**Full year 2022 performance figures for Share Classes**

The performance figures in the Directors' report are calculated based on the last official NAV published for 2022, which is in some cases different than the NAV used for the purpose of the annual report. NAVs used for the annual report are all dated 31/12/2022 (except for liquidated Sub-Funds or Share Classes) and have been specially calculated for the purpose of the annual report; for the avoidance of doubt, the NAVs as published in the annual report are not NAVs on which any Shareholder could have traded. Computing performance figures with the NAV included in the annual report will lead to different results than the table.

## **REPORT OF THE REVISEUR D'ENTREPRISES AGREE**

### ***Report on the audit of the financial statements***

#### ***Opinion***

We have audited the financial statements of Xtrackers II and each of its sub-funds (“the Fund”), which comprise the statement of net assets and the statement of investments as at 31 December 2022 and the statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Xtrackers II and each of its sub-funds as at 31 December 2022, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

#### ***Basis for opinion***

We conducted our audit in accordance with the EU Regulation N° 537/2014, the Law of 23 July 2016 on the audit profession (“Law of 23 July 2016”) and with International Standards on Auditing (“ISAs”) as adopted for Luxembourg by the Commission de Surveillance du Secteur Financier (“CSSF”). Our responsibilities under the EU Regulation N° 537/2014, the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the « Responsibilities of “réviseur d’entreprises agréé” for the Audit of the Financial Statements » section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (“IESBA Code”) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### ***Emphasis of Matter***

We draw attention to Note 17 of these financial statements, which indicates the decision of the Board of Directors of the Fund to close the sub-fund Xtrackers II iTraxx Europe Swap UCITS ETF on 22 March 2023 and the sub-fund Xtrackers II iTraxx Crossover Swap UCITS ETF on 26 April 2023. The financial statements of the concerned sub-funds have therefore been prepared using a non-going concern basis of accounting. Our opinion is not modified in respect of this matter.

### ***Key audit matters***

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of the audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

#### ***Valuation of Total Return Swaps***

*Why the matter was considered to be one of the most significant in the audit?*

Sub-funds with an Indirect Investment Policy (“Indirect Replication Funds”) may not invest directly in the constituents of the Reference Index. Instead, the exposure to the performance of the Reference Index is achieved by way of a conclusion of Total Return Swaps as disclosed in Note 1 b) Investment Objectives and Policies of the financial statements.

Following this synthetic ETF Strategy, the sub-funds rely on a mechanism which allows them to indirectly participate in a performance of an index. This is a process involving multiple steps and a higher complexity.

Based on the nature of the valuation model in use, its complexity and magnitude in the NAVs of the sub-Funds, the valuation of Total Return Swaps is considered to be the key driver of the Funds’ performance. Accordingly it is considered to be a key audit matter.

Refer to Note 2 a) (vii) of the financial statements for accounting policies in relation to Total Return Swaps valuation methodology.

*How the matter was addressed in our audit:*

Our procedures over the valuation of Total Return Swaps included, but were not limited to:

- Gaining an understanding of the valuation and accounting process in place between the Management Company, Portfolio Manager and the Administrator of the relevant sub-Funds;
- Reperforming valuation of Total Return Swaps by involvement of our own valuation specialists;
- Agreeing the method and amounts of unrealized/realized gains and losses related to Total Return Swaps disclosed in the Financial Statements;

### ***Other information***

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the “réviseur d’entreprises agréé” thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

### ***Responsibilities of the Board of Directors of the Fund for the financial statements***

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund’s and each of its sub-funds’ ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

### ***Responsibilities of the “réviseur d’entreprises agréé” for the audit of the financial statements***

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the “réviseur d’entreprises agréé” that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the EU Regulation N° 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the EU Regulation N° 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its sub-funds (except for the sub-funds where a decision or an intention to close exists) to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our report unless law or regulation precludes public disclosure about the matter.

### ***Report on other legal and regulatory requirements***

We have been appointed as "réviseur d'entreprises agréé" by the General Meeting of the shareholders on 22 April 2022 and the duration of our uninterrupted engagement, including previous renewals and reappointments, is two years.

We confirm that the prohibited non-audit services referred to in the EU Regulation N° 537/2014 were not provided and that we remained independent of the Fund in conducting the audit.

5. On 7 October 2022, the Company informed shareholders of Xtrackers II ESG EUR CORPORATE BOND UCITS ETF and Xtrackers II ESG EUR CORPORATE BOND SHORT DURATION UCITS ETF (each a “**Sub-Fund**” and together the “**Sub-Funds**”) that Bloomberg Index Services Limited, in its capacity as Index Administrator of the Reference Index of each Sub-Fund (as set out in the table below), had announced on 15 September 2022 that it would make certain changes to the index methodology and name of each Reference Index which would become effective as of 1 November 2022 (the “**Effective Date**”). As of the Effective Date, each Reference Index would aim to comply with the minimum standards laid out for EU Paris Aligned Benchmarks (“**EU PAB**”) in the relevant EU PAB Regulation and would apply certain additional environmental, social and governance criteria. As a result of the aforementioned changes, the Sub-Funds would be subject to the disclosure requirements of a financial product under Article 9(3) SFDR. This determination was made solely on the basis that, as of the Effective Date, the Reference Index that each Sub-Fund reflects would have a reduction of carbon emissions as its objective. Prior to the Effective Date, the Sub-Funds were subject to the disclosure requirements of a financial product under Article 8(1) SFDR. Furthermore, as a result of the aforementioned changes, the Company resolved to change the name of each Sub-Fund, as follows:

6. On 2 December 2022, the Company informed Shareholders of Xtrackers II EUR CORPORATE BOND SRI PAB UCITS ETF and Xtrackers II EUR CORPORATE BOND SHORT DURATION SRI PAB UCITS ETF that, as part of a review of the latest market and regulatory environment, the Management Company, has determined that each Sub-Fund should disclose pursuant to Article 8(1) of the Sustainable Finance Disclosure Regulation (“**SFDR**”). The Sub-Funds previously disclosed pursuant to Article 9(3) of SFDR. Consequently, the Board of Directors decided to amend the relevant product annex of each Sub-Fund to reflect this change with effect from 16 December 2022.

For other changes to the Company during the year, please refer to point 4 in the section “Information for Shareholders”.

## b) Investment Objectives and Policies

A Sub-Fund may carry out its Investment Objective via an Indirect Investment Policy and/or a Direct Investment Policy as more fully described in the following paragraphs.

*Sub-Funds with an Indirect Investment Policy*

The Sub-Funds with an Indirect Investment Policy are identified by the reference “SWAP” in their name. Sub-Funds with an Indirect Investment Policy (“Indirect Replication Funds”) may not invest directly in the constituents of the Reference Index. Instead, the exposure to the performance of the Reference Index will be achieved by way of derivative transactions and/or instruments (the “Derivative Transaction(s)”). In particular, an Indirect Replication Fund will conclude OTC swap transactions negotiated at arm’s length with one or more Swap Counterparties (the “OTC Swap Transaction(s)”). For the avoidance of doubt, the OTC Swap Transactions would qualify as total return swaps within the meaning of Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 (the “SFTR Regulation”). Indirect Replication Funds do not currently provide for the possibility to enter into securities lending agreements, buy-sell or sell-buy back transactions, margin lending transactions or repurchase agreements (and/or reverse repurchase agreements), as covered by the SFTR Regulation.

In order to achieve its Investment Objective and in accordance with the Investment Restrictions, an Indirect Replication Fund may at any time invest part or all of the net proceeds of any issue of its Shares:

- (a) in Invested Assets and use one or more Derivative Transactions the purpose of which is to exchange all or part of the performance and/or income of such Invested Assets to gain exposure to the Reference Index (an “Unfunded Swap”) (refer to Note 4); and/or,
- (b) in one or more Derivative Transactions the purpose of which is to exchange all or part of the invested proceeds to gain exposure to the Reference Index (a “Funded Swap”).

The Invested Assets that can be subject to an Unfunded Swap are UCITS eligible fixed income securities, unless otherwise specified in the relevant Product Annex.

For Funded Swaps, the maximum proportion of Net Asset Value that is subject to Derivative Transactions is 110 percent, excluding the impact of fees and foreign exchange (“FX”) hedging arrangements, as applicable; whilst the expected proportion of Net Asset Value that is subject to Derivative Transactions is 100 percent of the Net Asset Value, excluding the impact of fees and FX hedging arrangements, as applicable, unless otherwise specified in the relevant Product Annex.

For Unfunded Swaps, the maximum proportion of the Net Asset Value that is subject to Derivatives Transactions in relation to the Reference Index is 110 percent of the Net Asset Value, excluding the impact of fees and FX hedging arrangements, as applicable; whilst the expected proportion of the Net Asset Value that is subject to Derivative Transactions in relation to the Reference Index is 100 percent of the Net Asset Value, excluding the impact of fees and FX hedging arrangements, as applicable, unless otherwise specified in the relevant Product Annex.

For Unfunded Swaps, the maximum and expected proportion of the Net Asset Value that is subject to Derivatives Transactions in relation to Invested Assets is the same proportion as the proportion of the value of Invested Assets to the Net Asset Value of the relevant Sub-Fund.

Notes to the Financial Statements (continued)

**1. General (continued)**

b) Investment Objectives and Policies (continued)

An Indirect Replication Fund may, with due regard to the best interests of its Shareholders and subject to any conditions set forth in each specific Product Annex, decide from time to time to switch partially or totally from a Funded Swap to an Unfunded Swap, and vice versa.

The Invested Assets, Derivative Transactions and any techniques used to link the Invested Assets to the Reference Index or the Derivative Transactions, or the invested proceeds to the Reference Index will be managed by the relevant Investment Manager and/or the Sub-Portfolio Manager. The management of the Invested Assets will generally not involve the active buying and selling of securities on the basis of investment judgement and economic, financial and market analysis.

In principle, the return that the Shareholder will receive will largely be dependent on the performance of the Invested Assets, the performance of the Reference Index and the performance of any techniques used to link the Invested Assets and/or the net proceeds from the issue of Shares to the Reference Index.

Depending on the value of the Derivative Transactions and its chosen policy, an Indirect Replication Fund may be at any time fully or partially exposed to one or more counterparties (including one or more Swap Counterparties), in which case appropriate collateral or other counterparty risk mitigation arrangements compliant with the Regulations and EMIR will be taken/implemented and/or payment will be received from the Derivative Transactions counterparties so that the percentage of the counterparty risk exposure remains within the limits set out in the Regulations and EMIR (refer to Note 9).

