual reports and third-party data sources; and
• Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Additionally, all companies from the Global Industry Classification Standard (GICS) subindustry 'water utility' and companies that meet a certain sustainable water revenue threshold are also eligible for inclusion. Constituents that do not have any revenue that contributes to SDG 6 are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 6 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%.
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted according to their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

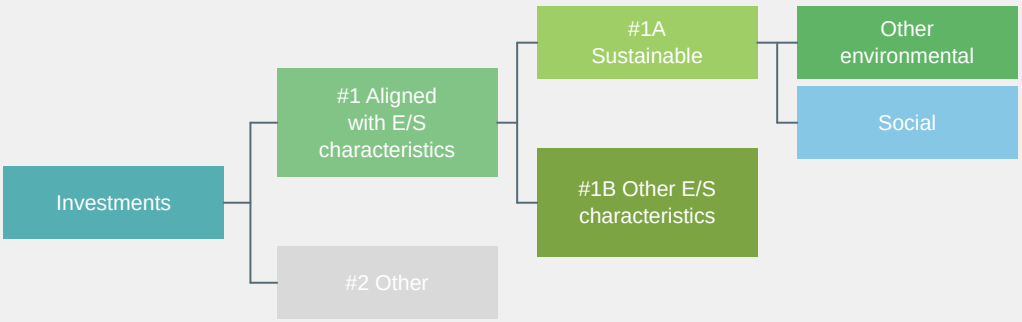
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 25% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

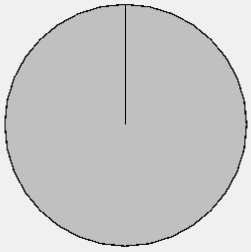
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

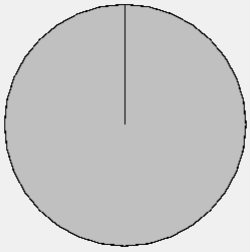
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 25%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 25%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the MSCI ACWI IMI SDG 6 Clean Water and Sanitation Select Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by excluding companies from the Parent Index which do not fulfil the specific ESG criteria and applying SDG impact selection and SDG thematic selection criteria outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large, medium, and small-capitalisation companies across developed and emerging markets globally. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 6 (ensure availability and sustainable management of water and sanitation for all) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 6 ("SDG 6") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 6. Companies that meet a certain revenue

threshold from business activities associated with SDG 6 are selected ("SDG 6 Aligned Business Activities"). Such SDG 6 Aligned Business Activities may include, but are not limited to:
• Sustainable water;
• Sanitation; and
• Sustainable agriculture.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Water Index (the "Thematic Parent Index"). Constituents' exposure to the theme of water (the "Theme"), which consists of business activities such as; water supply, water treatment, water utilities, and water-related equipment is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:

• Business segment information from company annual reports and third-party data sources; and
• Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Additionally, all companies from the Global Industry Classification Standard (GICS) subindustry 'water utility' and companies that meet a certain sustainable water revenue threshold are also eligible for inclusion. Constituents that do not have any revenue that contributes to SDG 6 are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 6 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%.
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted according to their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI Global SDGs UCITS ETF

Legal entity identifier: 254900H4CT68SNYH4735

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	X No
☐ It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 50% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective: __%**	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to the 17 Sustainable Development Goals of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index (as defined below) which are associated with a positive contribution to the 17 Sustainable Development Goals ("SDGs") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the SDGs contained in the UN 2030 Agenda is available on: https://sdgs.un.org.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics, MSCI Climate Change Metrics, and

MSCI BISR for their exposure to products and services which aim to contribute positively to the SDGs. Companies that meet a certain revenue threshold (the “SDG Revenue”) from business activities associated with the SDGs (“SDG Aligned Business Activities”) are included in the selection universe (“Selection Universe”). Such SDG Aligned Business Activities may include, but are not limited to:
• Alternative energy;
• Hydro power generation;
• Energy efficiency;
• Green building;
• Sustainable water;
• Pollution prevention;
• Sustainable agriculture;
• Nutrition;
• Major disease treatment;
• Sanitation;
• Contraceptives;
• Affordable real estate;
• SME finance;
• Education; and
• Connectivity.

Constituents in the Selection Universe are assigned to a Global Industry Classification Standard (GICS) sector and are ranked according to their SDG Revenue. A certain threshold of top-ranking constituents from each GICS sector are selected for inclusion. For GICS sectors that have less constituents than the threshold, all securities are selected for inclusion.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted by the product of their percentage of SDG Revenue and their free float-adjusted market capitalisation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies**: The percentage of the financial product’s portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product’s portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI.

• **Controversial Weapons Involvement**: The percentage of the financial product’s portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

• **SDG Impact Rating:** The financial product’s portfolio’s median score of each company’s overall impact on the SDGs, based on the sum of the companies’ highest positive and lowest negative SDG impact rating on a scale of -10 (significant negative impact) to 10 (significant positive impact), as measured by either MSCI or ISS ESG. Details on the provider used are available upon request.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 50% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no.14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X]

Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Exposure to companies active in the fossil fuel sector (no. 4);

• Activities negatively affecting biodiversity-sensitive areas (no. 7)

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no.14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the MSCI ACWI IMI SDG Impact Select Index, which is designed to reflect the performance of the shares of companies that are associated with a positive contribution to the 17 Sustainable Development Goals of the United Nations 2030 Agenda for Sustainable Development. The Reference Index is based on the MSCI ACWI IMI Index (the "Parent Index"). The Parent Index includes large, medium, and small-capitalisation companies across developed and emerging markets globally.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to the 17 Sustainable Development Goals of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index (as defined below) which are associated with a positive contribution to the 17 Sustainable Development Goals ("SDGs") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the SDGs contained in the UN 2030 Agenda is available on: https://sdgs.un.org.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;

• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics, MSCI Climate Change Metrics, and MSCI BISR for their exposure to products and services which aim to contribute positively to the SDGs. Companies that meet a certain revenue threshold (the "SDG Revenue") from business activities associated with the SDGs ("SDG Aligned Business Activities") are included in the selection universe ("Selection Universe"). Such SDG Aligned Business Activities may include, but are not limited to:
• Alternative energy;
• Hydro power generation;
• Energy efficiency;
• Green building;
• Sustainable water;
• Pollution prevention;
• Sustainable agriculture;
• Nutrition;
• Major disease treatment;
• Sanitation;
• Contraceptives;
• Affordable real estate;
• SME finance;
• Education; and
• Connectivity.

Constituents in the Selection Universe are assigned to a Global Industry Classification Standard (GICS) sector and are ranked according to their SDG Revenue. A certain threshold of top-ranking constituents from each GICS sector are selected for inclusion. For GICS sectors that have less constituents than the threshold, all securities are selected for inclusion.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the

tradability of eligible securities.

Securities in the Reference Index are weighted by the product of their percentage of SDG Revenue and their free float-adjusted market capitalisation.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

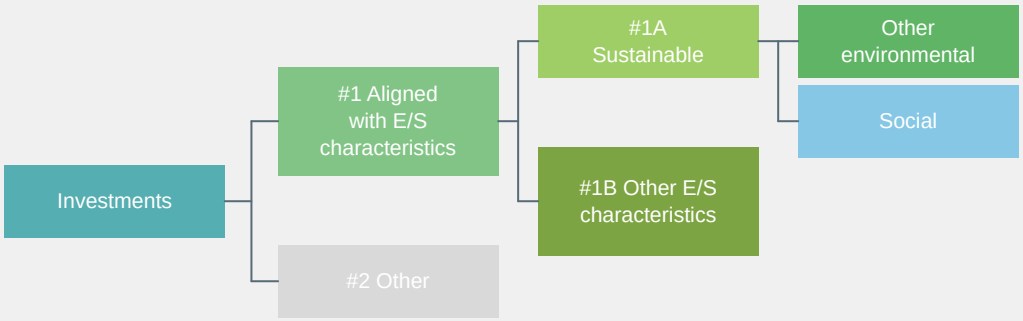
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 50% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("**FDIs**") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics **(#2 Other**).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

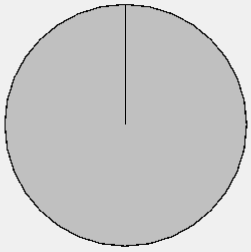
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

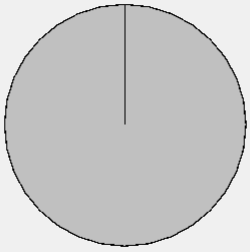
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 50%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 50%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the MSCI ACWI IMI SDG Impact Select Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by excluding companies from the Parent Index which do not fulfil the specific ESG criteria and applying SDG impact selection criteria outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large, medium, and small-capitalisation companies across developed and emerging markets globally. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to the 17 Sustainable Development Goals of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index (as defined below) which are associated with a positive contribution to the 17 Sustainable Development Goals ("SDGs") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the SDGs contained in the UN 2030 Agenda is available on: https://sdgs.un.org.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics, MSCI Climate Change Metrics, and MSCI BISR for their exposure to products and services which aim to contribute positively to the SDGs. Companies that meet a certain revenue threshold (the "SDG Revenue") from business activities

associated with the SDGs (“SDG Aligned Business Activities”) are included in the selection universe (“Selection Universe”). Such SDG Aligned Business Activities may include, but are not limited to:
• Alternative energy;
• Hydro power generation;
• Energy efficiency;
• Green building;
• Sustainable water;
• Pollution prevention;
• Sustainable agriculture;
• Nutrition;
• Major disease treatment;
• Sanitation;
• Contraceptives;
• Affordable real estate;
• SME finance;
• Education; and
• Connectivity.

Constituents in the Selection Universe are assigned to a Global Industry Classification Standard (GICS) sector and are ranked according to their SDG Revenue. A certain threshold of top-ranking constituents from each GICS sector are selected for inclusion. For GICS sectors that have less constituents than the threshold, all securities are selected for inclusion.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted by the product of their percentage of SDG Revenue and their free float-adjusted market capitalisation.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI Global SDG 7 Affordable and Clean Energy UCITS ETF

Legal entity identifier: 254900T2I3WMJK7S5Q13

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

● ● ☐ Yes	● ○ X No
☐ It will make a minimum of **sustainable investments with an environmental objective: __%**	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 50% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective: __%**	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 7 (ensure access to affordable, reliable, sustainable and modern energy for all) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index (as defined below) which are associated with a positive contribution to Sustainable Development Goal 7 ("SDG 7") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are

assessed by MSCI Impact Solutions' Sustainable Impact Metrics and MSCI Climate Change Metrics for their exposure to products and services which aim to contribute positively to SDG 7. Companies that meet a certain revenue threshold from business activities associated with SDG 7 are selected ("SDG 7 Aligned Business Activities"). Such SDG 7 Aligned Business Activities may include, but are not limited to:
• Alternative energy;
• Demand-side management;
• Smart grids;
• Other energy storage; and
• Hydro power generation.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Clean Energy Infrastructure Index (the "Thematic Parent Index"). Constituents' exposure to the theme of clean energy, which consists of business activities related to clean energy such as batteries, smart grids, and future fuels and technology (the "Sub-Themes") is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Sub-Themes and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:
• Business segment information from company annual reports and third-party data sources; and
• Descriptions of companies' activities from publicly available sources.

A combined relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Additionally, securities which correspond to certain Global Industry Classification Standard (GICS) sectors and sub-industries are removed from the eligible universe. Constituents that do not have any revenue that contributes to SDG 7 are also excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 7 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%.
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their combined relevance score and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.

• **Controversial Weapons Involvement**: The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

• **SDG 7 Net Product and Service Alignment Score:** The financial product's portfolio's weighted average of each company's net product and service alignment score to SDG 7, based on companies' revenues from alternative energy (positive), and/or fossil fuels and related products (negative), measured by MSCI on a scale of -10 (strongly misaligned) to 10 (strongly aligned).

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 50% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no.14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Exposure to companies active in the fossil fuel sector (no. 4);

• Activities negatively affecting biodiversity-sensitive areas (no. 7)

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no.14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the MSCI ACWI IMI SDG 7 Affordable and Clean Energy Select Index, which is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 7 (Ensure access to affordable, reliable, sustainable and modern energy for all) of the United Nations 2030 Agenda for Sustainable Development. The Reference Index is based on the MSCI ACWI IMI Index (the "Parent Index"). The Parent Index includes large, medium, and small-capitalisation companies across developed and emerging markets globally.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 7 (Ensure access to affordable, reliable, sustainable and modern energy for all) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 7 ("SDG 7") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics and MSCI Climate Change Metrics for their exposure to products and services which aim to contribute positively to SDG 7. Companies that meet a certain revenue threshold from business activities associated with SDG 7 are selected

("SDG 7 Aligned Business Activities"). Such SDG 7 Aligned Business Activities may include, but are not limited to:
• Alternative energy;
• Demand-side management;
• Smart grids;
• Other energy storage; and
• Hydro power generation.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Clean Energy Infrastructure Index (the "Thematic Parent Index"). Constituents' exposure to the theme of clean energy, which consists of business activities related to clean energy such as batteries, smart grids, and future fuels and technology (the "Sub-Themes") is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Sub-Themes and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:
• Business segment information from company annual reports and third-party data sources; and
• Descriptions of companies' activities from publicly available sources.

A combined relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Additionally, securities which correspond to certain Global Industry Classification Standard (GICS) sectors and sub-industries are removed from the eligible universe. Constituents that do not have any revenue that contributes to SDG 7 are also excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 7 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%.
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their combined relevance score and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

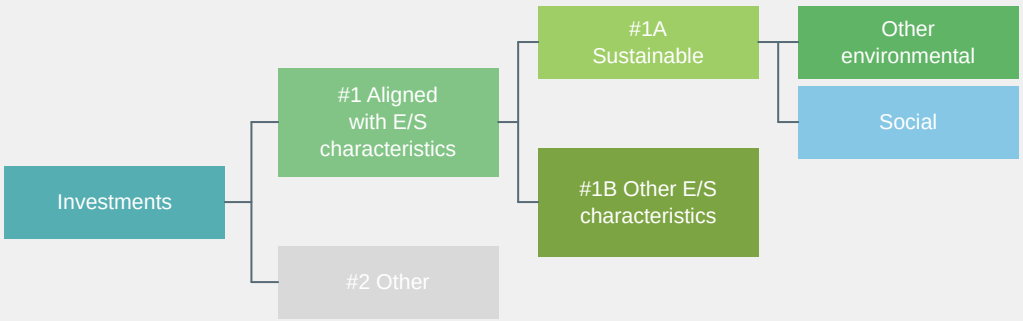
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 50% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

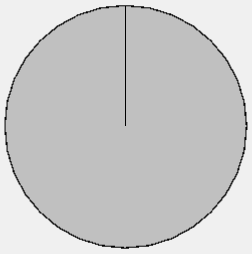
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

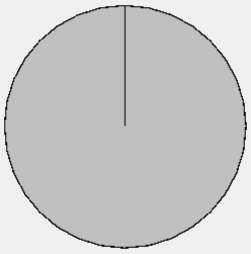
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 50%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 50%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the MSCI ACWI IMI SDG 7 Affordable and Clean Energy Select Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by excluding companies from the Parent Index which do not fulfil the specific ESG criteria and applying SDG impact selection and SDG thematic selection criteria outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large, medium, and small-capitalisation companies across developed and emerging markets globally. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 7 (Ensure access to affordable, reliable, sustainable and modern energy for all) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 7 ("SDG 7") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) fo the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics and MSCI Climate Change Metrics for their exposure to products and services which aim to contribute positively to SDG 7. Companies

that meet a certain revenue threshold from business activities associated with SDG 7 are selected ("SDG 7 Aligned Business Activities"). Such SDG 7 Aligned Business Activities may include, but are not limited to:
• Alternative energy;
• Demand-side management;
• Smart grids;
• Other energy storage; and
• Hydro power generation.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Clean Energy Infrastructure Index (the "Thematic Parent Index"). Constituents' exposure to the theme of clean energy, which consists of business activities related to clean energy such as batteries, smart grids, and future fuels and technology (the "Sub-Themes") is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Sub-Themes and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:

• Business segment information from company annual reports and third-party data sources; and
• Descriptions of companies' activities from publicly available sources.

A combined relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Additionally, securities which correspond to certain Global Industry Classification Standard (GICS) sectors and sub-industries are removed from the eligible universe. Constituents that do not have any revenue that contributes to SDG 7 are also excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 7 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%.
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their combined relevance score and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI Global SDG 3 Good Health UCITS ETF

Legal entity identifier: 254900BDBGMBEQO4SF60

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

Yes	X No
☐ It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 50% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective: __%**	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 3 (ensure healthy lives and promote well-being for all at all ages) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index (as defined below) which are associated with a positive contribution to Sustainable Development Goal 3 ("SDG 3") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands and, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Regulation").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are

assessed by MSCI Impact Solutions' Sustainable Impact Metrics and MSCI BISR for their exposure to products and services which aim to contribute positively to SDG 3. Companies that meet a certain revenue threshold from business activities associated with SDG 3 are selected ("SDG 3 Aligned Business Activities"). Such SDG 3 Aligned Business Activities may include, but are not limited to:
• Major disease treatment;
• Sanitation;
• Contraceptives;
• Conventional pollution control solutions; and
• Low toxicity solutions and/or low volatile organic compounds solutions.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Digital Health Index (the "Thematic Parent Index"). Constituents' exposure to the theme of digital healthcare (the "Theme"), which includes (but is not limited to) the development of new products and services focussed on telehealth, medical robots, and automation in healthcare is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:
• Business segment information from company annual reports and third-party data sources; and
• Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Constituents that do not have any revenue that contributes to SDG 3 are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 3 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%.
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their relevance score and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.

• **Controversial Weapons Involvement**: The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

• **SDG 3 Net Product and Service Alignment Score:** The financial product's portfolio's weighted average of each company's net product and service alignment score to SDG 3, based on companies' revenues from major disease treatment or pollution control (positive) and/or tobacco-related products (negative), measured by MSCI on a scale of -10 (strongly misaligned) to 10 (strongly aligned).

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 50% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no.14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Exposure to companies active in the fossil fuel sector (no. 4);

• Activities negatively affecting biodiversity-sensitive areas (no. 7)

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no.14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the MSCI ACWI IMI SDG 3 Good Health and Well-being Select Index, which is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 3 (ensure healthy lives and promote well-being for all at all ages) of the United Nations 2030 Agenda for Sustainable Development. The Reference Index is based on the MSCI ACWI IMI Index (the "Parent Index"). The Parent Index includes large, medium, and small-capitalisation companies across developed and emerging markets globally.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 3 (ensure healthy lives and promote well-being for all at all ages) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 3 ("SDG 3") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: www.msci.com/esg-investing
MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics and MSCI BISR for their exposure to products and services which aim to contribute positively to SDG 3. Companies that meet a certain revenue threshold from business activities associated with SDG 3 are selected ("SDG 3 Aligned Business Activities"). Such SDG 3 Aligned Business Activities may include, but are not limited to:
• Major disease treatment;

• Sanitation;
• Contraceptives;
• Conventional pollution control solutions; and
• Low toxicity solutions and/or low volatile organic compounds solutions.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Digital Health Index (the "Thematic Parent Index"). Constituents' exposure to the theme of digital healthcare (the "Theme"), which includes (but is not limited to) the development of new products and services focussed on telehealth, medical robots, and automation in healthcare is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:

• Business segment information from company annual reports and third-party data sources; and
• Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Constituents that do not have any revenue that contributes to SDG 3 are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 3 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%.
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their relevance score and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

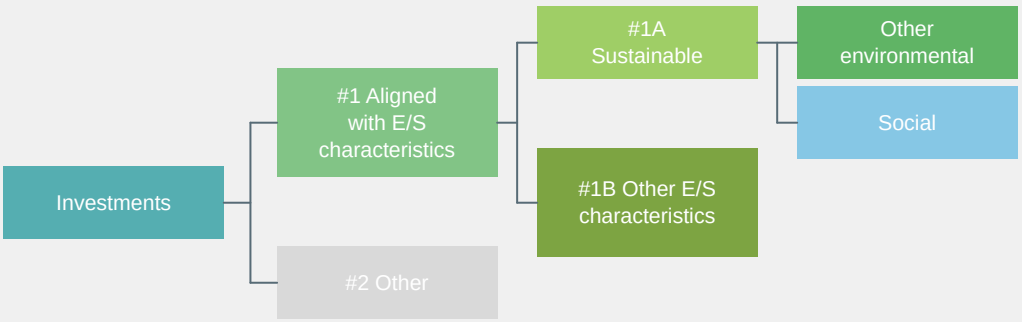
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 50% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

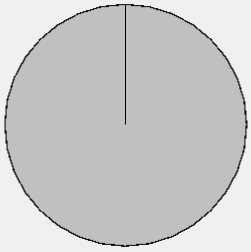
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

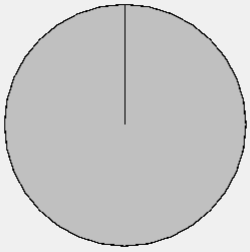
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 50%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 50%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the MSCI ACWI IMI SDG 3 Good Health and Well-being Select Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by excluding companies from the Parent Index which do not fulfil the specific ESG criteria and applying SDG impact selection and SDG thematic selection criteria outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large, medium, and small-capitalisation companies across developed and emerging markets globally. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 3 (ensure healthy lives and promote well-being for all at all ages) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 3 ("SDG 3") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics and MSCI BISR for their exposure to products and services which aim to contribute positively to SDG 3. Companies that meet a certain

revenue threshold from business activities associated with SDG 3 are selected ("SDG 3 Aligned Business Activities"). Such SDG 3 Aligned Business Activities may include, but are not limited to:
• Major disease treatment;
• Sanitation;
• Contraceptives;
• Conventional pollution control solutions; and
• Low toxicity solutions and/or low volatile organic compounds solutions.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Digital Health Index (the "Thematic Parent Index"). Constituents' exposure to the theme of digital healthcare (the "Theme"), which includes (but is not limited to) the development of new products and services focussed on telehealth, medical robots, and automation in healthcare is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:
• Business segment information from company annual reports and third-party data sources; and
• Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Constituents that do not have any revenue that contributes to SDG 3 are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 3 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%.
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their relevance score and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers S&P 500 Scored & Screened UCITS ETF

Legal entity identifier: 2549005KB8JP85LZK139

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	X No
☐ It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective: __%**	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of the shares of large-capitalisation companies representing all major US industries and which meet certain environmental, social and governance ("ESG") criteria.

