

Key Investor Information for Investors in the United Kingdom

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Xtrackers MSCI World Swap UCITS ETF

Share class: 4C - EUR Hedged, ISIN: LU0659579733, Security code: DBX0KQ, Currency: EUR

a sub-fund of Xtrackers. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. **INVESTMENT OBJECTIVE:** The aim is for your investment to reflect the performance of the MSCI Total Return Net World Index (index) while seeking to minimise foreign currency fluctuations at share class level. **DESCRIPTION OF INDEX:** The index is designed to reflect the performance of the listed shares of certain companies from various developed countries. The companies making up the index are large and medium sized companies based on the combined value of a company's readily available shares as compared to other companies. A company's weighting in the index depends on its relative size. **INDEX REBALANCING, CALCULATION AND ADMINISTRATION:** The index is calculated on a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax. The index is reviewed and rebalanced at least quarterly. **INVESTMENT POLICY:** To achieve the aim, the fund will i) invest in transferable securities and enter into financial contracts (derivatives) with one or more swap counterparties relating to transferable securities and the net or gross total return version of the index (swap index), in order to obtain the return on the swap index, and ii) enter into financial contracts (derivatives) which attempt to reduce the effect of

exchange rate fluctuations between the currency of the index components and the currency of your shares. The gross total return version of the index calculates the performance of the stocks assuming that all dividends and distributions are reinvested on a gross basis. The swap index shall be selected in the absolute discretion of the Investment Manager. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contracts (derivatives). **FURTHER INFORMATION:** Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 1 per cent. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss. The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events. The Fund will use financial contracts (known as derivatives) to try to reduce the effect of currency fluctuations between the currency of its assets and the currency of the shares. This may not be effective and may prevent the Fund from benefitting from an increase in value of (or expose a Fund to the decrease in value of) a particular currency. The Fund will enter into a derivative with a counterparty. If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss. The fund does not invest directly

in the components of the index and its returns will be dependent on the performance of the shares and/or cash deposits and the performance of the derivatives used. **COUNTERPARTY RISK:** The fund may enter into one or more derivatives with one or more counterparties. If any of the counterparties fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss. **CONFLICTS OF INTEREST RISK:** DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. **NO GUARANTEE RISK:** The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. **SHARES RISK:** The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events. **DERIVATIVES RISK:** The fund may use derivatives to (i) try to manage its investments more efficiently and (ii) try to reduce movements in currency exchange rates between the currency of the index components and the currency of the fund's shares. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investment. The derivative used to gain exposure to the swap index may be adjusted to reflect certain expenses in relation to taxes and/or buying, selling, borrowing, financing or custody costs. These replication costs may result in the fund and your investment suffering a loss.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charges	0.39 %
Charges taken from the fund under certain specific conditions	
Performance fee	None

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges figure is based on expenses for the fiscal year ending 31.12.2023. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the 4C - EUR Hedged share class of Xtrackers MSCI World Swap UCITS ETF were deducted during the calculation. The 4C - EUR Hedged share class of Xtrackers MSCI World Swap UCITS ETF was launched in 2013.

As of 19 May 2021 the share class changed its benchmark index to MSCI Total Return Net World Index. The investment objectives of the share class were unchanged and continued to hedge currency risk. The past performance shown from 2014 up to 2020 (inclusive), is that of the MSCI World monthly Euro Hedged Index. 2021 is based solely on the performance of the MSCI Total Return Net World Index.

Practical information

The depositary is State Street Bank International GmbH, Luxembourg Branch. Copies of the prospectus and the periodic reports are available free of charge in the language of this document. The documents as well as other information (including the latest share prices as well as the indicative net asset values) are available free of charge.
