

Key Investor Information for Investors in the United Kingdom

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Xtrackers Bloomberg Commodity Swap UCITS ETF

Share class: 2C - EUR Hedged, ISIN: LU0429790743, Security code: DBX0CZ, Currency: EUR

a sub-fund of Xtrackers. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. **INVESTMENT OBJECTIVE:** The aim is for your investment to reflect the performance of Bloomberg Commodity Index Total Return 3 Month Forward (index), while seeking to minimise foreign currency fluctuations at share class level. **DESCRIPTION OF INDEX:** The index is designed to be a highly liquid and diversified benchmark for longer dated commodity investments and represents the returns of a diversified basket of commodity futures. Twenty-five commodities are eligible for inclusion in the index. Each designated commodity future contract, which is eligible for the index, is weighted based on the following relative figures: (i) commodity production percentage (based on the average U.S. dollar-adjusted value of production, which measures the economic significance of the commodity), and (ii) commodity liquidity percentage (based on the average volume of trading). Among the designated commodity future contracts selected for inclusion, weighting limits both at single commodity and commodity group level are applied annually. Single commodities must have a minimum weight of 2% in the index and are capped at 15%. Single commodities together with their derivatives (e.g., West Texas Intermediate (WTI) crude oil and Brent crude oil, together with ULS diesel and unleaded gas), are capped at 25% of the index. Related groups of commodities (e.g., energy, precious metals, livestock or grains) are capped at 33% of the index. The composition of the index is reweighted and rebalanced annually. Between rebalancings, weightings may fluctuate to levels outside the above

limits. **INDEX REBALANCING, CALCULATION AND ADMINISTRATION:** The index is calculated on a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax. **INVESTMENT POLICY:** To achieve the aim, the fund will i) invest in transferable securities and enter into financial contracts (derivatives) with one or more swap counterparties relating to transferable securities and the index, in order to obtain the return on the index, and ii) enter into financial contracts (derivatives) which attempt to reduce the effect of exchange rate fluctuations between the currency of the index components and the currency of your shares. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contracts (derivatives). **FURTHER INFORMATION:** Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 1 per cent. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss. The Fund provides exposure to commodities. Commodity prices react, among other things, to economic factors such as changing supply and demand relationships, weather conditions and other natural events, the agricultural, trade, fiscal, monetary, and other policies of governments and other unforeseeable events all of which may affect your investment. The Fund will use financial contracts (known as derivatives) to try to reduce the effect of currency fluctuations between the currency of its assets and the currency of the shares. This may not be effective and may prevent the Fund from benefitting from an increase in value of (or expose a Fund to the decrease in value of) a particular currency. The Fund will enter into a derivative with a counterparty. If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss. The fund does not invest directly in the components of the index and its returns will be

dependent on the performance of the derivatives used. **COUNTERPARTY RISK:** The fund may enter into one or more derivatives with one or more counterparties. If any of the counterparties fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss. **CONFLICTS OF INTEREST RISK:** DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. **NO GUARANTEE RISK:** The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. **COMMODITIES RISK:** The fund provides exposure to commodities. Commodity prices react, among other things, to economic factors such as changing supply and demand relationships, weather conditions and other natural events, the agricultural, trade, fiscal, monetary, and other policies of governments and other unforeseeable events all of which may affect your investment. **DISRUPTIONS/ADJUSTMENT EVENTS RISK:** The index may also be subject to disruption or adjustment events which may prevent its calculation or lead to adjustments to the rules of the index which may cause your investment to suffer losses. **DERIVATIVES RISK:** The derivative used to gain exposure to the index may be adjusted to reflect certain expenses in relation to taxes and/or buying, selling, borrowing, financing or custody costs. These replication costs may result in the fund and your investment suffering a loss. The fund may use derivatives to (i) try to manage its investments more efficiently and (ii) try to reduce movements in currency exchange rates between the currency of the index components and the currency of the fund's shares. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investment. A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

| One-off charges taken before or after you invest | |
|---|------|
| Entry charge | None |
| Exit charge | None |
| This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge). | |
| Charges taken from the fund over a year | |

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

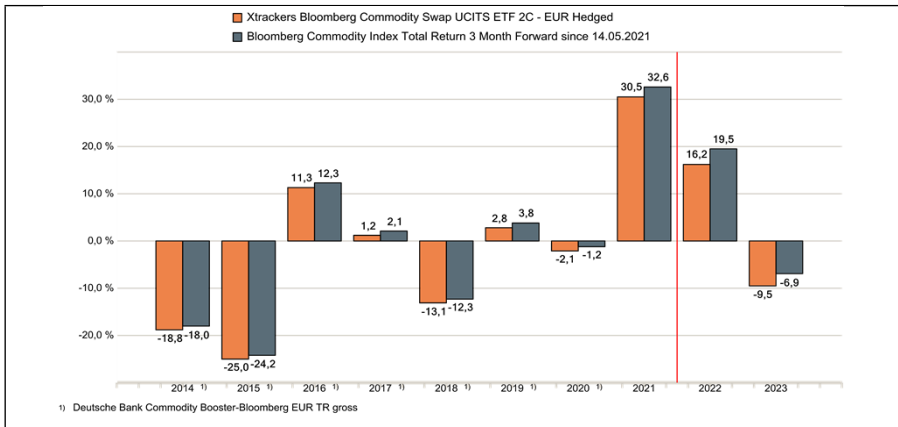

The ongoing charges figure is based on expenses for the

| | |
|---|--------|
| Ongoing charges | 0.24 % |
| Charges taken from the fund under certain specific conditions | |
| Performance fee | None |

fiscal year ending 31.12.2023. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the 2C - EUR Hedged share class of Xtrackers Bloomberg Commodity Swap UCITS ETF were deducted during the calculation. The 2C - EUR Hedged share class of Xtrackers Bloomberg Commodity Swap UCITS ETF was launched in 2009.

As of 14 May 2021 the fund changed its investment objective to reflect the performance of the Bloomberg Commodity Index Total Return 3 Month Forward. The investment objectives of the share class were unchanged and it continued to hedge currency risk. The past performance shown from 2012 up to 2020 (inclusive) is that of the Deutsche Bank Commodity Booster – Bloomberg EUR Index. 2021 shows a combined performance of the Deutsche Bank Commodity Booster – Bloomberg Index (which is the unhedged version of the Deutsche Bank Commodity Booster – Bloomberg EUR Index) and the Bloomberg Commodity Index Total Return 3 Month Forward.