The Reference Index excludes companies from the Parent Index (as defined below) which do not fulfil specific ESG criteria, including but not limited to:

• That do not have an S&P Global ESG Score, or with an S&P Global ESG Score that falls within the worst 25% of ESG scores from each GICS Industry Group, as calculated by S&P Global Sustainable1 ("**Sustainable1**") using a company's 'Corporate Sustainability Assessment' ("**CSA**") which is derived using either company-provided data, publicly available information, or a combination thereof;
• Are classified by S&P Global Business Involvement Screens as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, and thermal coal; and/or
• Have a disqualifying United Nations Global Compact ("**UNGC**") score (i.e. companies that do not act in accordance with the UNGC principles and their associated standards, conventions, and treaties as determined by Sustainalytics).

The Reference Index uses company ratings and research provided by Sustainable1, a business division of S&P Global which specialises in providing in-depth sustainability intelligence. In particular, the following two components are utilised:

S&P Global ESG Scores

S&P Global ESG Scores provide research and ratings measuring a company's performance on and management of environmental, social and governance risks and opportunities. S&P Global ESG Scores provide an overall company ESG rating. For more details on S&P Global ESG Scores, please refer to: Sustainable1 Solutions: ESG Scores | S&P Global (spglobal.com)*S&P Global Business Involvement Screens*

S&P Global Business Involvement Screens aim to enable investors to align investment values with investment strategy by providing detailed assessments of common areas of concern pinpointing the level of involvement. For more details on S&P Global Business Involvement Screens, please refer to: Sustainable1 Solutions: Business Involvement Screens | S&P Global (spglobal.com)

Sustainalytics, a Morningstar company, is a leading independent ESG and corporate governance research, ratings and analytics firm that supports investors around the world with the development and implementation of responsible investment strategies. Companies without Sustainalytics coverage are ineligible for index inclusion until they receive such coverage. Please refer to http://www.sustainalytics.com/ for more information.

In addition, the Reference Index uses RepRisk, a leading data science company, for daily filtering, screening, and analysis of ESG risk incidents and controversial activities related to the companies which may result in further exclusions of companies from the Reference Index as determined by the Index Administrator. Please refer to http://www.reprisk.com/ for more information.

Once constituents have been excluded, for each GICS® Industry Group, companies are selected in decreasing order of S&P Global ESG Score until 65% of the Parent Index's cumulative float-adjusted market capitalization ("FMC") is reached. Then for each GICS® Industry Group, existing constituents ranked between 65% and 85% of a GICS® Industry Group's cumulative FMC are selected to get as close as possible to the target 75% of FMC. If the combined FMC of selected companies is not above the 75% FMC target, companies not already selected from the eligible universe may be added, in decreasing order by S&P Global ESG Score, to get as close as possible to the 75% FMC target. This process ends when the addition of the next eligible company would result in the total FMC of the relevant GICS® Industry Group moving further away from the 75% FMC target.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies:** The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as determined by either MSCI, Sustainalytics, or RepRisk. Details on the provider used are available upon request.

• **Exposure to Worst-in-Class issuers:** The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC", as determined by either MSCI, Sustainalytics, or Sustainable1. Details on the provider used are available upon request.

• **Controversial Weapons Involvement:** The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments, as determined by either MSCI, Sustainable1, or RepRisk. Details on the provider used are available upon request.

• **Tobacco involvement:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, as determined by either MSCI or Sustainable1. Details on the provider used are available upon request.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 10% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the S&P 500 Scored & Screened Index, which is designed to reflect the performance of the shares of large-capitalisation companies representing all major US industries and which meet certain, environmental, social and governance ("ESG") criteria. The Reference Index is based on the S&P 500 Index (the "Parent Index"), which is a free float-adjusted market capitalisation weighted index reflecting the performance of circa 500 large-cap common stocks of publicly held companies actively traded on regulated US equities' exchanges.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies from the Parent Index which do not fulfil specific ESG criteria, including but not limited to:

• That do not have an S&P Global ESG Score, or with an S&P Global ESG Score that falls within the worst 25% of ESG scores from each GICS Industry Group, as calculated by Sustainable1 using a company's CSA which is derived using either company-provided data, publicly available information, or a combination thereof;
• Are classified by S&P Global Business Involvement Screens as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, and thermal coal; and/or
• Have a disqualifying United Nations Global Compact (UNGC) score (i.e. companies that do not act in accordance with the UNGC principles and their associated standards, conventions, and treaties as determined by Sustainalytics).

The Reference Index uses company ratings and research provided by Sustainable1, a business division of S&P Global which specialises in providing in-depth sustainability intelligence. In particular, the following two components are utilised:

S&P Global ESG Scores

S&P Global ESG Scores provide research and ratings measuring a company's performance on and management of environmental, social and governance risks and opportunities. S&P Global ESG Scores provide an overall company ESG rating. For more details on S&P Global ESG Scores, please refer to: Sustainable1 Solutions: ESG Scores | S&P Global (spglobal.com)

S&P Global Business Involvement Screens

S&P Global Business Involvement Screens aim to enable investors to align investment values with investment strategy by providing detailed assessments of common areas of concern pinpointing the level of involvement. For more details on S&P Global Business Involvement Screens, please refer to: Sustainable1 Solutions: Business Involvement Screens | S&P Global (spglobal.com)

Sustainalytics, a Morningstar company, is a leading independent ESG and corporate governance research, ratings and analytics firm that supports investors around the world with the development and implementation of responsible investment strategies. Companies without Sustainalytics coverage are ineligible for index inclusion until they receive such coverage. Please refer to http://www.sustainalytics.com/ for more information.

In addition, the Reference Index uses RepRisk, a leading data science company, for daily filtering, screening, and analysis of ESG risk incidents and controversial activities related to the companies which may result in further exclusions of companies from the Reference Index as determined by the Index Administrator. Please refer to http://www.reprisk.com/ for more information.

Once constituents have been excluded, for each GICS® Industry Group, companies are selected in decreasing order of S&P Global ESG Score until 65% of the Parent Index's cumulative float-adjusted market capitalization ("FMC") is reached. Then for each GICS® Industry Group, existing constituents ranked between 65% and 85% of a GICS® Industry Group's cumulative FMC are selected to get as close as possible to the target 75% of FMC. If the combined FMC of selected companies is not above the 75% FMC target, companies not already selected from the eligible universe may be added, in decreasing order by S&P Global ESG Score, to get as close as possible to the 75% FMC target. This process ends when the addition of the next eligible company would result in the total FMC of the relevant GICS® Industry Group moving further away from the 75% FMC target.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies which breach certain international norm standards (including governance controversies) using Sustainalytics ESG data, and companies that have an S&P Global ESG Score (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or have missing ESG data.

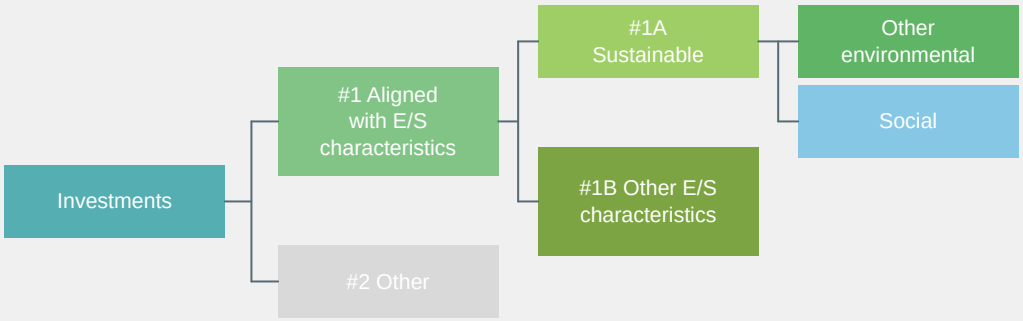
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 10% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

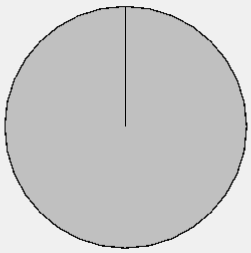
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

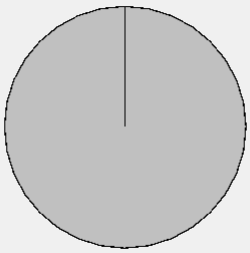
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the S&P 500 Scored & Screened Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by excluding companies from the Parent Index which do not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of circa 500 large-cap common stocks of publicly held companies actively traded on regulated US equities' exchanges.

The Reference Index excludes companies from the Parent Index (as defined below) which do not fulfil specific ESG criteria, including but not limited to:

• That do not have an S&P Global ESG Score, or with an S&P Global ESG Score that falls within the worst 25% of ESG scores from each GICS Industry Group, as calculated by Sustainable1 using a company's 'CSA which is derived using either company-provided data, publicly available information, or a combination thereof;
• Are classified by S&P Global Business Involvement Screens as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, and thermal coal; and/or
• Have a disqualifying United Nations Global Compact (UNGC) score (i.e. companies that do not act in accordance with the UNGC principles and their associated standards, conventions, and treaties as determined by Sustainalytics).

The Reference Index uses company ratings and research provided by Sustainable1, a business division of S&P Global which specialises in providing in-depth sustainability intelligence. In particular, the following two components are utilised:

S&P Global ESG Scores

S&P Global ESG Scores provide research and ratings measuring a company's performance on and management of environmental, social and governance risks and opportunities. S&P Global ESG Scores provide an overall company ESG rating. For more details on S&P Global ESG Scores, please refer to: Sustainable1 Solutions: ESG Scores | S&P Global (spglobal.com)

S&P Global Business Involvement Screens

S&P Global Business Involvement Screens aim to enable investors to align investment values with investment strategy by providing detailed assessments of common areas of concern pinpointing the level of involvement. For more details on S&P Global Business Involvement Screens, please refer to: Sustainable1 Solutions: Business Involvement Screens | S&P Global (spglobal.com)

Sustainalytics, a Morningstar company, is a leading independent ESG and corporate governance research, ratings and analytics firm that supports investors around the world with the development and implementation of responsible investment strategies. Companies without Sustainalytics coverage are ineligible for index inclusion until they receive such coverage. Please refer to http://www.sustainalytics.com/ for more information.

In addition, the Reference Index uses RepRisk, a leading data science company, for daily filtering, screening, and analysis of ESG risk incidents and controversial activities related to the companies which may result in further exclusions of companies from the Reference Index as determined by the Index Administrator. Please refer to http://www.reprisk.com/ for more information.

Once constituents have been excluded, for each GICS® Industry Group, companies are selected in decreasing order of S&P Global ESG Score until 65% of the Parent Index's cumulative float-adjusted market capitalization ("FMC") is reached. Then for each GICS® Industry Group, existing constituents ranked between 65% and 85% of a GICS® Industry Group's cumulative FMC are selected to get as close as possible to the target 75% of FMC. If the combined FMC of selected companies is not above the 75% FMC target, companies not already selected from the eligible universe may be added, in decreasing order by S&P Global ESG Score, to get as close as possible to the 75% FMC target. This process ends when the addition of the next eligible company would result in the total FMC of the relevant GICS® Industry Group moving further away from the 75% FMC target.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the S&P indices can be found on www.spglobal.com and https://www.spglobal.com/spdji/en/supplemental-data/europe/

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers S&P 500 Equal Weight Scored & Screened UCITS ETF

Legal entity identifier: 254900GFCY04N1RL0519

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	No
☐ It will make a minimum of **sustainable investments with an environmental objective: __%**	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective: __%**	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the equal weighted performance of the shares of large-capitalisation companies representing all major US industries and which meet certain environmental, social and governance ("ESG") criteria.

The Reference Index excludes companies from the Parent Index (as defined below) which do not fulfil specific ESG criteria, including but not limited to:

• That do not have an S&P Global ESG Score, or with an S&P Global ESG Scorethat falls within the worst 25% of ESG scores from each GICS Industry Group, as calculated by S&P Global Sustainable1 ("**Sustainable1**") using a company's 'Corporate Sustainability Assessment' ("**CSA**") which is derived using either company-provided data, publicly available information, or a combination thereof;
• Are classified by S&P Global Business Involvement Screens as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, and thermal coal; and/or
• Have a disqualifying United Nations Global Compact ("**UNGC**") score (i.e. companies that do not act in accordance with the UNGC principles and their associated standards, conventions, and treaties as determined by Sustainalytics).

The Reference Index uses company ratings and research provided by Sustainable1, a business division of S&P Global which specialises in providing in-depth sustainability intelligence. In particular, the following two components are utilised:

S&P Global ESG Scores

S&P Global ESG Scores provide research and ratings measuring a company's performance on and management of environmental, social and governance risks and opportunities. S&P Global ESG Scores provide an overall company ESG rating. For more details on S&P Global ESG Scores, please refer to: Sustainable1 Solutions: ESG Scores | S&P Global (spglobal.com)

S&P Global Business Involvement Screens

S&P Global Business Involvement Screens aim to enable investors to align investment values with investment strategy by providing detailed assessments of common areas of concern pinpointing the level of involvement. For more details on S&P Global Business Involvement Screens, please refer to: Sustainable1 Solutions: Business Involvement Screens | S&P Global (spglobal.com)

Sustainalytics, a Morningstar company, is a leading independent ESG and corporate governance research, ratings and analytics firm that supports investors around the world with the development and implementation of responsible investment strategies. Companies without Sustainalytics coverage are ineligible for index inclusion until they receive such coverage. Please refer to http://www.sustainalytics.com/ for more information.

In addition, the Reference Index uses RepRisk, a leading data science company, for daily filtering, screening, and analysis of ESG risk incidents and controversial activities related to the companies which may result in further exclusions of companies from the Reference Index as determined by the Index Administrator. Please refer to http://www.reprisk.com/ for more information.

Once constituents have been excluded, for each GICS® Industry Group, companies are selected in decreasing order of S&P Global ESG Score until 50% of the Parent Index's constituent count within the Industry group is reached. Then for each GICS® Industry Group, existing constituents ranked between 50% and 70% of a GICS® Industry Group's constituent count are selected to get as close as possible to the target 60% of the Parent Index's constituent count. If the number of selected companies is not above the 60% count target, companies not already selected from the eligible universe may be added, in decreasing order by S&P Global ESG Score, to get as close as possible to the 60% count target. This process ends when the addition of the next eligible company would result in the total constituent count of the relevant GICS® Industry Group moving further away from the 60% count target.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies:** The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as determined by either MSCI, Sustainalytics, or RepRisk. Details on the provider used are available upon request.

• **Exposure to Worst-in-Class issuers:** The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC", as determined by either MSCI, Sustainalytics, or Sustainable1. Details on the provider used are available upon request.

• **Controversial Weapons Involvement:** The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments, as determined by either MSCI, Sustainable1, or RepRisk. Details on the provider used are available upon request.

• **Tobacco involvement:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, as determined by either MSCI or Sustainable1. Details on the provider used are available upon request.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 10% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the S&P 500 Equal Weight Scored & Screened Index, which is designed to reflect the performance of the shares of large-capitalisation companies representing all major US industries and which meet certain, environmental, social and governance ("ESG") criteria. The Reference Index is based on the S&P 500 Equal Weight Index (the "Parent Index"), which is an equal weighted index reflecting the performance of large-cap common stocks of publicly held companies actively traded on regulated US equities' exchanges.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies from the Parent Index which do not fulfil specific ESG criteria, including but not limited to:

• That do not have an S&P Global ESG Score, or with an S&P Global ESG Score that falls within the worst 25% of ESG scores from each GICS Industry Group, as calculated by Sustainable1 using a company's CSA which is derived using either company-provided data, publicly available information, or a combination thereof;
• Are classified by S&P Global Business Involvement Screens as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, and thermal coal; and/or
• Have a disqualifying United Nations Global Compact (UNGC) score (i.e. companies that do not act in accordance with the UNGC principles and their associated standards, conventions, and treaties as determined by Sustainalytics).

The Reference Index uses company ratings and research provided by Sustainable1, a business division of S&P Global which specialises in providing in-depth sustainability intelligence. In particular, the following two components are utilised:

S&P Global ESG Scores

S&P Global ESG Scores provide research and ratings measuring a company's performance on and management of environmental, social and governance risks and opportunities. S&P Global ESG Scores provide an overall company ESG rating. For more details on S&P Global ESG Scores, please refer to: Sustainable1 Solutions: ESG Scores | S&P Global (spglobal.com)

S&P Global Business Involvement Screens

S&P Global Business Involvement Screens aim to enable investors to align investment values with investment strategy by providing detailed assessments of common areas of concern pinpointing the level of involvement. For more details on S&P Global Business Involvement Screens, please refer to: Sustainable1 Solutions: Business Involvement Screens | S&P Global (spglobal.com)

Sustainalytics, a Morningstar company, is a leading independent ESG and corporate governance research, ratings and analytics firm that supports investors around the world with the development and implementation of responsible investment strategies. Companies without Sustainalytics coverage are ineligible for index inclusion until they receive such coverage. Please refer to http://www.sustainalytics.com/ for more information.

In addition, the Reference Index uses RepRisk, a leading data science company, for daily filtering, screening, and analysis of ESG risk incidents and controversial activities related to the companies which may result in further exclusions of companies from the Reference Index as determined by the Index Administrator. Please refer to http://www.reprisk.com/ for more information.

Once constituents have been excluded, for each GICS® Industry Group, companies are selected in decreasing order of S&P Global ESG Score until 50% of the Parent Index's constituent count within the Industry group is reached. Then for each GICS® Industry Group, existing constituents ranked between 50% and 70% of a GICS® Industry Group's constituent count are selected to get as close as possible to the target 60% of the Parent Index's constituent count. If the number of selected companies is not above the 60% count target, companies not already selected from the eligible universe may be added, in decreasing order by S&P Global ESG Score, to get as close as possible to the 60% count target. This process ends when the addition of the next eligible company would result in the total constituent count of the relevant GICS® Industry Group moving further away from the 60% count target.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies which breach certain international norm standards (including governance controversies) using Sustainalytics ESG data, and companies that have an S&P Global ESG Score (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or have missing ESG data.

