Key Risks

The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events. The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss.

The Fund follows a rules-based strategy which will deviate from the overall market or parent index. Your investment is likely to be less diversified and there is no guarantee that the index's 'rules-based' strategy will be achieved. The Fund is exposed to the currency markets which may be highly volatile. Large price swings can occur in such markets within very short periods and may result in your investment suffering a loss.
