Key Risks

The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events. The Fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets. The Fund may have exposure to a small number of investments or have exposure to a few countries, industries, sectors of the economy or issuers. This can make the share price of the Fund fluctuate significantly. The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss.