*Sub-Funds with a Direct Investment Policy*

Sub-Funds with a Direct Investment Policy ("Direct Replication Funds") may carry out their investment objective by investing in a portfolio of transferable securities or other eligible assets that may comprise either:

- (i) all, or a substantial number of, the constituents of the Reference Index (such Sub-Fund a "Full Replication Fund"), or
- (ii) an optimised sample of the constituents of the Index, or unrelated transferable securities or other eligible assets (such Sub-Fund an "Optimised Replication Fund").

Optimised Replication Funds may not hold every constituent or the exact weighting of a constituent in the Reference Index but will seek to provide a return similar to that of its Reference Index by (i) investing either in a sub-set of the constituents of the Reference Index, (ii) seeking to gain exposure to the Reference Index by utilising optimisation techniques and/or (iii) by investing in securities that are not part of that Reference Index. Use of these investment techniques, the implementation of which is subject to a number of constraints detailed in the "Investment Restrictions" section of the Prospectus, may not produce the intended results.

Full Replication Funds may from time to time not contain all of the constituents of the Reference Index, and accordingly such Sub-Funds may hold other transferable securities or other eligible assets in accordance with the Investment Restrictions. The extent to which a Full Replication Fund does not contain all of the constituents of the Reference Index will vary, and will be dependent on a number of factors which may include, but are not limited to; the nature and number of the constituents of the Reference Index (for example, where a Reference Index comprises a large number of securities, contains a number of illiquid securities or where the availability of constituent securities for purchase is limited), legal or regulatory restrictions, the size of the Sub-Fund, and the utilisation of efficient portfolio management techniques.

A Direct Investment Policy provides for the possibility to enter into securities lending agreements but does not currently provide for the possibility to enter into margin lending transactions or repurchase agreements (and/or reverse repurchase agreements), buy-sell or sell-buy back transactions or total return swaps as covered by the SFTR Regulation. Should the Board of Directors decide to provide for such possibility, the Prospectus will be updated prior to the entry into force of such decision in order for the Company to comply with the relevant disclosure requirements of the SFTR Regulation for these Direct Replication Funds.

The types of securities in which Direct Replication Funds may invest include American depositary receipts ("ADRs"), global depositary receipts ("GDRs"), and/or non-voting depositary receipts ("NVDRs"). Direct Replication Funds may also invest in bank deposits, Money Market Instruments and money market funds to carry out their investment objective and/or for treasury purposes. Direct Replication Funds may receive income in respect of the securities held by them. Taxes may be imposed on income received from securities held by a Sub-Fund.

Direct Replication Funds may from time to time invest temporary cash balances (such as subscription proceeds which are pending investment or any other temporary cash balances) in FDIs to gain market exposure and to seek to reduce Tracking Error.

The Investment Manager may exclude from the portfolios of the Sub-Funds certain securities as outlined in the section headed "Sustainability-related disclosures under SFDR and EU Taxonomy Regulation" of Prospectus.

**1. General (continued)**

## b) Investment Objectives and Policies (continued)

In addition, the Investment Manager reserve the right to exclude from the portfolios of the Sub-Funds any securities which do not comply with the Investment Manager's policies. This will include those securities which have been identified as parties involved in the production or manufacturing of controversial conventional weapons, production of delivery devices and the deliberate and knowing production of primary key components of controversial conventional weapons, each as determined by the DWS Controversial Conventional Weapons identification methodology.

Notwithstanding the foregoing, it should be noted that due to exceptional circumstances, such as, but not limited to, disruptive market conditions or extremely volatile markets, instances may arise which cause a Direct Replication Fund's tracking accuracy to diverge substantially from the Reference Index. Due to various factors, including the Sub-Fund's fees and expenses involved, the concentration limits described in the Investment Restrictions, other legal or regulatory restrictions, and, in certain instances, certain securities being illiquid, it may not be possible or practicable to purchase all of the constituents in proportion to their weighting in the Reference Index or purchase certain of them at all.

## c) The Shares

The Shares will be issued by the Company exclusively in relation to Sub-Funds with the Investment Policies described in the Prospectus and may be subscribed in cash or in kind (or a combination of both in cash and in kind).

The Shares may be differentiated between Distribution Shares (identified by the letter "D") and Capitalisation Shares (identified by the letter "C"). Other Classes may be offered with specific features such as fee structures, minimum subscription amount, investor eligibility criteria or other specific features. The Shares will be listed for trading on one or more stock exchanges unless otherwise specified in the relevant Product Annex of the Prospectus.

**2. Accounting policies**

The financial statements of the Company have been prepared according to accounting principles generally accepted in Luxembourg and applicable for investment funds. The significant accounting policies used are as follows:

## a) Valuation of investments

The Net Asset Value of the Company is at any time equal to the total of the Net Asset Values of the Sub-Funds.

The Net Asset Value of the Sub-Funds shall be determined in accordance with the following rules:

- (i) the value of any cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued and not yet received is deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof shall be determined after making such discount as may be considered appropriate in such case to reflect the true value thereof;
- (ii) the value of all securities which are listed or traded on an official stock exchange or traded on any other Regulated Market will be valued on the basis of the last available prices on the Business Day immediately preceding the Valuation Day or on the basis of the last available prices on the main market on which the investments of the Sub-Funds are principally traded. The Board of Directors will approve a pricing service which will supply the above prices. If, in the opinion of the Board of Directors, such prices do not truly reflect the fair market value of the relevant securities, the value of such securities will be determined in good faith by the Board of Directors either by reference to any other publicly available source or by reference to such other sources as it deems in its discretion appropriate;
- (iii) securities not listed or traded on a stock exchange or a Regulated Market will be valued on the basis of the probable sales price determined prudently and in good faith by the Board of Directors;
- (iv) securities issued by open-ended investment funds shall be valued at their last available net asset value or in accordance with item (ii) above where such securities are listed;
- (v) the liquidating value of futures, forward or options contracts that are not traded on exchanges or on other organised markets shall be determined pursuant to the policies established by the Board of Directors, on a basis consistently applied. The liquidating value of futures, forward or options contracts traded on exchanges or on other organised markets shall be based upon the last available settlement prices of these contracts on exchanges and organised markets on which the particular futures, forward or options contracts are traded; provided that if a futures, forward or options contract could not be liquidated on such Business Day with respect to which a Net

## a) Valuation of investments (continued)

Asset Value is being determined, then the basis for determining the liquidating value of such contract shall be such value as the Board of Directors may deem fair and reasonable. The net realised gain / (loss) on forward foreign exchange is included in the financial statements as “Net realised gain / (loss) on foreign exchange”;

- (vi) liquid assets and money market instruments may be valued at nominal value plus any accrued interest or using an amortised cost method; this amortised cost method may result in periods during which the value deviates from the price the relevant Sub-Fund would receive if it sold the investment. The Management Company may, from time to time, assess this method of valuation and recommend changes, where necessary, to ensure that such assets will be valued at their fair value as determined in good faith pursuant to procedures established by the Board of Directors. If the Board of Directors believes that a deviation from the amortised cost per Share may result in material dilution or other unfair results to Shareholders, the Board of Directors shall take such corrective action, if any, as it deems appropriate, to eliminate or reduce, to the extent reasonably practicable, the dilution or unfair results;
- (vii) the total return swap (TRS) transactions will be consistently valued based on a calculation of the net present value of their expected cash flows. TRS are marked to market at each NAV Date;
- (viii) all other securities and other permissible assets as well as any of the above mentioned assets for which the valuation in accordance with the above sub-paragraphs would not be possible or practicable, or would not be representative of their fair value, will be valued at fair market value, as determined in good faith pursuant to procedures established by the Board of Directors.

## b) Investment transactions

The net realised gain / (loss) on sale of investments is determined on the basis of the average cost of investments sold. Investment transactions are accounted for on a trade date basis.

The net realised gain / (loss) on sale of investments is disclosed in the financial statements as “Net realised gain / (loss) on investments”.

The cost of inflation-linked bonds is adjusted for inflation and these adjustments are recognised as interest on bonds.

## c) Conversion of foreign currencies

Accounting records are kept for each Sub-Fund in its reference currency. The Combined Statement of Net Assets and Statement of Operations and Changes in Net Assets of the Company are presented in Euro based on the exchange rate prevailing at the date of the Statement of Net Assets.

Income and expenses in currencies other than the reference currency of a Sub-Fund are translated into the reference currency of the relevant Sub-Fund at the exchange rates prevailing at the transaction date.

Assets and liabilities in currencies other than the reference currency of a Sub-Fund are translated into the reference currency of the relevant Sub-Fund at the exchange rates prevailing at the date of the Statement of Net Assets.

The purchase price of the securities purchased in currencies other than the reference currency of the Sub-Fund are translated into the reference currency of the relevant Sub-Fund at the exchange rates prevailing at the date of the purchase of the securities.

The exchange rates used as at 31 December 2022 are:

## d) Income

Interest is recorded on an accrual basis net of withholding tax and includes amortization on a straight line basis of premiums and accretion of discounts that are disclosed in the financial statements as “Accretion of discount or Amortization of premium”. Dividends are accounted for on the ex-date, net of withholding tax.

## e) Net Asset Value

This annual report is prepared on the basis of the last available net asset value of the Sub-Funds as at 31 December 2022.

**3. Taxation of the Company**

Under current law and practice, the Company is not liable to any Luxembourg income taxes, stamp or other tax. Investment income and capital gains, if any, received or realised by the Company may, however, be subject to taxation in the country of origin at varying rates, which normally cannot be recovered by the Company.

Although the Company is, in principle, subject in Luxembourg to a subscription tax (“*Taxe d’Abonnement*”) at an annual rate of 0.05% or 0.01% for the category of shares reserved to institutional investors, all Sub-Funds which are index-tracking ETFs are exempt from such tax as (i) their Shares are listed or traded on at least one stock exchange or another regulated market operating regularly, recognised and open to the public; and (ii) their exclusive objective is to reflect the performance of one or more indices, it being understood that this condition of exclusive objective does not prevent the management of liquid assets, if any, on an ancillary basis, or the use of techniques and instruments used for hedging or for purposes of efficient portfolio management. A Grand-Ducal regulation may determine additional or alternative criteria with respect to the indices under that exemption.

**4. Total Return Swaps**

The Total Return Swap agreements are concluded at the beginning of the life of the Sub-Funds with the transferable securities and money market instruments having a similar cost to the notional value of the Reference Index. This position may however change during the life of the swap whereby the cost of the transferable securities and money market instruments, including net purchased accrued interest, may become higher / lower than the notional value of the Reference Index due to additional purchases / sales of transferable securities and money market instruments compared to the index notional.

