

Xtrackers ETCs

Product offering

Xtrackers
by //DWS

With EUR 1085 billion of assets under management (as of 31.12.2025), DWS is one of the world's leading investment organizations.

The Xtrackers ETF platform, which was launched in 2010, sits alongside actively managed products as a core business area.

In addition, DWS also offers Xtrackers ETCs, which are exchange-traded commodities (ETCs). In a similar way to how ETFs are designed to facilitate the taking of market exposures via an exchange-traded security, Xtrackers ETCs let investors gain exposure to the performance of commodities in a straight forward, transparent and efficient manner, and without having to trade the underlying futures contracts or commodities, or taking physical delivery.

Xtrackers ETCs are continuously quoted during exchange trading hours and can be bought or sold via your bank or broker on the relevant stock exchange on which they are listed.

Key Advantages of Xtrackers Physical precious metals ETCs

- Convenience: An easy way to gain exposure to spot returns of the underlying precious metal.
- Liquidity of Xtrackers ETC: Liquid and traded intra-day on major European stock exchange with intra-day market making.
- Minimal tracking error: Returns of the ETCs are equal to the spot returns of the underlying metal minus any applicable fees and adjusted in accordance with the FX hedge.
- Physical ownership: Backed by the corresponding physical metal.
- Transparent to value: Precious metal prices are published daily in major newspapers, TV and other news sources.
- Segregated: The physical metal is stored in secure accounts and each ETC series has a security over specific metal accounts held by the custodian.
- Currency hedging: Currency hedged ETCs have a daily currency hedging mechanism designed to minimize currency fluctuations ensuring full investment in the underlying physical precious metal.

Key Risk Factors

- Xtrackers ETCs are not principal protected investments, therefore an investor's capital will be at risk up to a total loss.
- Prices of precious metals, are generally more volatile than prices of other asset classes.
- Investments in ETC securities will not accrue any interest and performance is subject to the deduction of the product fee.
- The value of an investment in ETC securities may go down as well as up and past performance is not a good indicator of future performance.
- Investing in ETC securities will not make an investor the owner of the relevant metal.
- Pricing of the ETC securities on the secondary market may be at a significant discount or premium compared to the Value per ETC Security (intrinsic value) published by the Issuer.
- Currency hedging component of ETC securities: In case the issuer has made a profit on a currency hedging component between relevant observation dates, the issuer and the investors will have an unsecured credit exposure to the Series Counterparty for such a profit which will be settled in accordance with the terms of each programme.

For a full description of relevant risk factors, please refer to the prospectus.
