Overview of the Changes

MSCI Limited announced that changes were made to the capping methodologies of the Reference Indices.

From the Effective Dates, in addition to the existing issuer level capping methodology of the Reference Indices and the country deviation weighting scheme with regards to the MSCI Emerging Markets Asia Select ESG Screened Index (at least quarterly), the following country capping treatment for the Reference Indices will be implemented: should the combined weight of constituents from India exceed 18% at month-end, a capping process will be triggered such that the Reference Index will be reweighted with the excess weight distributed among the remaining constituents in proportion to their existing weights in the Reference Index. Additionally, a daily monitoring process will be put in place to reset the weight of India to 18% should the combined weight of Indian constituents exceed 20% at the end of any business day prior to month-end.

For the avoidance of doubt, the Sub-Funds' Investment Objectives, Investment Policies and Fees will remain the same.
