Investing involves risk, including possible loss of principal. Stocks may decline in value. Funds investing in a single industry, country or in a limited geographic region generally are more volatile than more diversified funds. India is an emerging market country and exhibits significantly greater market volatility from time to time in comparison to more developed markets. Special risks associated with investing in Indian companies include less developed securities markets (which can lead to uncertainty and higher transaction costs), exposure to currency fluctuations, political and legal uncertainty, greater government control over the economy and the threat of conflict from persistent religious and border disputes. This Fund is non-diversified and can take larger positions in fewer issues, increasing its potential risk. An investment in this Fund should be considered only as a supplement to a complete investment program for those investors willing to accept the risks associated with that fund. See the prospectus for details.

This report must be preceded or accompanied by a prospectus. We advise you to consider the Fund's investment objectives, risk factors, and charges and expenses carefully before investing. The prospectus contains this and other important information about the Fund, which can be requested by calling (844) 851-4255, or visit dws.com/etfreports to view or download a prospectus. Please read the prospectus carefully before you invest.