The “Net amount to swap counterparty and unrealized result on swap” shown in the statement of net assets represents the net gains / losses on the total return swaps, adjusted for (i) the total return swaps’ costs and (ii) its fees (i.e.: enhancement accruals).

The split of Net realised gain / (loss) on swap and Change in net unrealised gain / (loss) on swap shown in the Statement of Operations as at 31 December 2022, is provided in the table below.

**7. Forward Foreign Exchange Contracts (continued)**

Barclays Bank Ireland PLC, Royal Bank of Canada (UK) and State Street Bank International GmbH are the counterparties to these open forward foreign exchange contracts.

**8. Securities lending****Securities lending (until 27 June 2022)**

Sub-Funds with a Direct Investment Policy may enter into securities lending transactions (“Securities Lending Transactions”) for up to 50% of their assets to generate additional income and therewith offset part or all of their costs. Such transactions are strictly regulated and must, amongst other things, be able to be terminated at any time at the initiative of the Company. Securities Lending Transactions nonetheless give rise to certain risks including valuation and operational risks and market and counterparty risks.

Depending on the value of the Securities Lending Transactions and its chosen policy, a Sub-Fund may be at any time fully or partially exposed to one or more counterparties, in which case appropriate collateral or other counterparty risk mitigation arrangements compliant with, (i) Part I of the Luxembourg law of 17 December 2010, as amended, (ii) any amendment or replacement legislation thereto for the time being in force, (iii) any regulation of any type taken in pursuance of (i) and (ii), (iv) the Directive 2014/91/EU of the European Parliament and of the Council of 23 July 2014 as regards depositary functions, remunerations policies and sanctions, including its mandatory implementing legislations on an EU or Home Member State level, (v) any sub-custodian agreement entered into between the Securities Lending Agent (as defined below), the Company, the Management Company and State Street Bank International GmbH, Luxembourg Branch (“SSBL”) as well as (vi) any rule, guideline and general or specific position from time to time adopted by the CSSF pursuant thereto (the “Regulations”) will be taken/implemented and/or payment will be received from the Securities Lending Transactions counterparties so that the percentage of the counterparty risk exposure remains within the limits set out in the Regulations.

For the Sub-Funds with a Direct Investment Policy, the Company has appointed Deutsche Bank AG, acting through its Frankfurt am Main head office and its London and New York branches as the Securities Lending Agent (the “Securities Lending Agent”). The Securities Lending Agent has been authorised (i) to enter into Securities Lending Transactions on behalf of the Company and (ii) to invest any cash received/held on behalf of the Company as collateral pursuant to such Securities Lending Transactions, in accordance with and within the limits set forth in the Agency Securities Lending and Repurchase Agreement, the rules set out in the Prospectus and the Regulations.

The Depository has delegated the safekeeping function of certain non-cash collateral received by the Sub-Funds to Deutsche Bank AG.

Any income generated by Securities Lending Transactions (reduced by any applicable direct or indirect operational costs and fees arising therefrom and paid to the Securities Lending Agent and, as the case may be, to the relevant Investment Manager and/or the Sub-Portfolio Manager) will be payable to the relevant Sub-Fund. Unless otherwise specified in the relevant Product Annex and to the extent the Securities Lending Agent undertakes Securities Lending Transactions in relation to a Sub-Fund, the Securities Lending Agent, the relevant Investment Manager and/or the Portfolio Manager, as the case may be, shall receive a fee for the services provided in this respect.

During the financial period ending 30 June 2022, the Securities Lending Agent and DWS Investments UK Limited (“DWS UK”) received the following portions of the gross lending revenues generated, in order to cover their estimated direct or indirect operational costs and fees associated with the services provided in this respect and the oversight of the Securities Lending Transactions.

All securities lending transactions are settled in a bilateral way. The market value of securities lent is based on effective settlement for the trading activity between the Securities Lending Agent and the borrowing counterparty.

**Securities lending (as from 28 June 2022)**

With effect from 28 June 2022, the appointment of Deutsche Bank AG, acting through its Frankfurt am Main head office and its London and New York branches, as Securities Lending Agent has been terminated and the Investment Manager, DWS Investment GmbH, has taken over the provision of Securities Lending Services.

Sub-Funds with a Direct Investment Policy may enter into securities lending transactions (“Securities Lending Transactions”) for up to 100% of their assets to generate additional income and therewith offset part or all of their costs. Such transactions are strictly regulated and must, amongst other things, be able to be terminated at any time at the initiative of the Company. Securities Lending Transactions nonetheless give rise to certain risks including valuation and operational risks and market and counterparty risks.

Depending on the value of the Securities Lending Transactions and its chosen policy, a Sub-Fund may be at any time fully or partially exposed to one or more counterparties, in which case appropriate collateral or other counterparty risk mitigation arrangements compliant with the Regulations will be taken/implemented and/or payment will be received from the Securities Lending Transactions counterparties so that the percentage of the counterparty risk exposure remains within the limits set out in the Regulations.

For Sub-Funds permitted to enter into Securities Lending Transactions as described in the relevant Product Annex, the Investment Manager, DWS Investment GmbH, is authorised (i) to enter into Securities Lending Transactions on behalf of the Company and (ii) to invest any cash received/held on behalf of the Company as collateral pursuant to such Securities Lending Transactions, in accordance with and within separately agreed limits, the rules set out in the Prospectus and the Regulations.

Gross revenues generated by Securities Lending Transactions (reduced by any applicable direct or indirect costs arising therefrom and paid to the Management Company, the Investment Manager and other relevant service providers as further described in the relevant Product Annex) will be payable to the relevant Sub-Fund. Each Sub-Fund retained 70% of the gross revenues generated from Securities Lending Transactions. The Management Company received 30% of the gross lending revenues generated. Out of the 30% of the gross revenues it receives, the Management Company retains 5% of such 30% (that is 1.5% of the overall gross revenues generated from such transactions) for its own coordination and oversight tasks and pays the direct costs (e.g. transaction and collateral management costs) to external service providers. The remaining amount (after deduction of the Management Company costs and the direct costs) is paid to the Investment Manager for supporting the Management Company in initiating, preparing and implementing Securities Lending Transactions.

All Securities Lending Transactions are settled in a bilateral way.

The Company may have to provide variation margin for a Sub-Fund (i.e. collateral collected by a counterparty to reflect the results of the daily marking-to-market or marking-to-model of outstanding non-cleared OTC derivative contracts) to its counterparty to an OTC derivative transaction. In relation to the OTC derivative transactions entered into between the Company and counterparties (including Swap Counterparties), the Company may deliver or receive requested collateral by way of title transfer or by way of pledge, depending on the terms of the agreement between the relevant Sub-Fund and the counterparty.

The value of non-cash collateral pledged and cash collateral received by counterparty for each Sub-Fund is detailed in the following table, as at 31 December 2022:

## 10. Management Company Fee and Fixed Fee

### a) Management Company Fee

In accordance with and subject to the terms of the Management Company Agreement, the annual Management Company Fee will accrue on each calendar day and will be calculated on each Valuation Day on the basis of a percentage of (i) the last available Net Asset Value of each Sub-Fund or Class of Shares or (ii) the Initial Issue Price multiplied by the number of outstanding Shares of each Sub-Fund or Class of Shares (as indicated for each Sub-Fund or Class of Shares in the relevant Product Annex).

The Management Company is also entitled to receive reimbursement for any reasonable expenses that were made in its capacity as management company of the Company in the context of the execution of the Management Company Agreement and that were not reasonably foreseeable in the ordinary course of business.

Notwithstanding the above, the Management Company and the Company may agree on a different fee structure in respect of a certain Sub-Fund or Class of Shares, as indicated in the relevant Product Annex.

The Management Company may pay a Distribution Fee to the Distributor out of the Management Company Fee. A Distributor may re-allocate an amount of the Distribution Fee to a sub-distributor (as applicable). The Management Company shall remunerate the Investment Managers out of the Management Company Fee as agreed from time to time between the two parties. Each Investment Manager shall remunerate out of the applicable Investment Management Fee any appointed Sub-Portfolio Manager, as agreed from time to time between the parties.

### b) Fixed Fee

Under the terms of an arrangement between the Company and DWS Investments UK Limited<sup>(1)</sup> (the "Fixed Fee Agent"), the Fixed Fee Agent will, in exchange for the payment of a Fixed Fee calculated on the average daily Net Asset Value per Sub-Fund or per Class at a rate as specified in the table below and payable periodically, pay certain fees and expenses, unless otherwise specified in the relevant Product Annex.

The fees and expenses covered by the arrangement are the Administrative Agent Fee, the Depositary Fee, the Registrar, Transfer Agent and Listing Agent Fee, the annual tax in Luxembourg (if any) (the "*Taxe d'Abonnement*"), the formation expenses and certain Other Administrative Expenses.

The Fixed Fee does not include the following fees, expenses and costs:

- the Investment Management Fee;
- the Management Company Fee;
- the costs of any marketing agencies appointed by the Company or the Management Company to provide certain marketing and distribution services to the Company or the Management Company;

<sup>(1)</sup>Please refer to note 11. Related Parties.

### Notes to the Financial Statements (continued)

#### 10. Management Company Fee and Fixed Fee (continued)

##### b) Fixed Fee (continued)

- any taxes or fiscal charges which the Company may be required to pay, except the *Taxe d'Abonnement*, if any, or if it should be payable, any value added tax or similar sales or services tax payable by the Company (VAT) (all such taxes or fiscal charges), unless otherwise specified in the relevant Product Annex;
- expenses arising out of any advertising or promotional activities in connection with the Company; nor,
- any costs and expenses incurred outside of the Company's ordinary course of business such as extraordinary expenses (e.g. legal fees incurred in prosecuting or defending, a claim or allegation, by or against, the Company).

In particular, the Fixed Fee Agent will pay the invoices of legal advisers, local paying agents and translators provided and to the extent that these invoices do not in aggregate exceed the overall threshold of Euro ten million (10,000,000) per financial year and the Company will be liable to pay for any amount that exceeds this threshold. The Company will pay this amount out of the relevant Sub-Fund's assets to which the specific costs are attributed.

### 1. Online publication of investment portfolios, collateral holdings and swap exposures

Shareholders can view the swap exposures and investment portfolios or collateral holdings for each Sub-Fund on [www.etf.dws.com](http://www.etf.dws.com). The information is available under the “ETF Information” tab section for each Sub-Fund.