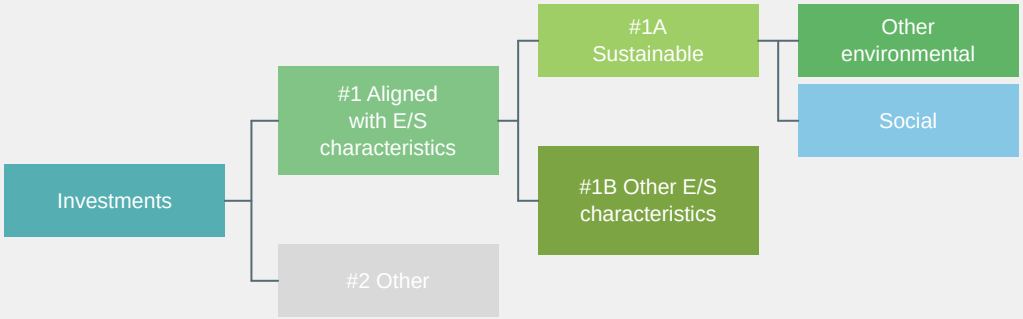
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 10% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

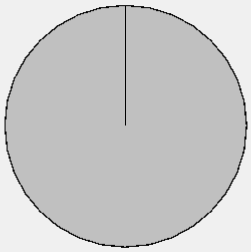
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

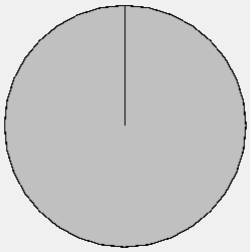
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 10%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the S&P 500 Equal Weight Scored & Screened Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by excluding companies from the Parent Index which do not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is an equal weighted index reflecting the performance of large-cap common stocks of publicly held companies actively traded on regulated US equities' exchanges.

The Reference Index excludes companies from the Parent Index (as defined below) which do not fulfil specific ESG criteria, including but not limited to:

• That do not have an S&P Global ESG Score, or with an S&P Global ESG Score that falls within the worst 25% of ESG scores from each GICS Industry Group, as calculated by Sustainable1 using a company's CSA which is derived using either company-provided data, publicly available information, or a combination thereof;
•Are classified by S&P Global Business Involvement Screens as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, and thermal coal; and/or
•Have a disqualifying United Nations Global Compact (UNGC) score (i.e. companies that do not act in accordance with the UNGC principles and their associated standards, conventions, and treaties as determined by Sustainalytics).

The Reference Index uses company ratings and research provided by Sustainable1, a business division of S&P Global which specialises in providing in-depth sustainability intelligence. In particular, the following two components are utilised:

S&P Global ESG Scores

S&P Global ESG Scores provide research and ratings measuring a company's performance on and management of environmental, social and governance risks and opportunities. S&P Global ESG Scores provide an overall company ESG rating. For more details on S&P Global ESG Scores, please refer to: Sustainable1 Solutions: ESG Scores | S&P Global (spglobal.com)

S&P Global Business Involvement Screens

S&P Global Business Involvement Screens aim to enable investors to align investment values with investment strategy by providing detailed assessments of common areas of concern pinpointing the level of involvement. For more details on S&P Global Business Involvement Screens, please refer to: Sustainable1 Solutions: Business Involvement Screens | S&P Global (spglobal.com)

Sustainalytics, a Morningstar company, is a leading independent ESG and corporate governance research, ratings and analytics firm that supports investors around the world with the development and implementation of responsible investment strategies. Companies without Sustainalytics coverage are ineligible for index inclusion until they receive such coverage. Please refer to http://www.sustainalytics.com/ for more information.

In addition, the Reference Index uses RepRisk, a leading data science company, for daily filtering, screening, and analysis of ESG risk incidents and controversial activities related to the companies which may result in further exclusions of companies from the Reference Index as determined by the Index Administrator. Please refer to http://www.reprisk.com/ for more information.

Once constituents have been excluded, for each GICS® Industry Group, companies are selected in decreasing order of S&P Global ESG Score until 50% of the Parent Index's constituent count within the Industry group is reached. Then for each GICS® Industry Group, existing constituents ranked between 50% and 70% of a GICS® Industry Group's constituent count are selected to get as close as possible to the target 60% of the Parent Index's constituent count. If the number of selected companies is not above the 60% count target, companies not already selected from the eligible universe may be added, in decreasing order by S&P Global ESG Score, to get as close as possible to the 60% count target. This process ends when the addition of the next eligible company would result in the total constituent count of the relevant GICS® Industry Group moving further away from the 60% count target.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, calculation and rules for periodical review and rebalancing and on the general methodology behind the S&P indices can be found on www.spglobal.com and https://www.spglobal.com/spdji/en/supplemental-data/europe/

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI Global SDG 9 Industry, Innovation & Infrastructure UCITS ETF

Legal entity identifier: 2549001F2P63VH5GSB64

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

● ● ☐ **Yes**	● ○ **X No**
☐ It will make a minimum of **sustainable investments with an environmental objective: __%**	**X** It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 50% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	**X** with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective: __%**	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 9 (build resilient infrastructure, promote inclusive and sustainable industrialisation and foster innovation) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index (as defined below) which are associated with a positive contribution to Sustainable Development Goal 9 ("SDG 9") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are

assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 9. Companies that meet a certain revenue threshold from business activities associated with SDG 9 are selected ("SDG 9 Aligned Business Activities"). Such SDG 9 Aligned Business Activities may include, but are not limited to:
• Alternative energy;
• Pollution prevention;
• Clean transport infrastructure;
• Industrial automation;
• Demand-side management;
• SME finance; and
• Connectivity.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI Robotics Index (the "Thematic Parent Index"). Constituents' exposure to the theme of robots and automation (the "Theme"), which includes (but is not limited to) the development of new products and services focused on robots, artificial intelligence, industrial robots, automation, non-industrial robots, and autonomous robots, is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:
• Business segment information from company annual reports and third-party data sources; and
• Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Constituents that do not have any revenue that contributes to SDG 9 are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 9 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%; and
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their relevance score and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.

• **Controversial Weapons Involvement**: The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

• **SDG 9 Net Product and Service Alignment Score:** The financial product's portfolio's weighted average of each company's net product and service alignment score to SDG 9, based on companies' revenues from clean and efficient technologies and enabling activities such as SME financing and connectivity, measured by MSCI on a scale of -10 (strongly misaligned) to 10 (strongly aligned).

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 50% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no.14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Exposure to companies active in the fossil fuel sector (no. 4);

• Activities negatively affecting biodiversity-sensitive areas (no. 7)

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no.14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the MSCI ACWI IMI SDG 9 Industry, Innovation and Infrastructure Select Index, which is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 9 (build resilient infrastructure, promote inclusive and sustainable industrialisation and foster innovation) of the United Nations 2030 Agenda for Sustainable Development. The Reference Index is based on the MSCI ACWI IMI Index (the "Parent Index"). The Parent Index includes large, medium, and small-capitalisation companies across developed and emerging markets globally.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 9 (build resilient infrastructure, promote inclusive and sustainable industrialisation and foster innovation) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 9 ("SDG 9") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 9. Companies that meet a certain revenue threshold from business activities associated with SDG 9 are selected ("SDG 9 Aligned Business

Activities"). Such SDG 9 Aligned Business Activities may include, but are not limited to:
• Alternative energy;
• Pollution prevention;
• Clean transport infrastructure;
• Industrial automation;
• Demand-side management;
• SME finance; and
• Connectivity.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI Robotics Index (the "Thematic Parent Index"). Constituents' exposure to the theme of robots and automation (the "Theme"), which includes (but is not limited to) the development of new products and services focused on robots, artificial intelligence, industrial robots, automation, non-industrial robots, and autonomous robots, is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:
• Business segment information from company annual reports and third-party data sources; and
• Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Constituents that do not have any revenue that contributes to SDG 9 are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 9 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%; and
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their relevance score and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

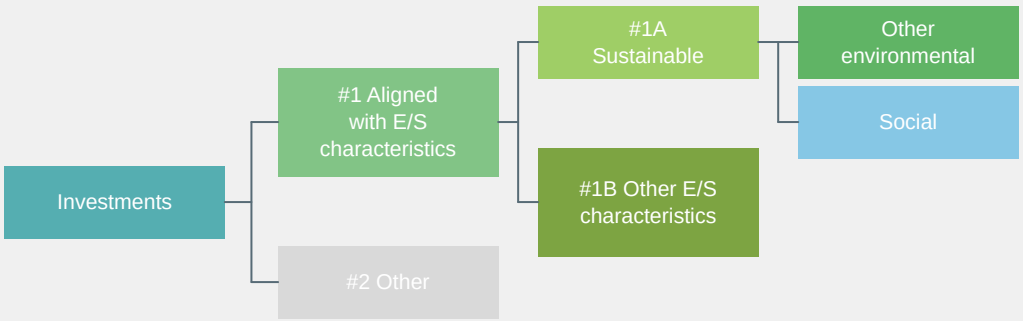
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 50% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

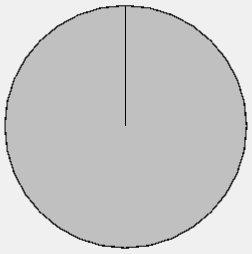
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

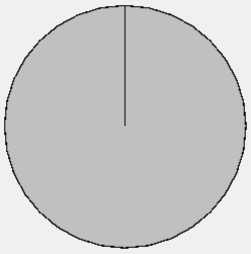
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 50%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 50%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the MSCI ACWI IMI SDG 9 Industry, Innovation and Infrastructure Select Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by excluding companies from the Parent Index which do not fulfil the specific ESG criteria and applying SDG impact selection and SDG thematic selection criteria outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large, medium, and small-capitalisation companies across developed and emerging markets globally. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 9 (build resilient infrastructure, promote inclusive and sustainable industrialisation and foster innovation) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 9 ("SDG 9") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 9. Companies that meet a certain revenue

threshold from business activities associated with SDG 9 are selected ("SDG 9 Aligned Business Activities"). Such SDG 9 Aligned Business Activities may include, but are not limited to:
• Alternative energy;
• Pollution prevention;
• Clean transport infrastructure;
• Industrial automation;
• Demand-side management;
• SME finance; and
• Connectivity.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI Robotics Index (the "Thematic Parent Index"). Constituents' exposure to the theme of robots and automation (the "Theme"), which includes (but is not limited to) the development of new products and services focused on robots, artificial intelligence, industrial robots, automation, non-industrial robots, and autonomous robots, is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:
• Business segment information from company annual reports and third-party data sources; and
• Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Constituents that do not have any revenue that contributes to SDG 9 are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 9 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%; and
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their relevance score and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI Global SDG 11 Sustainable Cities UCITS ETF

Legal entity identifier: 254900B4SYC8SRURPD89

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	X No
☐ It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 50% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** __%	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 11 (make cities and human settlements inclusive, safe, resilient and sustainable) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index (as defined below) which are associated with a positive contribution to Sustainable Development Goal 11 ("SDG 11") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate

risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 11. Companies that meet a certain revenue threshold ("SDG Revenue") from business activities associated with SDG 11 ("SDG 11 Aligned Business Activities") are included in the selection universe (the "SDG Impact Selection Universe"). SDG 11 Aligned Business Activities may include, but are not limited to:

• Pollution prevention;
• Demand-side management;
• Smart grid;
• Clean transport infrastructure;
• LED/CFL lighting;
• Insulation;
• Green building; and
• Affordable real estate.

Constituents in the SDG Impact Selection Universe are assigned to a Global Industry Classification Standard (GICS) sector and are ranked according to their SDG Revenue. A certain threshold of top-ranking constituents from each GICS sector are selected for inclusion. For GICS sectors that have less constituents than the threshold, all securities are selected for inclusion.

SDG Thematic Selection
Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Smart Cities Index (the "Thematic Parent Index"). Constituents' exposure to the theme of smart solutions for urban infrastructure (the "Theme"), which includes (but is not limited to) the development of new products and services focussed on smart connectivity for internet of things (e.g. nonstandard computing devices that connect wirelessly to a network and have the ability to transmit data), smart infrastructure, smart buildings, smart homes, smart safety and security, smart waste and water management, smart mobility, and smart energy and grids is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:
• Business segment information from company annual reports and third-party data sources; and
• Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Constituents that do not have any revenue that contributes to SDG 11 and securities which are mapped to certain GICS sub-industries are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:

• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 11 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%; and
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their relevance score and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.

• **Controversial Weapons Involvement**: The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

• **SDG 11 Net Product and Service Alignment Score:** The financial product's portfolio's weighted average of each company's net product and service alignment score to SDG 11, based on companies' revenues from infrastructure including green buildings, clean transport, and affordable real estate, amongst others, measured by MSCI on a scale of -10 (strongly misaligned) to 10 (strongly aligned).

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 50% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no.14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Exposure to companies active in the fossil fuel sector (no. 4);

• Activities negatively affecting biodiversity-sensitive areas (no. 7)

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no.14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the MSCI ACWI IMI SDG 11 Sustainable Cities and Communities Select Index, which is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 11 (make cities and human settlements inclusive, safe, resilient and sustainable) of the United Nations 2030 Agenda for Sustainable Development. The Reference Index is based on the MSCI ACWI IMI Index (the "Parent Index"). The Parent Index includes large, medium, and small-capitalisation companies across developed and emerging markets globally.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 11 (make cities and human settlements inclusive, safe, resilient and sustainable) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 11 ("SDG 11") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 11. Companies that meet a certain revenue threshold ("SDG Revenue") from business activities associated with SDG 11 ("SDG 11 Aligned Business Activities") are included in the selection universe (the "SDG Impact Selection Universe"). SDG 11 Aligned Business Activities may include, but are not limited to:

- Pollution prevention;
- Demand-side management;
- Smart grid;
- Clean transport infrastructure;
- LED/CFL lighting;
- Insulation;
- Green building; and
- Affordable real estate.

Constituents in the SDG Impact Selection Universe are assigned to a Global Industry Classification Standard (GICS) sector and are ranked according to their SDG Revenue. A certain threshold of top-ranking constituents from each GICS sector are selected for inclusion. For GICS sectors that have less constituents than the threshold, all securities are selected for inclusion.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Smart Cities Index (the "Thematic Parent Index"). Constituents' exposure to the theme of smart solutions for urban infrastructure (the "Theme"), which includes (but is not limited to) the development of new products and services focussed on smart connectivity for internet of things (e.g. nonstandard computing devices that connect wirelessly to a network and have the ability to transmit data), smart infrastructure, smart buildings, smart homes, smart safety and security, smart waste and water management, smart mobility, and smart energy and grids is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:

- Business segment information from company annual reports and third-party data sources; and
- Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Constituents that do not have any revenue that contributes to SDG 11 and securities which are mapped to certain GICS sub-industries are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:

- Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 11 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%; and
- Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their relevance score and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

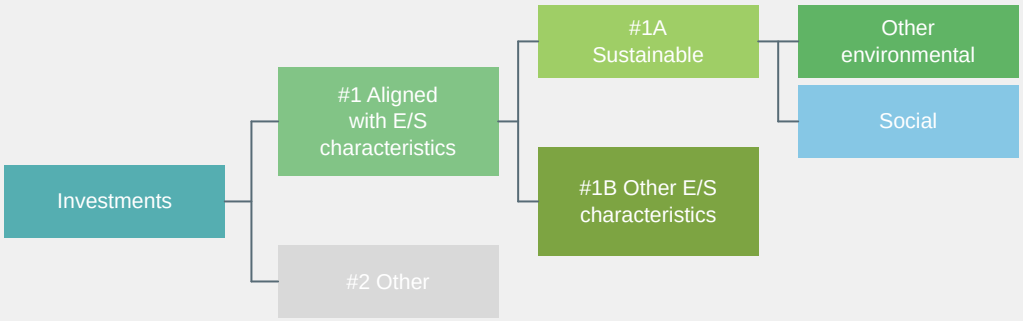
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 50% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

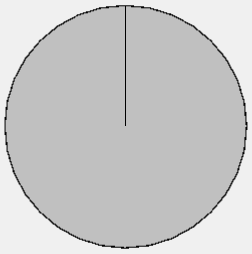
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

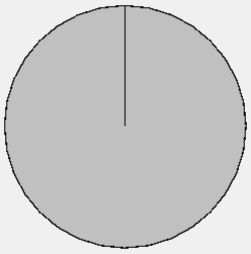
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 50%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 50%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the MSCI ACWI IMI SDG 11 Sustainable Cities and Communities Select Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by excluding companies from the Parent Index which do not fulfil the specific ESG criteria and applying SDG impact selection and SDG thematic selection criteria outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large, medium, and small-capitalisation companies across developed and emerging markets globally. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 11 (make cities and human settlements inclusive, safe, resilient and sustainable) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 11 ("SDG 11") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 11. Companies that meet a certain revenue

threshold (“SDG Revenue”) from business activities associated with SDG 11 (“SDG 11 Aligned Business Activities”) are included in the selection universe (the “SDG Impact Selection Universe”). SDG 11 Aligned Business Activities may include, but are not limited to:
• Pollution prevention;
• Demand-side management;
• Smart grid;
• Clean transport infrastructure;
• LED/CFL lighting;
• Insulation;
• Green building; and
• Affordable real estate.

Constituents in the SDG Impact Selection Universe are assigned to a Global Industry Classification Standard (GICS) sector and are ranked according to their SDG Revenue. A certain threshold of top-ranking constituents from each GICS sector are selected for inclusion. For GICS sectors that have less constituents than the threshold, all securities are selected for inclusion.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Smart Cities Index (the “Thematic Parent Index”). Constituents’ exposure to the theme of smart solutions for urban infrastructure (the “Theme”), which includes (but is not limited to) the development of new products and services focussed on smart connectivity for internet of things (e.g. nonstandard computing devices that connect wirelessly to a network and have the ability to transmit data), smart infrastructure, smart buildings, smart homes, smart safety and security, smart waste and water management, smart mobility, and smart energy and grids is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:
• Business segment information from company annual reports and third-party data sources; and
• Descriptions of companies’ activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company’s revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Constituents that do not have any revenue that contributes to SDG 11 and securities which are mapped to certain GICS sub-industries are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 11 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%; and
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their relevance score and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI Global Circular Economy UCITS ETF

Legal entity identifier: 254900MYTY0UR4AKNH15

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	X No
It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments
in economic activities that qualify as environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
It will make a minimum of **sustainable investments with a social objective:** __%	It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 12 (ensure sustainable consumption and production patterns) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index (as defined below) which are associated with a positive contribution to Sustainable Development Goal 12 ("SDG 12") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are

assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 12. Companies that meet a certain revenue threshold from business activities associated with SDG 12 are selected ("SDG 12 Aligned Business Activities"). Such SDG 12 Aligned Business Activities may include, but are not limited to:
• Alternative energy;
• Energy efficiency;
• Green building;
• Sustainable water;
• Pollution prevention; and
• Sustainable agriculture.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria.

In order to assess constituents' exposure to the theme of helping enable the transition to a circular economy, the Index Administrator defines a circular transition universe (the "Circular Transition Universe"). The Circular Transition Universe is constructed using management scores of the following MSCI ESG Ratings' key issues: water stress, biodiversity & land use, raw material sourcing, toxic emissions & waste, packaging material & waste, and electronic waste (the "Key Issue Management scores"), in order to identify companies that have better management strategies to protect natural resources and/or address waste issues relative to their sector peers.

An average management score ("AMS") is calculated for all companies in the Parent Index using the relevant Key Issue Management scores. Constituents which are not assessed on any relevant key issues or do not have exposure above a certain threshold to any relevant key issues are excluded from the Circular Transition Universe. A sector-relative management score ("SRMS") is then calculated for each company by dividing its AMS by the AMS of the highest scoring company in its Global Industry Classification Standard (GICS) Sector. All companies belonging to GICS Sectors where the AMS of the highest scoring company does not meet a minimum AMS are excluded from the calculation of SRMS. To be eligible for inclusion in the Circular Transition Universe, securities must meet a certain SRMS threshold.

Constituents that do not have any revenue that contributes to SDG 12 and constituents that do not reach a certain threshold on any of the relevant Key Issue Management scores are excluded from the eligible universe.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 12 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%; and
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted according to their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.

