

Key Investor Information for Investors in the United Kingdom

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Xtrackers India Government Bond UCITS ETF

Share class: 1C, ISIN: IE000QVYFUT7, Security code: DBX0RZ, Currency: USD

a sub-fund of Xtrackers (IE) plc. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. **INVESTMENT OBJECTIVE:** The aim is for your investment to reflect the performance of the J.P. Morgan India Government Fully Accessible Route (FAR) Bonds Index (index). **DESCRIPTION OF INDEX:** The index aims to reflect the performance of fixed rate and zero coupon, Indian Rupee denominated government bonds issued by the Indian central government that have been made eligible for investment to non-residents under the fully accessible route (FAR). In addition, these bonds are subject to minimum maturity and issue size requirements. To be eligible for the index, constituents must meet minimum liquidity criteria including the availability of pricing, availability for trading and reasonable transaction costs linked to replication. **INDEX REBALANCING, CALCULATION AND ADMINISTRATION:** The index is a total return gross index which means that coupon payments are reinvested in the index gross of taxes. The index is reviewed and rebalanced monthly and is administered by J.P. Morgan Securities LLC. **INVESTMENT POLICY:** To achieve the aim, the fund will attempt to replicate the

index, before fees and expenses, by buying a portfolio of securities that may comprise the constituents of the index or other unrelated investments as determined by the Sub-Portfolio Manager. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of derivatives. **FURTHER INFORMATION:** Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 2 per cent. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 4 because its share price fluctuates and the likelihood of both losses and gains may therefore be relatively high. The following risks could be of particular significance for the fund: The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. **EXCEPTIONAL CIRCUMSTANCES RISK:** Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the fund's performance to be substantially different from the performance of the index. **CONFLICTS OF INTEREST RISK:** DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. **NO GUARANTEE RISK:** The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. **EMERGING MARKETS RISK:** The fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks than well developed economies. Political unrest and

economic downturn may be more likely and will affect the value of your investment. **REGION CONCENTRATION RISK:** The fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets. **INDIA COUNTRY RISK:** The fund is exposed to liquidity, operational and settlement risks linked to investments in India. The fund uses the FAR channel of investment, which may lead to operational risk as it is a relatively new mechanism for overseas investors, such as the fund, to access the Indian market. **CURRENCY RISK:** Fluctuations in interest rates of the currency of the shares, the index or the other assets of the fund may affect the value of your investment. **BONDS RISK:** The index provides a notional exposure to the value and/or return of certain bonds which may fall significantly in case of default. Markets in these asset classes may at times become volatile or illiquid. This means that ordinary trading activity may occasionally be disrupted or impossible. The index may be affected. **DERIVATIVES RISK:** The fund may use derivatives to try to manage its investments more efficiently. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investment. **CREDIT RISK & INTEREST RATE RISK:** The fund may invest in bonds which are exposed to credit risk and interest rate risk. Credit risk means that there is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. Interest rate risk means that if interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charges	0.33 %
Charges taken from the fund under certain specific conditions	
Performance fee	None

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges shown here are a cost estimate. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.

Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the 1C share class of Xtrackers India Government Bond UCITS ETF were deducted during the calculation. The 1C share class of Xtrackers India Government Bond UCITS ETF was launched in 2022.
