Reference Index key features

The FTSE Emerging Markets USD Government and Government-Related Bond Select Index aims to reflect the performance of the following market:

- USD denominated bonds issued by the sovereigns and quasi-sovereigns from Emerging Market countries
- A country is considered as emerging if 1) it is classified by the International Monetary Fund World Economic Outlook as one of the "emerging and developing economies" OR if it is classified by the World Bank as one of the "low-income economies" or "lower-middle-income economies" or "upper-middle-income economies" AND 2) it has a GNI per capita below twice the World Bank "high-income economies" threshold
- Exposure across the whole yield curve (minimum time to maturity of 2 years, 3 years at inclusion)
- Minimum rating of C (exclusion of defaulted bonds)
- Minimum amount outstanding of USD 1 billion
- Cap on the maximum par amount considered per country of USD 25 billion

Key Risks

- **The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss.**
- The Fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks than well developed economies. Political unrest and economic downturn may be more likely and will affect the value of your investment.
- Bonds are exposed to credit risk and interest rate risk. There is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. If interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment.
- The Fund invests in non-investment grade bonds which generally have a higher risk of default and are more susceptible to market fluctuations. This could adversely affect the value of your investment.