• **Controversial Weapons Involvement**: The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

• **SDG 12 Net Product and Service Alignment Score:** The financial product's portfolio's weighted average of each company's net product and service alignment score to SDG 12, based on companies' revenues from products contributing to climate change mitigation and the protection of natural capital, measured by MSCI on a scale of -10 (strongly misaligned) to 10 (strongly aligned).

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 25% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);

• Activities negatively affecting biodiversity-sensitive areas (no. 7);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no.14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Exposure to companies active in the fossil fuel sector (no. 4);

• Activities negatively affecting biodiversity-sensitive areas (no. 7)

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no.14).

[ ] No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the MSCI ACWI IMI SDG 12 Responsible Consumption and Production Select Index, which is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 12 (ensure sustainable consumption and production patterns) of the United Nations 2030 Agenda for Sustainable Development. The Reference Index is based on the MSCI ACWI IMI Index (the "Parent Index"). The Parent Index includes large, medium, and small-capitalisation companies across developed and emerging markets globally.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 12 (ensure sustainable consumption and production patterns) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 12 ("SDG 12") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 12. Companies that meet a certain revenue

threshold from business activities associated with SDG 12 are selected ("SDG 12 Aligned Business Activities"). Such SDG 12 Aligned Business Activities may include, but are not limited to:
• Alternative energy;
• Energy efficiency;
• Green building;
• Sustainable water;
• Pollution prevention; and
• Sustainable agriculture.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria.

In order to assess constituents' exposure to the theme of helping enable the transition to a circular economy, the Index Administrator defines a circular transition universe (the "Circular Transition Universe"). The Circular Transition Universe is constructed using management scores of the following MSCI ESG Ratings' key issues: water stress, biodiversity & land use, raw material sourcing, toxic emissions & waste, packaging material & waste, and electronic waste (the "Key Issue Management Scores"), in order to identify companies that have better management strategies to protect natural resources and/or address waste issues relative to their sector peers.

An average management score ("AMS") is calculated for all companies in the Parent Index using the relevant Key Issue Management scores. Constituents which are not assessed on any relevant key issues or do not have exposure above a certain threshold to any relevant key issues are excluded from the Circular Transition Universe. A sector-relative management score ("SRMS") is then calculated for each company by dividing its AMS by the AMS of the highest scoring company in its Global Industry Classification Standard (GICS) Sector. All companies belonging to GICS Sectors where the AMS of the highest scoring company does not meet a minimum AMS are excluded from the calculation of SRMS. To be eligible for inclusion in the Circular Transition Universe, securities must meet a certain SRMS threshold.

Constituents that do not have any revenue that contributes to SDG 12 and constituents that do not reach a certain threshold on any of the relevant Key Issue Management scores are excluded from the eligible universe.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
•Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 12 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%; and
•Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted according to their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

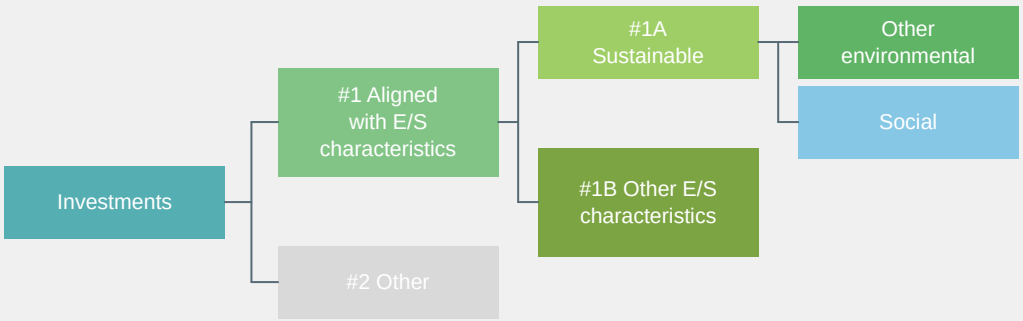
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 25% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

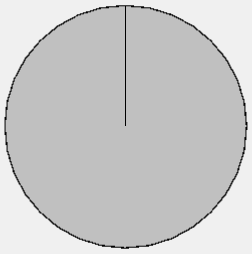
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

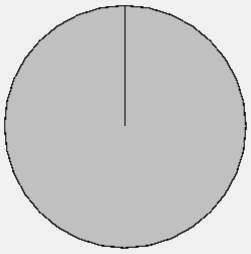
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 25%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 25%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the MSCI ACWI IMI SDG 12 Responsible Consumption and Production Select Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by excluding companies from the Parent Index which do not fulfil the specific ESG criteria and applying SDG impact selection and SDG thematic selection criteria outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large, medium, and small-capitalisation companies across developed and emerging markets globally. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 12 (ensure sustainable consumption and production patterns) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 12 ("SDG 12") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on:https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 12.

Companies that meet a certain revenue threshold from business activities associated with SDG 12 are selected ("SDG 12 Aligned Business Activities"). Such SDG 12 Aligned Business Activities may include, but are not limited to:
• Alternative energy;
• Energy efficiency;
• Green building;
• Sustainable water;
• Pollution prevention; and
• Sustainable agriculture.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria.

In order to assess constituents' exposure to the theme of helping enable the transition to a circular economy, the Index Administrator defines a circular transition universe (the "Circular Transition Universe"). The Circular Transition Universe is constructed using management scores of the following MSCI ESG Ratings' key issues: water stress, biodiversity & land use, raw material sourcing, toxic emissions & waste, packaging material & waste, and electronic waste (the "Key Issue Management Scores"), in order to identify companies that have better management strategies to protect natural resources and/or address waste issues relative to their sector peers.

An average management score ("AMS") is calculated for all companies in the Parent Index using the relevant Key Issue Management scores. Constituents which are not assessed on any relevant key issues or do not have exposure above a certain threshold to any relevant key issues are excluded from the Circular Transition Universe. A sector-relative management score ("SRMS") is then calculated for each company by dividing its AMS by the AMS of the highest scoring company in its Global Industry Classification Standard (GICS) Sector. All companies belonging to GICS Sectors where the AMS of the highest scoring company does not meet a minimum AMS are excluded from the calculation of SRMS. To be eligible for inclusion in the Circular Transition Universe, securities must meet a certain SRMS threshold.

Constituents that do not have any revenue that contributes to SDG 12 and constituents that do not reach a certain threshold on any of the relevant Key Issue Management scores are excluded from the eligible universe.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 12 and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%; and
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted according to their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI EMU High Dividend Yield ESG UCITS ETF

Legal entity identifier: 254900GAI0KC8ZWVR296

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	X No
It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments
in economic activities that qualify as environmentally sustainable under the EU Taxonomy	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
It will make a minimum of **sustainable investments with a social objective:** __%	It promotes E/S characteristics, but **will not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product specifically promotes, amongst others, the environmental characteristics of: a reduction in greenhouse gas intensity and a reduction in fossil fuel production; and the social characteristics of: a reduction in human and labour rights controversy occurrences and a reduction in controversial weapon production.

In order to promote these characteristics, the financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of large and medium capitalisation companies in the European Economic and Monetary Union with a focus on maximising the exposure to the dividend yield factor and which meet certain minimum environmental, social and governance ("ESG") criteria.

The Reference Index is based on the Parent Index (as defined below). The Reference Index looks to maximise its exposure to the dividend yield factor by optimising the Reference Index for the selection of securities with high dividend yields relative to the Parent Index whilst excluding companies from the Parent Index which do not fulfil certain ESG (environmental, social and governance) criteria.

ESG Exclusions

All of the companies from the Parent Index which breach the following ESG criteria are excluded:

• Are unrated or missing coverage by MSCI ESG Research;

• Are assigned an MSCI ESG Rating of CCC;

• Have any involvement in controversial weapons;

• Are classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas, and power generation; and

• Fail to comply with the United Nations Global Compact principles, have an MSCI ESG Controversies Score of 0, or have an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilises data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our-solutions/esg-investing/esg-ratings.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to: https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdf/4dfb3240-b5ed-0770-62c8-159c2ff785a0

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research (BISR) aims to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to:

http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support institutional investors seeking to integrate climate risk & opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to: https://www.msci.com/our-solutions/esg-investing/climate-solutions/climate-data-metrics

Security Selection and Weighting

Securities from the Parent Index which pass the ESG exclusions outlined above will constitute the eligible universe (the “Eligible Universe”). Securities from the Eligible Universe are selected and weighted following an optimisation-based approach (including optimising for high dividend yields) subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe are subject to climate and other ESG constraints including, but not limited to:

• A minimum reduction in greenhouse gas intensity relative to the Parent Index;

• A minimum reduction in fossil fuel exposure relative to the Parent Index;

• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;

• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and

• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe are also subject to diversification selection constraints.

The Reference Index is reviewed and rebalanced on at least a semi-annual basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers’ ESG metrics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies**: The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

• **Exposure to Worst-in-Class issuers**: The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.

• **Controversial Weapons Involvement**: The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.

• **Greenhouse Gas Intensity**: The financial product's portfolio's weighted average of its holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue) as determined by MSCI.

• **Exposure to Fossil Fuels:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 5% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;

• Violation of international norms or involvement in very severe controversies; and

• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

X

Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Carbon footprint (no. 2);

• GHG intensity of investee companies (no. 3);

• Exposure to companies active in the fossil fuel sector (no. 4);

• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

• Exposure to controversial weapons (no. 14).

No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the “Reference Index”, which is the MSCI EMU High Dividend Yield Low Carbon SRI Screened Select Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in the European Economic and Monetary Union with a focus on maximising the exposure to the dividend yield factor and which meet certain environmental, social and governance criteria. The Reference Index is based on the MSCI EMU Index (the “Parent Index”). The Parent Index reflects the performance of large and medium capitalisation listed companies in the European Economic and Monetary Union. The Reference Index looks to maximise its exposure to the dividend yield factor by optimising the Reference Index for the selection of securities with high dividend yields relative to the Parent Index whilst excluding companies from the Parent Index which do not fulfil certain ESG criteria.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index, which looks to maximise its exposure to the dividend yield factor by optimising the Reference Index for the selection of securities with high dividend yields relative to the Parent Index whilst excluding companies from the Parent Index which do not fulfil specific ESG criteria.

All of the companies from the Parent Index which breach the following ESG standards are excluded:

• Are unrated or missing coverage by MSCI ESG Research;

• Are assigned an MSCI ESG Rating of CCC;

• Have any involvement in controversial weapons;

• Are classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas, and power generation; and

• Fail to comply with the United Nations Global Compact principles, have an MSCI ESG Controversies Score of 0, or have an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilises data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our-solutions/esg-investing/esg-ratings

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to: https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdf/4dfb3240-b5ed-0770-62c8-159c2ff785a0

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aims to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to:

http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support institutional investors seeking to integrate climate risk & opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to: https://www.msci.com/our-solutions/esg-investing/climate-solutions/climate-data-metrics

Security Selection and Weighting
Securities from the Parent Index which pass the ESG exclusions outlined above will constitute the eligible universe (the “Eligible Universe”). Securities from the Eligible Universe are selected and weighted following an optimisation-based approach (including optimising for high dividend yields) subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe are subject to climate and other ESG constraints including, but not limited to:

• A minimum reduction in greenhouse gas intensity relative to the Parent Index;

• A minimum reduction in fossil fuel exposure relative to the Parent Index;

• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;

• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and

• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe are also subject to diversification selection constraints.

The Reference Index is reviewed and rebalanced on at least a semi-annual basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers’ ESG metrics.
Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

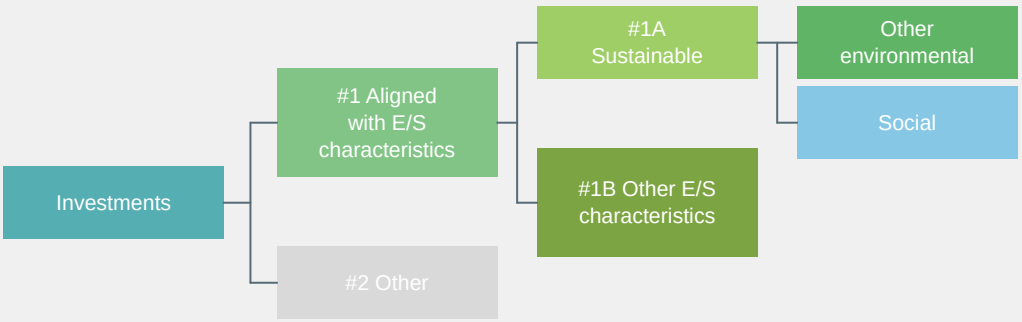
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 5% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index, or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

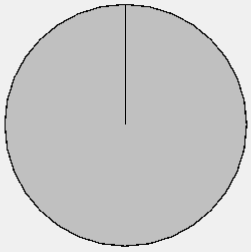
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

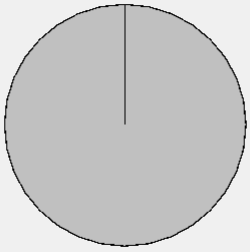
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 5%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 5%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the MSCI EMU High Dividend Yield Low Carbon SRI Screened Select Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by excluding companies from the Parent Index which do not fulfil the specific ESG criteria and selecting and weighting eligible securities following an optimisation-based approach subject to certain climate and ESG objectives outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in the European Economic and Monetary Union and looks to maximise its exposure to the dividend yield factor by optimising the Reference Index for the selection of securities with high dividend yields relative to the Parent Index whilst excluding companies from the Parent Index which do not fulfil the following specific ESG criteria:

• Are unrated or missing coverage by MSCI ESG Research;

• Are assigned an MSCI ESG Rating of CCC;

• Have any involvement in controversial weapons;

• Are classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas, and power generation; and

• Fail to comply with the United Nations Global Compact principles, have an MSCI ESG Controversies Score of 0, or have an insufficient MSCI ESG Controversies Score related to certain environmental controversies

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilises data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our-solutions/esg-investing/esg-ratings

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to:

https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdf/4dfb3240-b5ed-0770-62c8-159c2ff785a0

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aims to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support institutional investors seeking to integrate climate risk & opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to: https://www.msci.com/our-solutions/esg-investing/climate-solutions/climate-data-metrics

Security Selection and Weighting

Securities from the Parent Index which pass the ESG exclusions outlined above will constitute the eligible universe (the “Eligible Universe”). Securities from the Eligible Universe are selected and

weighted following an optimisation-based approach (including optimising for high dividend yields) subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe are subject to climate and other ESG constraints including, but not limited to:

• A minimum reduction in greenhouse gas intensity relative to the Parent Index;

• A minimum reduction in fossil fuel exposure relative to the Parent Index;

• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;

• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and

• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe are also subject to diversification selection constraints.
The Reference Index is reviewed and rebalanced on at least a semi-annual basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers' ESG metrics.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

Where can I find more product specific information online?

More product-specific information can be found on the website:

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers MSCI Global Social Fairness Contributors UCITS ETF

Legal entity identifier: 254900OGLQZJKMKIV360

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes	X No
☐ It will make a minimum of **sustainable investments with an environmental objective:** __%	X It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** __%	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR by tracking the Reference Index (as defined below) which includes environmental and/or social considerations. The financial product specifically promotes, amongst others, the environmental characteristics of: a reduction in fossil fuel extraction; and the social characteristics of: a reduction in human and labour rights controversy occurrences, a reduction in controversial weapon production and a positive impact on the UN Sustainable Development Goals ("**SDGs**").

In order to promote these characteristics, the financial product holds a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to the following SDGs: SDG 1, SDG 2, SDG 4, SDG 5, SDG 8 and SDG 10 (the "**Social Fairness SDGs**") of the United Nations 2030 Agenda for Sustainable Development (the "**UN 2030 Agenda**").

The Reference Index is based on the Parent Index (as defined below). Constituents of the Parent Index which are associated with a positive contribution to the Social Fairness SDGs, and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 SDGs contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to the Social Fairness SDGs. Companies that meet a certain revenue threshold from business activities associated with the Social Fairness SDGs are selected ("**Social Fairness SDGs Aligned Business Activities**"). Such Social Fairness SDGs Aligned Business Activities may include, but are not limited to:
• Nutrition;
• Major Disease Treatment;
• Sanitation;
• Affordable Real Estate;
• Education;
• Contraceptives;
• Sustainable Agriculture;
• SME finance; and
• Connectivity.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria.

In order to assess constituents' exposure to the theme of helping promote growth, development, and safeguards for employees and communities, MSCI Limited (the "Index Administrator") defines a SDG management universe (the "SDG Management Universe"). The SDG Management Universe is constructed by using management scores of the following MSCI ESG Ratings' key issues: Labour Management, Human Capital Development, Supply Chain Labour Standards, Health & Safety, Community Relations, Controversial Sourcing, Access to Finance, Opportunities in Nutrition & Health, Workforce Diversity Oversight & Programs (the "Key Issue Management Scores"), in order to identify companies that have better management strategies geared towards promoting growth, development, and safeguards of key stakeholders relative to their sector peers.

The Workforce Diversity Oversight & Programs key issue management score is determined by combining two separate indicators - Workforce diversity oversight by management and Programs to increase workforce diversity. These are converted and combined to give a key issue score.

An average management score ("**AMS**") is calculated for all companies in the Parent Index using the relevant Key Issue Management Scores. Constituents which are not assessed on any relevant key issues or do not have exposure above a certain threshold to any relevant key issues are excluded from the SDG Management Universe. A sector-relative management score ("**SRMS**") is then calculated for each company by dividing its AMS by the AMS of the highest scoring company in its Global Industry Classification Standard ("**GICS**") Sector. All companies belonging to GICS Sectors where the AMS of the highest scoring company does not meet a minimum AMS are excluded from the calculation of SRMS. To be eligible for inclusion in the SDG Management Universe, securities must meet a certain SRMS threshold.

Constituents that do not have any revenue that contributes to Social Fairness SDGs and constituents that do not reach a certain threshold on any of the relevant Key Issue Management Scores are excluded from the eligible universe.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted

by the product of their percentage of revenue exposure from Social Fairness SDGs Aligned Business Activities and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 50%.
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted according to their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 50%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

• **Exposure to Very Severe Controversies:** The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
• **Exposure to Worst-in-Class issuers:** The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI.
• **Controversial Weapons Involvement:** The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI.
• **SDG Impact Rating:** The financial product's portfolio's median score of each company's overall impact on the SDGs, based on the sum of the companies' highest positive and lowest negative SDG impact rating on a scale of -10 (significant negative impact) to 10 (significant positive impact), as measured by either MSCI or ISS ESG. Details on the provider used are available upon request.
• **Exposure to Fossil Fuels:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2(17) SFDR.

At least 25% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but is not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates certain metrics related to principle adverse indicators and the Reference Index of the financial product includes criteria to reduce exposure to or to exclude securities which are negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity-sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no.14).

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

X Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity-sensitive areas (no. 7)
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no.14).

☐ No

The Investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The investment objective of the financial product is to track the performance before fees and expenses of the "Reference Index", which is the MSCI ACWI IMI SDG Social Fairness Select Index, which is designed to reflect the performance of the shares of companies that are associated with a positive contribution to the Social Fairness SDGs, including SDG 1, SDG 2, SDG 4, SDG 5, SDG 8, and SDG 10 of the UN 2030 Agenda. The Reference Index is based on the MSCI ACWI IMI Index (the "**Parent Index**"). The Parent Index includes large, medium, and small-capitalisation companies across developed and emerging markets globally.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to the Social Fairness SDGs of the UN 2030 Agenda.

Constituents of the Parent Index which are associated with a positive contribution to the Social Fairness SDGs of the UN 2030 Agenda, and which meet certain ESG criteria are eligible for inclusion

in the Reference Index. Information on the 17 SDGs contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to the Social Fairness SDGs. Companies that meet a certain revenue threshold Social Fairness SDGs Aligned Business Activities are selected. Such Social Fairness SDGs Aligned Business Activities may include, but are not limited to:
• Nutrition;
• Major Disease Treatment;
• Sanitation;
• Affordable Real Estate;
• Education;
• Contraceptives;
• Sustainable Agriculture;
• SME finance; and
• Connectivity.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria.

