Xtrackers MSCI EM Asia Screened Swap UCITS ETF

Share class: 1D, ISIN: LU2296661775, Security code: A2QNNH, Currency: USD

a sub-fund of Xtrackers. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. **INVESTMENT OBJECTIVE:** The aim is for your investment to reflect the performance of the MSCI Emerging Markets Asia Select Screened Index (index). **DESCRIPTION OF INDEX:** The index is based on the MSCI Emerging Markets Asia Index (the Parent Index), which is designed to reflect the performance of the shares of certain large and medium capitalisation companies from Asian emerging markets. In order to be eligible for inclusion in the index, companies must be eligible for inclusion in the Parent Index and must meet certain environmental, social and governance (ESG) screening criteria. **ESG CRITERIA:** Securities which breach certain ESG standards, as disclosed in the prospectus and/or supplement, are excluded. The index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("GHG") intensity of the index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved. The remaining securities are then weighted by their free-float adjusted market capitalisation and are also subject to certain country weight adjustments as well as an 18% cap on the combined weight of Indian constituents. **INDEX**

REBALANCING, CALCULATION AND ADMINISTRATION: The index is administered by MSCI Limited. The index is calculated on a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax. The index is reviewed and rebalanced at least quarterly. **INVESTMENT POLICY:** To achieve the aim, the fund will invest in transferable securities and enter into financial contracts (derivatives) with one or more swap counterparties relating to the transferable securities and the index, in order to obtain the return on the index. **FURTHER INFORMATION:** Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 2 per cent. The currency of the fund is USD. The fund distributes up to four times per annum. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund does not invest directly in the components of the index and its returns will be dependent on the performance of the derivatives used. **COUNTERPARTY RISK:** The fund may enter into one or more derivatives with one or more counterparties. If any of the counterparties fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss. **CONFLICTS OF INTEREST RISK:** DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. **NO GUARANTEE RISK:** The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. **SHARES RISK:** The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical

region and political events. **EMERGING MARKETS RISK:** The fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks than well developed economies. Political unrest and economic downturn may be more likely and will affect the value of your investment. **SUSTAINABILITY RISK:** The ESG screening criteria are embedded within the index selection process, which seeks to exclude securities issued by companies involved in certain activities. The investment manager is not responsible for monitoring the screening process or confirming that all securities which pass the screening process are issued by companies with adequate ESG standards. The company is solely relying on the activities conducted by and information provided by the administrator of the index and MSCI ESG Research LLC for the ESG screening. ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the index administrator may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the index. **RULES BASED INDEX RISK:** The index is rules based and is not capable of being adjusted to take into account changing market circumstances. **DERIVATIVES RISK:** The derivatives used to gain exposure to the index may be adjusted to reflect certain expenses in relation to taxes and/or buying, selling, borrowing, financing or custody costs. These replication costs may result in the fund and your investment suffering a loss.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
