Key Risks

The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss. The Fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets. Bonds are exposed to credit risk and interest rate risk. There is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. If interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment.

Reference Index key features

The iBoxx EUR Sovereigns ESG Tilted Index aims to reflect the performance of the following market:

- Fixed-rate, Euro currency, investment-grade sovereign bonds only.
- Exposure across the whole yield curve (minimum time to maturity of 1 year).
- Universe of eligible bonds must meet certain ESG criteria.
- Country Weights are tilted so the index provides higher exposures to countries that have a higher ESG score, and lower exposures to countries that have a lower ESG score.
- All issuers with a Sustainalytics Country-Risk Category of "Severe" will be excluded from the index.
- The Index only includes bonds from issuers with a Freedom House Global Freedom Status of 'Free' or 'Partly Free'.

Additional information on the Index and the general methodology behind the IHS Markit can be found on IHS Markit website (www.ihsmarkit.com).