In order to assess constituents' exposure to the theme of helping promote growth, development, and safeguards for employees and communities, the Index Administrator defines a SDG management universe (the "SDG Management Universe"). The SDG Management Universe is constructed by using management scores of the following MSCI ESG Ratings' key issues: Labour Management, Human Capital Development, Supply Chain Labour Standards, Health & Safety, Community Relations, Controversial Sourcing, Access to Finance, Opportunities in Nutrition & Health, Workforce Diversity Oversight & Programs (the "Key Issue Management Scores"), in order to identify companies that have better management strategies geared towards promoting growth, development, and safeguards of key stakeholders relative to their sector peers.
The Workforce Diversity Oversight & Programs key issue management score is determined by combining two separate indicators - Workforce diversity oversight by management and Programs to increase workforce diversity. These are converted and combined to give a key issue score.

An AMS is calculated for all companies in the Parent Index using the relevant Key Issue Management Scores. Constituents which are not assessed on any relevant key issues or do not have exposure above a certain threshold to any relevant key issues are excluded from the SDG Management Universe. A SRMS is then calculated for each company by dividing its AMS by the AMS of the highest scoring company in its GICS Sector. All companies belonging to GICS Sectors where the AMS of the highest scoring company does not meet a minimum AMS are excluded from the calculation of SRMS. To be eligible for inclusion in the SDG Management Universe, securities must meet a certain SRMS threshold.

Constituents that do not have any revenue that contributes to Social Fairness SDGs and constituents that do not reach a certain threshold on any of the relevant Key Issue Management Scores are excluded from the eligible universe.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from Social Fairness SDGs Aligned Business Activities and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 50%.
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted according to their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 50%.

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index which excludes companies with very severe controversies (including governance controversies) using the MSCI ESG Controversies data, and companies that have an MSCI ESG Rating (which assesses, amongst other things, how well companies manage governance risks and opportunities) below a certain threshold or do not have an MSCI ESG Rating.

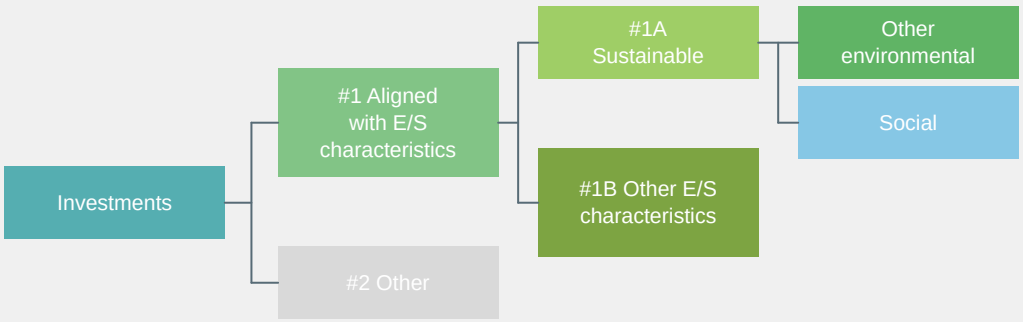
What is the asset allocation planned for this financial product?

This financial product invests at least 90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 25% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 10% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("**FDIs**") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending rebalance or investment in constituents of the Reference Index. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of the Reference Index or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities of climate change mitigation and/or climate change adaptation (the only two of the six environmental objectives under the EU Taxonomy Regulation for which technical screening criteria have been defined through delegated acts). As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy[1] related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

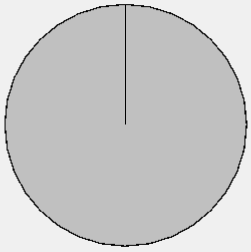
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

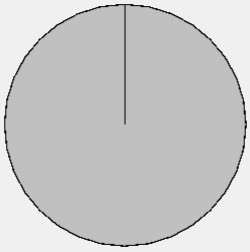
The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no fossil gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 25%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 25%.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments. It may also include securities which have been recently downgraded by the relevant ESG data provider but will not be removed from the Reference Index until the next Reference Index rebalance and may therefore not be removed from the portfolio until that time.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Yes. The financial product has designated the MSCI ACWI IMI SDG Social Fairness Select Index as the reference benchmark.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

The Reference Index promotes environmental and social characteristics by excluding companies from the Parent Index which do not fulfil the specific ESG criteria and applying SDG impact selection and SDG thematic selection criteria outlined above, as of each Reference Index rebalance.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

In order to seek to achieve the investment objective, the financial product will adopt a “Direct Investment Policy” which means that the financial product will aim to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

How does the designated index differ from a relevant broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large, medium, and small-capitalisation companies across developed and emerging markets globally. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to the Social Fairness SDGs of the UN 2030 Agenda.

Constituents of the Parent Index which are associated with a positive contribution to the Social Fairness SDGs of the UN 2030 Agenda, and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 SDGs contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:
• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg-investing. In particular, the following five components are utilised:

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment
MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to the Social Fairness SDGs. Companies that meet a certain revenue threshold from Social Fairness SDGs Aligned Business Activities are selected. Such Social Fairness SDGs Aligned Business Activities may include, but are not limited to:
• Nutrition;
• Major Disease Treatment;

• Sanitation;
• Affordable Real Estate;
• Education;
• Contraceptives;
• Sustainable Agriculture;
• SME finance; and
• Connectivity.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria.

In order to assess constituents' exposure to the theme of helping promote growth, development, and safeguards for employees and communities, the Index Administrator defines a SDG management universe (the "**SDG Management Universe**"). The SDG Management Universe is constructed by using management scores of the following MSCI ESG Ratings' key issues: Labour Management, Human Capital Development, Supply Chain Labour Standards, Health & Safety, Community Relations, Controversial Sourcing, Access to Finance, Opportunities in Nutrition & Health, Workforce Diversity Oversight & Programs (the "**Key Issue Management Scores**"), in order to identify companies that have better management strategies geared towards promoting growth, development, and safeguards of key stakeholders relative to their sector peers.
The Workforce Diversity Oversight & Programs key issue management score is determined by combining two separate indicators - Workforce diversity oversight by management and Programs to increase workforce diversity. These are converted and combined to give a key issue score.

An AMS is calculated for all companies in the Parent Index using the relevant Key Issue Management Scores. Constituents which are not assessed on any relevant key issues or do not have exposure above a certain threshold to any relevant key issues are excluded from the SDG Management Universe. A SRMS is then calculated for each company by dividing its AMS by the AMS of the highest scoring company in its GICS Sector. All companies belonging to GICS Sectors where the AMS of the highest scoring company does not meet a minimum AMS are excluded from the calculation of SRMS. To be eligible for inclusion in the SDG Management Universe, securities must meet a certain SRMS threshold.

Constituents that do not have any revenue that contributes to Social Fairness SDGs and constituents that do not reach a certain threshold on any of the relevant Key Issue Management Scores are excluded from the eligible universe.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:
• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from Social Fairness SDGs Aligned Business Activities and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 50%.
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted according to their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 50%.

Where can the methodology used for the calculation of the designated index be found?

Additional information on the Reference Index, its composition, ESG criteria, calculation and rules for periodical review and re-balancing and on the general methodology behind the MSCI indices can be found on http://www.msci.com.

Where can I find more product specific information online?

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

ANNEX

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers DJE US Equity Research UCITS ETF
Legal entity identifier: 254900NOOJDDY9ZY9188

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___%	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 1% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** ___%	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR through the screening of the portfolio against an ESG database. The financial product specifically promotes, the environmental characteristic of a reduction in oil sands extraction; and the social characteristics of: a reduction in human and labour rights controversy occurrences, a reduction in controversial weapon production, and a reduction in tobacco production. The financial product utilises data from MSCI ESG Research LLC ("MSCI") to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG Business Involvement Screening Research.

Companies in the Investment Universe which breach the following ESG standards, among others, will be excluded:

- Are assigned an MSCI ESG Rating of 'CCC';
- Fail to comply with the United Nations Global Compact principles or have an MSCI Controversies Score of 0;
- Have any involvement in controversial weapons, as categorised by MSCI ESG Research;

- Are classified by MSCI as breaching revenue thresholds of up to 10% in weapon-related activities, including civilian firearms, nuclear weapons, and conventional weapons;
- Are classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco, oil sands extraction, and thermal coal.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

The portfolio allocation (the "Proposed Allocation") will be provided by DJE Kapital AG (the "Discretionary Investment Advisor") on a scheduled quarterly basis (the "Asset Selection Date") or at other times where the Discretionary Investment Advisor wishes to update the Proposed Allocation based on economic and/or other indicators. While the financial product seeks to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer meet these criteria may remain included in the portfolio of the financial product until it is possible and practicable to divest such positions.

The financial product has not designated a reference benchmark to promote these environmental and/or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

  - **Exposure to Very Severe Controversies:** The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Typically, such exposure is expected to be 0%.
  - **Exposure to Worst-in-Class Issuers:** The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI. Typically, such exposure is expected to be 0%.
  - **Controversial Weapons Involvement:** The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI. Typically, such exposure is expected to be 0%.
  - **Tobacco Involvement:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, as determined by MSCI. Typically, such exposure is expected to be 0%.
  - **Oil Sands Extraction:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in oil sands extraction with a revenue in this area of more than, or equal to, 5%, as determined by MSCI. Typically, such exposure is expected to be 0%.

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

At least 1% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but are not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

- Involvement in harmful business activities, which harm any of the environmental and/or social objectives identified by their contribution to a UN SDG;

- Violation of international norms (such as the United Nations Global Compact principles) or involvement in very severe controversies (as assessed using MSCI ESG Controversies). The MSCI ESG Controversies analysis provides assessments of controversies concerning the negative environmental, social and/or governance impact of company operations, products and services. Identified controversy cases include alleged company violations of existing laws and/or regulations or an alleged company action or event that violates commonly accepted international norms, including global norms and conventions, such as the International Labour Organization ("ILO") Fundamental Conventions. A case can be a single event such as a spill, accident or regulatory action, or a set of closely linked events or allegations such as health and safety fines at the same facility, multiple allegations of anticompetitive behavior related to the same product line, multiple community protests at the same company location or multiple individual lawsuits alleging the same type of discrimination. The categorisation of a controversy case as being very severe (MSCI ESG Controversies Score of 0) is based on a combination of the assessed severity of the controversy as well as the assessments of the company's alleged role and the status of the case remediation; and

- Violation of certain principal adverse indicator thresholds, as further detailed under the section entitled “How have the indicators for adverse impacts on sustainability factors been taken into account?” below.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates the following 14 mandatory principal adverse indicators on sustainability factors applicable to investments in investee companies from Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing SFDR: PAI 1 GHG emissions; PAI 2 carbon footprint; PAI 3 GHG intensity of investee companies; PAI 4 exposure to companies active in the fossil fuel sector; PAI 5 share of non-renewable energy consumption and production; PAI 6 energy consumption intensity per high impact climate sector; PAI 7 activities negatively affecting biodiversity-sensitive areas; PAI 8 emissions to water; PAI 9 hazardous waste and radioactive waste ratio; PAI 10 violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; PAI 11 lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises; PAI 12 unadjusted gender pay gap; PAI 13 board gender diversity; and PAI 14 exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons). DWS has established quantitative thresholds and/or qualitative values to determine if an issuer significantly harms any of the environmental or social objectives. These values are set based upon various external and interal factors, such as data availability or market developments and may be adapted going forward. For further information on these thresholds, please refer to ‘5.2. Step 2: Do No Significant Harm – Assessment’ of the Procedure Document on ESG Methods, Data Sources and Data Processing available via the following link: https://etf.dws.com/en-lu/AssetDownload/Index/2bf90132-87c2-40f6-91e9-e732407c4562/202403_DWS%20Procedure%20Document_Final.pdf

In addition to the integration of principal adverse indicators in the DNSH assessment, the financial product further takes into consideration principal adverse indicators in its design through the screening of the portfolio against an ESG database. Utilising data from MSCI ESG Research LLC, the financial product identifies and excludes companies in the Investment Universe which breach revenue thresholds in activites which are negatively aligned with specific principal adverse indicators, including:

- Exposure to companies active in the fossil fuel sector (no. 4) - considered through the application of exclusions of companies classified by MSCI as breaching a revenue threshold of up to 5% in oil sands and thermal coal extraction;
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10) - considered through the application of exclusions of companies that fail to comply with the United Nations Global Compact principles or have an MSCI ESG Controversies score of 0; and
- Exposure to controversial weapons (no. 14) - considered through the application of exclusions of companies that have any involvement in controversial weapons, as categorised by MSCI ESG Research LLC.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are ineligible for investment by the financial product.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

✖ Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final) through the exclusion of securities from the investment universe:

- Exposure to companies active in the fossil fuel sector (no. 4) - as considered through the application of exclusions of companies classified by MSCI as breaching a revenue thresholds of up to 5% in oil sands and thermal coal extraction;
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10) - as considered through the application of exclusions of companies that fail to comply with the United Nations Global Compact principles or have an MSCI Controversies Score of 0; and
- Exposure to controversial weapons (no. 14) - as considered through the application of exclusions of companies that have any involvement in controversial weapons, as categorised by MSCI ESG Research.

Information relating to the principal adverse impacts considered by the financial product will be made available in its annual financial statements.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The investment objective of the financial product is to achieve a positive mid to long-term investment performance through investments in large and medium-capitalisation equities in the US. The Fund is actively managed and the Discretionary Investment Advisor will select the Proposed Allocation using a proprietary research driven, bottom-up strategy with the primary aim of generating capital appreciation. In order to achieve the investment objective, the Discretionary Investment Advisor will consider six quantitative and qualitative categories to determine a scoring model for each of the securities in the Investment Universe. The categories are valuation, momentum, safety and liquidity, sustainability, company meetings and (internal) analysts' recommendations. The Sub-Portfolio Manager will assess the Proposed Allocation with regards to certain liquidity criteria, tradability of securities and portfolio diversification and certain environmental, social and governance criteria as described above.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

  The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR through the screening of the portfolio against an ESG database.

The financial product utilises data from MSCI to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG BISR.

Companies in the Investment Universe which breach the following ESG standards will be excluded:

- Are assigned an MSCI ESG Rating of 'CCC';
- Fail to comply with the United Nations Global Compact principles or have an MSCI Controversies Score of 0;
- Have any involvement in controversial weapons, as categorised by MSCI ESG Research;
- Are classified by MSCI as breaching revenue thresholds of up to 10% in weapon-related activities, including civilian firearms, nuclear weapons, and conventional weapons;
- Are classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco, oil sands extraction, and thermal coal.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG BISR

MSCI ESG BISR aims to enable institutional investors to manage ESG standards and restrictions.

The Proposed Allocation will be provided by the Discretionary Investment Advisor on each Asset Allocation Date or at other times where the Discretionary Investment Advisor wishes to update the Proposed Allocation based on economic and/or other indicators. While the financial product seeks to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer meet these criteria may remain included in the portfolio of the financial product until it is possible and practicable to divest such positions.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

The policy of the financial product is to assess good governance practices of investee companies using MSCI ESG Ratings and MSCI ESG Controversies data.

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating. The inclusion of governance criteria in the MSCI ESG Rating ensures that any securities which pass the ESG criteria implemented by the financial product, by having an MSCI ESG Rating above 'CCC', have been assessed to not breach key issues including: board composition, pay, ownership, accounting, business ethics, and tax transparency.

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. The financial product

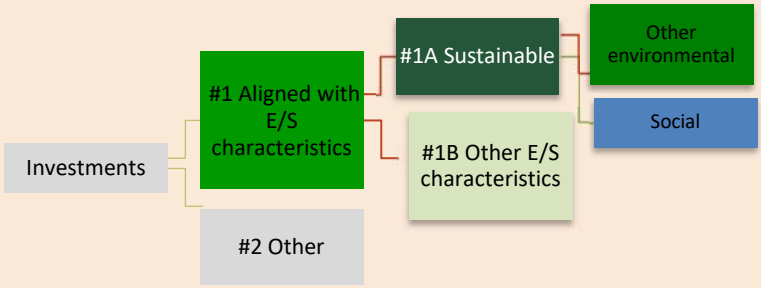
will utilise MSCI ESG Controversies to exclude companies with an MSCI Controversies Score of 0 which are companies which have very severe controversies, including governance controversies such as: bribery and fraud, governance structures, and controversial investments.

What is the asset allocation planned for this financial product?

This financial product invests at least 80% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 1% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 20% of the investments are not aligned with these characteristics (#2 Other).

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending portfolio rebalance to gain market exposure. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of this financial product or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities. As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an invironmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

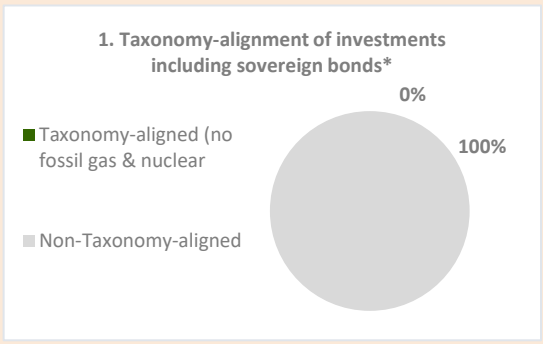
Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

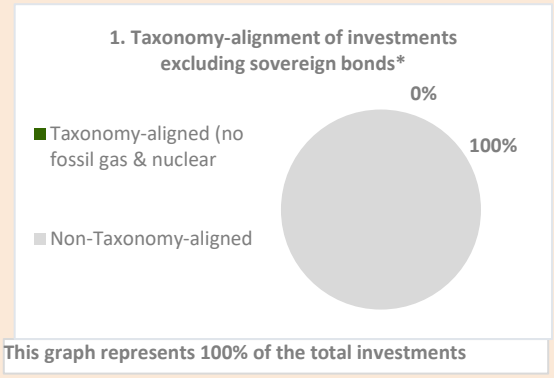
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No. However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 1%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 1%.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

[1] ***Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.***

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under "#2 Other", may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

This financial product has not designated a reference benchmark to determine whether it is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Where can I find more product specific information online?

More product-specific information can be found on the website

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

ANNEX

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers US Equity Enhanced Active UCITS ETF
Legal entity identifier: 254900Z4S13HFP1VHK26

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___%	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 1% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** ___%	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR through the screening of the portfolio against an ESG database. The financial product specifically promotes, the environmental characteristic of a reduction in oil sands extraction; and the social characteristics of: a reduction in human and labour rights controversy occurrences, a reduction in controversial weapon production, and a reduction in tobacco production. The financial product utilises data from Urgewald and MSCI ESG Research LLC ("MSCI") to apply certain ESG criteria using the following products: Urgewald Global Coal Exit List (GCEL), MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG Business Involvement Screening Research.

Companies in the Investment Universe which breach the following ESG standards, among others, will be excluded:

- Are assigned an MSCI ESG Rating of 'CCC';
- Fail to comply with the United Nations Global Compact principles or have a MSCI Controversies Score of 0;

- Have any involvement in controversial or nuclear weapons, as categorised by MSCI ESG Research;
- Are classified by MSCI as breaching revenue thresholds of up to 10% in weapon-related activities, including conventional weapons and civilian firearms;
- Are classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco production, thermal coal mining and power and unconventional oil and gas extraction (oil sands); and
- Are classified by GCEL as having any involvement in coal power expansion projects or coal mining expansion projects.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

Urgewald Global Coal Exit List (GCEL)

The Urgewald Global Coal Exit List aims to give financial institutions a tool to remove coal from their portfolios. The GCEL aims to provide coal-related data for companies within the coverage universe. GCEL covers the entire thermal coal value chain from coal exploration and mining, to coal power production and coal gasification. For full details please refer to www.urgewald.org/english

The portfolio allocation (the "Proposed Allocation") will be provided by DWS International GmbH (the "Discretionary Investment Advisor ") on a scheduled monthly basis (the "Asset Selection Date") or at other times where the Discretionary Investment Advisor wishes to update the Proposed Allocation based on economic and/or other indicators. While the financial product seeks to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer meet these criteria may remain included in the portfolio of the financial product until it is possible and practicable to divest such positions.

The financial product has not designated a reference benchmark to promote these environmental and/or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

  - **Exposure to Very Severe Controversies:** The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Typically, such exposure is expected to be 0%.
  - **Exposure to Worst-in-Class Issuers:** The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI. Typically, such exposure is expected to be 0%.
  - **Controversial Weapons Involvement:** The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI. Typically, such exposure is expected to be 0%.
  - **Tobacco Production:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco production with a revenue in this area of more than 0%, as determined by MSCI. Typically, such exposure is expected to be 0%.

