Reference Index key features

The Bloomberg MSCI Global Aggregate Sustainable and SRI Currency Neutral Index aims to reflect the performance of the following market:

- Treasury, government-related, corporate and securitised bonds
 - Broadly diversified exposure including bonds issued in both developed and emerging markets in one of the eligible currencies
 - Bonds with maturities of at least 1 year
 - Only bonds issued by companies with a MSCI ESG rating of BBB or above and a MSCI ESG Controversy score of 1 or above are included
 - Bonds issued by companies involved in the following business lines/activities are excluded: Alcohol, Tobacco, Gambling, Adult Entertainment, Genetically Modified Organisms (GMO), Nuclear Power, Civilian Firearms, Conventional Weapons, Nuclear Weapons, Controversial Weapons and certain Military Weapons as further described in the index exclusion rules
 - Currency, Sector and Maturity Neutral Reweighting
- Additional information on the Index and the general methodology behind the Bloomberg indices can be found on Bloomberg index website (<https://www.bloombergindeces.com/>).

Key Risks

- **The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss.**
- The Fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks than well developed economies. Political unrest and economic downturn may be more likely and will affect the value of your investment.
- The Fund will use financial contracts (known as derivatives) to try to reduce the effect of currency fluctuations between the currency of its assets and the currency of the shares. This may not be effective and may prevent the Fund from benefitting from an increase in value of (or expose a Fund to the decrease in value of) a particular currency.
- Bonds are exposed to credit risk and interest rate risk. There is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. If interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment.

Additional Information

A Glossary of Terms is available at Xtrackers.com.
 ETF performance is shown on NAV basis, net of fees and index replication costs. Index performance is calculated on a total return basis. The performance of currency hedged share classes may differ significantly from the performance of the index which is unhedged. Unhedged share class fees may vary from the hedged share class. On restructuring event dates, index values are re-based to match the index level of the previous index. Volatility is calculated since launch of the share class.