### 2. Adjustment to OTC Swap Transactions to reflect index replication costs

As per the Prospectus, each of the Swap Counterparties may enter into hedging transactions in respect of the OTC Swap Transaction(s). According to the OTC Swap Transaction(s) entered into between the Sub-Funds and the Swap Counterparty, the Sub-Funds shall receive the performance of the Reference Index adjusted to reflect certain index replication costs, taxes and any other transaction costs or charges incurred by the Swap Counterparty in relation to the OTC Swap Transaction. These costs may include, amongst other things, costs, taxes or other duties associated with the buying, selling, custody, holding or any other transactions relating to investments in transferable securities and/or OTC Swap Transactions and/or collateral. In extreme market conditions and exceptional circumstances, particularly in connection with less developed markets and emerging markets, such costs may increase significantly and as a result the OTC Swap Transaction Costs may increase. The Shareholders will therefore bear indirectly the OTC Swap Transaction Costs which may be passed on to certain Indirect Replication Funds by the Swap Counterparty and may affect the ability of the Indirect Replication Fund to achieve its Investment Objective. The OTC Swap Transaction Costs may also differ depending on the Reference Index whose performance the Sub-Funds aim to reflect. The OTC Swap Transaction Costs may also vary from time to time depending on actual market conditions.

•Situation 1: the Reference Index is “long” (i.e. its objective is to reflect the performance of its constituents). Then the index replication costs will be associated with (i) the buying and selling by the Swap Counterparty of the constituents of the Reference Index in order to reflect the Reference Index performance; or (ii) custody or other related costs incurred by the Swap Counterparty in relation to holding the constituents of the Reference Index; or (iii) taxes or other duties imposed on the buying or selling of the constituents of the Reference Index; or (iv) taxes imposed on any income derived from the constituents of the Reference Index; or (v) any other transactions performed by the Swap Counterparty in relation to the constituents of the Reference Index.

•Situation 2: the Reference Index is “leveraged” (i.e. its objective is to reflect the daily leveraged performance of the long version of the Reference Index). Then the index replication costs will be associated with (i) the buying and selling and any borrowing and/or financing of the constituents of the Reference Index in order to reflect the Reference Index performance, (ii) custody or other related costs incurred by the Swap Counterparty in relation to holding the constituents of the Reference Index, (iii) financing charges incurred to safeguard against severe market movements of the constituents of the Reference Index, (iv) unexpected financing costs in the event of severe market movements, (v) taxes imposed on any income derived from the constituents of the Reference Index, or (vi) any other transactions performed by the Swap Counterparty in relation to the constituents of the Reference Index.

•Situation 3: the Reference Index is “short” (i.e. its objective is to reflect the daily inverse performance of the long version of the Reference Index) or “short and leveraged” (i.e. its objective is to reflect the leveraged daily inverse performance of the long version of the Reference Index). Then the index replication costs will be associated with (i) the borrowing and/or financing of the constituents of the Reference Index in order to reflect the Reference Index performance, (ii) financing charges incurred to safeguard against severe market movements of the constituents of the Reference Index, (iii) unexpected financing costs in the event of severe market movements or (iv) any other transactions performed by the Swap Counterparty in relation to the constituents of the Reference Index.

In addition, from time to time each Swap Counterparty may achieve certain benefits or enhancements as a result of its hedging activities. In certain circumstances, the Swap Counterparty may, in its absolute and sole discretion, decide to pay some or all of such benefits or enhancements to the Sub-Fund under the OTC Swap Transaction(s) in addition to any payments contractually due under the OTC Swap Transaction(s). The OTC Swap Transactions of the following Sub-Funds were adjusted by the below figures in the valuation of the swaps prevailing as at 31 December 2022. A positive figure in the table means that the OTC Swap Transactions of the relevant Sub-Fund were subject to a negative adjustment. These figures are netted against the benefits or enhancements as a result of a Swap Counterparty’s hedging activities that were received under the OTC Swap Transaction(s), if any. These costs may vary over time in accordance with market conditions and market practice.

For the year ended 31 December 2022, there were no adjustments to the OTC transactions of the Sub-Funds.

### 3. Determination of the Global Exposure

For all Sub-Funds, the methodology used in order to calculate the Global Exposure resulting from the use of financial derivative instruments is the commitment approach in accordance with the CSSF Circular 11/512.

6. On 2 September 2022, the Company informed Shareholders that the Board of Directors had resolved to centralise the settlement of trading in Shares of all Sub-Funds of the Company in an International Central Securities Depository structure, with effect from 10 October 2022. The key difference between the previous settlement Model and the ICSD settlement model (the “**ICSD Settlement Model**”) was that the ICSD Settlement Model provided centralised settlement in Euroclear Bank S.A./N.V. and Clearstream Banking S.A., Luxembourg for shares traded across multiple stock exchanges, which was expected to result in improved liquidity and spreads for investors and reduced risk in the settlement process relating to the Company and its Sub-Funds.

The conflict between Russia and Ukraine marked a dramatic turning point in Europe, which, among other things, is impacting on Europe’s security architecture and energy policies in the long term and has caused considerable volatility. This volatility is likely to continue. However, the specific or possible medium-to-long-term effects of the crisis on the economy, individual markets and sectors, as well as the social implications, cannot be conclusively assessed due to the uncertainty at the time of preparing this report. The Management Company is therefore continuing its efforts, within the framework of its risk management strategy, to assess these uncertainties and their possible impact on the activities, liquidity and performance of the respective sub-fund. The Board of Directors is ensuring that the Management Company is taking all measures deemed appropriate to protect investor interests to the greatest possible extent.

#### 5. Remuneration disclosures under UCITS V regulation

The Management Company is a subsidiary of DWS Group GmbH & Co. KGaA (“DWS KGaA”) and is subject to the regulatory requirements of the Fifth Directive on Undertakings for Collective Investment in Transferable Securities as well as the European Securities and Markets Authority’s Guidelines on sound remuneration policies (“ESMA Guidelines”) with regard to the design of its remuneration system.

##### Remuneration Policy & Governance

The Management Company is governed by the Group-wide Compensation Policy that DWS KGaA has adopted for itself and all of its subsidiaries (“DWS Group” or only “Group”).

In line with the Group structure, committees have been set up to ensure the appropriateness of the compensation system and compliance with regulatory requirements on compensation and are responsible for reviewing it.

As such the DWS compensation committee was tasked by the DWS KGaA Executive Board with developing and designing sustainable compensation principles, making recommendations on overall compensation and ensuring appropriate governance and oversight with regard to compensation and benefits for the Group.

Furthermore, the remuneration committee was established to support the Supervisory Board of DWS KGaA in monitoring the appropriate structure of the remuneration systems for all Group employees. This is done by testing the consistency of the remuneration strategy with the business and risk strategy and taking into account the effects of the remuneration system on the Group-wide risk, capital and liquidity management.

The internal annual review at DWS Group level concluded the design of the remuneration system to be appropriate and no significant irregularities were recognised.

##### Compensation Structure

Employee compensation consists of fixed and variable compensation.

Fixed compensation remunerates employees for their skills, experience and competencies, commensurate with the requirements, size and scope of their role.

Variable compensation takes into account performance at group, divisional and individual level. Variable compensation generally consists of two elements – the “Franchise Component” and the “Individual Component”.

The Franchise Component is determined based upon the performance of three Key Performance Indicators (“KPIs”) at DWS Group level. For the performance year 2022 these were: Adjusted Cost Income Ratio, Net Flows and ESG metrics.

## 5. Remuneration disclosures under UCITS V regulation (continued)

The individual component of variable compensation takes into account a number of financial and non-financial factors, relativities within the peer group and retention considerations. Variable compensation can be reduced accordingly or cancelled completely in the event of negative performance contributions or misconduct. In principle, it is only granted and paid out if the granting is affordable for the Group. Guaranteed variable compensation is not normally granted to employees. On an exceptional basis, guaranteed variable compensation can be granted to new hires but only during their first year of employment.

The compensation strategy is designed to achieve an appropriate balance between fixed and variable compensation. This helps to align employee compensation with the interests of customers, investors and shareholders, as well as to industry standards. At the same time, it ensures that fixed compensation represents a sufficiently high proportion of total compensation to allow the Group full flexibility in granting variable compensation.

### Determination of variable compensation and appropriate risk-adjustment

The total amount of variable compensation is subject to appropriate risk-adjustment measures which include ex-ante and ex-post risk adjustments. The robust methodology is designed to ensure that the determination of variable compensation reflects the Group's risk-adjusted performance as well as the capital and liquidity position.

A number of considerations are used in assessing the performance of the business units. Performance is assessed in the context of financial and non-financial targets based on balanced scorecards. The allocation of variable compensation to the infrastructure areas and in particular to the control functions depends on the overall results of the Group, but not on the results of the business areas they oversee.

Principles for determining variable compensation apply at individual employee level which detail the factors and metrics that must be taken into account when making individual variable compensation decisions. These include, for instance, investment performance, client retention, culture considerations, and objective setting and performance assessment based on the "Total Performance" approach. Furthermore, any control function inputs and disciplinary sanctions and their impact on the variable compensation have to be considered as well.

### Sustainable Compensation

Sustainability and sustainability risks are an essential part that determine the variable compensation. Therefore, the remuneration policy is fully in line and consistent with sustainability risks. Hence, DWS Group incentivises behaviour that benefits both interest of clients and the long-term performance of the firm. Relevant sustainability factors are reviewed on a regular basis and incorporated in the design of the compensation system.

### Compensation for 2022

The DWS compensation committee has monitored the affordability of variable compensation for 2022 and determined that the Group's capital and liquidity levels remain above regulatory minimum requirements, and internal risk appetite threshold.

As part of the overall 2022 variable compensation granted in March 2023, the Franchise Component is awarded to eligible employees in line with the assessment of the defined KPIs. The Executive Board recognising the considerable contribution of employees and determined a target achievement rate of 76.25% for 2022.

### Identification of Material Risk Takers

In accordance with the Law as of 17 December 2010 on Undertakings for Collective Investments (as subsequently amended) in conjunction with the ESMA Guidelines, the Management Company has identified Material Risk Takers. The identification process was carried out in accordance with the Group's policies and is based on an assessment of the impact of the following categories of staff on the risk profile of the Management Company or on a fund it manages: (a) Board Members/Senior Management, (b) Portfolio/Investment Managers, (c) Control Functions, (d) Staff heading Administration, Marketing and Human Resources, (e) other individuals ("Risk Takers") in a significant position of influence, (f) other employees in the same remuneration bracket as other Risk Takers, whose roles have an impact on the risk profile of the Management Company or the Group. At least 40% of the variable compensation for Material Risk Takers is deferred. Additionally, at least 50% of both, the upfront and the deferred proportion, are granted in the Group share-based instruments or fund-linked instruments for Key Investment Professionals. All deferred components are subject to a number of performance conditions and forfeiture provisions which ensure an appropriate ex-post risk adjustment. In case the variable compensation is lower than EUR 50,000, the Material Risk Takers receive their entire variable compensation in cash without any deferral.

