

## Key Investor Information for Investors in the United Kingdom

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Xtrackers II Global Government Bond UCITS ETF

**Share class: 2D - GBP Hedged, ISIN: LU0641006290, Security code: DBX0LY, Currency: GBP**

a sub-fund of Xtrackers II. The management company is DWS Investment S.A., a member of the DWS Group.

## Objectives and investment policy

The fund is passively managed. **INVESTMENT OBJECTIVE:** The aim is for your investment to reflect the performance of the FTSE World Government Bond Index – Developed Markets (index), while seeking to minimise foreign currency fluctuations at share class level. **DESCRIPTION OF INDEX:** The index aims to reflect the performance of a range of fixed-rate, local currency, investment-grade sovereign debt issued in developed markets. To be included in the index, the debt must be i) issued by governments in developed countries; and ii) be deemed investment grade by major rating agencies. Certain other selection criteria may also be considered such as minimum issue size, time to maturity and market size. **INDEX REBALANCING, CALCULATION AND ADMINISTRATION:** The index is calculated on a total return basis, which means that amounts equivalent to interest payments are reinvested in the index. The index is administered by FTSE Fixed Income LLC and is reviewed and rebalanced monthly. **INVESTMENT POLICY:** To achieve the aim, the fund will i) attempt to replicate the index, before fees and expenses, by buying a portfolio of securities that may comprise the constituents of the index or other unrelated investments as determined by DWS

entities and ii) enter into financial contracts (derivatives) which attempt to reduce the effect of exchange rate fluctuations between the currency of the fund's assets and the currency of your shares. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of derivatives. The fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the fund. **FURTHER INFORMATION:** Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at [www.Xtrackers.com](http://www.Xtrackers.com). Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 1 per cent. The currency of the fund is EUR. The fund distributes up to four times per annum. You may request the redemption of shares generally on a daily basis.

## Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 4 because its share price fluctuates and the likelihood of both losses and gains may therefore be relatively high. The following risks could be of particular significance for the fund: The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss. The Fund will use financial contracts (known as derivatives) to try to reduce the effect of currency fluctuations between the currency of its assets and the currency of the shares. This may not be effective and may prevent the Fund from benefitting from an increase in value of (or expose a Fund to the decrease in value of) a particular currency. Bonds are exposed to credit risk and interest rate risk. There is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. If interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment. The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. **EXCEPTIONAL CIRCUMSTANCES RISK:** Exceptional circumstances may arise, such as, but not limited to, disruptive

market conditions, additional costs/taxes or extremely volatile markets, which may cause the fund's performance to be substantially different from the performance of the index. **CONFLICTS OF INTEREST RISK:** DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. **NO GUARANTEE RISK:** The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. **DERIVATIVES RISK:** The fund may use derivatives to i) try to manage its investments more efficiently and ii) try to reduce movements in currency exchange rates between the currency of the fund's assets and the currency of the fund's shares. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investment. **BONDS RISK:** The index provides a notional exposure to the value and/or return of certain bonds which may fall. Markets in these asset classes may at times become volatile or illiquid. This means that ordinary trading activity may occasionally be disrupted or impossible. The index may be affected. **CURRENCY RISK:** Fluctuations in interest rates of the currency of the shares, the index or the other assets of the fund may affect the value of your investment. **CREDIT RISK & INTEREST RATE RISK:** The fund may invest in bonds which are exposed to credit risk and interest rate risk. Credit risk means that there is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. Interest rate risk means that if interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

## Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
<b>Entry charge</b>	None
<b>Exit charge</b>	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
<b>Ongoing charges</b>	0.25 %
Charges taken from the fund under certain specific conditions	
<b>Performance fee</b>	None
<b>Securities lending fees</b>	0.01 %

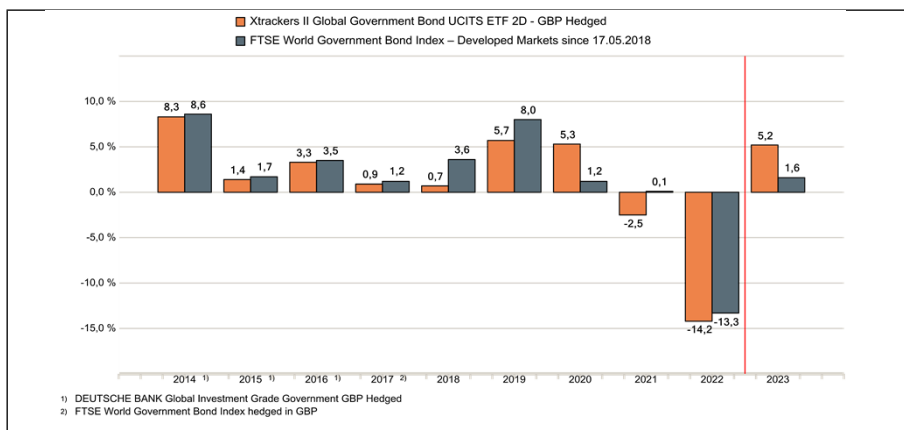

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges figure is based on expenses for the fiscal year ending 31.12.2023. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

To the extent the fund undertakes securities lending to generate revenue, the fund will ultimately be allocated 70% of the associated gross revenue. The remaining 30% will be allocated to the management company, out of which it (i) retains 5% of such 30% (that is 1.5% of the overall gross revenues generated from such transactions) for its own coordination and oversight tasks, (ii) pays the direct costs to external service providers, and (iii) pays such revenues as remain following payment of (i) and (ii) to the investment manager for supporting the management company in initiating, preparing and implementing securities lending transactions, as set out in the sales prospectus. As securities lending revenue sharing does not increase the costs of running the fund, this has been excluded from the composition of costs.

## Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the 2D - GBP Hedged share class of Xtrackers II Global Government Bond UCITS ETF were deducted during the calculation. The 2D - GBP Hedged share class of Xtrackers II Global Government Bond UCITS ETF was launched in 2011.

As of 17 May 2018 the share class changed its benchmark index to FTSE World Government Bond Index – Developed Markets. The investment objectives of the share class are unchanged and it continues to hedge currency risk. Prior to that date, index performance displayed reflects previous underlying indices. The index performance shown for 2018 is based solely on the performance of the FTSE World Government Bond Index – Developed Markets. The 2017 reference period shows a combined performance of the FTSE World Government Bond Index - Developed Markets, Currency Hedged in GBP (from 10 April 2017 until 31 December 2017) and the DEUTSCHE BANK Global Investment Grade Government GBP Hedged Index (from 1 January 2017 until 9 April 2017). The index performance for the 2012-2016 reference period shows the performance of the DEUTSCHE BANK Global Investment Grade Government GBP Hedged Index.