- **Oil Sands Extraction:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in oil sands extraction with a revenue in this area of more than, or equal to, 5%, as determined by MSCI. Typically, such exposure is expected to be 0%.

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

  While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

  At least 1% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but are not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

  In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

  - Involvement in harmful business activities, which harm any of the environmental and/or social objectives identified by their contribution to a UN SDG;
  - Violation of international norms (such as the United Nations Global Compact principles) or involvement in very severe controversies (as assessed using MSCI ESG Controversies, amongst others). The MSCI ESG Controversies analysis provides assessments of controversies concerning the negative environmental, social and/or governance impact of company operations, products and services. Identified controversy cases include alleged company violations of existing laws and/or regulations or an alleged company action or event that violates commonly accepted international norms, including global norms and conventions, such as the International Labour Organization ("ILO") Fundamental Conventions. A case can be a single event such as a spill, accident or regulatory action, or a set of closely linked events or allegations such as health and safety fines at the same facility, multiple allegations of anticompetitive behavior related to the same product line, multiple community protests at the same company location or multiple individual lawsuits alleging the same type of discrimination. The categorisation of a controversy case as

being very severe (MSCI ESG Controversies Score of 0) is based on a combination of the assessed severity of the controversy as well as the assessments of the company's alleged role and the status of the case remediation; and

- Violation of certain principal adverse indicator thresholds, as further detailed under the section entitled "How have the indicators for adverse impacts on sustainability factors been taken into account?" below.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates the following 14 mandatory principal adverse indicators on sustainability factors applicable to investments in investee companies from Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing SFDR: PAI 1 GHG emissions; PAI 2 carbon footprint; PAI 3 GHG intensity of investee companies; PAI 4 exposure to companies active in the fossil fuel sector; PAI 5 share of non-renewable energy consumption and production; PAI 6 energy consumption intensity per high impact climate sector; PAI 7 activities negatively affecting biodiversity-sensitive areas; PAI 8 emissions to water; PAI 9 hazardous waste and radioactive waste ratio; PAI 10 violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; PAI 11 lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises; PAI 12 unadjusted gender pay gap; PAI 13 board gender diversity; and PAI 14 exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons). DWS has established quantitative thresholds and/or qualitative values to determine if an issuer significantly harms any of the environmental or social objectives. These values are set based upon various external and interal factors, such as data availability or market developments and may be adapted going forward. For further information on these thresholds, please refer to '5.2. Step 2: Do No Significant Harm – Assessment' of the Procedure Document on ESG Methods, Data Sources and Data Processing available via the following link: https://etf.dws.com/en-lu/AssetDownload/Index/2bf90132-87c2-40f6-91e9-e732407c4562/202403_DWS%20Procedure%20Document_Final.pdf

In addition to the integration of principal adverse indicators in the DNSH assessment, the financial product further takes into consideration principal adverse indicators in its design through the screening of the portfolio against an ESG database. Utilising data from MSCI ESG Research LLC, the financial product identifies and excludes companies in the Investment Universe which breach revenue thresholds in activites which are negatively aligned with specific principal adverse indicators, including:

- Exposure to companies active in the fossil fuel sector (no. 4) - considered through the application of exclusions of companies classified by MSCI as breaching a revenue threshold of up to 5% in oil sands and thermal coal extraction;
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10) - considered through the application of exclusions of companies that fail to comply with the United Nations Global Compact principles or have an MSCI ESG Controversies score of 0; and
- Exposure to controversial weapons (no. 14) - considered through the application of exclusions of companies that have any involvement in controversial weapons, as categorised by MSCI ESG Research LLC.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are ineligible for investment by the financial product.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final) through the exclusion of securities from the investment universe:

- Exposure to companies active in the fossil fuel sector (no. 4) - as considered through the application of exclusions of companies classified by MSCI as breaching a revenue thresholds of up to 5% in oil sands and thermal coal extraction;
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10) - as considered through the application of exclusions of companies that fail to comply with the United Nations Global Compact principles or have an MSCI Controversies Score of 0; and
- Exposure to controversial weapons (no. 14) - as considered through the application of exclusions of companies that have any involvement in controversial weapons, as categorised by MSCI ESG Research.

Information relating to the principal adverse impacts considered by the financial product will be made available in its annual financial statements.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The investment objective of the financial product is to achieve mid to long-term capital appreciation in excess of a benchmark representing the shares of large capitalisation companies in the US. The financial product is actively managed and the Discretionary Investment Advisor will select the Proposed Allocation using a dynamic bottom-up stock selection strategy with the primary aim of generating capital appreciation. In order to achieve the investment objective, the Discretionary Investment Advisor will consider multiple quantitative categories of fundamental and price-driven stock characteristics to determine a scoring model for each of the securities in the Investment Universe. The categories include, but are not limited to: valuation, financial strength, technical indicators, analyst sentiment, and earnings growth. The categories are constantly reviewed for their contribution to overall performance and are dynamically weighted within the scoring model as a result. The scores are implemented in the final allocation using a risk-controlled approach. The Sub-Portfolio Manager will assess the Proposed Allocation with regards to certain liquidity criteria, tradability of securities and portfolio diversification and certain environmental, social and governance criteria as described above.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR through the screening of the portfolio against an ESG database. The financial product utilises data from Urgewald and MSCI to apply certain ESG criteria using the following products: Urgewald Global Coal Exit List ("GCEL"), MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG BISR.

Companies in the Investment Universe which breach the following ESG standards will be excluded:

- Are assigned an MSCI ESG Rating of 'CCC';
- Fail to comply with the United Nations Global Compact principles or have an MSCI Controversies Score of 0;
- Have any involvement in controversial or nuclear weapons, as categorised by MSCI ESG Research;
- Are classified by MSCI as breaching revenue thresholds of up to 10% in weapon-related activities, including conventional weapons and civilian firearms;
- Are classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco production, thermal coal mining and power and unconventional oil and gas extraction (oil sands); and
- Are classified by GCEL as having any involvement in coal power expansion projects or coal mining expansion projects.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG BISR

MSCI ESG BISR aims to enable institutional investors to manage ESG standards and restrictions.

Urgewald Global Coal Exit List (GCEL)

The Urgewald Global Coal Exit List aims to give financial institutions a tool to remove coal from their portfolios. The GCEL aims to provide coal-related data for companies within the coverage universe. GCEL covers the entire thermal coal value chain from coal exploration and mining, to coal power production and coal gasification. For full details please refer to www.urgewald.org/english

The Proposed Allocation will be provided by the Discretionary Investment Advisor on each Asset Allocation Date or at other times where the Discretionary Investment Advisor wishes to update the Proposed Allocation based on economic and/or other indicators. While the financial product seeks to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer meet these criteria may remain included

in the portfolio of the financial product until it is possible and practicable to divest such positions.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

The policy of the financial product is to assess good governance practices of investee companies using MSCI ESG Ratings and MSCI ESG Controversies data.

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating. The inclusion of governance criteria in the MSCI ESG Rating ensures that any securities which pass the ESG criteria implemented by the financial product, by having an MSCI ESG Rating above 'CCC', have been assessed to not breach key issues including: board composition, pay, ownership, accounting, business ethics, and tax transparency.

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. The financial product will utilise MSCI ESG Controversies to exclude companies with an MSCI Controversies Score of 0 which are companies which have very severe controversies, including governance controversies such as: bribery and fraud, governance structures, and controversial investments.

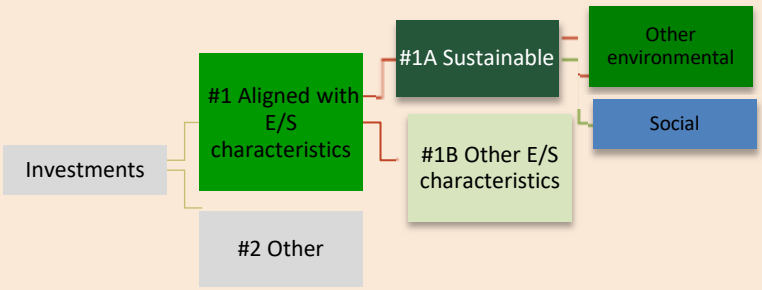
What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

This financial product invests at least 80% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 1% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 20% of the investments are not aligned with these characteristics (#2 Other).

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

to a green economy. **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending portfolio rebalance to gain market exposure. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of this financial product or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules**.**

Enabling activities directly enable other activities to make a substantial contribution to an invironmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities. As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

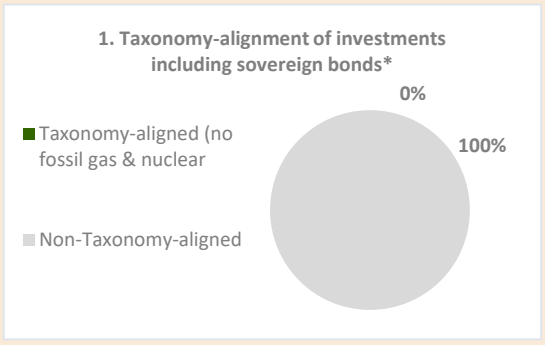
Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

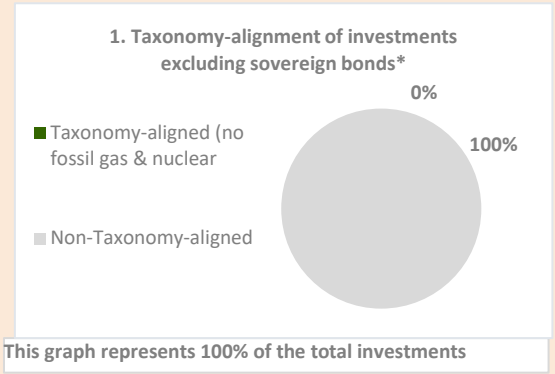
Yes:

In fossil gas In nuclear energy

No. However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

[1] ***Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.***

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 1%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 1%.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under "#2 Other", may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

This financial product has not designated a reference benchmark to determine whether it is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

More product-specific information can be found on the website

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

ANNEX

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers Europe Equity Enhanced Active UCITS ETF
Legal entity identifier: 254900PU8HHM39WC7G96

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___%	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 1% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** ___%	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR through the screening of the portfolio against an ESG database. The financial product specifically promotes, the environmental characteristic of a reduction in oil sands extraction; and the social characteristics of: a reduction in human and labour rights controversy occurrences, a reduction in controversial weapon production, and a reduction in tobacco production. The financial product utilises data from Urgewald and MSCI ESG Research LLC ("MSCI") to apply certain ESG criteria using the following products: Urgewald Global Coal Exit List (GCEL), MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG Business Involvement Screening Research.

Companies in the Investment Universe which breach the following ESG standards, among others, will be excluded:

- Are assigned an MSCI ESG Rating of 'CCC';
- Fail to comply with the United Nations Global Compact principles or have a MSCI Controversies Score of 0;

- Have any involvement in controversial or nuclear weapons, as categorised by MSCI ESG Research;
- Are classified by MSCI as breaching revenue thresholds of up to 10% in weapon-related activities, including conventional weapons and civilian firearms;
- Are classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco production, thermal coal mining and power and unconventional oil and gas extraction (oil sands); and
- Are classified by GCEL as having any involvement in coal power expansion projects or coal mining expansion projects.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

Urgewald Global Coal Exit List (GCEL)

The Urgewald Global Coal Exit List aims to give financial institutions a tool to remove coal from their portfolios. The GCEL aims to provide coal-related data for companies within the coverage universe. GCEL covers the entire thermal coal value chain from coal exploration and mining, to coal power production and coal gasification. For full details please refer to www.urgewald.org/english

The portfolio allocation (the "Proposed Allocation") will be provided by DWS International GmbH (the "Discretionary Investment Advisor ") on a scheduled monthly basis (the "Asset Selection Date") or at other times where the Discretionary Investment Advisor wishes to update the Proposed Allocation based on economic and/or other indicators. While the financial product seeks to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer meet these criteria may remain included in the portfolio of the financial product until it is possible and practicable to divest such positions.

The financial product has not designated a reference benchmark to promote these environmental and/or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

  - **Exposure to Very Severe Controversies:** The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Typically, such exposure is expected to be 0%.
  - **Exposure to Worst-in-Class Issuers:** The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI. Typically, such exposure is expected to be 0%.
  - **Controversial Weapons Involvement:** The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI. Typically, such exposure is expected to be 0%.
  - **Tobacco Production:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco production with a revenue in this area of more than 0%, as determined by MSCI. Typically, such exposure is expected to be 0%.

- **Oil Sands Extraction:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in oil sands extraction with a revenue in this area of more than, or equal to, 5%, as determined by MSCI. Typically, such exposure is expected to be 0%.

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

  While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

  At least 1% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but are not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

  In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

  - Involvement in harmful business activities; which harm any of the environmental and/or social objectives identified by their contribution to a UN SDG;
  - Violation of international norms (such as the United Nations Global Compact principles) or involvement in very severe controversies (as assessed using MSCI ESG Controversies, amongst others). The MSCI ESG Controversies analysis provides assessments of controversies concerning the negative environmental, social and/or governance impact of company operations, products and services. Identified controversy cases include alleged company violations of existing laws and/or regulations or an alleged company action or event that violates commonly accepted international norms, including global norms and conventions, such as the International Labour Organization ("ILO") Fundamental Conventions. A case can be a single event such as a spill, accident or regulatory action, or a set of closely linked events or allegations such as health and safety fines at the same facility, multiple allegations of anticompetitive behavior related to the same product line, multiple community protests at the same company location or multiple individual lawsuits alleging the same type of discrimination. The categorisation of a controversy case as being very severe (MSCI ESG Controversies Score of 0) is based on a combination of

the assessed severity of the controversy as well as the assessments of the company's alleged role and the status of the case remediation; and

- Violation of certain principal adverse indicator thresholds, as further detailed under the section entitled "How have the indicators for adverse impacts on sustainability factors been taken into account?" below.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates the following 14 mandatory principal adverse indicators on sustainability factors applicable to investments in investee companies from Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing SFDR: PAI 1 GHG emissions; PAI 2 carbon footprint; PAI 3 GHG intensity of investee companies; PAI 4 exposure to companies active in the fossil fuel sector; PAI 5 share of non-renewable energy consumption and production; PAI 6 energy consumption intensity per high impact climate sector; PAI 7 activities negatively affecting biodiversity-sensitive areas; PAI 8 emissions to water; PAI 9 hazardous waste and radioactive waste ratio; PAI 10 violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; PAI 11 lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises; PAI 12 unadjusted gender pay gap; PAI 13 board gender diversity; and PAI 14 exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons). DWS has established quantitative thresholds and/or qualitative values to determine if an issuer significantly harms any of the environmental or social objectives. These values are set based upon various external and interal factors, such as data availability or market developments and may be adapted going forward. For further information on these thresholds, please refer to '5.2. Step 2: Do No Significant Harm – Assessment' of the Procedure Document on ESG Methods, Data Sources and Data Processing available via the following link: https://etf.dws.com/en-lu/AssetDownload/Index/2bf90132-87c2-40f6-91e9-e732407c4562/202403_DWS%20Procedure%20Document_Final.pdf

In addition to the integration of principal adverse indicators in the DNSH assessment, the financial product further takes into consideration principal adverse indicators in its design through the screening of the portfolio against an ESG database. Utilising data from MSCI ESG Research LLC, the financial product identifies and excludes companies in the Investment Universe which breach revenue thresholds in activites which are negatively aligned with specific principal adverse indicators, including:

- Exposure to companies active in the fossil fuel sector (no. 4) - considered through the application of exclusions of companies classified by MSCI as breaching a revenue threshold of up to 5% in oil sands and thermal coal extraction;
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10) - considered through the application of exclusions of companies that fail to comply with the United Nations Global Compact principles or have an MSCI ESG Controversies score of 0; and
- Exposure to controversial weapons (no. 14) - considered through the application of exclusions of companies that have any involvement in controversial weapons, as categorised by MSCI ESG Research LLC.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are ineligible for investment by the financial product.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final): through the exclusion of securities from the investment universe:

- Exposure to companies active in the fossil fuel sector (no. 4) - as considered through the application of exclusions of companies classified by MSCI as breaching a revenue thresholds of up to 5% in oil sands and thermal coal extraction;
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10) - as considered through the application of exclusions of companies that fail to comply with the United Nations Global Compact principles or have an MSCI Controversies Score of 0; and
- Exposure to controversial weapons (no. 14) - as considered through the application of exclusions of companies that have any involvement in controversial weapons, as categorised by MSCI ESG Research.

Information relating to the principal adverse impacts considered by the financial product will be made available in its annual financial statements.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The investment objective of the financial product is to achieve mid to long-term capital appreciation in excess of a benchmark representing the shares of large capitalisation companies in developed market countries in Europe. The Fund is actively managed and the Discretionary Investment Advisor will select the Proposed Allocation using a dynamic bottom-up stock selection strategy with the primary aim of generating capital appreciation. In order to achieve the investment objective, the Discretionary Investment Advisor will consider multiple quantitative categories of fundamental and price-driven stock characteristics to determine a scoring model for each of the securities in the Investment Universe. The categories include, but are not limited to: valuation, financial strength, technical indicators, analyst sentiment, and earnings growth. The categories are constantly reviewed for their contribution to overall performance and are dynamically weighted within the scoring model as a result. The scores are implemented in the final allocation using a risk-controlled approach. The Sub-Portfolio Manager will assess the Proposed Allocation with regards to certain liquidity criteria, tradability of securities and portfolio diversification and certain environmental, social and governance criteria

as described above.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

  The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR through the screening of the portfolio against an ESG database. The financial product utilises data from Urgewald and MSCI to apply certain ESG criteria using the following products: Urgewald Global Coal Exit List ("GCEL"), MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG BISR.

  Companies in the Investment Universe which breach the following ESG standards will be excluded:

  - Are assigned an MSCI ESG Rating of 'CCC';
  - Fail to comply with the United Nations Global Compact principles or have an MSCI Controversies Score of 0;
  - Have any involvement in controversial or nuclear weapons, as categorised by MSCI ESG Research;
  - Are classified by MSCI as breaching revenue thresholds of up to 10% in weapon-related activities, including conventional weapons and civilian firearms;
  - Are classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco production, thermal coal mining and power and unconventional oil and gas extraction (oil sands); and
  - Are classified by GCEL as having any involvement in coal power expansion projects or coal mining expansion projects.

  Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

  MSCI ESG Ratings

  MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

  MSCI ESG Controversies

  MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

  MSCI ESG BISR

  MSCI ESG BISR aims to enable institutional investors to manage ESG standards and restrictions.

  Urgewald Global Coal Exit List (GCEL)

  The Urgewald Global Coal Exit List aims to give financial institutions a tool to remove coal from their portfolios. The GCEL aims to provide coal-related data for companies within the coverage universe. GCEL covers the entire thermal coal value chain from coal exploration and mining, to coal power production and coal gasification. For full details please refer to www.urgewald.org/english

  The Proposed Allocation will be provided by the Discretionary Investment Advisor on each Asset Allocation Date or at other times where the Discretionary Investment Advisor wishes to update the Proposed Allocation based on economic and/or other indicators. While the financial product seeks to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer meet these criteria may remain included

in the portfolio of the financial product until it is possible and practicable to divest such positions.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

The policy of the financial product is to assess good governance practices of investee companies using MSCI ESG Ratings and MSCI ESG Controversies data.

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating. The inclusion of governance criteria in the MSCI ESG Rating ensures that any securities which pass the ESG criteria implemented by the financial product, by having an MSCI ESG Rating above 'CCC', have been assessed to not breach key issues including: board composition, pay, ownership, accounting, business ethics, and tax transparency.

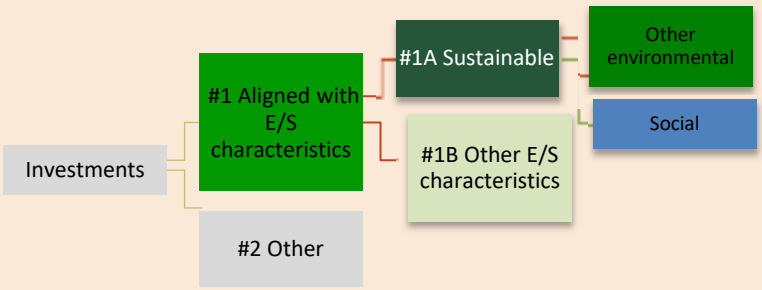
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. The financial product will utilise MSCI ESG Controversies to exclude companies with an MSCI Controversies Score of 0 which are companies which have very severe controversies, including governance controversies such as: bribery and fraud, governance structures, and controversial investments.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

This financial product invests at least 80% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 1% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 20% of the investments are not aligned with these characteristics (#2 Other).



