Key Risks

The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events. The Fund will enter into a derivative with a counterparty. If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss. The Fund is exposed to less economically developed economies (known as frontier / pre-emerging markets) which involve much greater risks than well-developed economies and emerging markets. Political unrest, less government regulation, economic downturn and limited liquidity may be much more likely and could therefore affect the value of your investment. The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss.