The TER percentage is presented in the Share Class' currency.

Information for Shareholders - unaudited (continued)

**7. Total Expense Ratio (continued)**

The TER expresses the sum of all fees and incidental costs charged on an ongoing basis to the collective investment scheme's assets (operating expenses) taken retrospectively as a percentage of the net assets, and is in principle calculated as follows according to the Swiss Asset Management Association (AMAS) Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes from 16 May 2008 (dated 5 August 2021):

$$\text{TER \%} = \frac{\text{Total operating expenses in CU}^*}{\text{Average net assets in CU}^*} \times 100$$

\* CU = currency units in the accounting currency of the collective investment scheme

Where

- operating expenses equal total expenses, excluding negative investment income and
- the average net fund assets correspond to the arithmetic average of the total net fund assets on each valuation day.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 23.66% of sustainable investments (as at 31.12.2022)

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Bloomberg MSCI Euro Corporate SRI PAB Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to represent the performance of the investment grade, euro-denominated, fixed-rate corporate bond market, excluding bonds which did not fulfil specific ESG (environmental, social, and governance) criteria. The Reference Index aimed to comply with the minimum standards laid out for EU PAB in the PAB Regulation.

The Reference Index set an initial 50% decarbonization of absolute greenhouse gas ("GHG") emissions relative to the Bloomberg Euro Corporate Index (the "Parent Index"), followed by an annual 7% decarbonization trajectory of absolute GHG emissions. In addition, the Reference Index excluded bonds which do not fulfil specific ESG criteria.

In particular, the following bonds were excluded from the Reference Index:

- Issuers where MSCI did not have reported or estimated absolute GHG emissions data;
- Securities that were unrated by MSCI ESG Research LLC;
- Bonds issued by issuers rated BB or below by MSCI ESG Research LLC. MSCI ESG ratings provided scores to measure a company's ESG characteristics, relative to their industry peers and took into account over 30 Environmental, Social and Governance Key Issues;
- Issuers with a "red" MSCI ESG Controversies Score or issuers which breached a MSCI Environmental Controversy Score. MSCI ESG Controversies identified companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited to, United Nations Global Compact, Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work;
- Issuers that were classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal; and
- Issuers with any involvement in controversial weapons or fossil fuel reserves.

If having applied the above ESG exclusion criteria, less than 20% of the total number of issuers in the universe of eligible bonds (the "Relevant Threshold") were excluded, the remaining issuers were ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking were excluded from the Reference Index, until the number of excluded issuers was higher than the Relevant Threshold.

The MSCI GHG emissions data, MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research were sourced from MSCI ESG Research LLC.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Indicator	Description	Performance (as at 31.12.2022)

Exposure to Fossil Fuels	The percentage of financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, and includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power	1.93%

	generation, or natural gas based power generation, or for which no data was available.	
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	1.57%

● **...and compared to previous periods?**

N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2022, 23.66% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG emissions (Scope 1, 2, 3 and total) (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Share of non-renewable energy consumption and production (no. 5);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **How did this financial product consider principal adverse impacts on sustainability factors?**

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG emissions (Scope 1, 2, 3 and total) (no. 3);

- Exposure to companies active in the fossil fuel sector (no. 4);
- Share of non-renewable energy consumption and production (no. 5);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01.01.2022 through 31.12.2022

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### ● *What was the asset allocation?*

As at 31 December 2022, this financial product invested 98.23% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 23.66% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

1.77% of the investments were not aligned with these characteristics (#2 Other).

### ● *In which economic sectors were the investments made?*

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – Due to a lack of reliable data, there was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?

Yes:

In fossil gas       In nuclear energy

No. However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis,

<sup>2</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

although it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

N/A – Due to a lack of reliable data, there was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2022 the share of environmentally and socially sustainable investments was 23.66% in total.

**What was the share of socially sustainable investments?**

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2022 the share of environmentally and socially sustainable investments was 23.66% in total.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) and shares of other collective investment schemes which pursued a money market strategy as at 31 December 2022. It also included securities which have been recently downgraded by the relevant ESG data provider but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by aiming to comply with the minimum standards laid out for EU PAB in the PAB Regulation. The Reference Index set an initial 50% decarbonisation of absolute greenhouse gas ("GHG") emissions relative to the Parent Index, followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index excluded bonds which did not fulfil specific ESG (environmental, social, and governance) criteria. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate the Reference Index by buying all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. Any unrelated transferable securities held by the financial product were typically similar to the securities comprised in the Reference Index.

Active engagement with investee issuers to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. ## How did this financial product perform compared to the reference benchmark?

The financial product has designated the Bloomberg MSCI Euro Corporate SRI PAB Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

### ● *How does the reference benchmark differ from a broad market index?*

The Reference Index will set an initial 50% decarbonisation of absolute greenhouse gas ("GHG") emissions relative to the Parent Index, which is the relevant broad market index, followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index will exclude bonds which do not fulfil specific ESG (environmental, social, and governance) criteria.

In particular, the following bonds will be excluded from the Reference Index:

- Issuers where MSCI does not have reported or estimated absolute GHG emissions data;
- Securities that are unrated by MSCI ESG Research LLC;
- Bonds issued by issuers rated BB or below by MSCI ESG Research LLC. MSCI ESG ratings provide scores to measure a company's ESG characteristics, relative to their industry peers and takes into account over 30 Environmental, Social and Governance Key Issues;
- Issuers with a "red" MSCI ESG Controversies Score or issuers which breach a MSCI Environmental Controversy Score. MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to United Nations Global Compact, Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work;

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- Issuers that are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal; and
- Issuers with any involvement in controversial weapons or fossil fuel reserves.

If having applied the above ESG exclusion criteria less than 20% of the total number of issuers in the universe of eligible bonds (the "Relevant Threshold") are excluded, the remaining issuers are ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking will be excluded from the Reference Index, until the number of excluded issuers is higher than the Relevant Threshold.

The MSCI GHG emissions data, MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research are sourced from MSCI ESG Research LLC.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Bloomberg MSCI Global Aggregate Sustainable and SRI Currency Neutral Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities. The Reference Index was designed to represent the performance of a broad-based measure of the global investment grade fixed-rate debt markets.

The Reference Index was based on the Bloomberg Global Aggregate Index (the "Parent Index"). The Reference Index applied criteria to the Parent Index. The Reference Index first excluded issuers with insufficient MSCI ESG Ratings. MSCI ESG ratings provided scores to measure an issuer's ESG characteristics, relative to their peers and took into account Environmental, Social and Governance key issues. In addition, the Reference Index excluded issuers (especially companies) (i) that were involved in business activities that are inconsistent with certain social responsibility criteria as per the MSCI ESG Business Involvement Screening Research methodology, or (ii) that were deemed severely controversial as per the MSCI ESG Controversies methodology. MSCI ESG Controversies identified companies involved in severe ESG controversies inconsistent with global conventions and norms, such as, but not limited to, United Nations Global Compact. MSCI Business Involvement Screening Research identified issuers that breached certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, conventional oil & gas and nuclear power. The MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research were sourced from MSCI ESG Research LLC (<http://www.msci.com>).

As at 31 December 2022, 19.24% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude relevant securities which were negatively aligned with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10);
- Exposure to controversial weapons (no. 14); and

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – Due to a lack of reliable data, there was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

- Yes:
  - In fossil gas
  - In nuclear energy

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Bloomberg MSCI Euro Corporate SRI 0-5 Year PAB Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to represent the performance of the investment grade, euro-denominated, fixed-rate corporate bonds with at least 1 month and up to (but not including) 5 years to maturity, excluding bonds which did not fulfil specific ESG (environmental, social, and

governance) criteria. The Reference Index aimed to comply with the minimum standards laid out for EU PAB in the PAB Regulation.

The Reference Index set an initial 50% decarbonization of absolute greenhouse gas ("GHG") emissions relative to the Bloomberg Euro Corporate 0-5 Year Index (the "Parent Index"), followed by an annual 7% decarbonization trajectory of absolute GHG emissions. In addition, the Reference Index excluded bonds which do not fulfil specific ESG criteria.

In particular, the following bonds were excluded from the Reference Index:

- Issuers where MSCI did not have reported or estimated absolute GHG emissions data;
- Securities that were unrated by MSCI ESG Research LLC;
- Bonds issued by issuers rated BB or below by MSCI ESG Research LLC. MSCI ESG ratings provided scores to measure a company's ESG characteristics, relative to their industry peers and took into account over 30 Environmental, Social and Governance Key Issues;
- Issuers with a "red" MSCI ESG Controversies Score or issuers which breached a MSCI Environmental Controversy Score. MSCI ESG Controversies identified companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited to, United Nations Global Compact, Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work;
- Issuers that were classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal; and
- Issuers with any involvement in controversial weapons or fossil fuel reserves.

If having applied the above ESG exclusion criteria, less than 20% of the total number of issuers in the universe of eligible bonds (the "Relevant Threshold") were excluded, the remaining issuers were ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking were excluded from the Reference Index, until the number of excluded issuers was higher than the Relevant Threshold.

The MSCI GHG emissions data, MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research were sourced from MSCI ESG Research LLC.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31 December 2022, 21.88% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;

- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG emissions (Scope 1, 2, 3 and total) (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Share of non-renewable energy consumption and production (no. 5);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### **How did this financial product consider principal adverse impacts on sustainability factors?**

exclude securities which were negatively aligned with the following principal adverse indicators:

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – Due to a lack of reliable data, there was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?**

Yes:

In fossil gas       In nuclear energy

No. However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

- **What was the share of investments made in transitional and enabling activities?**

N/A – Due to a lack of reliable data, there was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31 December 2022 the share of environmentally and socially sustainable investments was 21.88% in total.

- **What was the share of socially sustainable investments?**

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31 December 2022 the share of environmentally and socially sustainable investments was 21.88% in total.

<sup>2</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) and shares of other collective investment schemes which pursued a money market strategy as at 31 December 2022. It also included securities which have been recently downgraded by the relevant ESG data provider but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by aiming to comply with the minimum standards laid out for EU PAB in the PAB Regulation. The Reference Index set an initial 50% decarbonisation of absolute greenhouse gas ("GHG") emissions relative to the Parent Index, followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index excluded bonds which did not fulfil specific ESG (environmental, social, and governance) criteria. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate the Reference Index by buying all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. Any unrelated transferable securities held by the financial product were typically similar to the securities comprised in the Reference Index.

