

Key Investor Information for Investors in the United Kingdom

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Xtrackers II Target Maturity Sept 2033 EUR Corporate Bond UCITS ETF

Share class: 1D, ISIN: LU2673523564, Security code: DBX0VD, Currency: EUR
a sub-fund of Xtrackers II. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. DESCRIPTION OF INDEX: The aim is for your investment to reflect the performance of the Bloomberg MSCI Euro Corporate September 2033 SRI Index (index). The index aims to reflect the performance of the investment grade, euro-denominated, fixed-rate corporate bond market with maturity dates on or between 1 October 2032 and 30 September 2033, and excluding bonds which do not fulfil specific ESG criteria. The bonds must meet certain sector, amount outstanding, and security type criteria. From 1 October 2032, the Reference Index will also include certain Euro-denominated Treasury bills issued by certain European governments with 1 to 3 months remaining to maturity, and which fulfil certain ESG criteria (bills). ESG CRITERIA: Based on MSCI ESG Research, the index excludes: (i) sovereign issuers rated below BB or, (ii) corporate issuers rated below B, (iii) corporate issuers with a "red" Controversies score, (iv) corporate issuers breaching certain thresholds in controversial activities, and (v) Sovereign issuers classified as "Not Free" or "Partly Free" based on Freedom House data. INDEX REBALANCING, CALCULATION AND ADMINISTRATION: The weight of each corporate issuer is limited to 3%. From the 1 October 2032 cash amounts received from maturing bonds will be re-invested into bills rather than corporate bonds at each rebalance.

The index is rebalanced monthly. The index is administered by Bloomberg Index Services Limited. The index is calculated on a total return basis which means that the payments from coupons are reinvested. INVESTMENT POLICY: To achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying a portfolio of securities that may comprise the constituents of the index or other unrelated investments as determined by DWS entities. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of derivatives. FURTHER INFORMATION: Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 1 per cent. The currency of the fund is EUR. The fund distributes up to four times per annum. The term of the fund is limited. It ends on 30.09.2033. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 4 because its share price fluctuates and the likelihood of both losses and gains may therefore be relatively high. The following risks could be of particular significance for the fund: The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss. Bonds are exposed to credit risk and interest rate risk. There is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. If interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment. The fund has a scheduled maturity date, there is no guarantee this will be met. There is no guarantee that any specific redemption amount will be returned to investors at maturity, the redemption amount may be below the initial purchase amount, and investors should be able to sustain losses up to the total investment amount. The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. EXCEPTIONAL CIRCUMSTANCES RISK: Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the fund's performance to be substantially different from the performance of the index. CONFLICTS OF INTEREST RISK: DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts

of interest. NO GUARANTEE RISK: The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. CURRENCY RISK: Fluctuations in interest rates of the currency of the shares, the index or the other assets of the fund may affect the value of your investment. CREDIT & INTEREST RATE RISK: The fund may invest in bonds which are exposed to credit risk and interest rate risk. This may affect the value of your investment. MATURITY DATE RISK: While the fund has a scheduled maturity date, there is no guarantee that this will be met. The Board of Directors may determine to redeem all of the outstanding Shares of the fund or Class of Share in advance of this date. There is no guarantee that any specific redemption amount will be returned to investors at maturity. The redemption amount may be below the initial purchase amount. During the twelve months in advance of the maturity date, the fund may be exposed to securities with a lower yield than during the typical life of the fund or to bonds in the wider market. SUSTAINABILITY RISK: The ESG screening criteria are embedded within the index selection process, which seeks to exclude securities issued by companies involved in certain activities. The investment manager and sub-portfolio manager are not responsible for monitoring the screening process or confirming that all securities which pass the screening process are issued by companies with adequate ESG standards. The company is solely relying on the activities conducted by and information provided by the administrator of the index and MSCI ESG Research LLC for the ESG screening. ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the index administrator may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the index and therefore the portfolio of the fund. DERIVATIVES RISK: The fund may use derivatives to try to manage its investments more efficiently. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investment. A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

Charges taken from the fund over a year	
Ongoing charges	0.12 %
Charges taken from the fund under certain specific conditions	
Performance fee	None

The ongoing charges shown here are a cost estimate. It excludes portfolio transaction costs and performance fees, if any. Additional information on costs can be found in the cost section(s) of the prospectus.
