A. Overview of the Changes

The Index Administrator announced that enhanced criteria would be applied to the existing Environmental, Social, and Governance exclusion criteria (the "ESG Exclusion Criteria") of each Reference Index.

As of the Effective Date, the index methodology was updated to reflect enhanced oil & gas and power generation screens.

As a result, the following enhanced ESG Exclusion Criteria will be applied to exclude companies that:

- are unrated or missing coverage by MSCI ESG Research;
- are assigned an MSCI ESG Rating of CCC;
- have any involvement in controversial weapons;
- are classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas, and power generation; and
- fail to comply with the United Nations Global Compact principles, have an MSCI ESG Controversies Score of 0, or have an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 (“PAB Exclusions”).

For the avoidance of doubt, the Funds’ investment objectives, investment policies, risk profiles and fees remain unchanged.

For full details about the changes to the index methodology, please refer to the website of the Index Administrator on www.msci.com/index-methodology.