Active engagement with investee issuers to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. ## How did this financial product perform compared to the reference benchmark?

The financial product has designated the Bloomberg MSCI Euro Corporate Sustainable and SRI 0-5 Year PAB Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

- **How does the reference benchmark differ from a broad market index?**

The Reference Index will set an initial 50% decarbonisation of absolute greenhouse gas ("GHG") emissions relative to the Parent Index, which is the relevant broad market index, followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index will exclude bonds which do not fulfil specific ESG (environmental, social, and governance) criteria.

In particular, the following bonds will be excluded from the Reference Index:

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- Issuers where MSCI does not have reported or estimated absolute GHG emissions data;
- Securities that are unrated by MSCI ESG Research LLC;
- Bonds issued by issuers rated BB or below by MSCI ESG Research LLC. MSCI ESG ratings provide scores to measure a company's ESG characteristics, relative to their industry peers and takes into account over 30 Environmental, Social and Governance Key Issues;
- Issuers with a "red" MSCI ESG Controversies Score or issuers which breach a MSCI Environmental Controversy Score. MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to United Nations Global Compact, Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work;
- Issuers that are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal; and
- Issuers with any involvement in controversial weapons or fossil fuel reserves.

If having applied the above ESG exclusion criteria less than 20% of the total number of issuers in the universe of eligible bonds (the "Relevant Threshold") are excluded, the remaining issuers are ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking will be excluded from the Reference Index, until the number of excluded issuers is higher than the Relevant Threshold.

The MSCI GHG emissions data, MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research are sourced from MSCI ESG Research LLC.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the FTSE ESG Select World Government Bond Index – DM (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of securities that comprised constituents of the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to represent the performance of fixed-rate, local currency, investment-grade sovereign debt issued in developed markets, excluding countries which did not fulfil specific ESG (environmental, social, and governance) criteria.

The Reference Index determined its constituents by applying certain ESG criteria derived from the FTSE ESG Government Bond Index series. Constituent weightings were adjusted in the Reference Index relative to the FTSE World Government Bond Index – DM (the "Parent Index") by overweighting higher ESG performing countries and underweighting lower ESG performing countries before applying certain other inclusion criteria to the Parent Index constituents. The market value weight for each security was "tilted" by its respective country's ESG score such that the weight of each issuer in the Reference Index was a function of the market value weight and the country ESG score.

#### *ESG Scores*

Country ESG scores were calculated in respect of those countries present in the Parent Index. These ESG scores were intended to assess a country's exposure to, and management of, certain ESG risk factors as determined by the Sustainability Profile of the Beyond Ratings Sovereign Risk Monitor. Beyond Ratings is a smart data and analytics provider for (ESG) integration in Fixed Income. Further information can be found on:

[https://content.ftserussell.com/sites/default/files/sovereign\\_risk\\_monitor\\_methodology\\_final\\_0.pdf](https://content.ftserussell.com/sites/default/files/sovereign_risk_monitor_methodology_final_0.pdf)

ESG scores for each country were established by evaluating and scoring each country's performance across the following three pillars:

- Environmental performance: considered topics such as energy, climate, and resources;
- Social performance: considered topics such as inequality, employment, human capital, health, and societal wellbeing; and
- Governance performance: considered topics such as corruption, government effectiveness, political stability, regulatory quality, rule of law, and voice & accountability.

These pillar scores were then compared on a relative basis against those other countries in the Reference Index universe with a specified "tilt factor" applied to each pillar score. The resulting pillar scores were then combined to derive a single combined ESG score for each country.

The country ESG scores were then applied to re-weight each country's market value weighting in the Reference Index relative to the Parent Index to provide higher exposures to countries that have a higher ESG score, and lower exposures to countries that have a lower ESG score.

For full details on the ESG pillars, underlying ESG indicators and ESG "tilting" methodology, please refer to the FTSE ESG Government Bond Index Series Ground Rules.

#### *Country Inclusion Criteria*

A further country inclusion criteria assessment was then performed by ranking countries based on the country ESG scores. Countries that were identified as significant laggards (i.e. ranked in a certain lowest percentile) were removed from the Reference Index. For

full details on the exclusion thresholds refer to the FTSE ESG Select World Government Bond Index – DM Ground Rules.

#### *Freedom Criteria*

The Reference Index also applied an additional inclusion criteria based on Freedom House data. Freedom House is a nonprofit, non-governmental organisation that conducted research and advocacy on democracy, political freedom, and human rights. Freedom House classified countries as part of its 'Freedom of the World' report as either "Free", "Partially Free" or "Not Free". Freedom House classified each country based on its research. Only countries designated as "Free" were eligible for inclusion in the Reference Index. Further information is available at <https://freedomhouse.org>. ● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The financial product did not make an allocation to sustainable economic activities that contribute to an environmental objective.

**What was the share of socially sustainable investments?**

The financial product did not make an allocation to sustainable economic activities that contribute to a social objective.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) and shares of other collective investment schemes which pursued a money market strategy as at 31 December 2022.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Reference Index promoted environmental and social characteristics by excluding or reweighting issuers from the Parent Index by applying certain ESG criteria derived from the FTSE ESG Government Bond Index series, as of each Reference Index rebalance. Constituent weightings were adjusted in the Reference Index relative to the Parent Index by overweighting higher ESG performing countries and underweighting lower ESG performing countries before applying certain other inclusion criteria to the Parent Index constituents. The market value weight for each security was "tilted" by its respective country’s ESG score such that the weight of each issuer in the Reference Index was a function of the market value weight and the country ESG score as outlined above. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate the

Active engagement with investee issuers to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. ### How did this financial product perform compared to the reference benchmark?

The financial product has designated the FTSE ESG Select World Government Bond Index – DM as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

#### ● **How does the reference benchmark differ from a broad market index?**

The Reference Index is based on the Parent Index, which is designed to reflect the performance of fixed-rate, local currency, investment-grade sovereign bonds issued in developed markets.

The Reference Index determines its constituents by applying certain ESG criteria derived from the FTSE ESG Government Bond Index series. Constituent weightings are adjusted in the Reference Index relative to the Parent Index by overweighting higher ESG performing countries and underweighting lower ESG performing countries before applying certain other inclusion criteria to the Parent Index constituents. The market value weight for each security is "tilted" by its respective country's ESG score such that the weight of each issuer in the Reference Index is a function of the market value weight and the country ESG score.

#### *ESG Scores*

Country ESG scores are calculated in respect of those countries present in the Parent Index. These ESG scores are intended to assess a country's exposure to, and management of, certain ESG risk factors as determined by the Sustainability Profile of the Beyond Ratings Sovereign Risk Monitor. Beyond Ratings is a smart data and analytics provider for (ESG) integration in Fixed Income. Further information can be found on:

[https://content.ftserussell.com/sites/default/files/sovereign\\_risk\\_monitor\\_methodology\\_final\\_0.pdf](https://content.ftserussell.com/sites/default/files/sovereign_risk_monitor_methodology_final_0.pdf)

ESG scores for each country are established by evaluating and scoring each country's performance across the following three pillars:

- Environmental performance: considers topics such as energy, climate, and resources;
- Social performance: considers topics such as inequality, employment, human capital, health, and societal wellbeing; and

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- Governance performance: considers topics such as corruption, government effectiveness, political stability, regulatory quality, rule of law, and voice & accountability.

These pillar scores are then compared on a relative basis against those other countries in the Reference Index universe with a specified "tilt factor" applied to each pillar score. The resulting pillar scores are then combined to derive a single combined ESG score for each country.

The country ESG scores are then applied to re-weight each country's market value weighting in the Reference Index relative to the Parent Index to provide higher exposures to countries that have a higher ESG score, and lower exposures to countries that have a lower ESG score.

For full details on the ESG pillars, underlying ESG indicators and ESG "tilting" methodology, please refer to the FTSE ESG Government Bond Index Series Ground Rules.

[https://research.ftserussell.com/products/downloads/FTSE ESG Government Bond Index Series Ground Rules.pdf](https://research.ftserussell.com/products/downloads/FTSE_ESG_Government_Bond_Index_Series_Ground_Rules.pdf)

#### *Country Inclusion Criteria*

A further country inclusion criteria assessment is then performed by ranking countries based on the country ESG scores. Countries that are identified as significant laggards (i.e. ranked in a certain lowest percentile) are removed from the Reference Index. For full details on the exclusion thresholds refer to the FTSE ESG Select World Government Bond Index – DM Ground Rules.

[https://research.ftserussell.com/products/downloads/FTSE ESG Select World Government Bond Index Ground Rules.pdf](https://research.ftserussell.com/products/downloads/FTSE_ESG_Select_World_Government_Bond_Index_Ground_Rules.pdf)

#### *Freedom Criteria*

The Reference Index also applies an additional inclusion criteria based on Freedom House data. Freedom House is a nonprofit, non-governmental organisation that conducts research and advocacy on democracy, political freedom, and human rights. Freedom House classifies countries as part of its 'Freedom of the World' report as either "Free", "Partially Free" or "Not Free". Freedom House classifies each country based on its research. Only countries designated as "Free" are eligible for inclusion in the Reference Index. Further information is available at <https://freedomhouse.org>. For full details refer to the FTSE ESG Select World Government Bond Index – DM Ground Rules.

[https://research.ftserussell.com/products/downloads/FTSE ESG Select World Government Bond Index Ground Rules.pdf](https://research.ftserussell.com/products/downloads/FTSE_ESG_Select_World_Government_Bond_Index_Ground_Rules.pdf)

Investors should note that whilst the financial product and the Reference Index seek to ensure compliance with such criteria at each rebalance or review date, between these reviews or rebalances, securities which no longer meet these criteria may remain included in (i) the Reference Index until they are removed at

the subsequent rebalance or review or, (ii) the portfolio of the financial product until it is possible and practicable to divest such positions.

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments (as at 31.12.2022)

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the FTSE ESG Select EMU Government Bond Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of securities that comprised constituents of the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to represent the performance of fixed-rate, euro-denominated, investment-grade sovereign debt issued in developed market

countries in the European Economic and Monetary Union ("EMU"), excluding countries which did not fulfil specific ESG (environmental, social, and governance) criteria.

