#### **Reference Index key features**

The Solactive ISS ESG Emerging Markets Net Zero Pathway Index aims to reflect the performance of the following market:

 Large and mid-capitalisation companies across global emerging markets which are selected and weighted with the aim of seeking alignment with EU Paris Aligned Benchmark standards and certain net zero frameworks
 ESG exclusions

- Reviewed on a semi-annual basis

Additional information on the index, selection and weighting methodology is available at www.solactive.com.

### Key Risks

- —The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss.
- The Fund is exposed to the currency markets which may be highly volatile. Large price swings can occur in such markets within very short periods and may result in your investment suffering a loss.
- The Fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks than well developed economies. Political unrest and economic downturn may be more likely and will affect the value of your investment.
- The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events.