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

to a green economy.

operational expenditure (OpEx) reflecting green operational activities of investee companies.

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending portfolio rebalance to gain market exposure. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of this financial product or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules**.**

Enabling activities directly enable other activities to make a substantial contribution to an invironmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities. As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

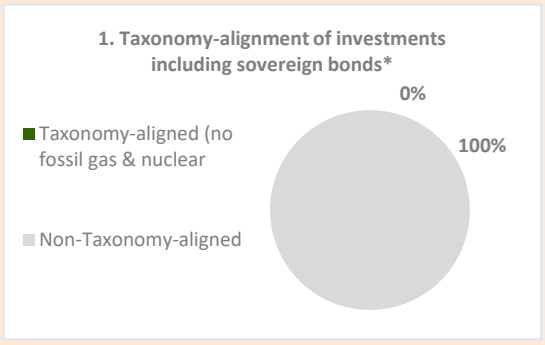
Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

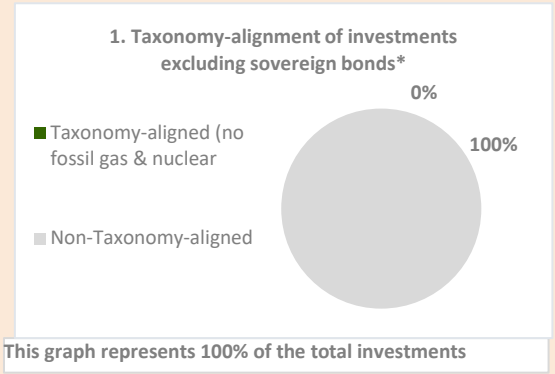
Yes:

In fossil gas In nuclear energy

No. However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

[1] ***Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.***

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 1%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 1%.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under "#2 Other", may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

This financial product has not designated a reference benchmark to determine whether it is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Where can I find more product specific information online?

More product-specific information can be found on the website

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

ANNEX

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers World Equity Enhanced Active UCITS ETF
Legal entity identifier: 254900AF69CKD5864H81

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___%	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 1% of sustainable investments

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** ___%	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR through the screening of the portfolio against an ESG database. The financial product specifically promotes, the environmental characteristic of a reduction in oil sands extraction; and the social characteristics of: a reduction in human and labour rights controversy occurrences, a reduction in controversial weapon production, and a reduction in tobacco production. The financial product utilises data from Urgewald and MSCI ESG Research LLC ("MSCI") to apply certain ESG criteria using the following products: Urgewald Global Coal Exit List (GCEL), MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG Business Involvement Screening Research.

Companies in the Investment Universe which breach the following ESG standards, among others, will be excluded:

- Are assigned an MSCI ESG Rating of 'CCC';
- Fail to comply with the United Nations Global Compact principles or have a MSCI Controversies Score of 0;

- Have any involvement in controversial or nuclear weapons, as categorised by MSCI ESG Research;
- Are classified by MSCI as breaching revenue thresholds of up to 10% in weapon-related activities, including conventional weapons and civilian firearms;
- Are classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco production, thermal coal mining and power and unconventional oil and gas extraction (oil sands); and
- Are classified by GCEL as having any involvement in coal power expansion projects or coal mining expansion projects.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

Urgewald Global Coal Exit List (GCEL)

The Urgewald Global Coal Exit List aims to give financial institutions a tool to remove coal from their portfolios. The GCEL aims to provide coal-related data for companies within the coverage universe. GCEL covers the entire thermal coal value chain from coal exploration and mining, to coal power production and coal gasification. For full details please refer to www.urgewald.org/english

The portfolio allocation (the "Proposed Allocation") will be provided by DWS International GmbH (the "Discretionary Investment Advisor ") on a scheduled monthly basis (the "Asset Selection Date") or at other times where the Discretionary Investment Advisor wishes to update the Proposed Allocation based on economic and/or other indicators. While the financial product seeks to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer meet these criteria may remain included in the portfolio of the financial product until it is possible and practicable to divest such positions.

The financial product has not designated a reference benchmark to promote these environmental and/or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

  - **Exposure to Very Severe Controversies:** The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Typically, such exposure is expected to be 0%.
  - **Exposure to Worst-in-Class Issuers:** The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI. Typically, such exposure is expected to be 0%.
  - **Controversial Weapons Involvement:** The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI. Typically, such exposure is expected to be 0%.
  - **Tobacco Production:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco production with a revenue in this area of more than 0%, as determined by MSCI. Typically, such exposure is expected to be 0%.

- **Oil Sands Extraction:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in oil sands extraction with a revenue in this area of more than, or equal to, 5%, as determined by MSCI. Typically, such exposure is expected to be 0%.

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

  While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

  At least 1% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable. The environmental and/or social objectives are identified by activities that contribute positively to the United Nations Sustainable Development Goals ("UN SDGs"), which may include, but are not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, are measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

  In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

  - Involvement in harmful business activities; which harm any of the environmental and/or social objectives identified by their contribution to a UN SDG;
  - Violation of international norms (such as the United Nations Global Compact principles) or involvement in very severe controversies (as assessed using MSCI ESG Controversies, amongst others). The MSCI ESG Controversies analysis provides assessments of controversies concerning the negative environmental, social and/or governance impact of company operations, products and services. Identified controversy cases include alleged company violations of existing laws and/or regulations or an alleged company action or event that violates commonly accepted international norms, including global norms and conventions, such as the International Labour Organization ("ILO") Fundamental Conventions. A case can be a single event such as a spill, accident or regulatory action, or a set of closely linked events or allegations such as health and safety fines at the same facility, multiple allegations of anticompetitive behavior related to the same product line, multiple community protests at the same company location or multiple individual lawsuits alleging the same type of discrimination. The categorisation of a controversy case as being very severe (MSCI ESG Controversies Score of 0) is based on a combination of

the assessed severity of the controversy as well as the assessments of the company's alleged role and the status of the case remediation; and

- Violation of certain principal adverse indicator thresholds, as further detailed under the section entitled "How have the indicators for adverse impacts on sustainability factors been taken into account?" below.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates the following 14 mandatory principal adverse indicators on sustainability factors applicable to investments in investee companies from Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing SFDR: PAI 1 GHG emissions; PAI 2 carbon footprint; PAI 3 GHG intensity of investee companies; PAI 4 exposure to companies active in the fossil fuel sector; PAI 5 share of non-renewable energy consumption and production; PAI 6 energy consumption intensity per high impact climate sector; PAI 7 activities negatively affecting biodiversity-sensitive areas; PAI 8 emissions to water; PAI 9 hazardous waste and radioactive waste ratio; PAI 10 violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; PAI 11 lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises; PAI 12 unadjusted gender pay gap; PAI 13 board gender diversity; and PAI 14 exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons). DWS has established quantitative thresholds and/or qualitative values to determine if an issuer significantly harms any of the environmental or social objectives. These values are set based upon various external and interal factors, such as data availability or market developments and may be adapted going forward. For further information on these thresholds, please refer to '5.2. Step 2: Do No Significant Harm – Assessment' of the Procedure Document on ESG Methods, Data Sources and Data Processing available via the following link: https://etf.dws.com/en-lu/AssetDownload/Index/2bf90132-87c2-40f6-91e9-e732407c4562/202403_DWS%20Procedure%20Document_Final.pdf

In addition to the integration of principal adverse indicators in the DNSH assessment, the financial product further takes into consideration principal adverse indicators in its design through the screening of the portfolio against an ESG database. Utilising data from MSCI ESG Research LLC, the financial product identifies and excludes companies in the Investment Universe which breach revenue thresholds in activites which are negatively aligned with specific principal adverse indicators, including:

- Exposure to companies active in the fossil fuel sector (no. 4) - considered through the application of exclusions of companies classified by MSCI as breaching a revenue threshold of up to 5% in oil sands and thermal coal extraction;

- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10) - considered through the application of exclusions of companies that fail to comply with the United Nations Global Compact principles or have an MSCI ESG Controversies score of 0; and

- Exposure to controversial weapons (no. 14) - considered through the application of exclusions of companies that have any involvement in controversial weapons, as categorised by MSCI ESG Research LLC.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are ineligible for investment by the financial product.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final) through the exclusion of securities from the investment universe:

- Exposure to companies active in the fossil fuel sector (no. 4) - as considered through the application of exclusions of companies classified by MSCI as breaching a revenue thresholds of up to 5% in oil sands and thermal coal extraction;
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10) - as considered through the application of exclusions of companies that fail to comply with the United Nations Global Compact principles or have an MSCI Controversies Score of 0; and
- Exposure to controversial weapons (no. 14) - as considered through the application of exclusions of companies that have any involvement in controversial weapons, as categorised by MSCI ESG Research.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The investment objective of the financial product is to achieve mid to long-term capital appreciation in excess of a benchmark representing the shares of large and medium-capitalisation companies in developed market countries. The financial product is actively managed and the Discretionary Investment Advisor will select the Proposed Allocation using a dynamic bottom-up stock selection strategy with the primary aim of generating capital appreciation. In order to achieve the investment objective, the Discretionary Investment Advisor will consider multiple quantitative categories of fundamental and price-driven stock characteristics to determine a scoring model for each of the securities in the Investment Universe. The categories include, but are not limited to: valuation, financial strength, technical indicators, analyst sentiment, and earnings growth. The categories are constantly reviewed for their contribution to overall performance and are dynamically weighted within the scoring model as a result. The scores are implemented in the final allocation using a risk-controlled approach. The Sub-Portfolio Manager will assess the Proposed Allocation with regards to certain liquidity criteria, tradability of securities and portfolio diversification and certain environmental, social and governance criteria as described above.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR through the screening of the portfolio against an ESG database. The financial product utilises data from Urgewald and MSCI to apply certain ESG criteria using the following products: Urgewald Global Coal Exit List ("GCEL"), MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG BISR.

Companies in the Investment Universe which breach the following ESG standards will be excluded:

- Are assigned an MSCI ESG Rating of 'CCC';
- Fail to comply with the United Nations Global Compact principles or have an MSCI Controversies Score of 0;
- Have any involvement in controversial or nuclear weapons, as categorised by MSCI ESG Research;
- Are classified by MSCI as breaching revenue thresholds of up to 10% in weapon-related activities, including conventional weapons and civilian firearms;
- Are classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco production, thermal coal mining and power and unconventional oil and gas extraction (oil sands); and
- Are classified by GCEL as having any involvement in coal power expansion projects or coal mining expansion projects.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG BISR

MSCI ESG BISR aims to enable institutional investors to manage ESG standards and restrictions.

Urgewald Global Coal Exit List (GCEL)

The Urgewald Global Coal Exit List aims to give financial institutions a tool to remove coal from their portfolios. The GCEL aims to provide coal-related data for companies within the coverage universe. GCEL covers the entire thermal coal value chain from coal exploration and mining, to coal power production and coal gasification. For full details please refer to www.urgewald.org/english

The Proposed Allocation will be provided by the Discretionary Investment Advisor on each Asset Allocation Date or at other times where the Discretionary Investment Advisor wishes to update the Proposed Allocation based on economic and/or other indicators. While the financial product seeks to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer meet these criteria may remain included in the portfolio of the financial product until it is possible and practicable to divest such positions.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

The policy of the financial product is to assess good governance practices of investee companies using MSCI ESG Ratings and MSCI ESG Controversies data.

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating. The inclusion of governance criteria in the MSCI ESG Rating ensures that any securities which pass the ESG criteria implemented by the financial product, by having an MSCI ESG Rating above 'CCC', have been assessed to not breach key issues including: board composition, pay, ownership, accounting, business ethics, and tax transparency.

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. The financial product will utilise MSCI ESG Controversies to exclude companies with an MSCI Controversies Score of 0 which are companies which have very severe controversies, including governance controversies such as: bribery and fraud, governance structures, and controversial investments.

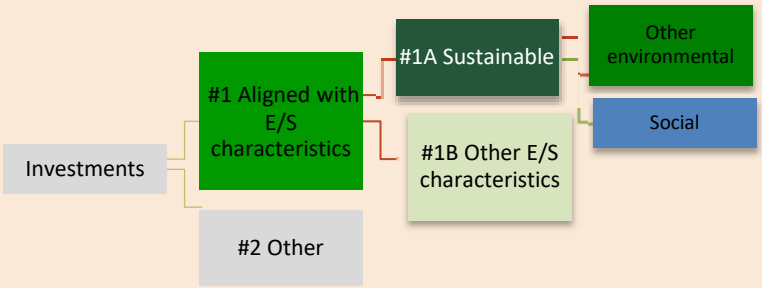
What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

This financial product invests at least 80% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 1% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 20% of the investments are not aligned with these characteristics (#2 Other).

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is

operational expenditure (OpEx) reflecting green operational activities of investee companies.

not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending portfolio rebalance to gain market exposure. Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of this financial product or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules**.**

Enabling activities directly enable other activities to make a substantial contribution to an invironmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities. As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

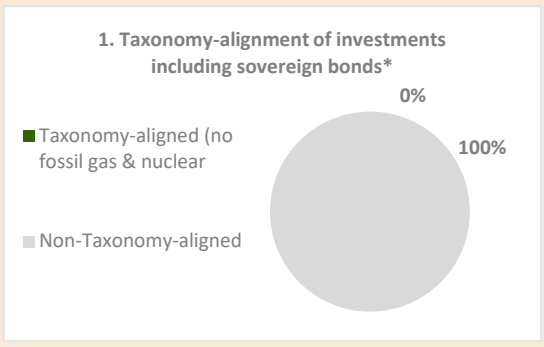
Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

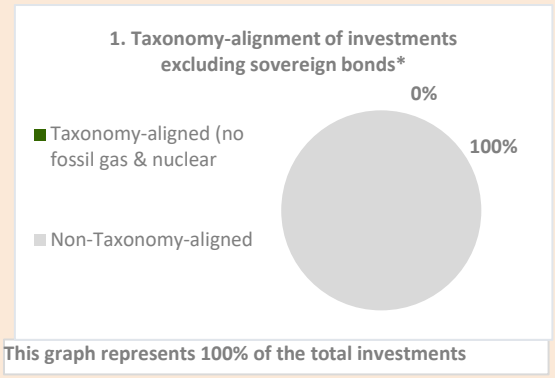
Yes:

In fossil gas In nuclear energy

No. However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

[1] ***Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.***

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 1%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 1%.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under "#2 Other", may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

This financial product has not designated a reference benchmark to determine whether it is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Where can I find more product specific information online?

More product-specific information can be found on the website

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

ANNEX

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers DJE Europe Equity Research UCITS ETF
Legal entity identifier: 254900VGYTM7SHS9BG15

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes** ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective:** ___%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective:** ___%

☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 1% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR through the screening of the portfolio against an ESG database. The financial product specifically promotes, the environmental characteristic of a reduction in oil sands extraction; and the social characteristics of: a reduction in human and labour rights controversy occurrences, a reduction in controversial weapon production, and a reduction in tobacco production. The financial product utilises data from MSCI ESG Research LLC ("MSCI") to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG Business Involvement Screening Research.

Companies in the Investment Universe which breach the following ESG standards, among others, will be excluded:

- Are assigned an MSCI ESG Rating of 'CCC';
- Fail to comply with the United Nations Global Compact principles or have an MSCI Controversies Score of 0;

- Have any involvement in controversial weapons, as categorised by MSCI ESG Research;
- Are classified by MSCI as breaching revenue thresholds of up to 5% in civilian firearms;
- Are classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco and oil sands extraction;
- Are classified by MSCI as breaching revenue thresholds of up to 30% in thermal coal activities.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

The portfolio allocation (the "Proposed Allocation") will be provided by DJE Kapital AG (the "Discretionary Investment Advisor") on a scheduled quarterly basis (the "Asset Selection Date") or at other times where the Discretionary Investment Advisor wishes to update the Proposed Allocation based on economic and/or other indicators. While the financial product seeks to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer meet these criteria may remain included in the portfolio of the financial product until it is possible and practicable to divest such positions.

The financial product has not designated a reference benchmark to promote these environmental and/or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

  - **Exposure to Very Severe Controversies:** The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Typically, such exposure is expected to be 0%.
  - **Exposure to Worst-in-Class Issuers:** The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI. Typically, such exposure is expected to be 0%.
  - **Controversial Weapons Involvement:** The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI. Typically, such exposure is expected to be 0%.
  - **Tobacco Involvement:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, as determined by MSCI. Typically, such exposure is expected to be 0%.
  - **Oil Sands Extraction:** The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in oil sands extraction with a revenue in this area of more than, or equal to, 5%, as determined by MSCI. Typically, such exposure is expected to be 0%.

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

While the financial product does not have sustainable investment as its objective, it will invest a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

At least 1% of the financial product's net assets will be invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities are calculated as the product of an issuer's weight within the financial product and the proportion of such issuer's economic activities which contribute to an environmental objective and/or a social objective (an activity-based approach), provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment uses data from one or multiple data providers and/or public sources to determine if an activity is sustainable.

Sustainable economic activities that contribute to an environmental and/or social objective can be defined as 1) economic activities contributing to the objectives set out under the EU Taxonomy Regulation including, but not limited to, climate change mitigation and adaptation, or 2) economic activities that are not environmentally sustainable under the EU Taxonomy, but which contribute to an environmental or social objective as defined under Article 2(17) SFDR. The environmental and/or social objectives under Article 2(17) SFDR, which are not defined under the EU Taxonomy, include the United Nations Sustainable Development Goals ("UN SDGs"), of (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land. Such environmentally or socially sustainable investments are identified by their activities which contribute positively to the UN SDGs as measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs will vary based on the actual investments in the portfolio.

For the avoidance of doubt, while this Fund may contribute to the environmental objectives of climate change mitigation and climate change adaptation, it measures such contribution in the manner outlined above and not against the technical screening criteria set down in the EU Taxonomy Regulation. As such, it does not commit a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

In accordance with Article 2 (17) SFDR, any such sustainable investments must not significantly harm any environmental or social objectives and such sustainable investment issuers must follow good governance practices. Any investment that fails to meet the do no significant harm ("DNSH") thresholds will not be considered towards the sustainable investment share of the financial product. Such DNSH thresholds will include, but not be limited to:

- Involvement in harmful business activities, which harm any of the environmental and/or social objectives identified by their contribution to a UN SDG;

- Violation of international norms (such as the United Nations Global Compact principles) or involvement in very severe controversies (as assessed using MSCI ESG Controversies). The MSCI ESG Controversies analysis provides assessments of controversies concerning the negative environmental, social and/or governance impact of company operations, products and services. Identified controversy cases include alleged company violations of existing laws and/or regulations or an alleged company action or event that violates commonly accepted international norms, including global norms and conventions, such as the International Labour Organization ("ILO") Fundamental Conventions. A case can be a single event such as a spill, accident or regulatory action, or a set of closely linked events or allegations such as health and safety fines at the same facility, multiple allegations of anticompetitive behavior related to the same product line, multiple community protests at the same company location or multiple individual lawsuits alleging the same type of discrimination. The categorisation of a controversy case as being very severe (MSCI ESG Controversies Score of 0) is based on a combination of the assessed severity of the controversy as well as the assessments of the company's alleged role and the status of the case remediation; and

- Violation of certain principal adverse indicator thresholds, as further detailed under the section entitled "How have the indicators for adverse impacts on sustainability factors been taken into account?" below.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrates the following 14 mandatory principal adverse indicators on sustainability factors applicable to investments in investee companies from Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing SFDR: PAI 1 GHG emissions; PAI 2 carbon footprint; PAI 3 GHG intensity of investee companies; PAI 4 exposure to companies active in the fossil fuel sector; PAI 5 share of non-renewable energy consumption and production; PAI 6 energy consumption intensity per high impact climate sector; PAI 7 activities negatively affecting biodiversity-sensitive areas; PAI 8 emissions to water; PAI 9 hazardous waste and radioactive waste ratio; PAI 10 violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; PAI 11 lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises; PAI 12 unadjusted gender pay gap; PAI 13 board gender diversity; and PAI 14 exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons). DWS has established quantitative thresholds and/or qualitative values to determine if an issuer significantly harms any of the environmental or social objectives. These values are set based upon various external and interal factors, such as data availability or market developments and may be adapted going forward. For further information on these thresholds, please refer to '5.2. Step 2: Do No Significant Harm – Assessment' of the Procedure Document on ESG Methods, Data Sources and Data Processing available via the following link: https://etf.dws.com/en-lu/AssetDownload/Index/2bf90132-87c2-40f6-91e9-e732407c4562/202403_DWS%20Procedure%20Document_Final.pdf

In addition to the integration of principal adverse indicators in the DNSH assessment, the financial product further takes into consideration principal adverse indicators in its design through the screening of the portfolio against an ESG database. Utilising data from MSCI ESG Research LLC, the financial product identifies and excludes companies in the Investment Universe which breach revenue thresholds in activites which are negatively aligned with specific principal adverse indicators, including:

- Exposure to companies active in the fossil fuel sector (no. 4) - considered through the application of exclusions of companies classified by MSCI as breaching a revenue threshold of up to 5% in oil sands and up to 30% in thermal coal extraction;

- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10) - considered through the application of exclusions of companies that fail to comply with the United Nations Global Compact principles or have an MSCI ESG Controversies score of 0; and
- Exposure to controversial weapons (no. 14) - considered through the application of exclusions of companies that have any involvement in controversial weapons, as categorised by MSCI ESG Research LLC.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities violating the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are ineligible for investment by the financial product.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

✖ Yes, the financial product considers the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final) through the exclusion of securities from the investment universe:

- Exposure to companies active in the fossil fuel sector (no. 4) - as considered through the application of exclusions of companies classified by MSCI as breaching a revenue threshold of up to 5% in oil sands and up to 30% in thermal coal extraction;
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10) - as considered through the application of exclusions of companies that fail to comply with the United Nations Global Compact principles or have an MSCI Controversies Score of 0; and
- Exposure to controversial weapons (no. 14) - as considered through the application of exclusions of companies that have any involvement in controversial weapons, as categorised by MSCI ESG Research.