The Reference Index included securities issued by EMU countries in the FTSE ESG Select World Government Bond Index – DM (the "Parent Index"). The Parent Index was designed to measure the performance of fixed-rate, local currency, investment-grade sovereign bonds issued in developed market countries included in the FTSE World Government Bond Index – DM (the "Ultimate Parent Index"), excluding countries which did not fulfil specific ESG criteria. Countries excluded from the Parent Index were also excluded from the Reference Index. The Parent Index excluded countries based on the following criteria:

#### *Country Inclusion Criteria*

The Parent Index applied a country inclusion criteria assessment by ranking countries based on the country ESG scores. Countries that were identified as significant laggards were removed from the Parent Index. Further information on the exclusion thresholds is available at: <https://www.ftserussell.com/products/indices/custom-methodologies>.

#### *Freedom Criteria*

The Parent Index also applied an inclusion criteria based on Freedom House data. Freedom House is a non-profit, nongovernmental organisation that conducted research and advocacy on democracy, political freedom, and human rights. Freedom House classified countries as part of its 'Freedom of the World' report as either "Free", "Partially Free" or "Not Free". Only countries designated as "Free" were eligible for inclusion in the Parent Index. Further information is available at: <https://freedomhouse.org>.

#### *ESG Criteria and Tilting*

The weights of eligible constituents were adjusted in the Reference Index relative to the EMU subset of the Ultimate Parent Index by overweighting higher ESG performing countries and underweighting lower ESG performing countries. The market value weight for each security was "tilted" by its respective country's ESG score such that the weight of each issuer in the Reference Index was a function of the market value weight and the country ESG score (the "Tilted Weight").

Country ESG scores were intended to assess a country's exposure to, and management of, certain ESG risk factors as determined by the Sustainability Profile of the Beyond Ratings Sovereign Risk Monitor. Beyond Ratings is a smart data and analytics provider for ESG integration into Fixed Income.

ESG scores for each country were established by evaluating and scoring each country's performance across the following three pillars:

- Environmental performance: considered topics such as energy, climate, and resources;
- Social performance: considered topics such as inequality, employment, human capital, health, and societal wellbeing; and

- Governance performance: considered topics such as corruption, government effectiveness, political stability, regulatory quality, rule of law, and voice & accountability.

These pillar scores were then compared on a relative basis against other eligible constituents in the Reference Index with a specified "tilt factor" applied to each pillar score, and combined to derive a single combined ESG score for each country. This single ESG score was then used to determine each issuer's Tilted Weight in the Reference Index.

Further information on the ESG Pillars, Underlying Indicators and ESG Tilting methodology is available at:

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – Due to a lack of reliable data, there was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:  
 In fossil gas       In nuclear energy

No. However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

N/A – Due to a lack of reliable data, there was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The financial product did not make an allocation to sustainable economic activities that contribute to an environmental objective.

**What was the share of socially sustainable investments?**

The financial product did not make an allocation to sustainable economic activities that contribute to a social objective.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

Those investments included under “#2 Other” included secured/unsecured deposits (cash) and shares of other collective investment schemes which pursued a money market strategy as at 31 December 2022.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Reference Index promoted environmental and social characteristics by excluding or reweighting issuers from the EMU subset of the Ultimate Parent Index by applying certain ESG criteria derived from the FTSE ESG Government Bond Index series, as of each Reference Index rebalance. The Parent Index applied certain inclusion criteria to the Ultimate Parent Index constituents. Countries excluded from the Parent Index were also excluded from the Reference Index. ## How did this financial product perform compared to the reference benchmark?

The financial product has designated the FTSE ESG Select EMU Government Bond Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

### ● **How does the reference benchmark differ from a broad market index?**

The Reference Index is based on the Parent Index, which is designed to reflect the performance of fixed-rate, local currency, investment-grade sovereign bonds issued in developed market countries included in the Ultimate Parent Index, excluding countries which do not fulfil specific ESG criteria. Countries excluded from the Parent Index will also be excluded from the Reference Index. The Parent Index excludes countries based on the following criteria:

Freedom House classifies countries as part of its 'Freedom of the World' report as either "Free", "Partially Free" or "Not Free". ## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: 99.99%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: 0.00%**

No

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent was the sustainable investment objective of this financial product met?

The financial product had sustainable investment as its objective and qualified as a financial product subject to Article 9(1) SFDR by tracking the iBoxx EUR Eurozone Sovereigns Green Bonds Capped Index (the "Reference Index"). The Reference Index was designed to represent the performance of sovereign green bonds that were denominated in EUR. The Reference Index rules aimed to offer a broad coverage of the green sovereign bond universe, meeting certain minimum environmental, social and governance ("ESG")

criteria. The financial product held a portfolio of securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets.

The Reference Index determined its constituents by applying the following ESG selection criteria:

- (1) **Freedom House Global Freedom Status:** The Reference Index applied an inclusion criterion based on Freedom House data. Freedom House is a non-profit, non-governmental organisation that conducted research and advocacy on democracy, political freedom, and human rights. Freedom House classified countries as part of its 'Freedom of the World' report as either "Free", "Partly Free" or "Not Free". Freedom House classified each country based on its research. Only sovereign bonds issued by countries designated as "Free" or "Partly Free" were eligible for inclusion in the Reference Index. Further information surrounding the methodology is available under the header "Reports" at <https://freedomhouse.org>.
- (2) **Sustainalytics Country-Risk Category:** Country-Risk Scores were used to determine the Sustainalytics Country-Risk Category. The Country-Risk Scores calculated the degree of unmanaged ESG risk a country may have. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) and, for 95% of cases, a maximum score below 50. Issuers were then grouped into one of five risk categories; negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+). All issuers with a Sustainalytics Country-Risk Category of "severe" were excluded from the Reference Index. In the case of category change, the country would be added or removed during monthly rebalancing. Further information on Country-Risk Category can be found on the Sustainalytics website (<https://www.sustainalytics.com/>) under ESG Risk Ratings.
- (3) **Green Bond classification:** The Reference Index leveraged external independent data sources for determining any 'green' bond classification. Only those bonds that had been classified by the Climate Bond Initiative ("CBI") as 'Green Bonds' in adherence with the CBI's Climate Bond Taxonomy were eligible. The criteria went beyond self-labelling conventions, and evaluated the credibility of an asset and its environmental impact. The CBI's Climate Bond Taxonomy determined if each Green Bond's use of generated proceeds will help in the wider effort of transitioning to a low carbon economy. The CBI verified if any generated greenhouse gas emissions were consistent with the greater goal of achieving the 2-degree global warming target as set by the COP 21 Paris Agreement. The CBI Taxonomy has been developed based on the latest climate science, including research from the Intergovernmental Panel on Climate Change, the International Energy Agency, and has benefited from the input of hundreds of technical experts from around the world.

The Reference Index used inclusion criteria based on Morningstars Sustainalytics data. ● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in social violations; and
- Violation of certain principal adverse indicator thresholds.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Investee countries subject to social violations (no. 16).

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

N/A – The financial product invested solely in sovereign debt.

As at 31 December 2022, this financial product invested 99.99% of its net assets in investments that were aligned with the sustainable investments with an environmental or social objective (#1 Sustainable).

0.01% of the investments were not aligned with these characteristics (#2 Not sustainable).

### ● In which economic sectors were the investments made?

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

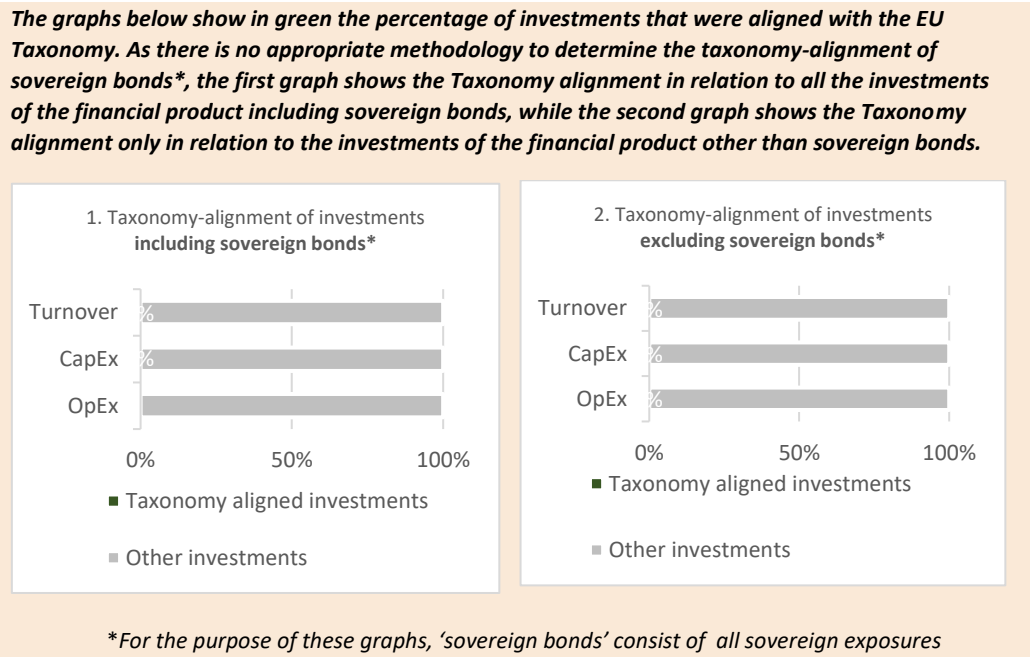

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

N/A – Due to a lack of reliable data, there was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy

No. However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

<sup>2</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

N/A – Due to a lack of reliable data, there was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

- **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

N/A

### **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

As at 31 December 2022, the share of sustainable economic activities that contribute to an environmental objective that are not aligned with the EU Taxonomy was 99.99%.

### **What was the share of socially sustainable investments?**

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. As at 31 December 2022, the share of sustainable economic activities that contribute to social objective was 0.00%.

### **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The financial product predominantly promoted asset allocation in investments that were sustainable investments with an environmental objective (#1 Sustainable).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) as at 31 December 2022.

### **What actions have been taken to attain the sustainable investment objective during the reference period?**

The Reference Index took into account sustainability factors in line with the sustainable investment objective by aiming to offer a broad coverage of the Green sovereign bond universe, meeting certain minimum ESG criteria. The Reference Index only included those bonds that have been classified by the Climate Bond Initiative ("CBI") as 'Green Bonds' in adherence with the CBI's Climate Bond Taxonomy. With regards to ESG criteria, the Sustainalytics Country-Risk Category and the Freedom House Global Freedom Status were used to exclude certain countries. All issuers with a Sustainalytics Country-Risk Category of "severe" were excluded from the Reference Index and only countries designated as "Free" or "Partly Free" were eligible for inclusion in the Reference Index, amongst other things. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate the Reference Index by buying all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. Any

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

unrelated transferable securities held by the financial product were typically similar to the securities comprised in the Reference Index.

