

Product overview

Xtrackers ETFs with direct replication (DR)

Xtrackers ETFs – one of the largest providers of physical ETFs in Europe

With assets of over EUR 150 billion (as of March 29, 2024), DWS Xtrackers ETFs is one of the largest providers of direct replication ETFs in Europe by assets under management.

Xtrackers Core¹ ETFs: The core investment for your portfolio

Core Xtrackers Core¹ ETFs are direct replication (physical) ETFs tracking major developed market indices, such as the FTSE 100, with low All-in Fees². The Core ETFs are some of the lowest-priced in Europe in their market segment.

¹ Low cost (country / regional / global) main-stream benchmark trackers on major international equity and fixed income indices that can be considered suitable (long term) „core“ holdings in investors' portfolios.

² Investors should be aware that in addition to the All-In Fee, the ETF may incur other costs which may negatively impact the performance of their investment relative to the underlying index. Examples include: Brokerage and other transaction costs, financial transaction taxes or stamp duties as well as potential differences in taxation of either capital gains or dividend assumed in the relevant underlying index, and actual taxation of either capital gains or dividends in the ETF. The precise impact of these costs cannot be estimated reliably in advance as it depends on a variety of non-static factors. Investors are encouraged to consult the audited annual- and un-audited semi-annual reports for details.

³ All ETFs are sub-funds of one of the platforms: Xtrackers, Xtrackers II or Xtrackers (IE) Plc.

⁴ Sub-Fund of Xtrackers (IE) Plc.

ESG Environmental, Social and Governance

Core Low cost (country / regional / global) main-stream benchmark trackers on major international equity and fixed income indices that can be considered suitable (long term) „core“ holdings in investors' portfolios.

ESG Strategic Beta strategies aim to provide higher risk-adjusted returns compared to traditional benchmarks by applying alternative weighting or stock selection methodologies.

Key Risks:

- Xtrackers ETFs are not capital protected, therefore investors should be prepared and able to sustain losses up to the total loss of the capital invested.
- The value of an investment in a Xtrackers ETF may go down as well as up and past performance is not a reliable indicator of future performance.
- Investment in Xtrackers ETFs involve numerous risks including, among others, general market risks relating to the relevant underlying index, exchange rate risks, interest rate risks, inflationary risks, liquidity risks and legal and regulatory risks.
- Xtrackers ETFs following a direct replication investment policy, may engage in securities lending. In these instances the ETFs face the risk of the borrower not returning the securities lent by the ETF due to e.g. a default situation and the risk that collateral received by the ETFs may be liquidated at a value lower than the value of the securities lent out by the ETFs and hence investors may suffer a loss.
- ETFs shares may be denominated in a currency different to that of the traded currency on the stock exchange in which case exchange rate fluctuations may have a negative effect on the returns of the ETF. The value of any investment involving exposure to foreign currencies can be affected by exchange rate movements.
- There may be tracking difference between the ETF and the underlying index due to the impact of annual fund management fees. The returns on the ETF may not be directly comparable to the returns achieved by direct investment in the underlying assets of the ETF or the underlying index.
- Shares purchased on the secondary market cannot usually be sold directly back to the ETF. Investors must buy and sell shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying shares and may receive less than the current net asset value when selling them.
- Investors should be aware that DB affiliates may from time to time own a significant amount or proportion of the overall investor holdings in a Sub-Fund. A reduction in the holdings of DB affiliates may result in (a) a reduction in the Net Asset Value of the relevant Sub-Fund to below the Minimum Net Asset Value which might result the closure the Sub-Fund or (b) an increase in the holding proportion of the other Shareholders in the Sub-Fund beyond those allowed by applicable laws or internal guidelines.
- Full disclosure on the composition of the Fund's portfolio and information on the Index constituents, as well as the indicative Net Asset Value, is available free of charge at www.etf.dws.com
- The price of any Xtrackers ETFs traded on the secondary market will depend, on market supply and demand, movements in the value of the Xtrackers ETFs as well as other factors such as prevailing financial market, corporate, economic and political conditions. However, in certain abnormal market conditions liquidity may be affected.
- An investment in a Xtrackers ETF tracking a daily leveraged or daily short index is intended for financially sophisticated investors only who understand the strategy, characteristics and risks. The Xtrackers ETFs on daily, leveraged or daily short indices are not intended to be a buy and hold investment.
- For further information regarding risk factors, please refer to the risk factors section of the prospectus, or the Key Investor Information Document.

Glossary

A Glossary of Terms is available at Xtrackers.com

Key Risk Factors

Investments in funds involve numerous risks including, among others, general market risks, credit risks, foreign exchange risks, interest rate risks and liquidity risks. As such, the value of an investment in an Xtrackers ETF may go down as well as up and can result in losses, up and including a total loss of the amount initially invested. Movements in exchange rates can impact the value of your investment. If the currency of your country of residence is different from the currency in which the underlying investments of the fund are made, the value of your investment may increase or decrease subject to movements in exchange rates.