Information relating to the principal adverse impacts considered by the financial product will be made available in its annual financial statements.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The investment objective of the financial product is to achieve a positive mid to long-term investment performance through investments in large and medium-capitalisation equities in Europe. The Fund is actively managed and the Discretionary Investment Advisor will select the Proposed Allocation using a proprietary research driven, bottom-up strategy with the primary aim of generating capital appreciation. In order to achieve the investment objective, the Discretionary Investment Advisor will consider six quantitative and qualitative categories to determine a scoring model for each of the securities in the Investment Universe. The categories are valuation, momentum, safety and liquidity, sustainability, company meetings and (internal) analysts' recommendations. The Sub-Portfolio Manager will assess the Proposed Allocation with regards to certain liquidity criteria, tradability of securities and portfolio diversification and certain environmental, social and governance criteria as described above.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

  The financial product promotes environmental and social characteristics and qualifies as a financial product subject to Article 8(1) SFDR through the screening of the portfolio against an ESG database. The financial product utilises data from MSCI to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG BISR.

  Companies in the Investment Universe which breach the following ESG standards will be excluded:

  - Are assigned an MSCI ESG Rating of 'CCC';
  - Fail to comply with the United Nations Global Compact principles or have an MSCI Controversies Score of 0;
  - Have any involvement in controversial weapons, as categorised by MSCI ESG Research;
  - Are classified by MSCI as breaching revenue thresholds of up to 5% in civilian firearms;
  - Are classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco and oil sands extraction;
  - Are classified by MSCI as breaching revenue thresholds of up to 30% in thermal coal activities.

  Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

  MSCI ESG Ratings

  MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

  MSCI ESG Controversies

  MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

  MSCI ESG BISR

  MSCI ESG BISR aims to enable institutional investors to manage ESG standards and restrictions.

  The Proposed Allocation will be provided by the Discretionary Investment Advisor on each Asset Allocation Date or at other times where the Discretionary Investment Advisor wishes to update the Proposed Allocation based on economic and/or other indicators. While the financial product seeks to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer meet these criteria may remain included in the portfolio of the financial product until it is possible and practicable to divest such positions.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

The financial product does not pursue a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

The policy of the financial product is to assess good governance practices of investee companies using MSCI ESG Ratings and MSCI ESG Controversies data.

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating. The inclusion of governance criteria in the MSCI ESG Rating ensures that any securities which pass the ESG criteria implemented by the financial product, by having an MSCI ESG Rating above 'CCC', have been assessed to not breach key issues including: board composition, pay, ownership, accounting, business ethics, and tax transparency.

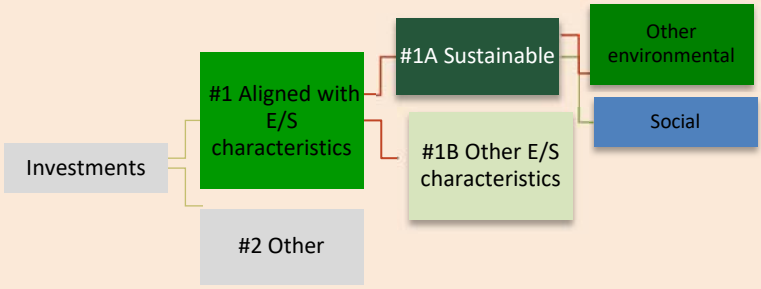
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. The financial product will utilise MSCI ESG Controversies to exclude companies with an MSCI Controversies Score of 0 which are companies which have very severe controversies, including governance controversies such as: bribery and fraud, governance structures, and controversial investments.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

This financial product invests at least 80% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, at least 1% of the financial product's assets qualify as sustainable investments (#1A Sustainable).

Up to 20% of the investments are not aligned with these characteristics (#2 Other).



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure**

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

Financial derivative instruments ("FDIs") may be used for efficient portfolio management purposes. It is not intended to use FDIs for the attainment of the financial product's objective but rather as ancillary investments to, for example, invest cash balances pending portfolio rebalance to gain market exposure.

(OpEx) reflecting green operational activities of investee companies.

Any exposures obtained through the use of FDIs for these ancillary purposes will be aligned with the investment objective of the financial product and would conform to ESG standards substantially similar to those of this financial product or would fall within the quoted percentage of the investments that are not aligned with the promoted environmental and social characteristics (#2 Other).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules**.**

Enabling activities directly enable other activities to make a substantial contribution to an invironmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the financial product promotes environmental characteristics, it is not intended that its underlying investments take into account the EU Taxonomy Regulation criteria for the environmentally sustainable economic activities. As a result, the financial product does not intend to make investments within the scope of the EU Taxonomy Regulation.

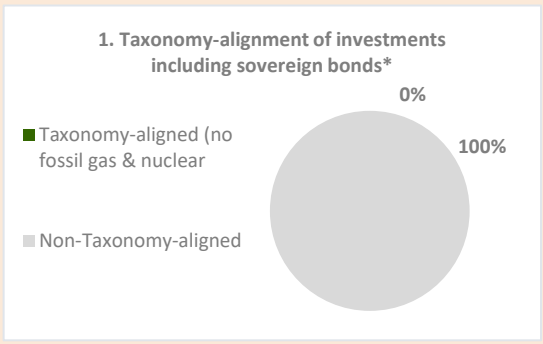
- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[2]?**

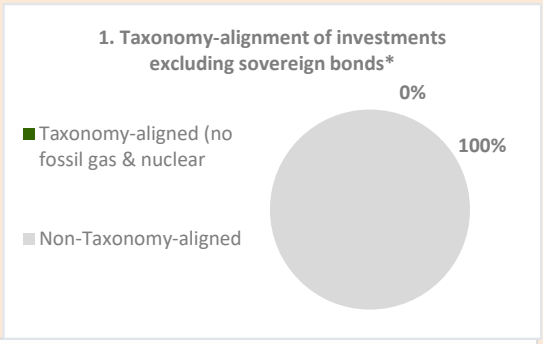
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No. However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments are made, it is possible the financial product may make some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

[2] ***Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.***

What is the minimum share of investments in transitional and enabling activities?

The financial product does not have a minimum share of investments in transitional and enabling activities, as it does not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, the share of environmentally and socially sustainable investments will in total be at least 1%.

What is the minimum share of socially sustainable investments?

The financial product does not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, the share of environmentally and socially sustainable investments will in total be at least 1%.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The financial product predominantly promotes asset allocation in investments that are aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under "#2 Other", may include ancillary liquid assets for the purpose of efficient portfolio management, which may include, secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursue a money market or cash strategy, or financial derivative instruments.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

This financial product has not designated a reference benchmark to determine whether it is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Where can I find more product specific information online?

More product-specific information can be found on the website

More product-specific information can be found on the website: www.xtrackers.com as well as on your local country website.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers Future Mobility UCITS ETF

Legal entity identifier: 254900BN65IWB0RK9A45

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
[ ] it made **sustainable investments with an environmental objective:** ___%	[X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 22.53 % of sustainable investments.
[ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy	[ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
[ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	[X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	[X] with a social objective
[ ] It made **sustainable investments with a social objective:** ___%	[ ] It promoted E/S characteristics, but did **not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Nasdaq Global Future Mobility Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the Nasdaq Global Disruptive Technology Benchmark Index (the "Parent Index") that met, among other thematic selection criteria, certain minimum Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria.

The Reference Index utilised ESG Risk Scores from Morningstar Sustainalytics ("Sustainalytics"), a leading independent ESG and corporate governance research, ratings and analytics firm. The ESG Risk scores were categorized across five risk levels: negligible (0–10), low (10–20), medium (20–30), high (30–40) and severe (40+). Further information regarding ESG Risk Scores can be found on the company website https://www.sustainalytics.com/esg–ratings.

Any company from the eligible universe which breached the following criteria was excluded from the Reference Index:

• ESG Risk Score of at least 40;

• Non–compliance of the United Nations Global Compact Principles; and

• Involvement of certain degrees in tobacco products, thermal coal, oil sands, controversial weapons, civilian firearms, small arms and military contracting, nuclear weapons, depleted uranium, adult entertainment or gambling.

How did the sustainability indicators perform?

Xtrackers Future Mobility UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.04 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.64 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.64 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	2.92 Market weight (%)

Tobacco involvement	0.22	0.09	0.24	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 22.53% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers Future Mobility UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
Tesla	C - Manufacturing	5.3 %	United States

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025

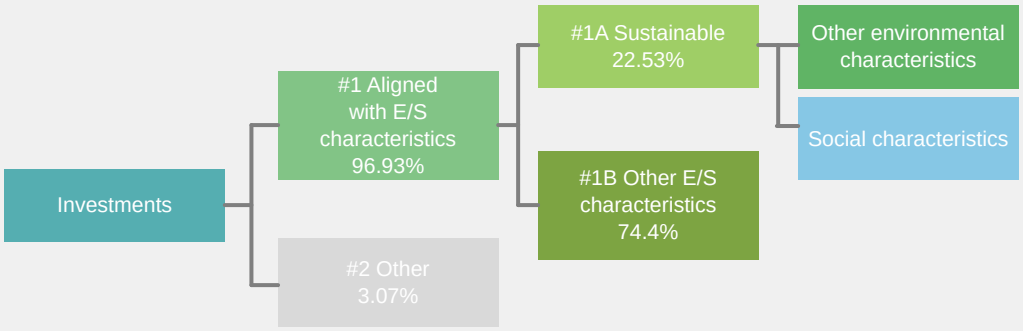
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 96.93% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 22.53% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

3.07% of the investments were not aligned with these characteristics (#2 Other).



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers Future Mobility UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
C	Manufacturing	75.7 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	0.5 %
J	Information and communication	12.8 %
K	Financial and insurance activities	0.0 %
M	Professional, scientific and technical activities	4.1 %
NA	Other	7.0 %
Exposure to companies active in the fossil fuel sector*		**4.7 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

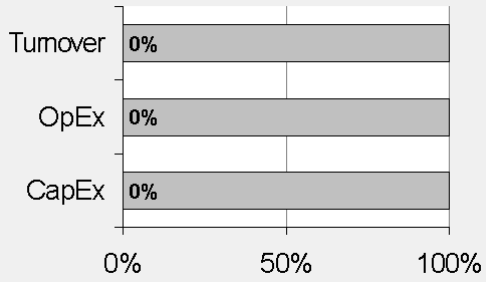
While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

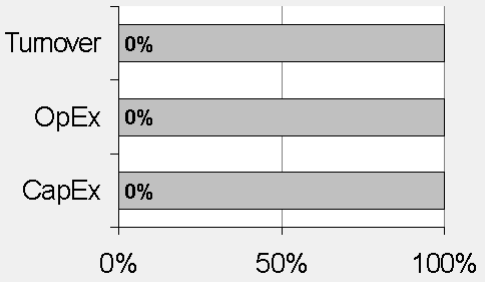
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 22.53% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 22.53% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Where the financial product entered into securities lending transactions during the period, if any, the collateral received in relation to such transactions complied with ESG standards as determined by the relevant investment manager, sub-portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards were identified by reference to an appropriate ESG index and incorporated as a minimum ESG screens substantially similar to those of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Nasdaq Global Future Mobility Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of companies engaged in future mobility, for example: autonomous vehicles (i.e. driverless cars), 3D graphics, electric vehicles, hybrid vehicles and the technology and supply chain behind this, such as electric batteries and lithium batteries. The Parent Index is used as the universe of eligible securities for the Reference Index. The constituents of the Reference Index are determined by applying thematic selection criteria to the constituents of the Parent Index. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria.

The Reference Index utilises ESG Risk Scores from Morningstar Sustainalytics ("Sustainalytics"), a leading independent ESG and corporate governance research, ratings and analytics firm. The ESG Risk scores are categorized across five risk levels: negligible (0–10), low (10–20), medium (20–30), high (30–40) and severe (40+). Further information regarding ESG Risk Scores can be found on the company website https://www.sustainalytics.com/esg–ratings.

Any company from the eligible universe which breaches the following criteria shall be excluded from the Reference Index:

• ESG Risk Score of at least 40;

• Non–compliance of the United Nations Global Compact Principles; and
• Involvement of certain degrees in tobacco products, thermal coal, oil sands, controversial weapons, civilian firearms, small arms and military contracting, nuclear weapons, depleted uranium, adult entertainment or gambling.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers Artificial Intelligence & Big Data UCITS ETF

Legal entity identifier: 254900X8OXFNVMRD9308

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
[ ] it made **sustainable investments with an environmental objective:** ___%	[X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 15.2 % of sustainable investments.
[ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy	[ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
[ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	[X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	[X] with a social objective
[ ] It made **sustainable investments with a social objective:** ___%	[ ] It promoted E/S characteristics, but did **not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Nasdaq Global Artificial Intelligence and Big Data Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the Nasdaq Global Disruptive Technology Benchmark Index (the “Parent Index”) that met, among other thematic selection criteria, certain minimum Environmental, Social and Governance (“ESG”) standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria.

The Reference Index utilised ESG Risk Scores from Morningstar Sustainalytics (“Sustainalytics”), a leading independent ESG and corporate governance research, ratings and analytics firm. The ESG Risk scores were categorized across five risk levels: negligible (0–10), low (10–20), medium (20–30), high (30–40) and severe (40+). Further information regarding ESG Risk Scores can be found on the company website https://www.sustainalytics.com/esg–ratings.

Any company from the eligible universe which breached the following criteria was excluded from the Reference Index:

• ESG Risk Score of at least 40;

• Non–compliance of the United Nations Global Compact Principles; and

• Involvement of certain degrees in tobacco products, thermal coal, oil sands, controversial weapons, civilian firearms, small arms and military contracting, nuclear weapons, depleted uranium, adult entertainment or gambling.

How did the sustainability indicators perform?

Xtrackers Artificial Intelligence & Big Data UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.03 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.13 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.13 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.45 Market weight (%)

Tobacco involvement	0.09	0.00	0.00	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 15.2% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers Artificial Intelligence & Big Data UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
Alphabet Cl.A	J - Information and communication	4.9 %	United States
Apple	G - Wholesale and retail trade; repair of motor vehicles and motorcycles	4.6 %	United States

for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025

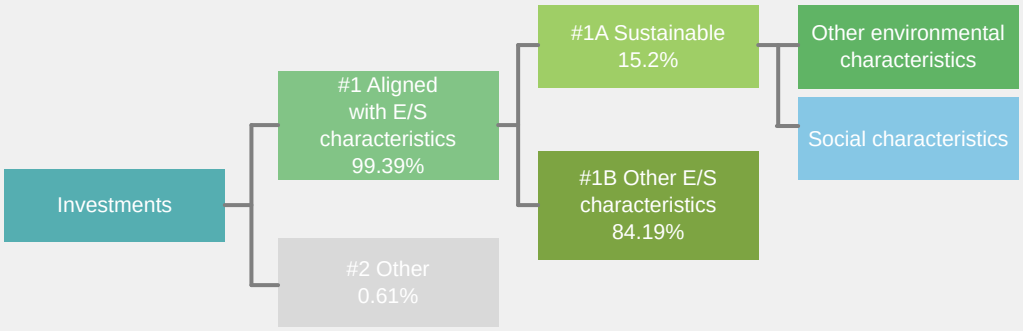
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.39% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 15.2% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.61% of the investments were not aligned with these characteristics (#2 Other).



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers Artificial Intelligence & Big Data UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
C	Manufacturing	32.5 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	10.1 %
H	Transporting and storage	0.1 %
J	Information and communication	40.4 %
K	Financial and insurance activities	9.2 %
N	Administrative and support service activities	0.0 %
S	Other services activities	0.0 %
NA	Other	7.5 %
Exposure to companies active in the fossil fuel sector*		0.0 %

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

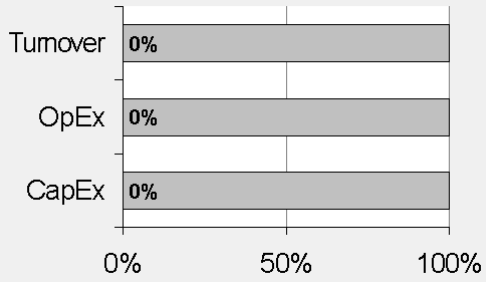
While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

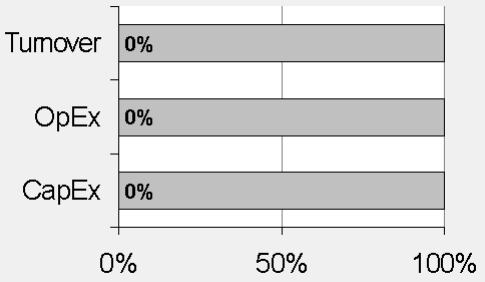
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***



Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 15.2% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 15.2% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Where the financial product entered into securities lending transactions during the period, if any, the collateral received in relation to such transactions complied with ESG standards as determined by the relevant investment manager, sub-portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards were identified by reference to an appropriate ESG index and incorporated as a minimum ESG screens substantially similar to those of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Nasdaq Global Artificial Intelligence and Big Data Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of companies engaged in artificial intelligence; robotics; automotive innovation; healthcare innovation; new energy & environment; internet of things; and data computing & processing. The Parent Index is used as the universe of eligible securities for the Reference Index. The constituents of the Reference Index are determined by applying thematic selection criteria to the constituents of the Parent Index. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria.

The Reference Index utilises ESG Risk Scores from Morningstar Sustainalytics ("Sustainalytics"), a leading independent ESG and corporate governance research, ratings and analytics firm. The ESG Risk scores are categorized across five risk levels: negligible (0–10), low (10–20), medium (20–30), high (30–40) and severe (40+). Further information regarding ESG Risk Scores can be found on the company website https://www.sustainalytics.com/esg–ratings.

Any company from the eligible universe which breaches the following criteria shall be excluded from the Reference Index:

• ESG Risk Score of at least 40;
• Non–compliance of the United Nations Global Compact Principles; and
• Involvement of certain degrees in tobacco products, thermal coal, oil sands, controversial weapons, civilian firearms, small arms and military contracting, nuclear weapons, depleted uranium, adult entertainment or gambling.