Active engagement with investee issuers to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy, which sets out types and methods of engagement, escalation strategies and expectations regarding communication with inter alia DWS as an investor and DWS on behalf of its clients on a number of topics, including ESG.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

### **How did this financial product perform compared to the reference sustainable benchmark?**

The financial product has designated the iBoxx EUR Eurozone Sovereigns Green Bonds Capped Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

- ***How did the reference benchmark differ from a broad market index?***

The Reference Index differed from a relevant broad market index by only including those bonds that had been classified by the Climate Bond Initiative ("CBI") as 'Green Bonds' in adherence with the CBI's Climate Bond Taxonomy and that met certain minimum ESG criteria.

#### *Climate Bond Initiative ("CBI")*

The Reference Index leveraged external independent data sources for determining any 'green' bond classification. Only those bonds that had been classified by the Climate Bond Initiative ("CBI") as 'Green Bonds' in adherence with the CBI's Climate Bond Taxonomy were eligible. The criteria went beyond self-labelling conventions, and evaluated the credibility of an asset and its environmental impact. The CBI's Climate Bond Taxonomy determined if each Green Bond's use of generated proceeds will help in the wider effort of transitioning to a low carbon economy. The CBI verified if any generated greenhouse gas emissions were consistent with the greater goal of achieving the 2-degree global warming target as set by the COP 21 Paris Agreement. The CBI Taxonomy has been developed based on the latest climate science, including research from the Intergovernmental Panel on Climate Change, the International Energy Agency, and has benefited from the input of hundreds of technical experts from around the world.

#### *Sustainalytics Country-Risk Category*

Country-Risk Scores were used to determine the Sustainalytics Country-Risk Category. The Country-Risk Scores calculated the degree of unmanaged ESG risk a country may have. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) and, for 95% of cases, a maximum score below 50. Issuers were then grouped into one of five risk categories; negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+). All issuers with a Sustainalytics Country-Risk Category of "severe" were excluded from the Reference Index. In the case of category change, the country would be added or removed during monthly rebalancing. Further information on Country-Risk Category can be found on the Sustainalytics website (<https://www.sustainalytics.com/>) under ESG Risk Ratings.

*Freedom House Global Freedom Status*

The Reference Index applied an inclusion criterion based on Freedom House data. Freedom House is a non-profit, non-governmental organisation that conducted research and advocacy on democracy, political freedom, and human rights. Freedom House classified countries as part of its 'Freedom of the World' report as either "Free", "Partly Free" or "Not Free". Freedom House classified each country based on its research. Only sovereign bonds issued by countries designated as "Free" or "Partly Free" were eligible for inclusion in the Reference Index. Further information surrounding the methodology is available under the header "Reports" at <https://freedomhouse.org>.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

**Yes**

It made **sustainable investments with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_%

**No**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the iBoxx EUR Sovereigns ESG Tilted Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of securities that comprised constituents of the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to represent the performance of EUR denominated sovereign bond issues with adjusted weights, which met certain minimum environmental, social and governance ("ESG") standards, by allocating higher weights to countries with a favourable Country-Risk score and reducing weights of countries with a less favourable Country-Risk score.

The Reference Index determined its constituents by applying the following ESG selection criteria:

- (1) **Freedom House Global Freedom Status**: The Reference Index applied an additional inclusion criteria based on Freedom House data. Freedom House is a non-profit, non-governmental organisation that conducted research and advocacy on democracy, political freedom, and human rights. Freedom House classified countries as part of its 'Freedom of the World' report as either "Free", "Partly Free" or "Not Free". Freedom House classified each country based on its research. To calculate the Reference Index, only countries designated as "Free" or "Partly Free" were eligible for inclusion in the Reference Index. Further information surrounding the methodology is available under the header "Reports" at <https://freedomhouse.org>.
- (2) **Sustainalytics Country-Risk Score**: Once the eligible bond universe had been defined, the countries within the eligible bond universe were weighted depending on their relative 'Sustainalytics Country-Risk Scores'. A country's risk score measured the magnitude of unmanaged ESG risk. A low score indicated a lower degree of unmanaged ESG risk and a high score indicated a higher degree of unmanaged ESG risk. Countries were then grouped into one of five Country-Risk Categories (negligible, low, medium, high, severe) as further detailed below and based on the calculated Country-Risk Score. Issuer weights were then tilted more favourably towards countries with lower levels of unmanaged ESG risk (i.e. a lower Country-Risk Score) by the application of a re-weight factor and the issuer's pre-tilted weight. Such re-weight factor assessed the variance of each issuer's Country-Risk Score from the mean of the eligible universe. The country with the lowest Country-Risk Score relative to the mean was assigned a re-weight factor of 0.5 and the country with the highest Country-Risk Score relative to the mean was assigned a re-weight factor of 2. Countries falling between this range were assigned a re-weight factor by a non-linear formula relative to such issuer's variance from the Country-Risk Score mean. Country weights were then normalised to sum to 100%. Further information on Country-Risk Scores can be found on the Sustainalytics website (<https://www.sustainalytics.com/>) under ESG Risk Ratings.
- (3) **Sustainalytics Country-Risk Category**: The Country-Risk Scores as described above calculated the degree of unmanaged ESG risk a country may have. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) and, for 95% of cases, a maximum score below 50. Issuers were then grouped into one of five risk categories; negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+). All issuers with a Sustainalytics Country-Risk Category of "Severe" were excluded from the Reference Index. In the case of category change, the country would be added or removed during monthly rebalancing. Further information on Country-Risk Category can be found on the Sustainalytics website (<https://www.sustainalytics.com/>) under ESG Risk Ratings.

The Reference Index used inclusion criteria based on Morningstar's Sustainalytics data. Sustainalytics is a leading independent ESG and corporate governance research, ratings and analytics firm that supports investors around the world with the development and implementation of responsible investment strategies. In particular, the Reference Index used the following ESG Products: Sustainalytics ESG Risk Rating Scores, Controversies,

Country Ratings, Global Standards Screening, and Product Involvement, Controversial Weapons Involvement. For details on Sustainalytics ESG Research's full suite of ESG products, please refer to: <http://www.sustainalytics.com>.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Investee countries subject to social violations (no. 16).

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## What was the proportion of sustainability-related investments?

### ● *What was the asset allocation?*

As at 31 December 2022, this financial product invested 99.82% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics).

0.18% of the investments were not aligned with these characteristics (#2 Other).

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A – Due to a lack of reliable data, there was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product’s assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?**

Yes:  
 In fossil gas       In nuclear energy

No. However, there is a lack of reliable data in relation to fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. On this basis, although it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

● **What was the share of investments made in transitional and enabling activities?**

N/A – Due to a lack of reliable data, there was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The financial product did not make an allocation to sustainable economic activities that contribute to an environmental objective.

### **What was the share of socially sustainable investments?**

The financial product did not make an allocation to sustainable economic activities that contribute to a social objective.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) and shares of other collective investment schemes which pursued a money market strategy as at 31 December 2022.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Reference Index promoted environmental and social characteristics by adjusting weights of EUR denominated sovereign bond issues. The Reference Index excluded countries classified as "Not Free" using Freedom House data and countries classified as "Severe" in the Sustainalytics Country-Risk Category. Eligible bonds were reweighted based on the Sustainalytics Country-Risk Score, allocating higher weights to countries with a favourable Country-Risk score and reducing weights of countries with a less favourable Country-Risk score. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate the Reference Index by buying all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. Any unrelated transferable securities held by the financial product were typically similar to the securities comprised in the Reference Index.

Active engagement with investee issuers to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy, which sets out types and methods of engagement, escalation strategies and expectations regarding communication with inter alia DWS as an investor and DWS on behalf of its clients on a number of topics, including ESG.

### **How did this financial product perform compared to the reference benchmark?**

The financial product has designated the iBoxx EUR Sovereigns ESG Tilted Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index representing the performance of the EUR denominated sovereign bond universe by applying the following ESG selection criteria:

- (1) **Freedom House Global Freedom Status:** The Reference Index applies an additional inclusion criteria based on Freedom House data. Freedom House is a non-profit, non-governmental organisation that conducts research and advocacy on democracy, political freedom, and human rights. Freedom House classifies countries as part of its 'Freedom of the World' report as either "Free", "Partly Free" or "Not Free". Freedom House classifies each country based on its research. To calculate the Reference Index, only countries designated as "Free" or "Partly Free" are eligible for inclusion in the Reference Index. Further information surrounding the methodology is available under the header "Reports" at <https://freedomhouse.org>.
- (2) **Sustainalytics Country-Risk Score:** Once the eligible bond universe has been defined, the countries within the eligible bond universe are weighted depending on their relative 'Sustainalytics Country-Risk Scores'. A country's risk score measures the magnitude of unmanaged ESG risk. A low score indicates a lower degree of unmanaged ESG risk and a high score indicates a higher degree of unmanaged ESG risk. Countries are then grouped into one of five Country-Risk Categories (negligible, low, medium, high, severe) as further detailed below and based on the calculated Country-Risk Score. Issuer weights are then tilted more favourably towards countries with lower levels of unmanaged ESG risk (i.e. a lower Country-Risk Score) by the application of a re-weight factor and the issuer's pre-tilted weight. Such re-weight factor assesses the variance of each issuer's Country-Risk Score from the mean of the eligible universe. The country with the lowest Country-Risk Score relative to the mean will be assigned a re-weight factor of 0.5 and the country with the highest Country-Risk Score relative to the mean will be assigned a re-weight factor of 2. Countries falling between this range are assigned a re-weight factor by a non-linear formula relative to such issuer's variance from the Country-Risk Score mean. Country weights will then be normalised to sum to 100%. Further information on Country-Risk Scores can be found on the Sustainalytics website (<https://www.sustainalytics.com/>) under ESG Risk Ratings.
- (3) **Sustainalytics Country-Risk Category:** The Country-Risk Scores as described above calculates the degree of unmanaged ESG risk a country may have. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) and, for 95% of cases, a maximum score below 50. Issuers are then grouped into one of five risk categories; negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+). All issuers with a Sustainalytics Country-Risk Category of "Severe" will be excluded from the Reference Index. In the case of category change, the country will be added or removed during monthly rebalancing. Further information on Country-Risk Category can be found on the Sustainalytics website (<https://www.sustainalytics.com/>) under ESG Risk Ratings.
