

Key Investor Information for Investors in the United Kingdom

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Xtrackers NASDAQ 100 Swap UCITS ETF

Share class: 1C, ISIN: IE000472H9T4, Security code: DBX0W6, Currency: USD

a sub-fund of Xtrackers (IE) plc. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. **INVESTMENT OBJECTIVE:** The aim is for your investment to track the performance, before fees and expenses, of the NASDAQ-100 Index (index) which is designed to track the performance of shares from 100 of the largest US and international non-financial companies listed on the NASDAQ Stock Market, based on market capitalisation, that comply with certain eligibility and liquidity criteria. **DESCRIPTION OF INDEX:** The index reflects companies across major industry groups including computer hardware and software, telecommunications, retail/wholesale trade and biotechnology. **INDEX REBALANCING, CALCULATION AND ADMINISTRATION:** The index is administered by Nasdaq Inc. The index is calculated on a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax. The index is reviewed on at least an annual basis and rebalanced on at least a quarterly basis. **INVESTMENT POLICY:** To achieve the aim, the fund will invest in transferable securities and enter into financial contracts (derivatives) with one or more counterparties relating to

the transferable securities and the net or gross total return version of the index (swap index), in order to obtain the return on the swap index. The gross total return version of the index calculates the performance of the stocks assuming that all dividends and distributions are reinvested on a gross basis. The swap index shall be selected in the absolute discretion of the Investment Manager. **FURTHER INFORMATION:** Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 1 per cent. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund does not invest directly in the components of the index and its returns will be dependent on the performance of the derivatives used. **COUNTERPARTY RISK:** The fund may enter into one or more derivatives with one or more counterparties. If any of the counterparties fails to make payments (for example, becomes insolvent) this may result in your investment suffering a loss. **CONFLICTS OF INTEREST RISK:** DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. **NO GUARANTEE RISK:** The fund is not guaranteed

and your investment is at risk. The value of your investment may go down as well as up. **SHARES RISK:** The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events. **REGION CONCENTRATION RISK:** The Fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets. **RULES BASED INDEX RISK:** The index is rules-based and is not capable of being adjusted to take into account changing market circumstances. As a result you may be negatively affected by, or may not benefit from, the lack of such adjustments in changing market circumstances. **DERIVATIVES RISK:** The fund may use derivatives to try to reduce movements in currency exchange rates between the currency of the fund's assets and the currency of the fund's shares. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investment. The derivative used to gain exposure to the swap index may be adjusted to reflect certain expenses in relation to taxes and/or buying, selling, borrowing, financing or custody costs. These replication costs may result in the fund and your investment suffering a loss. A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.
